Or join at zoom.com with Webinar ID: **814 5586 1911** and Password: **83001** or by phone: **+1 719 359 4580**

II. OPENING

A. Call to Order and Roll Call

B. Pledge of Allegiance

C. Land Acknowledgement

D. Announcements/Proclamations

1. Martin Luther King Jr. & Equality Day
2. Introduction of David Garcia, Deputy Town Manager

III. PUBLIC COMMENT

This section is reserved for public comment about items not included in this agenda. Public comment is limited to 3 minutes. As a general practice, Council does not discuss, debate, or act on issues raised under public comment. Council may or may not discuss an issue raised under Public Comment later in the meeting during Matters from Mayor and Council at their discretion. If you would like to communicate with Council during the meeting about an item on the agenda, please wait until public comment has been called for that item. Public comment may also be submitted to Council at any time by emailing *electedofficials@jacksonwy.gov*.

IV. CONSENT CALENDAR

All matters listed in this section are considered to be of routine nature by the governing body and will be enacted in one motion, unless it is removed from the consent calendar and considered separately by Council. Public comment may be given on any item.

A. Meeting Minutes

1. January 5, 2026 Regular Town Council Meeting

B. Disbursements

C. Contracts

1. Access and Utility Easement with Snow King Mountain Resort, LLC

X. ADJOURN

Please note that at any point during the meeting, the Mayor may change the order of items listed on this agenda. In order to ensure that you are present at the time your item of interest is discussed, please join the meeting at the beginning to hear any changes to the schedule or agenda.

TOWN OF JACKSON

Pledge of Allegiance

I pledge allegiance to the flag of the United States of America,
and to the Republic for which it stands, one Nation under God,
indivisible, with liberty and justice for all.

TOWN OF JACKSON

Land Acknowledgement

We recognize that the land we are gathering on is the ancestral homeland of the Mountain Shoshone People who stewarded it for thousands of years and that many other tribes also lived upon and cared for this area including the Bannock, Blackfoot, Crow, Eastern Shoshone, Gros Ventre, Nez Perce, Northern Arapaho tribes, and others. With gratitude, we honor Indigenous Peoples, past and present. We also acknowledge the sovereignty of the Native nations closest to Jackson whose land was taken through broken treaties that resulted in the creation of the Wind River and Fort Hall Indian Reservations. We recognize this acknowledgement is simply a first step. The Town of Jackson is committed to continued and informed action to connect with indigenous people.

PROCLAMATION FOR MARTIN LUTHER KING JR. & EQUALITY DAY

WHEREAS, in January, America celebrates a national holiday in honor of the birthday of the Reverend Doctor Martin Luther King, Jr.; and

WHEREAS, Martin Luther King gave eloquent voice and powerful leadership to the long-cherished hopes of millions as he headed a crusade to end bigotry, segregation, and discrimination in our land, to foster equal opportunity, and to make universal America's promise of liberty and justice for all; and

WHEREAS, Congress passed legislation recognizing Dr. King's birthday as a holiday which was then signed by President Ronald Reagan in 1983; and

WHEREAS, Wyoming joins the nation in celebrating Martin Luther King Jr.'s birthday and the ideals for which he stood by celebrating Equality Day as advocated for by Senator Elizabeth "Liz" Byrd during her time in our state's legislature; and

WHEREAS, King stated, "I have a dream deeply rooted in the American dream. I have a dream that one day this nation will rise up and live out the true meaning of its creed: "We hold these truths to be self-evident: that all men are created equal"; and

WHEREAS, Martin Luther King's principles are American principles, and Dr. King's work is not done. He urged again and again that Americans come to love and befriend one another, to live in brotherhood and reconciliation, to nourish each and every individual's dignity and self-respect; and

WHEREAS, We must reaffirm in every generation the lessons of justice and charity that Dr. King taught with his unflinching determination, his complete confidence in the redeeming power of love, and his utter willingness to suffer, to sacrifice, and to serve.

NOW, THEREFORE, BE IT RESOLVED, that I, Arne Jorgensen, Mayor of the Town of Jackson, on behalf of Jackson's Town Council, proclaim January 19, 2026, Martin Luther King Jr. and Equality Day.

DATED THIS 20th DAY of JANUARY 2026.

There was no public comment on the consent calendar. Mayor Jorgensen called for the vote. The vote showed all in favor. The motion carried.

Legislative Approach. Susan Scarlata and Kelly Thompson made staff comment. Andy Schwartz, the Town's legislative liaison, made comments. Council held discussion with staff. There was no public comment. A motion was made by Devon Viehman and seconded by Kevin Regan to amend Town Council's travel, training, and meeting budget by $15,000. A friendly amendment was made to amend the budget by $10,000. Mayor Jorgensen called for the vote. The vote showed all in favor. The motion carried.

A motion was made by Devon Viehman and seconded by Kevin Regan to approve registration and related travel expenses for Councilors to attend WAM's Winter Convention from February 11 to 13, 2026 in Cheyenne and the Legislative Session overall. Mayor Jorgensen called for the vote. The vote showed all in favor. The motion carried.

A motion was made by Devon Viehman and seconded by Kevin Regan to have our Town's representative propose the list of ideas below as potential Interim Topics:

- Increasing allowable fees for retail liquor licenses
- Supporting the ability to maintain and add new options for local revenue generation
- Establishing statutory authority to utilize workforce housing exactions
- Legislation to address ticket scalping at Jackson's Rodeo.
- Allowing contractors to supply materials and government to still cover those materials exempt from taxes.

Mayor Jorgensen called for the vote. The vote showed all in favor. The motion carried.

Flock Safety Contract Review Scoping Staff Report. Lea Colasuonno made staff comment. Council held discussion with staff. Craig Logan made public comment. A motion was made by Devon Viehman and seconded by Alyson Spery to direct the Town Manager to address amending the Flock contract at staff's next opportunity. Mayor Jorgensen called for the vote. The vote showed all in favor. The motion carried.

George Washington Memorial Park Historic Preservation Nomination Scoping Staff Report (PM25-012). Paul Anthony made staff comment. Council held discussion with staff. Michael Stern made public comment. A motion was made by Alyson Spery and seconded by Kevin Regan to direct staff to notify the TCHPB of Council's support to the TCHPB's nomination of Geroge Washington Memorial Park (GWMP) to the Jackson Historic Register. Mayor Jorgensen called for the vote. The vote showed all in favor. The motion carried.

Subdivision Plat for Teton Landing Townhomes Addition to the Town of Jackson (P25-204). Tyler Valentine made staff comment. Jed Graham commented on behalf of the applicant. Council held discussion with staff. There was no public comment. A motion was made by Devon Viehman and seconded by Kevin Regan to approve Subdivision Plat P25-204 for the Teton Landing Townhomes Addition to the Town of Jackson for Lots 8, 10, & 12, based upon the findings and conditions presented in the staff report and listed below, the departmental reviews, and subject to the staff report dated January 5, 2026.

- Prior to recording the Subdivision Plat, the applicant shall pay the Park and School Exaction fees in the total amount of $14,325.00.

Mayor Jorgensen called for the vote. The vote showed all in favor. The motion carried.

Matters from Mayor and Council. Board and Commission Reports. There was no discussion.

Town Manager's Report. Tyler Sinclair made staff comment. The Town Manager's report contained updates on temporary sign permits for Climb Wyoming, and two grant applications for Wyoming Office of State Lands and Investments Unmet Housing Needs grant funding for S4 Flats and 90 Virginian Lane. A motion was made by Devon Viehman and seconded by Kevin Regan to approve the Town Manager's Report. Mayor Jorgensen called for the vote. The vote showed all in favor. The motion carried.

Adjourn. A motion was made by Alyson Spery and seconded by Kevin Regan to adjourn. Mayor Jorgensen called for the vote. The vote showed all in favor. The motion carried. The meeting adjourned at 7:14 p.m.

STAFF REPORT

Meeting Date:	January 20, 2026	**Meeting Title:**	Regular
Submitting Department:	Legal	**Presenter:**	Lea Colasuonno
Agenda Item:	Standard Contract Consideration for Approval	**Public Comment:**	Yes

Purpose & Policy Considerations.
The purpose of this item is for the Council to review and consider contracts to which the Town of Jackson would be a party.

Requested Action.
Staff request that the Council review and consider the contracts included with the staff report.

Recommendations.
Staff recommend that the Council approve the contracts included with this staff report.

Background, **Analysis, and Key Policy Questions**.

1. Access and Utility Easement with Snow King Mountain Resort, LLC
   - *Purpose*: The purpose of this easement is for Snow King Mountain Resort, LLC, to grant an easement to the Town of Jackson for the construction and maintenance of an overflow pipe from the Town's water tank located on Snow King Mountain. The overflow pipe will provide protection if the water from the Town's water tank overflows. The overflow pipe will allow any water that overflows to move downhill into the Town's stormwater system.
   - *Term:* Perpetuity.
   - *Cost and Payment Terms:* In lieu of payment for this easement, the Town has agreed to connect Snow King Mountain Resort's water tank to the new overflow line. Both the Town's water tank and Snow King Mountain's water tank are in the same proximity. The additional cost to connect Snow King Mountain's water tank is minor, and the area is further protected by connecting both water tanks.
   - *Department & Budget Detail*: This item is for the Public Works Department and the Snow King Water Tank line item is included in the FY26 Capital Budget. There is no other cost associated with the easement.

The key policy question with respect to each contract listed above is whether the Town Council approves of the agreement as presented by staff.

Possible Alternatives.
For each contract included with the staff report the Council has the option to:
A. Direct staff to negotiate different terms or conditions with the contracting party.
B. Not to enter the contract.

Comprehensive Plan & Priority Alignment.
Section 8.1 and 8.2: Timely, efficiently, and safely deliver quality services and facilities in a fiscally responsible and coordinated manner.

Fiscal Impact.
The fiscal impact for each contract is set forth above.

Staff Impact.
The primary impact on staff for contracts falls in the Legal Department, and averages 3 hours for each contract. Secondary impacts on staff for contracts are felt in each department to which the contract is relevant, and averages two hours for each contract.

Attachments or Links.
The contracts in the order listed above are attached to the staff report as follows:

1. Access and Utility Easement with Snow King Mountain Resort, LLC

Suggested Motion.

1. I move to approve the Access and Utility Easement with Snow King Mountain Resort, LLC, subject to minor changes by staff.

ACCESS AND UTILITY EASEMENT AGREEMENT

This ACCESS AND UTILITY EASEMENT AGREEMENT ("**Agreement**") is made and entered into by and between Snow King Mountain Resort, LLC, a Wyoming limited liability, whose address is 575 S. Willow Street/P.O. Box 1846, Jackson, WY 83001 ("**Grantor**") and the Town of Jackson, Wyoming, a municipal corporation of the State of Wyoming, whose address is 150 East Pearl Street/P.O. Box 1687, Jackson, Wyoming 83001 ("**Grantee**"), and shall be effective as of the date of final signature below ("**Effective Date**").

RECITALS

WHEREAS, Grantor owns certain real property in Teton County, Wyoming legally described as Lot 61 of Grand View Lodges Third Addition to the Town of Jackson, Teton County, Wyoming, according to that plat recorded in the Office of the Teton County Clerk on November 14, 2013 as Plat No. 1333 and subject to that Boundary Adjustment P25-117, recorded as Doc No. 1115008 in the Office of the Teton County Clerk on November 17, 2025; PIDN 22-41-16-34-3-07-003 ("**Burdened Property**"); and

WHEREAS, Grantor, as successor to Grand View Development, LLC, granted Water Storage Tank, Access and Maintenance Easements to Grantee in, under, over, and across the Burdened Property pursuant to Doc No. 0788119, recorded in the Office of the Teton County Clerk on January 19, 2011.

WHEREAS, the Grantor seeks to grant a further easement to Grantee to install, operate, access, and maintain an underground drainage pipe and appurtenances thereto from the Grantee's existing water storage tank pursuant to the terms and conditions contained herein.

NOW, THEREFORE, in consideration of the above recitals, which are incorporated herein by reference, and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Grantor and Grantee agree as follows:

1. **Grant of Non-Exclusive, In Gross Easement**. Grantor, as owner of the Burdened Property, grants and conveys to Grantee and Grantee's employees, agents, contractors and licensees, a permanent, non-exclusive utility and access easement in gross for the purposes of installing, operating, accessing, and maintaining an underground drainage pipe and appurtenances thereto ("**Utility**"), together with all necessary and reasonable rights of ingress and egress for the location and repair of the utility, and to cut, trim, spray herbicides, or remove trees, shrubbery, undergrowth or other obstructions interfering with the repair and maintenance of the Utility, over that portion of the Burdened Property legally described in **Exhibit A** and graphically depicted in **Exhibit B**, which exhibits are incorporated herein by reference ("**Utility Easement**").

2. **Restrictions**. Grantee shall use the rights granted herein with due regard to the rights of others and shall not use the Utility Easement in any way that would impair the rights or Grantor or others to the use of the same.

3. **Ownership**. Grantee agrees that the Utility installed under the described lands shall remain the property of and be removable by the Grantee in its sole discretion.

4. **Binding Effect**. The Utility Easement shall burden the Burdened Property and benefit the Grantee.

5. **No Assumption of Liability**. Grantor, by granting, declaring, and establishing the Utility Easement, does not assume any responsibilities or liabilities with respect thereto, nor shall Grantor at any time incur any liability for failure to comply with any law, ordinance, regulation, or order with respect to this Agreement, the Utility Easement, or the Utility.

6. **Easement in Gross**. The Utility Easement granted herein is an easement in gross and is personal to Grantee and Grantee's employees, agents, contractors, and licensees, for their sole and exclusive use, and shall not be construed in any manner to create or grant any rights to the public generally.

7. **Indemnification**. Grantee agrees to indemnify, defend and hold harmless Grantor, its members, managers, officers, employees, agents successors and assigns ("Indemnified Parties") from and against any and all liabilities, loss, claims, demands, liens, damages, penalties, fines, costs and expenses, including reasonable attorneys' fees and all damage to property (collectively, "Losses"), arising out of or attributable to use of the Utility Easement by Grantee and its employees, agents, contractors and licensees, unless such Losses are caused by the willful misconduct or gross negligence of Grantor or its employees or agents.

8. **Enforcement and Remedies**. Grantor and Grantee shall be entitled to enforce this Agreement by specific performance, injunction, or by bringing an action for damages. The prevailing party in an action brought under this Agreement shall be entitled to recover from the other party or parties, as the case may be, reasonable attorneys' fees and costs, in addition to all other relief provided by law or in equity.

9. **Notices**. Any notice, request, demand, consent, approval, or other communication required or permitted under this Contract shall be in writing and shall be deemed duly given (i) when delivered personally to the recipient, (ii) when sent by certified mail, return receipt requested, to the address specified below, or (iii) when sent by email to the email address specified herein, provided that the sender has not received a delivery failure notification. A notice sent by email shall be deemed received on the date and time the email is sent, provided that (a) the email is sent to the recipient's designated email address as set forth herein (b) the sender does not receive a bounce-back or delivery failure notification, and (c) if the notice is sent outside of normal business hours (9:00 AM to 6:00 PM on business days), the notice shall be deemed received at 9:00 AM on the following business day. Notices shall be sent to the parties at the addresses above. Either party may change its address or email address for notice purposes by providing written notice to the other party in accordance with the terms of this provision.

10. **Amendments**. Any modifications, amendments, or changes to any of the provisions of this Agreement shall be effective only if in writing and executed by all parties to this Agreement.

11. **Governing Law**. This Agreement shall be construed, performed, and enforced in accordance with, and governed by, the laws of the State of Wyoming. Venue for any lawsuit brough under this Agreement shall lie exclusively in the 9th Judicial Circuit, Teton County, Wyoming. The descriptive headings of the sections contained in this Agreement are inserted for convenience only and shall not control or affect the meaning or construction of any of the provisions herein. It is expressly agreed by the parties that the judicial rule of construction that a document should be more strictly construed against the draftsperson thereof shall not apply to any provision of this Agreement.

12. **Recordation**. This Agreement shall be recorded in the land records of the Office of the Teton County, Wyoming Clerk at the sole cost of Grantee.

13. **Severability.** If any provision of this Agreement is deemed invalid or unenforceable by a court of competent jurisdiction, such invalidity or unenforceability shall not affect the validity or enforceability of any other provisions of this Agreement.

14. **Counterparts.** This Agreement may be executed in any number of counterparts and each such counterpart shall be deemed to be an original instrument, but all such counterparts together shall constitute but one document.

15. **Governmental Immunity**. Grantee does not waive its sovereign or governmental immunity by entering this Agreement, and fully retains all immunities and defenses provided by law with respect to any action based on or arising out of this Agreement.

IN WITNESS WHEREOF, this Agreement was executed on the date of signatures set forth below.

GRANTOR

Snow King Mountain Resort, LLC, a Wyoming limited liability company

OF
STORMWATER UTILITY EASEMENT
BENEFITTING TOWN OF JACKSON

A thirty-foot (30.00') wide strip of land, fifteen feet (15.00') on each side of the following centerline, lying within a portion of land within NE1/4S W1/4 Section 34, T.41N., R.116W., 6th P.M., Teton County, Wyoming, said centerline being more particularly described as follows:

COMMENCING at the southeastern corner to "Lot 59, Grand View Lodges, Third Addition" as shown on plat 1333 on record in the Office of the Clerk of Teton County, Wyoming, identical to the C-S 1/16th corner of said Section 34, monumented with a 3" iron pipe with brass cap inscribed with illegible markings;
THENCE N 13°15'22" W, 117.42 feet to the **POINT OF BEGINNING**;
THENCE N 17°40'21" W, 216.92 feet;
THENCE N 16°39'20" E, 248.23 feet;
THENCE N 52°09'41" E, 39.33 feet;
THENCE N 02°24'05" E, 659.84 feet to the **POINT OF TERMINUS, said POINT OF TERMINUS bearing S 57°29'18" W, 18.29 feet from the Center ¼ of said Section 34**.

This strip encompasses 0.80 acres, more or less.

The basis of bearings for this description is N 89°40'35" W on the south line of Lot 59, Grand View Lodges, Third Addition.

ARTICLE 1—DEFINED TERMS

1.01 Terms used in these Instructions to Bidders have the meanings indicated in the General Conditions and Supplementary Conditions. Additional terms used in these Instructions to Bidders have the meanings indicated below:

Issuing Office—The office from which the Bidding Documents are to be issued, and which registers plan holders.

Town of Jackson
QuestCDN
Town Engineering Department
townclerk@jacksonwy.gov
307-733-3079

ARTICLE 2—BIDDING DOCUMENTS

2.01 Bidder shall obtain a complete set of Bidding Requirements and proposed Contract Documents (together, the Bidding Documents). See the Agreement for a list of the Contract Documents. It is Bidder's responsibility to determine that it is using a complete set of documents in the preparation of a Bid. Bidder assumes sole responsibility for errors or misinterpretations resulting from the use of incomplete documents, by Bidder itself or by its prospective Subcontractors and Suppliers.

2.02 Bidding Documents are made available for the sole purpose of obtaining Bids for completion of the Project and permission to download or distribution of the Bidding Documents does not confer a license or grant permission or authorization for any other use. Authorization to download documents, or other distribution, includes the right for plan holders to print documents solely for their use, and the use of their prospective Subcontractors and Suppliers, provided the plan holder pays all costs associated with printing or reproduction. Printed documents may not be re-sold under any circumstances.

2.03 Owner has established a Bidding Documents Website as indicated in the Advertisement. Owner requires that Bidder register as a plan holder with the Issuing Office, and obtain a complete set of the Bidding Documents from such website. Bidders may rely that sets of Bidding Documents obtained from the Bidding Documents Website are complete, unless an omission is blatant. Registered plan holders will receive notice of Addenda issued by Owner.

2.04 Plan rooms (including construction information subscription services, and electronic and virtual plan rooms) may distribute the Bidding Documents, or make them available for examination. Those prospective bidders that obtain an electronic (digital) copy of the Bidding Documents from a plan room are required to register as plan holders from the Issuing Office. Owner is not responsible for omissions in Bidding Documents or other documents obtained from plan rooms, or for a Bidder's failure to obtain Addenda from a plan room.

2.05 *Electronic Documents*

A. When the Bidding Requirements indicate that electronic (digital) copies of the Bidding Documents are available, such documents will be made available to the Bidders as Electronic Documents in the manner specified.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

1. Bidding Documents will be provided in Adobe PDF (Portable Document Format) (.pdf) that is readable by Adobe Acrobat Reader Version DC. It is the intent of the Engineer and Owner that such Electronic Documents are to be exactly representative of the paper copies of the documents. However, because the Owner and Engineer cannot totally control the transmission and receipt of Electronic Documents nor the Contractor's means of reproduction of such documents, the Owner and Engineer cannot and do not guarantee that Electronic Documents and reproductions prepared from those versions are identical in every manner to the paper copies.

B. Unless otherwise stated in the Bidding Documents, the Bidder may use and rely upon complete sets of Electronic Documents of the Bidding Documents, described in Paragraph 2.06.A above. However, Bidder assumes all risks associated with differences arising from transmission/receipt of Electronic Documents versions of Bidding Documents and reproductions prepared from those versions and, further, assumes all risks, costs, and responsibility associated with use of the Electronic Documents versions to derive information that is not explicitly contained in printed paper versions of the documents, and for Bidder's reliance upon such derived information.

ARTICLE 3—QUALIFICATIONS OF BIDDERS

3.01 Bidder is to submit the following information with its Bid to demonstrate Bidder's qualifications to perform the Work:

A. Written evidence establishing its qualifications such as financial data, previous experience, and present commitments.

B. A written statement that Bidder is authorized to do business in the state where the Project is located, or a written certification that Bidder will obtain such authority prior to the Effective Date of the Contract.

C. Bidder's state or other contractor license number, if applicable.

D. Subcontractor and Supplier qualification information.

E. Other required information regarding qualifications.

3.02 A Bidder's failure to submit required qualification information within the times indicated may disqualify Bidder from receiving an award of the Contract.

3.03 No requirement in this Article 3 to submit information will prejudice the right of Owner to seek additional pertinent information regarding Bidder's qualifications.

ARTICLE 4—PRE-BID CONFERENCE

4.01 A mandatory pre-bid conference will be held at the time and location indicated in the Advertisement or invitation to bid. Representatives of Owner and Engineer will be present to discuss the Project. Proposals will not be accepted from Bidders who do not attend the conference. It is each Bidder's responsibility to sign in at the pre-bid conference to verify its participation. Bidders must sign in using the name of the organization that will be submitting a

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Bid. A list of qualified Bidders that attended the pre-bid conference and are eligible to submit a Bid for this Project will be issued in an Addendum.

4.02 Information presented at the pre-Bid conference does not alter the Contract Documents. Owner will issue Addenda to make any changes to the Contract Documents that result from discussions at the pre-Bid conference. Information presented, and statements made at the pre-bid conference will not be binding or legally effective unless incorporated in an Addendum.

ARTICLE 5—SITE AND OTHER AREAS; EXISTING SITE CONDITIONS; EXAMINATION OF SITE; OWNER'S SAFETY PROGRAM; OTHER WORK AT THE SITE

5.01 *Site and Other Areas*

A. The Site is identified in the Bidding Documents. By definition, the Site includes rights-of-way, easements, and other lands furnished by Owner for the use of the Contractor. Any additional lands required for temporary construction facilities, construction equipment, or storage of materials and equipment, and any access needed for such additional lands, are to be obtained and paid for by Contractor.

5.02 *Existing Site Conditions*

A. *Subsurface and Physical Conditions; Hazardous Environmental Conditions*

1. The Supplementary Conditions identify the following regarding existing conditions at or adjacent to the Site:

a. Those reports of explorations and tests of subsurface conditions at or adjacent to the Site that contain Technical Data.

b. Those drawings known to Owner of existing physical conditions at or adjacent to the Site, including those drawings depicting existing surface or subsurface structures at or adjacent to the Site (except Underground Facilities), that contain Technical Data.

c. Reports and drawings known to Owner relating to Hazardous Environmental Conditions that have been identified at or adjacent to the Site.

d. Technical Data contained in such reports and drawings.

2. Owner will make copies of reports and drawings referenced above available to any Bidder on request. These reports and drawings are not part of the Contract Documents, but the Technical Data contained therein upon whose accuracy Bidder is entitled to rely, as provided in the General Conditions, has been identified and established in the Supplementary Conditions. Bidder is responsible for any interpretation or conclusion Bidder draws from any Technical Data or any other data, interpretations, opinions, or information contained in such reports or shown or indicated in such drawings.

3. If the Supplementary Conditions do not identify Technical Data, the default definition of Technical Data set forth in Article 1 of the General Conditions will apply.

B. *Underground Facilities:* Underground Facilities are shown or indicated on the Drawings, pursuant to Paragraph 5.05 of the General Conditions, and not in the drawings referred to in Paragraph 5.02.A of these Instructions to Bidders. Information and data regarding the

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

presence or location of Underground Facilities are not intended to be categorized, identified, or defined as Technical Data.

5.03 *Site Visit and Testing by Bidders*

A. Bidder is required to visit the Site and conduct a thorough visual examination of the Site and adjacent areas. During the visit the Bidder must not disturb any ongoing operations at the Site.

B. Bidder is not required to conduct any subsurface testing, or exhaustive investigations of Site conditions.

C. On request, and to the extent Owner has control over the Site, and schedule permitting, the Owner will provide Bidder general access to the Site to conduct such additional examinations, investigations, explorations, tests, and studies as Bidder deems necessary for preparing and submitting a successful Bid. Owner will not have any obligation to grant such access if doing so is not practical because of existing operations, security or safety concerns, or restraints on Owner's authority regarding the Site. Bidder is responsible for establishing access needed to reach specific selected test sites.

D. Bidder must comply with all applicable Laws and Regulations regarding excavation and location of utilities, obtain all permits, and comply with all terms and conditions established by Owner or by property owners or other entities controlling the Site with respect to schedule, access, existing operations, security, liability insurance, and applicable safety programs.

5.04 *Owner's Safety Program*

A. Site visits and work at the Site may be governed by an Owner safety program. If an Owner safety program exists, it will be noted in the Supplementary Conditions.

5.05 *Other Work at the Site*

A. Reference is made to Article 8 of the Supplementary Conditions for the identification of the general nature of other work of which Owner is aware (if any) that is to be performed at the Site by Owner or others (such as utilities and other prime contractors) and relates to the Work contemplated by these Bidding Documents. If Owner is party to a written contract for such other work, then on request, Owner will provide to each Bidder access to examine such contracts (other than portions thereof related to price and other confidential matters), if any.

ARTICLE 6—BIDDER'S REPRESENTATIONS AND CERTIFICATIONS

6.01 *Express Representations and Certifications in Bid Form, Agreement*

A. The Bid Form that each Bidder will submit contains express representations regarding the Bidder's examination of Project documentation, Site visit, and preparation of the Bid, and certifications regarding lack of collusion or fraud in connection with the Bid. Bidder should review these representations and certifications, and assure that Bidder can make the representations and certifications in good faith, before executing and submitting its Bid.

B. If Bidder is awarded the Contract, Bidder (as Contractor) will make similar express representations and certifications when it executes the Agreement.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 7—INTERPRETATIONS AND ADDENDA

7.01 Owner on its own initiative may issue Addenda to clarify, correct, supplement, or change the Bidding Documents.

7.02 Bidder shall submit all questions about the meaning or intent of the Bidding Documents to Engineer in writing.

7.03 Interpretations or clarifications considered necessary by Engineer in response to such questions will be issued by Addenda delivered to all registered plan holders. Questions received less than seven days prior to the date for opening of Bids may not be answered.

7.04 Only responses set forth in an Addendum will be binding. Oral and other interpretations or clarifications will be without legal effect. Responses to questions are not part of the Contract Documents unless set forth in an Addendum that expressly modifies or supplements the Contract Documents.

ARTICLE 8—BID SECURITY

8.01 A Bid must be accompanied by Bid security made payable to Owner in an amount of five percent (5%) of Bidder's maximum Bid price (determined by adding the base bid and all alternates). Bid Security shall be a Cashier's Check, Irrevocable Letter of Credit or a Bid bond issued by a surety meeting the requirements of Paragraph 6.01 of the General Conditions. Such Bid bond will be issued in the form included in the Bidding Documents.

8.02 The Bid security of the apparent Successful Bidder will be retained until Owner awards the contract to such Bidder, and such Bidder has executed the Contract, furnished the required Contract security, and met the other conditions of the Notice of Award, whereupon the Bid security will be released. If the Successful Bidder fails to execute and deliver the Contract and furnish the required Contract security within 15 days after the Notice of Award, Owner may consider Bidder to be in default, annul the Notice of Award, and the Bid security of that Bidder will be forfeited, in whole in the case of a penal sum bid bond, and to the extent of Owner's damages in the case of a damages-form bond. Such forfeiture will be Owner's exclusive remedy if Bidder defaults.

8.03 The Bid security of other Bidders that Owner believes to have a reasonable chance of receiving the award may be retained by Owner until the earlier of 7 days after the Effective Date of the

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Contract or 61 days after the Bid opening, whereupon Bid security furnished by such Bidders will be released.

8.04 Bid security of other Bidders that Owner believes do not have a reasonable chance of receiving the award will be released within 7 days after the Bid opening.

ARTICLE 9—CONTRACT TIMES

9.01 The number of days within which, or the dates by which, the Work is to be (a) substantially completed and (b) ready for final payment, and (c) Milestones (if any) are to be achieved, are set forth in the Agreement.

ARTICLE 10—LIQUIDATED DAMAGES

10.01 Provisions for liquidated damages, if any, for failure to timely attain a Milestone, Substantial Completion, or completion of the Work in readiness for final payment, are set forth in the Agreement.

ARTICLE 11—SUBSTITUTE AND "OR EQUAL" ITEMS

11.01 The Contract for the Work, as awarded, will be on the basis of materials and equipment specified or described in the Bidding Documents without consideration during the bidding and Contract award process of possible substitute or "or-equal" items. In cases in which the Contract allows the Contractor to request that Engineer authorize the use of a substitute or "or-equal" item of material or equipment, application for such acceptance may not be made to and will not be considered by Engineer until after the Effective Date of the Contract.

11.02 All prices that Bidder sets forth in its Bid will be based on the presumption that the Contractor will furnish the materials and equipment specified or described in the Bidding Documents, as supplemented by Addenda. Any assumptions regarding the possibility of post-Bid approvals of "or-equal" or substitution requests are made at Bidder's sole risk.

ARTICLE 12—SUBCONTRACTORS, SUPPLIERS, AND OTHERS

12.01 A Bidder must be prepared to retain specific Subcontractors and Suppliers for the performance of the Work if required to do so by the Bidding Documents or in the Specifications. If a prospective Bidder objects to retaining any such Subcontractor or Supplier and the concern is not relieved by an Addendum, then the prospective Bidder should refrain from submitting a Bid.

12.02 The apparent Successful Bidder, and any other Bidder so requested, must submit to Owner a list of the Subcontractors or Suppliers proposed for the following portions of the Work within five days after Bid opening:

A. None Listed.

12.03 If requested by Owner, such list must be accompanied by an experience statement with pertinent information regarding similar projects and other evidence of qualification for each such Subcontractor or Supplier. If Owner or Engineer, after due investigation, has reasonable objection to any proposed Subcontractor or Supplier, Owner may, before the Notice of Award is given, request apparent Successful Bidder to submit an acceptable substitute, in which case apparent Successful Bidder will submit a substitute, Bidder's Bid price will be increased (or decreased) by

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

the difference in cost occasioned by such substitution, and Owner may consider such price adjustment in evaluating Bids and making the Contract award.

12.04 If apparent Successful Bidder declines to make any such substitution, Owner may award the Contract to the next lowest Bidder that proposes to use acceptable Subcontractors and Suppliers. Declining to make requested substitutions will constitute grounds for forfeiture of the Bid security of any Bidder. Any Subcontractor or Supplier, so listed and against which Owner or Engineer makes no written objection prior to the giving of the Notice of Award will be deemed acceptable to Owner and Engineer subject to subsequent revocation of such acceptance as provided in Paragraph 7.07 of the General Conditions.

ARTICLE 13—PREPARATION OF BID

13.01 The Bid Form is included with the Bidding Documents.

A. All blanks on the Bid Form must be completed in ink and the Bid Form signed in ink. Erasures or alterations must be initialed in ink by the person signing the Bid Form. A Bid price must be indicated for each section, Bid item, alternate, adjustment unit price item, and unit price item listed therein.

B. If the Bid Form expressly indicates that submitting pricing on a specific alternate item is optional, and Bidder elects to not furnish pricing for such optional alternate item, then Bidder may enter the words "No Bid" or "Not Applicable."

13.02 If Bidder has obtained the Bidding Documents as Electronic Documents, then Bidder shall prepare its Bid on a paper copy of the Bid Form printed from the Electronic Documents version of the Bidding Documents. The printed copy of the Bid Form must be clearly legible, printed on 8½ inch by 11-inch paper and as closely identical in appearance to the Electronic Document version of the Bid Form as may be practical. The Owner reserves the right to accept Bid Forms which nominally vary in appearance from the original paper version of the Bid Form, providing that all required information and submittals are included with the Bid.

13.03 A Bid by a corporation must be executed in the corporate name by a corporate officer (whose title must appear under the signature), accompanied by evidence of authority to sign. The corporate address and state of incorporation must be shown.

13.04 A Bid by a partnership must be executed in the partnership name and signed by a partner (whose title must appear under the signature), accompanied by evidence of authority to sign. The official address of the partnership must be shown.

13.05 A Bid by a limited liability company must be executed in the name of the firm by a member or other authorized person and accompanied by evidence of authority to sign. The state of formation of the firm and the official address of the firm must be shown.

13.06 A Bid by an individual must show the Bidder's name and official address.

13.07 A Bid by a joint venture must be executed by an authorized representative of each joint venturer in the manner indicated on the Bid Form. The joint venture must have been formally established prior to submittal of a Bid, and the official address of the joint venture must be shown.

13.08 All names must be printed in ink below the signatures.

13.09 The Bid must contain an acknowledgment of receipt of all Addenda, the numbers of which must be filled in on the Bid Form.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

13.10 Postal and e-mail addresses and telephone number for communications regarding the Bid must be shown.

13.11 The Bid must contain evidence of Bidder's authority to do business in the state where the Project is located, or Bidder must certify in writing that it will obtain such authority within the time for acceptance of Bids and attach such certification to the Bid.

13.12 If Bidder is required to be licensed to submit a Bid or perform the Work in the state where the Project is located, the Bid must contain evidence of Bidder's licensure, or Bidder must certify in writing that it will obtain such licensure within the time for acceptance of Bids and attach such certification to the Bid. Bidder's state contractor license number, if any, must also be shown on the Bid Form.

ARTICLE 14—BASIS OF BID

14.01 *Lump Sum*

A. Bidders must submit a Bid on a lump sum basis as set forth in the Bid Form.

14.02 *Unit Price*

A. Bidders must submit a Bid on a unit price basis for each item of Work listed in the unit price section of the Bid Form.

B. The "Bid Price" (sometimes referred to as the extended price) for each unit price Bid item will be the product of the "Estimated Quantity", which Owner or its representative has set forth in the Bid Form, for the item and the corresponding "Bid Unit Price" offered by the Bidder. The total of all unit price Bid items will be the sum of these "Bid Prices"; such total will be used by Owner for Bid comparison purposes. The final quantities and Contract Price will be determined in accordance with Paragraph 13.03 of the General Conditions.

C. Discrepancies between the multiplication of units of Work and unit prices will be resolved in favor of the unit prices. Discrepancies between the indicated sum of any column of figures and the correct sum thereof will be resolved in favor of the correct sum.

ARTICLE 15—SUBMITTAL OF BID

15.01 The Bidding Documents include one separate unbound copy of the Bid Form, and, if required, the Bid Bond Form. The unbound copy of the Bid Form is to be completed and submitted with the Bid security and the other documents required to be submitted under the terms of Article 2 of the Bid Form.

15.02 A Bid must be received no later than the date and time prescribed and at the place indicated in the Advertisement or invitation to bid and must be enclosed in a plainly marked package with the Project title, and, if applicable, the designated portion of the Project for which the Bid is submitted, the name and address of Bidder, and must be accompanied by the Bid security and other required documents. If a Bid is sent by mail or other delivery system, the sealed envelope containing the Bid must be enclosed in a separate package plainly marked on the outside with the

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

notation "BID ENCLOSED." A mailed Bid must be addressed to the location designated in the Advertisement.

15.03 Bids received after the date and time prescribed for the opening of bids, or not submitted at the correct location or in the designated manner, will not be accepted and will be returned to the Bidder unopened.

ARTICLE 16—MODIFICATION AND WITHDRAWAL OF BID

16.01 An unopened Bid may be withdrawn by an appropriate document duly executed in the same manner that a Bid must be executed and delivered to the place where Bids are to be submitted prior to the date and time for the opening of Bids. Upon receipt of such notice, the unopened Bid will be returned to the Bidder.

16.02 If a Bidder wishes to modify its Bid prior to Bid opening, Bidder must withdraw its initial Bid in the manner specified in Paragraph 15.01 and submit a new Bid prior to the date and time for the opening of Bids.

16.03 If within 24 hours after Bids are opened any Bidder files a duly signed written notice with Owner and promptly thereafter demonstrates to the reasonable satisfaction of Owner that there was a material and substantial mistake in the preparation of its Bid, the Bidder may withdraw its Bid, and the Bid security will be returned. Thereafter, if the Work is rebid, the Bidder will be disqualified from further bidding on the Work.

ARTICLE 17—OPENING OF BIDS

17.01 Bids will be opened at the time and place indicated in the advertisement or invitation to bid and, unless obviously non-responsive, read aloud publicly. An abstract of the amounts of the base Bids and major alternates, if any, will be made available to Bidders after the opening of Bids.

ARTICLE 18—BIDS TO REMAIN SUBJECT TO ACCEPTANCE

18.01 All Bids will remain subject to acceptance for the period of time stated in the Bid Form, but Owner may, in its sole discretion, release any Bid and return the Bid security prior to the end of this period.

ARTICLE 19—EVALUATION OF BIDS AND AWARD OF CONTRACT

19.01 Owner reserves the right to reject any or all Bids, including without limitation, nonconforming, nonresponsive, unbalanced, or conditional Bids. Owner also reserves the right to waive all minor Bid informalities not involving price, time, or changes in the Work.

19.02 Owner will reject the Bid of any Bidder that Owner finds, after reasonable inquiry and evaluation, to not be responsible.

19.03 If Bidder purports to add terms or conditions to its Bid, takes exception to any provision of the Bidding Documents, or attempts to alter the contents of the Contract Documents for purposes of the Bid, whether in the Bid itself or in a separate communication to Owner or Engineer, then Owner will reject the Bid as nonresponsive.

19.04 If Owner awards the contract for the Work, such award shall be to the responsible and certified resident making the lowest responsive bid, if the certified resident's bid is not more than five

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

percent (5%) higher than that of the lowest responsible nonresident bidder and the resident bidder does not propose to subcontract more than thirty percent (30%) of the work to nonresident contractors. A resident for this purpose must be certified as a resident by the Wyoming Department of Workforce Services prior to bidding upon the Contract. See W.S. 16-6-101, et seq. A resident bidder shall submit a copy of its certificate of residency with its bid.

19.05 *Evaluation of Bids*

A. In evaluating Bids, Owner will consider whether the Bids comply with the prescribed requirements, and such alternates, unit prices, and other data, as may be requested in the Bid Form or prior to the Notice of Award.

B. In the comparison of Bids, alternates will be applied in the same order of priority as listed in the Bid Form. To determine the Bid prices for purposes of comparison, Owner will announce to all bidders a "Base Bid plus alternates" budget after receiving all Bids, but prior to opening them. For comparison purposes alternates will be accepted, following the order of priority established in the Bid Form, until doing so would cause the budget to be exceeded. After determination of the Successful Bidder based on this comparative process and on the responsiveness, responsibility, and other factors set forth in these Instructions, the award may be made to said Successful Bidder on its base Bid and any combination of its additive alternate Bids for which Owner determines funds will be available at the time of award.

C. For the determination of the apparent low Bidder when unit price bids are submitted, Bids will be compared on the basis of the total of the products of the estimated quantity of each item and unit price Bid for that item, together with any lump sum items.

19.06 In evaluating whether a Bidder is responsible, Owner will consider the qualifications of the Bidder and may consider the qualifications and experience of Subcontractors and Suppliers proposed for those portions of the Work for which the identity of Subcontractors and Suppliers must be submitted as provided in the Bidding Documents.

19.07 Owner may conduct such investigations as Owner deems necessary to establish the responsibility, qualifications, and financial ability of Bidders and any proposed Subcontractors or Suppliers.

ARTICLE 20—BONDS AND INSURANCE

20.01 Article 6 of the General Conditions, as may be modified by the Supplementary Conditions, sets forth Owner's requirements as to performance and payment bonds, other required bonds (if any), and insurance. When the Successful Bidder delivers the executed Agreement to Owner, it must be accompanied by required bonds and insurance documentation.

20.02 Article 8, Bid Security, of these Instructions, addresses any requirements for providing bid bonds as part of the bidding process.

ARTICLE 21—SIGNING OF AGREEMENT

21.01 When Owner issues a Notice of Award to the Successful Bidder, it will be accompanied by the unexecuted counterparts of the Agreement along with the other Contract Documents as identified in the Agreement. Within 15 days thereafter, Successful Bidder must execute and deliver the required number of counterparts of the Agreement and any bonds and insurance documentation required to be delivered by the Contract Documents to Owner. Within 10 days thereafter, Owner will deliver one fully executed counterpart of the Agreement to Successful

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Bidder, together with printed and electronic copies of the Contract Documents as stated in Paragraph 2.02 of the General Conditions.

ARTICLE 22—SALES AND USE TAXES

22.01 *Contractor shall pay all sales, consumer, use, and other similar taxes required to be paid by Contractor in accordance with the Laws and Regulations of the place of the Project which are applicable during the performance of the Work. Said taxes must be included in the Bid.*

ARTICLE 23—RETAINAGE

23.01 *Provisions concerning Contractor's retainage are set forth in the Agreement.*

ARTICLE 24—WYOMING PREFERENCE

24.01 *Responsible resident bidders will receive a five percent (5%) preference in accordance with Wyoming State Statute 16-6-102.*

"… the contract shall be let to the responsible resident making the lowest bid if the resident's bid is not more than five percent (5%) higher than that of the lowest responsible non-resident bidder…"

24.02 Certification of resident status shall be submitted with the Bid. Bidders seeking residency status must apply for such status pursuant to Wyoming State Statute 16-6-101, as amended, and rules and regulations promulgated by the Wyoming Department of Labor and Statistics. Bidders are solely responsible for contacting the Wyoming Department of Labor and Statistics to determine any revisions and current policies regarding residency status. Bidders who qualify for resident status shall be required to comply with Wyoming State Statute 16-6-103:

"… Resident bidder shall not subcontract more than thirty percent (30%) of the work… to non-resident contractors."

24.03 Preference for State Labor and Materials: Pursuant to Wyoming State Statute 16-6-201 *et seq*. (1977), resident Wyoming laborers, workmen and mechanics shall be used in the performance of the Contract and any contract awarded as a result of the Contract; except that other laborers may be used when Wyoming laborers are not available for employment from within the State or are not qualified to perform the work involved. Pursuant to Wyoming State Statute 16-6-104 (1977), resident Wyoming laborers, workmen and mechanics shall be used upon all work enumerated in Wyoming State Statute 16-6-102 (1977) whenever possible and Wyoming materials and products of equal quality and desirability shall have preference over materials or products produced outside the state. Pursuant to Wyoming State Statute 16-6-106 (1977), preference is hereby given to materials supplied or grown in Wyoming, quality being equal to articles offered by the competitors outside of the state. Pursuant to Wyoming State Statute 16-6-107 (1977), all public structures constructed in the State of Wyoming shall be constructed and maintained by materials produced or manufactured in Wyoming if Wyoming materials are suitable and can be furnished in marketable quantities. Preference shall not be granted for materials of an inferior quality to those offered by competitors outside of the state, but a differential of not to exceed five percent (5%) may be allowed in cost of Wyoming materials of equal quality as against materials from states having or enforcing a preference rule against "out-of-state" products.

BID FORM FOR CONSTRUCTION CONTRACT

The terms used in this Bid with initial capital letters have the meanings stated in the Instructions to Bidders, the General Conditions, and the Supplementary Conditions.

ARTICLE 1—OWNER AND BIDDER

1.01 This Bid is submitted to:

Town of Jackson
P.O. Box 1687
150 East Pearl Avenue
Jackson, Wyoming 83001
townclerk@jacksonwy.gov
Bid No. 26-10

1.02 The undersigned Bidder proposes and agrees, if this Bid is accepted, to enter into an Agreement with Owner in the form included in the Bidding Documents to perform all Work as specified or indicated in the Bidding Documents for the prices and within the times indicated in this Bid and in accordance with the other terms and conditions of the Bidding Documents.

ARTICLE 2—ATTACHMENTS TO THIS BID

2.01 The following documents are submitted with and made a condition of this Bid:

A. Required Bid security;

B. Wyoming certification of residency, if claiming status as an in-state contractor.

C. A company-wide hourly rate sheet for equipment and labor, including operators and supervisory personnel for use under Section 02005, Force Account Work, in the Technical Specifications.

D. Bidder Qualification Statement;

E. List of Proposed Subcontractors;

F. List of Proposed Suppliers;

G. Evidence of authority to do business in the state of the Project; or a written covenant to obtain such authority within the time for acceptance of Bids;

H. Contractor's license number as evidence of Bidder's State Contractor's License or a covenant by Bidder to obtain said license within the time for acceptance of Bids; and

ARTICLE 3—BASIS OF BID—LUMP SUM BID AND UNIT PRICES

3.01 *Unit Price Bids*

A. Bidder will complete the Work in accordance with the Contract Documents for the following indicated unit prices for the base bid:

EJCDC® C-410, Bid Form for Construction Contract.
Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Bidder acknowledges that:

1. each Bid Unit Price includes an amount considered by Bidder to be adequate to cover Contractor's overhead and profit for each separately identified item, and
2. estimated quantities are not guaranteed, and are solely for the purpose of comparison of Bids, and final payment for all Unit Price Work will be based on actual quantities, determined as provided in the Contract Documents.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 4—TIME OF COMPLETION

4.01 Bidder agrees that the Work will be substantially complete and will be completed and ready for final payment in accordance with Paragraph 15.06 of the General Conditions on or before the dates or within the number of calendar days indicated in the Agreement.

4.02 Bidder accepts the provisions of the Agreement as to liquidated damages.

ARTICLE 5—BIDDER'S ACKNOWLEDGEMENTS: ACCEPTANCE PERIOD, INSTRUCTIONS, AND RECEIPT OF ADDENDA

5.01 *Bid Acceptance Period*

A. This Bid will remain subject to acceptance for 60 days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Owner.

5.02 *Instructions to Bidders*

A. Bidder accepts all of the terms and conditions of the Instructions to Bidders, including without limitation those dealing with the disposition of Bid security.

5.03 *Receipt of Addenda*

A. Bidder hereby acknowledges receipt of the following Addenda

Addendum Number	Addendum Date

ARTICLE 6—BIDDER'S REPRESENTATIONS AND CERTIFICATIONS

6.01 *Bidder's Representations*

A. In submitting this Bid, Bidder represents the following:

1. Bidder has examined and carefully studied the Bidding Documents, including Addenda.
2. Bidder has visited the Site, conducted a thorough visual examination of the Site and adjacent areas, and become familiar with the general, local, and Site conditions that may affect cost, progress, and performance of the Work.
3. Bidder is familiar with all Laws and Regulations that may affect cost, progress, and performance of the Work.
4. Bidder has carefully studied the reports of explorations and tests of subsurface conditions at or adjacent to the Site and the drawings of physical conditions relating to existing surface or subsurface structures at the Site that have been identified in the Supplementary Conditions, with respect to the Technical Data in such reports and drawings.
5. Bidder has carefully studied the reports and drawings relating to Hazardous Environmental Conditions, if any, at or adjacent to the Site that have been identified in the Supplementary Conditions, with respect to Technical Data in such reports and drawings.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

6. Bidder has considered the information known to Bidder itself; information commonly known to contractors doing business in the locality of the Site; information and observations obtained from visits to the Site; the Bidding Documents; and the Technical Data identified in the Supplementary Conditions or by definition, with respect to the effect of such information, observations, and Technical Data on (a) the cost, progress, and performance of the Work; (b) the means, methods, techniques, sequences, and procedures of construction to be employed by Bidder, if selected as Contractor; and (c) Bidder's (Contractor's) safety precautions and programs.

7. Based on the information and observations referred to in the preceding paragraph, Bidder agrees that no further examinations, investigations, explorations, tests, studies, or data are necessary for the performance of the Work at the Contract Price, within the Contract Times, and in accordance with the other terms and conditions of the Contract.

8. Bidder is aware of the general nature of work to be performed by Owner and others at the Site that relates to the Work as indicated in the Bidding Documents.

9. Bidder has given Engineer written notice of all conflicts, errors, ambiguities, or discrepancies that Bidder has discovered in the Bidding Documents, and of discrepancies between Site conditions and the Contract Documents, and the written resolution thereof by Engineer is acceptable to Contractor.

10. The Bidding Documents are generally sufficient to indicate and convey understanding of all terms and conditions for performance and furnishing of the Work.

11. The submission of this Bid constitutes an incontrovertible representation by Bidder that without exception the Bid and all prices in the Bid are premised upon performing and furnishing the Work required by the Bidding Documents.

6.02 *Bidder's Certifications*

A. The Bidder certifies the following:

1. This Bid is genuine and not made in the interest of or on behalf of any undisclosed individual or entity and is not submitted in conformity with any collusive agreement or rules of any group, association, organization, or corporation.

2. Bidder has not directly or indirectly induced or solicited any other Bidder to submit a false or sham Bid.

3. Bidder has not solicited or induced any individual or entity to refrain from bidding.

4. Bidder has not engaged in corrupt, fraudulent, collusive, or coercive practices in competing for the Contract. For the purposes of this Paragraph 8.02.A:

a. Corrupt practice means the offering, giving, receiving, or soliciting of anything of value likely to influence the action of a public official in the bidding process.

b. Fraudulent practice means an intentional misrepresentation of facts made (a) to influence the bidding process to the detriment of Owner, (b) to establish bid prices at artificial non-competitive levels, or (c) to deprive Owner of the benefits of free and open competition.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

c. Collusive practice means a scheme or arrangement between two or more Bidders, with or without the knowledge of Owner, a purpose of which is to establish bid prices at artificial, non-competitive levels.

d. Coercive practice means harming or threatening to harm, directly or indirectly, persons or their property to influence their participation in the bidding process or affect the execution of the Contract.

Notes: (1) Note: Addresses are to be used for giving any required notice. (2) Provide execution by any additional parties, such as joint venturers, if necessary.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

1. Bidder and Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors, and assigns to pay to Owner upon default of Bidder the penal sum set forth on the face of this Bond. Payment of the penal sum is the extent of Bidder's and Surety's liability. Recovery of such penal sum under the terms of this Bond will be Owner's sole and exclusive remedy upon default of Bidder.
2. Default of Bidder occurs upon the failure of Bidder to deliver within the time required by the Bidding Documents (or any extension thereof agreed to in writing by Owner) the executed Agreement required by the Bidding Documents and any performance and payment bonds required by the Bidding Documents.
3. This obligation will be null and void if:
    3.1. Owner accepts Bidder's Bid and Bidder delivers within the time required by the Bidding Documents (or any extension thereof agreed to in writing by Owner) the executed Agreement required by the Bidding Documents and any performance and payment bonds required by the Bidding Documents, or
    3.2. All Bids are rejected by Owner, or
    3.3. Owner fails to issue a Notice of Award to Bidder within the time specified in the Bidding Documents (or any extension thereof agreed to in writing by Bidder and, if applicable, consented to by Surety when required by Paragraph 5 hereof).
4. Payment under this Bond will be due and payable upon default of Bidder and within 30 calendar days after receipt by Bidder and Surety of written notice of default from Owner, which notice will be given with reasonable promptness, identifying this Bond and the Project and including a statement of the amount due.
5. Surety waives notice of any and all defenses based on or arising out of any time extension to issue Notice of Award agreed to in writing by Owner and Bidder, provided that the total time for issuing Notice of Award including extensions does not in the aggregate exceed 120 days from the Bid due date without Surety's written consent.
6. No suit or action will be commenced under this Bond prior to 30 calendar days after the notice of default required in Paragraph 4 above is received by Bidder and Surety, and in no case later than one year after the Bid due date.
7. Any suit or action under this Bond will be commenced only in a court of competent jurisdiction located in the state in which the Project is located.
8. Notices required hereunder must be in writing and sent to Bidder and Surety at their respective addresses shown on the face of this Bond. Such notices may be sent by personal delivery, commercial courier, or by United States Postal Service registered or certified mail, return receipt requested, postage pre-paid, and will be deemed to be effective upon receipt by the party concerned.
9. Surety shall cause to be attached to this Bond a current and effective Power of Attorney evidencing the authority of the officer, agent, or representative who executed this Bond on behalf of Surety to execute, seal, and deliver such Bond and bind the Surety thereby.
10. This Bond is intended to conform to all applicable statutory requirements. Any applicable requirement of any applicable statute that has been omitted from this Bond will be deemed to be included herein as if set forth at length. If any provision of this Bond conflicts with any applicable statute, then the provision of said statute governs and the remainder of this Bond that is not in conflict therewith continues in full force and effect.
11. The term "Bid" as used herein includes a Bid, offer, or proposal as applicable.

NOTICE OF AWARD

Date of Issuance:

Owner: Town of Jackson, Wyoming — Owner's Project No.: 26-10

Engineer: Nelson Engineering — Engineer's Project No.: 21-411-04

Project: Town of Jackson Vine Street Improvements Project

Contract Name: Vine Street Improvements Project

Bidder:

Bidder's Address:

You are notified that Owner has accepted your Bid dated December 18. 2025 for the above Contract, and that you are the Successful Bidder and are awarded a Contract for:

Town of Jackson Vine Street Improvements Project

The Contract Price of the awarded Contract is $_____. Contract Price is subject to adjustment based on the provisions of the Contract, including but not limited to those governing changes, Unit Price Work, and Work performed on a cost-plus-fee basis, as applicable.

Three (3) unexecuted counterparts of the Agreement accompany this Notice of Award, and one copy of the Contract Documents accompanies this Notice of Award, or has been transmitted or made available to Bidder electronically.

☐ Drawings will be delivered separately from the other Contract Documents.

You must comply with the following conditions precedent within 30 days of the date of receipt of this Notice of Award:

1. Deliver to Owner **three (3)** counterparts of the Agreement, signed by Bidder (as Contractor).
2. Deliver with the signed Agreement(s) the Contract security (such as required performance and payment bonds) and insurance documentation, as specified in the Instructions to Bidders and in the General Conditions, Articles 2 and 6.
3. Other conditions precedent (if any): N/A

Failure to comply with these conditions within the time specified will entitle Owner to consider you in default, annul this Notice of Award, and declare your Bid security forfeited.

Within 10 days after you comply with the above conditions, Owner will return to you one fully signed counterpart of the Agreement, together with any additional copies of the Contract Documents as indicated in Paragraph 2.02 of the General Conditions.

Owner: **Town of Jackson, Wyoming**

By *(signature)*: _____

Name *(printed)*: _____

Title: _____

Copy: Engineer

AGREEMENT BETWEEN OWNER AND CONTRACTOR FOR CONSTRUCTION CONTRACT (STIPULATED PRICE)

This Agreement is by and between **Town of Jackson, Wyoming** ("Owner") and _____ ("Contractor").

Terms used in this Agreement have the meanings stated in the General Conditions and the Supplementary Conditions.

Owner and Contractor hereby agree as follows:

ARTICLE 1—WORK

1.01 Contractor shall complete all Work as specified or indicated in the Contract Documents. The Work is generally described as follows: Furnish all materials, transportation, equipment, and labor for the Vine Street Improvements Project, which consists of the reconstruction of Vine Street and utility replacement from Snow King Avenue. through the Kelly Ave. intersection. The Work includes installation of 8" sanitary sewer main and manholes, 12" water main, services, sidewalk, curb and gutter, street lighting, asphalt surface restoration, concrete surface restoration, and grass surface restoration, and other miscellaneous items.

2.01 The Project, of which the Work under the Contract Documents is a part, is generally described as follows: **Vine Street Improvements Project.**

ARTICLE 2—ENGINEER

3.01 The Project will be administered by: Town of Jackson Engineering Department, 450 West Snow King Avenue, PO Box 1687, Jackson, Wyoming, 83001, 307-733-3079 ("Engineer"), who is to act as Owner's representative, assume all duties and responsibilities, and have the rights and authority assigned to Engineer in the Contract Documents in connection with the completion of the Work in accordance with the Contract Documents set forth in the General Conditions and Supplementary Conditions.

3.02 The part of the Project that pertains to the Work has been designed by Valley West Engineering, who may at times provide technical support to the Owner and Engineer.

ARTICLE 3—CONTRACT TIMES

4.01 *Time is of the Essence*

A. All time limits for Milestones, if any, Substantial Completion, and completion and readiness for final payment as stated in the Contract Documents are of the essence of the Contract.

4.02 *Contract Times: Dates*

A. The Work may commence on **April 15, 2026**, weather permitting, and shall be substantially complete on or before **October 15, 2026** and completed and ready for final payment in accordance with Paragraph 15.06 of the General Conditions on or before **November 1, 2026** .

4.03 ~~*Contract Times: Days*~~

EJCDC® C-520, Agreement between Owner and Contractor for Construction Contract (Stipulated Price).
Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

4.05 *Liquidated Damages*

A. Contractor and Owner recognize that time is of the essence as stated in Paragraph 4.01 above and that Owner will suffer financial and other losses if the Work is not completed within the Contract Times, as duly modified. The parties also recognize the delays, expense, and difficulties involved in proving, in a legal or arbitration proceeding, the actual loss suffered by Owner if the Work is not completed on time. Accordingly, instead of requiring any such proof, Owner and Contractor agree that as liquidated damages for delay (but not as a penalty):

1. *Substantial Completion:* Contractor shall pay Owner $**1000** for each day that expires after the time (as duly adjusted pursuant to the Contract) specified above for Substantial Completion, until the Work is substantially complete.

2. *Completion of Remaining Work:* After Substantial Completion, if Contractor shall neglect, refuse, or fail to complete the remaining Work within the Contract Times (as duly adjusted pursuant to the Contract) for completion and readiness for final payment, Contractor shall pay Owner $**500** for each day that expires after such time until the Work is completed and ready for final payment.

3. Liquidated damages for failing to timely attain Substantial Completion, and final completion are not additive, and will not be imposed concurrently.

B. If Owner recovers liquidated damages for a delay in completion by Contractor, then such liquidated damages are Owner's sole and exclusive remedy for such delay, and Owner is precluded from recovering any other damages, whether actual, direct, excess, or consequential, for such delay, except for special damages (if any) specified in this Agreement.

ARTICLE 4—CONTRACT PRICE

5.01 Owner shall pay Contractor for completion of the Work in accordance with the Contract Documents, the amounts that follow, subject to adjustment under the Contract:

A. For all Work, at the prices stated in Contractor's Bid, attached hereto as an exhibit.

B. The extended prices for Unit Price Work set forth as of the Effective Date of the Contract are based on estimated quantities. As provided in Paragraph 13.03 of the General Conditions, estimated quantities are not guaranteed, and determinations of actual quantities and classifications are to be made by Engineer.

ARTICLE 5—PAYMENT PROCEDURES

6.01 *Submittal and Processing of Payments*

A. Contractor shall submit Applications for Payment in accordance with Article 15 of the General Conditions. Applications for Payment will be processed by Engineer as provided in the General Conditions.

6.02 *Progress Payments; Retainage*

A. Owner shall make progress payments on the basis of Contractor's Applications for Payment once each month during performance of the Work as provided in Paragraph 6.02.A.1 below, provided that such Applications for Payment have been submitted in a timely manner and

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

otherwise meet the requirements of the Contract. All such payments will be measured by the Schedule of Values established as provided in the General Conditions (and in the case of Unit Price Work based on the number of units completed) or, in the event there is no Schedule of Values, as provided elsewhere in the Contract.

1. Prior to Substantial Completion, progress payments will be made in an amount equal to the percentage indicated below but, in each case, less the aggregate of payments previously made and less such amounts as Owner may withhold, including but not limited to liquidated damages, in accordance with the Contract.

    a. **90** percent of the value of the Work completed (with the balance being retainage).

        1) If 50 percent or more of the Work has been completed, as determined by Engineer, and if the character and progress of the Work have been satisfactory to Owner and Engineer, then as long as the character and progress of the Work remain satisfactory to Owner and Engineer, there will be no additional retainage; and

    b. **90** percent of cost of materials and equipment not incorporated in the Work (with the balance being retainage).

B. Upon Substantial Completion, Owner shall pay an amount sufficient to increase total payments to Contractor to **95** percent of the Work completed, less such amounts set off by Owner pursuant to Paragraph 15.01.E of the General Conditions, and less **200** percent of Engineer's estimate of the value of Work to be completed or corrected as shown on the punch list of items to be completed or corrected prior to final payment.

6.03 *Final Payment*

A. Upon final completion and acceptance of the Work, Owner shall pay the remainder of the Contract Price in accordance with Paragraph 15.06 of the General Conditions and as modified in the Supplementary Conditions, Section SC-15.06.

6.04 *Consent of Surety*

A. Owner will not make final payment, or return or release retainage at Substantial Completion or any other time, unless Contractor submits written consent of the surety to such payment, return, or release.

6.05 *Interest*

A. All amounts not paid when due will bear interest at the rate of **6** percent per annum.

ARTICLE 6—CONTRACT DOCUMENTS

7.01 *Contents*

A. The Contract Documents consist of all of the following:

1. This Agreement.
2. Bonds:
    a. Performance bond (together with power of attorney).
    b. Payment bond (together with power of attorney).

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

3. General Conditions.
4. Supplementary Conditions.
5. Specifications as listed in the table of contents of the project manual.
6. Drawings (not attached but incorporated by reference) consisting of **23** sheets with each sheet bearing the following general title: **Vine Street Improvements Project.**
8. Addenda (numbers ____to _____**,** inclusive).
9. Exhibits to this Agreement (enumerated as follows):
    a. Contractor's Bid (pages 1 to 5, inclusive)
    b. Documentation submitted by Contactor as Attachments to the Bid other than Bid Security. (See Bid Form)
10. The following which may be delivered or issued on or after the Effective Date of the Contract and are not attached hereto:
    a. Notice to Proceed.
    b. Work Change Directives.
    c. Change Orders.
    d. Field Orders.
    e. Warranty Bond, if any.

B. The Contract Documents listed in Paragraph 7.01.A are attached to this Agreement (except as expressly noted otherwise above).

C. There are no Contract Documents other than those listed above in this Article 7.

D. The Contract Documents may only be amended, modified, or supplemented as provided in the Contract.

ARTICLE 7—REPRESENTATIONS, CERTIFICATIONS, AND STIPULATIONS

8.01 *Contractor's Representations*

A. In order to induce Owner to enter into this Contract, Contractor makes the following representations:

1. Contractor has examined and carefully studied the Contract Documents, including Addenda.
2. Contractor has visited the Site, conducted a thorough visual examination of the Site and adjacent areas, and become familiar with the general, local, and Site conditions that may affect cost, progress, and performance of the Work.
3. Contractor is familiar with all Laws and Regulations that may affect cost, progress, and performance of the Work.
4. Contractor has carefully studied the reports of explorations and tests of subsurface conditions at or adjacent to the Site and the drawings of physical conditions relating to existing surface or subsurface structures at the Site that have been identified in the

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Supplementary Conditions, with respect to the Technical Data in such reports and drawings.

5. Contractor has carefully studied the reports and drawings relating to Hazardous Environmental Conditions, if any, at or adjacent to the Site that have been identified in the Supplementary Conditions, with respect to Technical Data in such reports and drawings.

6. Contractor has considered the information known to Contractor itself; information commonly known to contractors doing business in the locality of the Site; information and observations obtained from visits to the Site; the Contract Documents; and the Technical Data identified in the Supplementary Conditions or by definition, with respect to the effect of such information, observations, and Technical Data on (a) the cost, progress, and performance of the Work; (b) the means, methods, techniques, sequences, and procedures of construction to be employed by Contractor; and (c) Contractor's safety precautions and programs.

7. Based on the information and observations referred to in the preceding paragraph, Contractor agrees that no further examinations, investigations, explorations, tests, studies, or data are necessary for the performance of the Work at the Contract Price, within the Contract Times, and in accordance with the other terms and conditions of the Contract.

8. Contractor is aware of the general nature of work to be performed by Owner and others at the Site that relates to the Work as indicated in the Contract Documents.

9. Contractor has given Engineer written notice of all conflicts, errors, ambiguities, or discrepancies that Contractor has discovered in the Contract Documents, and of discrepancies between Site conditions and the Contract Documents, and the written resolution thereof by Engineer is acceptable to Contractor.

10. The Contract Documents are generally sufficient to indicate and convey understanding of all terms and conditions for performance and furnishing of the Work.

11. Contractor's entry into this Contract constitutes an incontrovertible representation by Contractor that without exception all prices in the Agreement are premised upon performing and furnishing the Work required by the Contract Documents.

8.02 *Contractor's Certifications*

A. Contractor certifies that it has not engaged in corrupt, fraudulent, collusive, or coercive practices in competing for or in executing the Contract. For the purposes of this Paragraph 8.02:

1. "corrupt practice" means the offering, giving, receiving, or soliciting of anything of value likely to influence the action of a public official in the bidding process or in the Contract execution;

2. "fraudulent practice" means an intentional misrepresentation of facts made (a) to influence the bidding process or the execution of the Contract to the detriment of Owner, (b) to establish Bid or Contract prices at artificial non-competitive levels, or (c) to deprive Owner of the benefits of free and open competition;

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

3. “collusive practice” means a scheme or arrangement between two or more Bidders, with or without the knowledge of Owner, a purpose of which is to establish Bid prices at artificial, non-competitive levels; and

4. “coercive practice” means harming or threatening to harm, directly or indirectly, persons or their property to influence their participation in the bidding process or affect the execution of the Contract.

8.03 *Standard General Conditions*

A. Owner stipulates that if the General Conditions that are made a part of this Contract are EJCDC® C-700, Standard General Conditions for the Construction Contract (2018), published by the Engineers Joint Contract Documents Committee, and if Owner is the party that has furnished said General Conditions, then Owner has plainly shown all modifications to the standard wording of such published document to the Contractor, through a process such as highlighting or “track changes” (redline/strikeout), or in the Supplementary Conditions.

Notes: (1) Provide supplemental execution by any additional parties, such as joint venturers. (2) Any singular reference to Contractor, Surety, Owner, or other party is considered plural where applicable.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

1. The Contractor and Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors, and assigns to the Owner for the performance of the Construction Contract, which is incorporated herein by reference.

2. If the Contractor performs the Construction Contract, the Surety and the Contractor shall have no obligation under this Bond, except when applicable to participate in a conference as provided in Paragraph 3.

3. If there is no Owner Default under the Construction Contract, the Surety's obligation under this Bond will arise after:

    3.1. The Owner first provides notice to the Contractor and the Surety that the Owner is considering declaring a Contractor Default. Such notice may indicate whether the Owner is requesting a conference among the Owner, Contractor, and Surety to discuss the Contractor's performance. If the Owner does not request a conference, the Surety may, within five (5) business days after receipt of the Owner's notice, request such a conference. If the Surety timely requests a conference, the Owner shall attend. Unless the Owner agrees otherwise, any conference requested under this Paragraph 3.1 will be held within ten (10) business days of the Surety's receipt of the Owner's notice. If the Owner, the Contractor, and the Surety agree, the Contractor shall be allowed a reasonable time to perform the Construction Contract, but such an agreement does not waive the Owner's right, if any, subsequently to declare a Contractor Default;

    3.2. The Owner declares a Contractor Default, terminates the Construction Contract and notifies the Surety; and

    3.3. The Owner has agreed to pay the Balance of the Contract Price in accordance with the terms of the Construction Contract to the Surety or to a contractor selected to perform the Construction Contract.

4. Failure on the part of the Owner to comply with the notice requirement in Paragraph 3.1 does not constitute a failure to comply with a condition precedent to the Surety's obligations, or release the Surety from its obligations, except to the extent the Surety demonstrates actual prejudice.

5. When the Owner has satisfied the conditions of Paragraph 3, the Surety shall promptly and at the Surety's expense take one of the following actions:

    5.1. Arrange for the Contractor, with the consent of the Owner, to perform and complete the Construction Contract;

    5.2. Undertake to perform and complete the Construction Contract itself, through its agents or independent contractors;

    5.3. Obtain bids or negotiated proposals from qualified contractors acceptable to the Owner for a contract for performance and completion of the Construction Contract, arrange for a contract to be prepared for execution by the Owner and a contractor selected with the Owners concurrence, to be secured with performance and payment bonds executed by a qualified surety equivalent to the bonds issued on the Construction Contract, and pay to the Owner the amount of damages as described in Paragraph 7 in excess of the Balance of the Contract Price incurred by the Owner as a result of the Contractor Default; or

    5.4. Waive its right to perform and complete, arrange for completion, or obtain a new contractor, and with reasonable promptness under the circumstances:

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

5.4.1 After investigation, determine the amount for which it may be liable to the Owner and, as soon as practicable after the amount is determined, make payment to the Owner; or

5.4.2 Deny liability in whole or in part and notify the Owner, citing the reasons for denial.

6. If the Surety does not proceed as provided in Paragraph 5 with reasonable promptness, the Surety shall be deemed to be in default on this Bond seven days after receipt of an additional written notice from the Owner to the Surety demanding that the Surety perform its obligations under this Bond, and the Owner shall be entitled to enforce any remedy available to the Owner. If the Surety proceeds as provided in Paragraph 5.4, and the Owner refuses the payment, or the Surety has denied liability, in whole or in part, without further notice, the Owner shall be entitled to enforce any remedy available to the Owner.

7. If the Surety elects to act under Paragraph 5.1, 5.2, or 5.3, then the responsibilities of the Surety to the Owner will not be greater than those of the Contractor under the Construction Contract, and the responsibilities of the Owner to the Surety will not be greater than those of the Owner under the Construction Contract. Subject to the commitment by the Owner to pay the Balance of the Contract Price, the Surety is obligated, without duplication for:

   7.1. the responsibilities of the Contractor for correction of defective work and completion of the Construction Contract;

   7.2. additional legal, design professional, and delay costs resulting from the Contractor's Default, and resulting from the actions or failure to act of the Surety under Paragraph 5; and

   7.3. liquidated damages, or if no liquidated damages are specified in the Construction Contract, actual damages caused by delayed performance or non-performance of the Contractor.

8. If the Surety elects to act under Paragraph 5.1, 5.3, or 5.4, the Surety's liability is limited to the amount of this Bond.

9. The Surety shall not be liable to the Owner or others for obligations of the Contractor that are unrelated to the Construction Contract, and the Balance of the Contract Price will not be reduced or set off on account of any such unrelated obligations. No right of action will accrue on this Bond to any person or entity other than the Owner or its heirs, executors, administrators, successors, and assigns.

10. The Surety hereby waives notice of any change, including changes of time, to the Construction Contract or to related subcontracts, purchase orders, and other obligations.

11. Any proceeding, legal or equitable, under this Bond must be instituted in any court of competent jurisdiction in the location in which the work or part of the work is located and must be instituted within two years after a declaration of Contractor Default or within two years after the Contractor ceased working or within two years after the Surety refuses or fails to perform its obligations under this Bond, whichever occurs first. If the provisions of this paragraph are void or prohibited by law, the minimum periods of limitations available to sureties as a defense in the jurisdiction of the suit will be applicable.

12. Notice to the Surety, the Owner, or the Contractor must be mailed or delivered to the address shown on the page on which their signature appears.

13. When this Bond has been furnished to comply with a statutory or other legal requirement in the location where the construction was to be performed, any provision in this Bond conflicting with said statutory or legal requirement will be deemed deleted therefrom and provisions conforming to such

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

statutory or other legal requirement will be deemed incorporated herein. When so furnished, the intent is that this Bond will be construed as a statutory bond and not as a common law bond.

14. Definitions

    14.1. *Balance of the Contract Price*—The total amount payable by the Owner to the Contractor under the Construction Contract after all proper adjustments have been made including allowance for the Contractor for any amounts received or to be received by the Owner in settlement of insurance or other claims for damages to which the Contractor is entitled, reduced by all valid and proper payments made to or on behalf of the Contractor under the Construction Contract.

    14.2. *Construction Contract*—The agreement between the Owner and Contractor identified on the cover page, including all Contract Documents and changes made to the agreement and the Contract Documents.

    14.3. *Contractor Default*—Failure of the Contractor, which has not been remedied or waived, to perform or otherwise to comply with a material term of the Construction Contract.

    14.4. *Owner Default*—Failure of the Owner, which has not been remedied or waived, to pay the Contractor as required under the Construction Contract or to perform and complete or comply with the other material terms of the Construction Contract.

    14.5. *Contract Documents*—All the documents that comprise the agreement between the Owner and Contractor.

15. If this Bond is issued for an agreement between a contractor and subcontractor, the term Contractor in this Bond will be deemed to be Subcontractor and the term Owner will be deemed to be Contractor.

16. Modifications to this Bond are as follows: None.

EJCDC® C-615, Payment Bond.
Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

1. The Contractor and Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors, and assigns to the Owner to pay for labor, materials, and equipment furnished for use in the performance of the Construction Contract, which is incorporated herein by reference, subject to the following terms.

2. If the Contractor promptly makes payment of all sums due to Claimants, and defends, indemnifies, and holds harmless the Owner from claims, demands, liens, or suits by any person or entity seeking payment for labor, materials, or equipment furnished for use in the performance of the Construction Contract, then the Surety and the Contractor shall have no obligation under this Bond.

3. If there is no Owner Default under the Construction Contract, the Surety's obligation to the Owner under this Bond will arise after the Owner has promptly notified the Contractor and the Surety (at the address described in Paragraph 13) of claims, demands, liens, or suits against the Owner or the Owner's property by any person or entity seeking payment for labor, materials, or equipment furnished for use in the performance of the Construction Contract, and tendered defense of such claims, demands, liens, or suits to the Contractor and the Surety.

4. When the Owner has satisfied the conditions in Paragraph 3, the Surety shall promptly and at the Surety's expense defend, indemnify, and hold harmless the Owner against a duly tendered claim, demand, lien, or suit.

5. The Surety's obligations to a Claimant under this Bond will arise after the following:

    5.1. Claimants who do not have a direct contract with the Contractor

        5.1.1. have furnished a written notice of non-payment to the Contractor, stating with substantial accuracy the amount claimed and the name of the party to whom the materials were, or equipment was, furnished or supplied or for whom the labor was done or performed, within ninety (90) days after having last performed labor or last furnished materials or equipment included in the Claim; and

        5.1.2. have sent a Claim to the Surety (at the address described in Paragraph 13).

    5.2. Claimants who are employed by or have a direct contract with the Contractor have sent a Claim to the Surety (at the address described in Paragraph 13).

6. If a notice of non-payment required by Paragraph 5.1.1 is given by the Owner to the Contractor, that is sufficient to satisfy a Claimant's obligation to furnish a written notice of non-payment under Paragraph 5.1.1.

7. When a Claimant has satisfied the conditions of Paragraph 5.1 or 5.2, whichever is applicable, the Surety shall promptly and at the Surety's expense take the following actions:

    7.1. Send an answer to the Claimant, with a copy to the Owner, within sixty (60) days after receipt of the Claim, stating the amounts that are undisputed and the basis for challenging any amounts that are disputed; and

    7.2. Pay or arrange for payment of any undisputed amounts.

    7.3. The Surety's failure to discharge its obligations under Paragraph 7.1 or 7.2 will not be deemed to constitute a waiver of defenses the Surety or Contractor may have or acquire as to a Claim, except as to undisputed amounts for which the Surety and Claimant have reached agreement. If, however, the Surety fails to discharge its obligations under Paragraph 7.1 or 7.2, the Surety shall indemnify the Claimant for the reasonable attorney's fees the Claimant incurs thereafter to recover any sums found to be due and owing to the Claimant.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

8. The Surety's total obligation will not exceed the amount of this Bond, plus the amount of reasonable attorney's fees provided under Paragraph 7.3, and the amount of this Bond will be credited for any payments made in good faith by the Surety.

9. Amounts owed by the Owner to the Contractor under the Construction Contract will be used for the performance of the Construction Contract and to satisfy claims, if any, under any construction performance bond. By the Contractor furnishing and the Owner accepting this Bond, they agree that all funds earned by the Contractor in the performance of the Construction Contract are dedicated to satisfying obligations of the Contractor and Surety under this Bond, subject to the Owner's priority to use the funds for the completion of the work.

10. The Surety shall not be liable to the Owner, Claimants, or others for obligations of the Contractor that are unrelated to the Construction Contract. The Owner shall not be liable for the payment of any costs or expenses of any Claimant under this Bond, and shall have under this Bond no obligation to make payments to or give notice on behalf of Claimants, or otherwise have any obligations to Claimants under this Bond.

11. The Surety hereby waives notice of any change, including changes of time, to the Construction Contract or to related subcontracts, purchase orders, and other obligations.

12. No suit or action will be commenced by a Claimant under this Bond other than in a court of competent jurisdiction in the state in which the project that is the subject of the Construction Contract is located or after the expiration of one year from the date (1) on which the Claimant sent a Claim to the Surety pursuant to Paragraph 5.1.2 or 5.2, or (2) on which the last labor or service was performed by anyone or the last materials or equipment were furnished by anyone under the Construction Contract, whichever of (1) or (2) first occurs. If the provisions of this paragraph are void or prohibited by law, the minimum period of limitation available to sureties as a defense in the jurisdiction of the suit will be applicable.

13. Notice and Claims to the Surety, the Owner, or the Contractor must be mailed or delivered to the address shown on the page on which their signature appears. Actual receipt of notice or Claims, however accomplished, will be sufficient compliance as of the date received.

14. When this Bond has been furnished to comply with a statutory or other legal requirement in the location where the construction was to be performed, any provision in this Bond conflicting with said statutory or legal requirement will be deemed deleted here from and provisions conforming to such statutory or other legal requirement will be deemed incorporated herein. When so furnished, the intent is that this Bond will be construed as a statutory bond and not as a common law bond.

15. Upon requests by any person or entity appearing to be a potential beneficiary of this Bond, the Contractor and Owner shall promptly furnish a copy of this Bond or shall permit a copy to be made.

16. Definitions

    16.1. *Claim*—A written statement by the Claimant including at a minimum:

        16.1.1. The name of the Claimant;

        16.1.2. The name of the person for whom the labor was done, or materials or equipment furnished;

        16.1.3. A copy of the agreement or purchase order pursuant to which labor, materials, or equipment was furnished for use in the performance of the Construction Contract;

        16.1.4. A brief description of the labor, materials, or equipment furnished;

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

16.1.5. The date on which the Claimant last performed labor or last furnished materials or equipment for use in the performance of the Construction Contract;

16.1.6. The total amount earned by the Claimant for labor, materials, or equipment furnished as of the date of the Claim;

16.1.7. The total amount of previous payments received by the Claimant; and

16.1.8. The total amount due and unpaid to the Claimant for labor, materials, or equipment furnished as of the date of the Claim.

16.2. *Claimant*—An individual or entity having a direct contract with the Contractor or with a subcontractor of the Contractor to furnish labor, materials, or equipment for use in the performance of the Construction Contract. The term Claimant also includes any individual or entity that has rightfully asserted a claim under an applicable mechanic's lien or similar statute against the real property upon which the Project is located. The intent of this Bond is to include without limitation in the terms of "labor, materials, or equipment" that part of the water, gas, power, light, heat, oil, gasoline, telephone service, or rental equipment used in the Construction Contract, architectural and engineering services required for performance of the work of the Contractor and the Contractor's subcontractors, and all other items for which a mechanic's lien may be asserted in the jurisdiction where the labor, materials, or equipment were furnished.

16.3. *Construction Contract*—The agreement between the Owner and Contractor identified on the cover page, including all Contract Documents and all changes made to the agreement and the Contract Documents.

16.4. *Owner Default*—Failure of the Owner, which has not been remedied or waived, to pay the Contractor as required under the Construction Contract or to perform and complete or comply with the other material terms of the Construction Contract.

16.5. *Contract Documents*—All the documents that comprise the agreement between the Owner and Contractor.

17. If this Bond is issued for an agreement between a contractor and subcontractor, the term Contractor in this Bond will be deemed to be Subcontractor and the term Owner will be deemed to be Contractor.

18. Modifications to this Bond are as follows: None.

3. Current Contract Price (Line 1 + Line 2)		
4. Total Work completed and materials stored to date (Sum of Column J Unit Price Total)		$ -
5. Retainage		
a. _____ X	$ - Work Completed	
b. _____ X	$ - Stored Materials	
c. Total Retainage (Line 5.a + Line 5.b)		
6. Amount eligible to date (Line 4 - Line 5.c)		
7. Less previous payments (Line 6 from prior application)		
8. Amount due this application		
9. Balance to finish, including retainage (Line 3 - Line 4)		

Contractor's Certification

The undersigned Contractor certifies, to the best of its knowledge, the following:
(1) All previous progress payments received from Owner on account of Work done under the Contract have been applied on account to discharge Contractor's legitimate obligations incurred in connection with the Work covered by prior Applications for Payment;
(2) Title to all Work, materials and equipment incorporated in said Work, or otherwise listed in or covered by this Application for Payment, will pass to Owner at time of payment free and clear of all liens, security interests, and encumbrances (except such as are covered by a bond acceptable to Owner indemnifying Owner against any such liens, security interest, or encumbrances); and
(3) All the Work covered by this Application for Payment is in accordance with the Contract Documents and is not defective.

CERTIFICATE OF SUBSTANTIAL COMPLETION

Owner:	Town of Jackson	Owner's Project No.:	26-10
Engineer:		Engineer's Project No.:	21-411-04
Contractor:		Contractor's Project No.:	
Project:	Vine Street Improvements Project		
Contract Name:	Vine Street Improvements Project		

This ☐ Preliminary ☐ Final Certificate of Substantial Completion applies to:

☐ All Work ☐ The following specified portions of the Work:

[Describe the portion of the work for which Certificate of Substantial Completion is issued]

Date of Substantial Completion: **[Enter date, as determined by Engineer]**

The Work to which this Certificate applies has been inspected by authorized representatives of Owner, Contractor, and Engineer, and found to be substantially complete. The Date of Substantial Completion of the Work or portion thereof designated above is hereby established, subject to the provisions of the Contract pertaining to Substantial Completion. The date of Substantial Completion in the final Certificate of Substantial Completion marks the commencement of the contractual correction period and applicable warranties required by the Contract.

A punch list of items to be completed or corrected is attached to this Certificate. This list may not be all-inclusive, and the failure to include any items on such list does not alter the responsibility of the Contractor to complete all Work in accordance with the Contract Documents.

Amendments of contractual responsibilities recorded in this Certificate should be the product of mutual agreement of Owner and Contractor; see Paragraph 15.03.D of the General Conditions.

The responsibilities between Owner and Contractor for security, operation, safety, maintenance, heat, utilities, insurance, and warranties upon Owner's use or occupancy of the Work must be as provided in the Contract, except as amended as follows:

Amendments to Owner's Responsibilities: ☐ None ☐ As follows:

[List amendments to Owner's Responsibilities]

Amendments to Contractor's Responsibilities: ☐ None ☐ As follows:

[List amendments to Contractor's Responsibilities]

The following documents are attached to and made a part of this Certificate:

[List attachments such as punch list; other documents]

This Certificate does not constitute an acceptance of Work not in accordance with the Contract Documents, nor is it a release of Contractor's obligation to complete the Work in accordance with the Contract Documents.

NOTICE OF ACCEPTABILITY OF WORK

Owner:	Town of Jackson	Owner's Project No.:	26-10
Engineer:		Engineer's Project No.:	21-411-04
Contractor:		Contractor's Project No.:	
Project:	Vine Street Improvements Project		
Contract Name:	Vine Street Improvements Project		
Notice Date:		Effective Date of the Construction Contract:	

The Engineer hereby gives notice to the Owner and Contractor that Engineer recommends final payment to Contractor, and that the Work furnished and performed by Contractor under the Construction Contract is acceptable, expressly subject to the provisions of the Construction Contract's Contract Documents ("Contract Documents") and of the Agreement between Owner and Engineer for Professional Services dated **[date of professional services agreement]** ("Owner-Engineer Agreement"). This Notice of Acceptability of Work (Notice) is made expressly subject to the following terms and conditions to which all who receive and rely on said Notice agree:

1. This Notice has been prepared with the skill and care ordinarily used by members of the engineering profession practicing under similar conditions at the same time and in the same locality.
2. This Notice reflects and is an expression of the Engineer's professional opinion.
3. This Notice has been prepared to the best of Engineer's knowledge, information, and belief as of the Notice Date.
4. This Notice is based entirely on and expressly limited by the scope of services Engineer has been employed by Owner to perform or furnish during construction of the Project (including observation of the Contractor's Work) under the Owner-Engineer Agreement, and applies only to facts that are within Engineer's knowledge or could reasonably have been ascertained by Engineer as a result of carrying out the responsibilities specifically assigned to Engineer under such Owner-Engineer Agreement.
5. This Notice is not a guarantee or warranty of Contractor's performance under the Construction Contract, an acceptance of Work that is not in accordance with the Contract Documents, including but not limited to defective Work discovered after final inspection, nor an assumption of responsibility for any failure of Contractor to furnish and perform the Work thereunder in accordance with the Contract Documents, or to otherwise comply with the Contract Documents or the terms of any special guarantees specified therein.
6. This Notice does not relieve Contractor of any surviving obligations under the Construction Contract, and is subject to Owner's reservations of rights with respect to completion and final payment.

STANDARD GENERAL CONDITIONS OF THE CONSTRUCTION CONTRACT

ARTICLE 1—DEFINITIONS AND TERMINOLOGY

1.01 *Defined Terms*

A. Wherever used in the Bidding Requirements or Contract Documents, a term printed with initial capital letters, including the term's singular and plural forms, will have the meaning indicated in the definitions below. In addition to terms specifically defined, terms with initial capital letters in the Contract Documents include references to identified articles and paragraphs, and the titles of other documents or forms.

1. *Addenda*—Written or graphic instruments issued prior to the opening of Bids which clarify, correct, or change the Bidding Requirements or the proposed Contract Documents.

2. *Agreement*—The written instrument, executed by Owner and Contractor, that sets forth the Contract Price and Contract Times, identifies the parties and the Engineer, and designates the specific items that are Contract Documents.

3. *Application for Payment*—The document prepared by Contractor, in a form acceptable to Engineer, to request progress or final payments, and which is to be accompanied by such supporting documentation as is required by the Contract Documents.

4. *Bid*—The offer of a Bidder submitted on the prescribed form setting forth the prices for the Work to be performed.

5. *Bidder*—An individual or entity that submits a Bid to Owner.

6. *Bidding Documents*—The Bidding Requirements, the proposed Contract Documents, and all Addenda.

7. *Bidding Requirements*—The Advertisement or invitation to bid, Instructions to Bidders, Bid Bond or other Bid security, if any, the Bid Form, and the Bid with any attachments.

8. *Change Order*—A document which is signed by Contractor and Owner and authorizes an addition, deletion, or revision in the Work or an adjustment in the Contract Price or the Contract Times, or other revision to the Contract, issued on or after the Effective Date of the Contract.

9. *Change Proposal*—A written request by Contractor, duly submitted in compliance with the procedural requirements set forth herein, seeking an adjustment in Contract Price or Contract Times; contesting an initial decision by Engineer concerning the requirements of the Contract Documents or the acceptability of Work under the Contract Documents; challenging a set-off against payments due; or seeking other relief with respect to the terms of the Contract.

10. *Claim*

a. A demand or assertion by Owner directly to Contractor, duly submitted in compliance with the procedural requirements set forth herein, seeking an adjustment of Contract Price or Contract Times; contesting an initial decision by Engineer concerning the

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

requirements of the Contract Documents or the acceptability of Work under the Contract Documents; contesting Engineer's decision regarding a Change Proposal; seeking resolution of a contractual issue that Engineer has declined to address; or seeking other relief with respect to the terms of the Contract.

b. A demand or assertion by Contractor directly to Owner, duly submitted in compliance with the procedural requirements set forth herein, contesting Engineer's decision regarding a Change Proposal, or seeking resolution of a contractual issue that Engineer has declined to address.

c. A demand or assertion by Owner or Contractor, duly submitted in compliance with the procedural requirements set forth herein, made pursuant to Paragraph 12.01.A.4, concerning disputes arising after Engineer has issued a recommendation of final payment.

d. A demand for money or services by a third party is not a Claim.

11. *Constituent of Concern*—Asbestos, petroleum, radioactive materials, polychlorinated biphenyls (PCBs), lead-based paint (as defined by the HUD/EPA standard), hazardous waste, and any substance, product, waste, or other material of any nature whatsoever that is or becomes listed, regulated, or addressed pursuant to Laws and Regulations regulating, relating to, or imposing liability or standards of conduct concerning, any hazardous, toxic, or dangerous waste, substance, or material.

12. *Contract*—The entire and integrated written contract between Owner and Contractor concerning the Work.

13. *Contract Documents*—Those items so designated in the Agreement, and which together comprise the Contract.

14. *Contract Price*—The money that Owner has agreed to pay Contractor for completion of the Work in accordance with the Contract Documents.

15. *Contract Times*—The number of days or the dates by which Contractor shall: (a) achieve Milestones, if any; (b) achieve Substantial Completion; and (c) complete the Work.

16. *Contractor*—The individual or entity with which Owner has contracted for performance of the Work.

17. *Cost of the Work*—See Paragraph 13.01 for definition.

18. *Drawings*—The part of the Contract that graphically shows the scope, extent, and character of the Work to be performed by Contractor.

19. *Effective Date of the Contract*—The date, indicated in the Agreement, on which the Contract becomes effective.

20. *Electronic Document*—Any Project-related correspondence, attachments to correspondence, data, documents, drawings, information, or graphics, including but not limited to Shop Drawings and other Submittals, that are in an electronic or digital format.

21. *Electronic Means*—Electronic mail (email), upload/download from a secure Project website, or other communications methods that allow: (a) the transmission or communication of Electronic Documents; (b) the documentation of transmissions, including sending and receipt; (c) printing of the transmitted Electronic Document by the

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

recipient; (d) the storage and archiving of the Electronic Document by sender and recipient; and (e) the use by recipient of the Electronic Document for purposes permitted by this Contract. Electronic Means does not include the use of text messaging, or of Facebook, Twitter, Instagram, or similar social media services for transmission of Electronic Documents.

22. *Engineer*—The individual or entity named as such in the Agreement.

23. *Field Order*—A written order issued by Engineer which requires minor changes in the Work but does not change the Contract Price or the Contract Times.

24. *Hazardous Environmental Condition*—The presence at the Site of Constituents of Concern in such quantities or circumstances that may present a danger to persons or property exposed thereto.

    a. The presence at the Site of materials that are necessary for the execution of the Work, or that are to be incorporated into the Work, and that are controlled and contained pursuant to industry practices, Laws and Regulations, and the requirements of the Contract, is not a Hazardous Environmental Condition.

    b. The presence of Constituents of Concern that are to be removed or remediated as part of the Work is not a Hazardous Environmental Condition.

    c. The presence of Constituents of Concern as part of the routine, anticipated, and obvious working conditions at the Site, is not a Hazardous Environmental Condition.

25. *Laws and Regulations; Laws or Regulations*—Any and all applicable laws, statutes, rules, regulations, ordinances, codes, and binding decrees, resolutions, and orders of any and all governmental bodies, agencies, authorities, and courts having jurisdiction.

26. *Liens*—Charges, security interests, or encumbrances upon Contract-related funds, real property, or personal property.

27. *Milestone*—A principal event in the performance of the Work that the Contract requires Contractor to achieve by an intermediate completion date, or by a time prior to Substantial Completion of all the Work.

28. *Notice of Award*—The written notice by Owner to a Bidder of Owner's acceptance of the Bid.

29. *Notice to Proceed*—A written notice by Owner to Contractor fixing the date on which the Contract Times will commence to run and on which Contractor shall start to perform the Work.

30. *Owner*—The individual or entity with which Contractor has contracted regarding the Work, and which has agreed to pay Contractor for the performance of the Work, pursuant to the terms of the Contract.

31. *Progress Schedule*—A schedule, prepared and maintained by Contractor, describing the sequence and duration of the activities comprising Contractor's plan to accomplish the Work within the Contract Times.

32. *Project*—The total undertaking to be accomplished for Owner by engineers, contractors, and others, including planning, study, design, construction, testing, commissioning, and start-up, and of which the Work to be performed under the Contract Documents is a part.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

33. *Resident Project Representative*—The authorized representative of Engineer assigned to assist Engineer at the Site. As used herein, the term Resident Project Representative (RPR) includes any assistants or field staff of Resident Project Representative.

34. *Samples*—Physical examples of materials, equipment, or workmanship that are representative of some portion of the Work and that establish the standards by which such portion of the Work will be judged.

35. *Schedule of Submittals*—A schedule, prepared and maintained by Contractor, of required submittals and the time requirements for Engineer's review of the submittals.

36. *Schedule of Values*—A schedule, prepared and maintained by Contractor, allocating portions of the Contract Price to various portions of the Work and used as the basis for reviewing Contractor's Applications for Payment.

37. *Shop Drawings*—All drawings, diagrams, illustrations, schedules, and other data or information that are specifically prepared or assembled by or for Contractor and submitted by Contractor to illustrate some portion of the Work. Shop Drawings, whether approved or not, are not Drawings and are not Contract Documents.

38. *Site*—Lands or areas indicated in the Contract Documents as being furnished by Owner upon which the Work is to be performed, including rights-of-way and easements, and such other lands or areas furnished by Owner which are designated for the use of Contractor.

39. *Specifications*—The part of the Contract that consists of written requirements for materials, equipment, systems, standards, and workmanship as applied to the Work, and certain administrative requirements and procedural matters applicable to the Work.

40. *Subcontractor*—An individual or entity having a direct contract with Contractor or with any other Subcontractor for the performance of a part of the Work.

41. *Submittal*—A written or graphic document, prepared by or for Contractor, which the Contract Documents require Contractor to submit to Engineer, or that is indicated as a Submittal in the Schedule of Submittals accepted by Engineer. Submittals may include Shop Drawings and Samples; schedules; product data; Owner-delegated designs; sustainable design information; information on special procedures; testing plans; results of tests and evaluations, source quality-control testing and inspections, and field or Site quality-control testing and inspections; warranties and certifications; Suppliers' instructions and reports; records of delivery of spare parts and tools; operations and maintenance data; Project photographic documentation; record documents; and other such documents required by the Contract Documents. Submittals, whether or not approved or accepted by Engineer, are not Contract Documents. Change Proposals, Change Orders, Claims, notices, Applications for Payment, and requests for interpretation or clarification are not Submittals.

42. *Substantial Completion*—The time at which the Work (or a specified part thereof) has progressed to the point where, in the opinion of Engineer, the Work (or a specified part thereof) is sufficiently complete, in accordance with the Contract Documents, so that the Work (or a specified part thereof) can be utilized for the purposes for which it is intended. The terms "substantially complete" and "substantially completed" as applied to all or part of the Work refer to Substantial Completion of such Work.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

43. *Successful Bidder*—The Bidder to which the Owner makes an award of contract.

44. *Supplementary Conditions*—The part of the Contract that amends or supplements these General Conditions.

45. *Supplier*—A manufacturer, fabricator, supplier, distributor, or vendor having a direct contract with Contractor or with any Subcontractor to furnish materials or equipment to be incorporated in the Work by Contractor or a Subcontractor.

46. *Technical Data*

    a. Those items expressly identified as Technical Data in the Supplementary Conditions, with respect to either (1) existing subsurface conditions at or adjacent to the Site, or existing physical conditions at or adjacent to the Site including existing surface or subsurface structures (except Underground Facilities) or (2) Hazardous Environmental Conditions at the Site.

    b. If no such express identifications of Technical Data have been made with respect to conditions at the Site, then Technical Data is defined, with respect to conditions at the Site under Paragraphs 5.03, 5.04, and 5.06, as the data contained in boring logs, recorded measurements of subsurface water levels, assessments of the condition of subsurface facilities, laboratory test results, and other factual, objective information regarding conditions at the Site that are set forth in any geotechnical, environmental, or other Site or facilities conditions report prepared for the Project and made available to Contractor.

    c. Information and data regarding the presence or location of Underground Facilities are not intended to be categorized, identified, or defined as Technical Data, and instead Underground Facilities are shown or indicated on the Drawings.

47. *Underground Facilities*—All active or not-in-service underground lines, pipelines, conduits, ducts, encasements, cables, wires, manholes, vaults, tanks, tunnels, or other such facilities or systems at the Site, including but not limited to those facilities or systems that produce, transmit, distribute, or convey telephone or other communications, cable television, fiber optic transmissions, power, electricity, light, heat, gases, oil, crude oil products, liquid petroleum products, water, steam, waste, wastewater, storm water, other liquids or chemicals, or traffic or other control systems. An abandoned facility or system is not an Underground Facility.

48. *Unit Price Work*—Work to be paid for on the basis of unit prices.

49. *Work*—The entire construction or the various separately identifiable parts thereof required to be provided under the Contract Documents. Work includes and is the result of performing or providing all labor, services, and documentation necessary to produce such construction; furnishing, installing, and incorporating all materials and equipment into such construction; and may include related services such as testing, start-up, and commissioning, all as required by the Contract Documents.

50. *Work Change Directive*—A written directive to Contractor issued on or after the Effective Date of the Contract, signed by Owner and recommended by Engineer, ordering an addition, deletion, or revision in the Work.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

1.02 *Terminology*

A. The words and terms discussed in Paragraphs 1.02.B, C, D, and E are not defined terms that require initial capital letters, but, when used in the Bidding Requirements or Contract Documents, have the indicated meaning.

B. *Intent of Certain Terms or Adjectives*: The Contract Documents include the terms "as allowed," "as approved," "as ordered," "as directed" or terms of like effect or import to authorize an exercise of professional judgment by Engineer. In addition, the adjectives "reasonable," "suitable," "acceptable," "proper," "satisfactory," or adjectives of like effect or import are used to describe an action or determination of Engineer as to the Work. It is intended that such exercise of professional judgment, action, or determination will be solely to evaluate, in general, the Work for compliance with the information in the Contract Documents and with the design concept of the Project as a functioning whole as shown or indicated in the Contract Documents (unless there is a specific statement indicating otherwise). The use of any such term or adjective is not intended to and shall not be effective to assign to Engineer any duty or authority to supervise or direct the performance of the Work, or any duty or authority to undertake responsibility contrary to the provisions of Article 10 or any other provision of the Contract Documents.

C. *Day*: The word "day" means a calendar day of 24 hours measured from midnight to the next midnight.

D. *Defective*: The word "defective," when modifying the word "Work," refers to Work that is unsatisfactory, faulty, or deficient in that it:

1. does not conform to the Contract Documents;

2. does not meet the requirements of any applicable inspection, reference standard, test, or approval referred to in the Contract Documents; or

3. has been damaged prior to Engineer's recommendation of final payment (unless responsibility for the protection thereof has been assumed by Owner at Substantial Completion in accordance with Paragraph 15.03 or Paragraph 15.04).

E. *Furnish, Install, Perform, Provide*

1. The word "furnish," when used in connection with services, materials, or equipment, means to supply and deliver said services, materials, or equipment to the Site (or some other specified location) ready for use or installation and in usable or operable condition.

2. The word "install," when used in connection with services, materials, or equipment, means to put into use or place in final position said services, materials, or equipment complete and ready for intended use.

3. The words "perform" or "provide," when used in connection with services, materials, or equipment, means to furnish and install said services, materials, or equipment complete and ready for intended use.

4. If the Contract Documents establish an obligation of Contractor with respect to specific services, materials, or equipment, but do not expressly use any of the four words "furnish," "install," "perform," or "provide," then Contractor shall furnish and install said services, materials, or equipment complete and ready for intended use.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

F. *Contract Price or Contract Times*: References to a change in "Contract Price or Contract Times" or "Contract Times or Contract Price" or similar, indicate that such change applies to (1) Contract Price, (2) Contract Times, or (3) both Contract Price and Contract Times, as warranted, even if the term "or both" is not expressed.

G. Unless stated otherwise in the Contract Documents, words or phrases that have a well-known technical or construction industry or trade meaning are used in the Contract Documents in accordance with such recognized meaning.

ARTICLE 2—PRELIMINARY MATTERS

2.01 *Delivery of Performance and Payment Bonds; Evidence of Insurance*

A. *Performance and Payment Bonds*: When Contractor delivers the signed counterparts of the Agreement to Owner, Contractor shall also deliver to Owner the performance bond and payment bond (if the Contract requires Contractor to furnish such bonds).

B. *Evidence of Contractor's Insurance*: When Contractor delivers the signed counterparts of the Agreement to Owner, Contractor shall also deliver to Owner, with copies to each additional insured (as identified in the Contract), the certificates, endorsements, and other evidence of insurance required to be provided by Contractor in accordance with Article 6, except to the extent the Supplementary Conditions expressly establish other dates for delivery of specific insurance policies.

C. *Evidence of Owner's Insurance*: After receipt of the signed counterparts of the Agreement and all required bonds and insurance documentation, Owner shall promptly deliver to Contractor, with copies to each additional insured (as identified in the Contract), the certificates and other evidence of insurance required to be provided by Owner under Article 6.

2.02 *Copies of Documents*

A. Owner shall furnish to Contractor four printed copies of the Contract (including one fully signed counterpart of the Agreement), and one copy in electronic portable document format (PDF). Additional printed copies will be furnished upon request at the cost of reproduction.

B. Owner shall maintain and safeguard at least one original printed record version of the Contract, including Drawings and Specifications signed and sealed by Engineer and other design professionals. Owner shall make such original printed record version of the Contract available to Contractor for review. Owner may delegate the responsibilities under this provision to Engineer.

2.03 *Before Starting Construction*

A. *Preliminary Schedules*: Within 10 days after the Effective Date of the Contract (or as otherwise required by the Contract Documents), Contractor shall submit to Engineer for timely review:

1. a preliminary Progress Schedule indicating the times (numbers of days or dates) for starting and completing the various stages of the Work, including any Milestones specified in the Contract;

2. a preliminary Schedule of Submittals; and

3. a preliminary Schedule of Values for all of the Work which includes quantities and prices of items which when added together equal the Contract Price and subdivides the Work

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

into component parts in sufficient detail to serve as the basis for progress payments during performance of the Work. Such prices will include an appropriate amount of overhead and profit applicable to each item of Work.

2.04 *Preconstruction Conference; Designation of Authorized Representatives*

A. Before any Work at the Site is started, a conference attended by Owner, Contractor, Engineer, and others as appropriate will be held to establish a working understanding among the parties as to the Work, and to discuss the schedules referred to in Paragraph 2.03.A, procedures for handling Shop Drawings, Samples, and other Submittals, processing Applications for Payment, electronic or digital transmittals, and maintaining required records.

B. At this conference Owner and Contractor each shall designate, in writing, a specific individual to act as its authorized representative with respect to the services and responsibilities under the Contract. Such individuals shall have the authority to transmit and receive information, render decisions relative to the Contract, and otherwise act on behalf of each respective party.

2.05 *Acceptance of Schedules*

A. At least 10 days before submission of the first Application for Payment a conference, attended by Contractor, Engineer, and others as appropriate, will be held to review the schedules submitted in accordance with Paragraph 2.03.A. No progress payment will be made to Contractor until acceptable schedules are submitted to Engineer.

1. The Progress Schedule will be acceptable to Engineer if it provides an orderly progression of the Work to completion within the Contract Times. Such acceptance will not impose on Engineer responsibility for the Progress Schedule, for sequencing, scheduling, or progress of the Work, nor interfere with or relieve Contractor from Contractor's full responsibility therefor.

2. Contractor's Schedule of Submittals will be acceptable to Engineer if it provides a workable arrangement for reviewing and processing the required submittals.

3. Contractor's Schedule of Values will be acceptable to Engineer as to form and substance if it provides a reasonable allocation of the Contract Price to the component parts of the Work.

4. If a schedule is not acceptable, Contractor will have an additional 10 days to revise and resubmit the schedule.

2.06 *Electronic Transmittals*

A. Except as otherwise stated elsewhere in the Contract, the Owner, Engineer, and Contractor may send, and shall accept, Electronic Documents transmitted by Electronic Means.

B. If the Contract does not establish protocols for Electronic Means, then Owner, Engineer, and Contractor shall jointly develop such protocols.

C. Subject to any governing protocols for Electronic Means, when transmitting Electronic Documents by Electronic Means, the transmitting party makes no representations as to long-term compatibility, usability, or readability of the Electronic Documents resulting from the recipient's use of software application packages, operating systems, or computer hardware differing from those used in the drafting or transmittal of the Electronic Documents.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 3—CONTRACT DOCUMENTS: INTENT, REQUIREMENTS, REUSE

3.01 *Intent*

A. The Contract Documents are complementary; what is required by one Contract Document is as binding as if required by all.

B. It is the intent of the Contract Documents to describe a functionally complete Project (or part thereof) to be constructed in accordance with the Contract Documents.

C. Unless otherwise stated in the Contract Documents, if there is a discrepancy between the electronic versions of the Contract Documents (including any printed copies derived from such electronic versions) and the printed record version, the printed record version will govern.

D. The Contract supersedes prior negotiations, representations, and agreements, whether written or oral.

E. Engineer will issue clarifications and interpretations of the Contract Documents as provided herein.

F. Any provision or part of the Contract Documents held to be void or unenforceable under any Law or Regulation will be deemed stricken, and all remaining provisions will continue to be valid and binding upon Owner and Contractor, which agree that the Contract Documents will be reformed to replace such stricken provision or part thereof with a valid and enforceable provision that comes as close as possible to expressing the intention of the stricken provision.

G. Nothing in the Contract Documents creates:

1. any contractual relationship between Owner or Engineer and any Subcontractor, Supplier, or other individual or entity performing or furnishing any of the Work, for the benefit of such Subcontractor, Supplier, or other individual or entity; or

2. any obligation on the part of Owner or Engineer to pay or to see to the payment of any money due any such Subcontractor, Supplier, or other individual or entity, except as may otherwise be required by Laws and Regulations.

3.02 *Reference Standards*

A. *Standards Specifications, Codes, Laws and Regulations*

1. Reference in the Contract Documents to standard specifications, manuals, reference standards, or codes of any technical society, organization, or association, or to Laws or Regulations, whether such reference be specific or by implication, means the standard specification, manual, reference standard, code, or Laws or Regulations in effect at the time of opening of Bids (or on the Effective Date of the Contract if there were no Bids), except as may be otherwise specifically stated in the Contract Documents.

2. No provision of any such standard specification, manual, reference standard, or code, and no instruction of a Supplier, will be effective to change the duties or responsibilities of Owner, Contractor, or Engineer from those set forth in the part of the Contract Documents prepared by or for Engineer. No such provision or instruction shall be effective to assign to Owner or Engineer any duty or authority to supervise or direct the performance of the Work, or any duty or authority to undertake responsibility

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

inconsistent with the provisions of the part of the Contract Documents prepared by or for Engineer.

3.03 *Reporting and Resolving Discrepancies*

A. *Reporting Discrepancies*

1. *Contractor's Verification of Figures and Field Measurements*: Before undertaking each part of the Work, Contractor shall carefully study the Contract Documents, and check and verify pertinent figures and dimensions therein, particularly with respect to applicable field measurements. Contractor shall promptly report in writing to Engineer any conflict, error, ambiguity, or discrepancy that Contractor discovers, or has actual knowledge of, and shall not proceed with any Work affected thereby until the conflict, error, ambiguity, or discrepancy is resolved by a clarification or interpretation by Engineer, or by an amendment or supplement to the Contract issued pursuant to Paragraph 11.01.

2. *Contractor's Review of Contract Documents*: If, before or during the performance of the Work, Contractor discovers any conflict, error, ambiguity, or discrepancy within the Contract Documents, or between the Contract Documents and (a) any applicable Law or Regulation, (b) actual field conditions, (c) any standard specification, manual, reference standard, or code, or (d) any instruction of any Supplier, then Contractor shall promptly report it to Engineer in writing. Contractor shall not proceed with the Work affected thereby (except in an emergency as required by Paragraph 7.15) until the conflict, error, ambiguity, or discrepancy is resolved, by a clarification or interpretation by Engineer, or by an amendment or supplement to the Contract issued pursuant to Paragraph 11.01.

3. Contractor shall not be liable to Owner or Engineer for failure to report any conflict, error, ambiguity, or discrepancy in the Contract Documents unless Contractor had actual knowledge thereof.

B. *Resolving Discrepancies*

1. Except as may be otherwise specifically stated in the Contract Documents, the provisions of the part of the Contract Documents prepared by or for Engineer take precedence in resolving any conflict, error, ambiguity, or discrepancy between such provisions of the Contract Documents and:

a. the provisions of any standard specification, manual, reference standard, or code, or the instruction of any Supplier (whether or not specifically incorporated by reference as a Contract Document); or

b. the provisions of any Laws or Regulations applicable to the performance of the Work (unless such an interpretation of the provisions of the Contract Documents would result in violation of such Law or Regulation).

3.04 *Requirements of the Contract Documents*

A. During the performance of the Work and until final payment, Contractor and Owner shall submit to the Engineer in writing all matters in question concerning the requirements of the Contract Documents (sometimes referred to as requests for information or interpretation—RFIs), or relating to the acceptability of the Work under the Contract Documents, as soon as possible after such matters arise. Engineer will be the initial interpreter of the requirements of the Contract Documents, and judge of the acceptability of the Work.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

B. Engineer will, with reasonable promptness, render a written clarification, interpretation, or decision on the issue submitted, or initiate an amendment or supplement to the Contract Documents. Engineer's written clarification, interpretation, or decision will be final and binding on Contractor, unless it appeals by submitting a Change Proposal, and on Owner, unless it appeals by filing a Claim.

C. If a submitted matter in question concerns terms and conditions of the Contract Documents that do not involve (1) the performance or acceptability of the Work under the Contract Documents, (2) the design (as set forth in the Drawings, Specifications, or otherwise), or (3) other engineering or technical matters, then Engineer will promptly notify Owner and Contractor in writing that Engineer is unable to provide a decision or interpretation. If Owner and Contractor are unable to agree on resolution of such a matter in question, either party may pursue resolution as provided in Article 12.

3.05 *Reuse of Documents*

A. Contractor and its Subcontractors and Suppliers shall not:

1. have or acquire any title to or ownership rights in any of the Drawings, Specifications, or other documents (or copies of any thereof) prepared by or bearing the seal of Engineer or its consultants, including electronic media versions, or reuse any such Drawings, Specifications, other documents, or copies thereof on extensions of the Project or any other project without written consent of Owner and Engineer and specific written verification or adaptation by Engineer; or

2. have or acquire any title or ownership rights in any other Contract Documents, reuse any such Contract Documents for any purpose without Owner's express written consent, or violate any copyrights pertaining to such Contract Documents.

B. The prohibitions of this Paragraph 3.05 will survive final payment, or termination of the Contract. Nothing herein precludes Contractor from retaining copies of the Contract Documents for record purposes.

ARTICLE 4—COMMENCEMENT AND PROGRESS OF THE WORK

4.01 *Commencement of Contract Times; Notice to Proceed*

A. The Contract Times will commence to run on the 30th day after the Effective Date of the Contract or, if a Notice to Proceed is given, on the day indicated in the Notice to Proceed. A Notice to Proceed may be given at any time within 30 days after the Effective Date of the Contract. In no event will the Contract Times commence to run later than the 60th day after the day of Bid opening or the 30th day after the Effective Date of the Contract, whichever date is earlier.

4.02 *Starting the Work*

A. Contractor shall start to perform the Work on the date when the Contract Times commence to run. No Work may be done at the Site prior to such date.

4.03 *Reference Points*

A. Owner shall provide engineering surveys to establish reference points for construction which in Engineer's judgment are necessary to enable Contractor to proceed with the Work. Contractor shall be responsible for laying out the Work, shall protect and preserve the

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

established reference points and property monuments, and shall make no changes or relocations without the prior written approval of Owner. Contractor shall report to Engineer whenever any reference point or property monument is lost or destroyed or requires relocation because of necessary changes in grades or locations, and shall be responsible for the accurate replacement or relocation of such reference points or property monuments by professionally qualified personnel.

4.04 *Progress Schedule*

A. Contractor shall adhere to the Progress Schedule established in accordance with Paragraph 2.05 as it may be adjusted from time to time as provided below.

1. Contractor shall submit to Engineer for acceptance (to the extent indicated in Paragraph 2.05) proposed adjustments in the Progress Schedule that will not result in changing the Contract Times.

2. Proposed adjustments in the Progress Schedule that will change the Contract Times must be submitted in accordance with the requirements of Article 11.

B. Contractor shall carry on the Work and adhere to the Progress Schedule during all disputes or disagreements with Owner. No Work will be delayed or postponed pending resolution of any disputes or disagreements, or during any appeal process, except as permitted by Paragraph 16.04, or as Owner and Contractor may otherwise agree in writing.

4.05 *Delays in Contractor's Progress*

A. If Owner, Engineer, or anyone for whom Owner is responsible, delays, disrupts, or interferes with the performance or progress of the Work, then Contractor shall be entitled to an equitable adjustment in Contract Price or Contract Times.

B. Contractor shall not be entitled to an adjustment in Contract Price or Contract Times for delay, disruption, or interference caused by or within the control of Contractor. Delay, disruption, and interference attributable to and within the control of a Subcontractor or Supplier shall be deemed to be within the control of Contractor.

C. If Contractor's performance or progress is delayed, disrupted, or interfered with by unanticipated causes not the fault of and beyond the control of Owner, Contractor, and those for which they are responsible, then Contractor shall be entitled to an equitable adjustment in Contract Times. Such an adjustment will be Contractor's sole and exclusive remedy for the delays, disruption, and interference described in this paragraph. Causes of delay, disruption, or interference that may give rise to an adjustment in Contract Times under this paragraph include but are not limited to the following:

1. Severe and unavoidable natural catastrophes such as fires, floods, epidemics, and earthquakes;

2. Abnormal weather conditions;

3. Acts or failures to act of third-party utility owners or other third-party entities (other than those third-party utility owners or other third-party entities performing other work at or adjacent to the Site as arranged by or under contract with Owner, as contemplated in Article 8); and

4. Acts of war or terrorism.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

D. Contractor's entitlement to an adjustment of Contract Times or Contract Price is limited as follows:

1. Contractor's entitlement to an adjustment of the Contract Times is conditioned on the delay, disruption, or interference adversely affecting an activity on the critical path to completion of the Work, as of the time of the delay, disruption, or interference.

2. Contractor shall not be entitled to an adjustment in Contract Price for any delay, disruption, or interference if such delay is concurrent with a delay, disruption, or interference caused by or within the control of Contractor. Such a concurrent delay by Contractor shall not preclude an adjustment of Contract Times to which Contractor is otherwise entitled.

3. Adjustments of Contract Times or Contract Price are subject to the provisions of Article 11.

E. Each Contractor request or Change Proposal seeking an increase in Contract Times or Contract Price must be supplemented by supporting data that sets forth in detail the following:

1. The circumstances that form the basis for the requested adjustment;

2. The date upon which each cause of delay, disruption, or interference began to affect the progress of the Work;

3. The date upon which each cause of delay, disruption, or interference ceased to affect the progress of the Work;

4. The number of days' increase in Contract Times claimed as a consequence of each such cause of delay, disruption, or interference; and

5. The impact on Contract Price, in accordance with the provisions of Paragraph 11.07.

Contractor shall also furnish such additional supporting documentation as Owner or Engineer may require including, where appropriate, a revised progress schedule indicating all the activities affected by the delay, disruption, or interference, and an explanation of the effect of the delay, disruption, or interference on the critical path to completion of the Work.

F. Delays, disruption, and interference to the performance or progress of the Work resulting from the existence of a differing subsurface or physical condition, an Underground Facility that was not shown or indicated by the Contract Documents, or not shown or indicated with reasonable accuracy, and those resulting from Hazardous Environmental Conditions, are governed by Article 5, together with the provisions of Paragraphs 4.05.D and 4.05.E.

G. Paragraph 8.03 addresses delays, disruption, and interference to the performance or progress of the Work resulting from the performance of certain other work at or adjacent to the Site.

ARTICLE 5—SITE; SUBSURFACE AND PHYSICAL CONDITIONS; HAZARDOUS ENVIRONMENTAL CONDITIONS

5.01 *Availability of Lands*

A. Owner shall furnish the Site. Owner shall notify Contractor in writing of any encumbrances or restrictions not of general application but specifically related to use of the Site with which Contractor must comply in performing the Work.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

B. Upon reasonable written request, Owner shall furnish Contractor with a current statement of record legal title and legal description of the lands upon which permanent improvements are to be made and Owner's interest therein as necessary for giving notice of or filing a mechanic's or construction lien against such lands in accordance with applicable Laws and Regulations.

C. Contractor shall provide for all additional lands and access thereto that may be required for temporary construction facilities or storage of materials and equipment.

5.02 *Use of Site and Other Areas*

A. *Limitation on Use of Site and Other Areas*

1. Contractor shall confine construction equipment, temporary construction facilities, the storage of materials and equipment, and the operations of workers to the Site, adjacent areas that Contractor has arranged to use through construction easements or otherwise, and other adjacent areas permitted by Laws and Regulations, and shall not unreasonably encumber the Site and such other adjacent areas with construction equipment or other materials or equipment. Contractor shall assume full responsibility for (a) damage to the Site; (b) damage to any such other adjacent areas used for Contractor's operations; (c) damage to any other adjacent land or areas, or to improvements, structures, utilities, or similar facilities located at such adjacent lands or areas; and (d) for injuries and losses sustained by the owners or occupants of any such land or areas; provided that such damage or injuries result from the performance of the Work or from other actions or conduct of the Contractor or those for which Contractor is responsible.

2. If a damage or injury claim is made by the owner or occupant of any such land or area because of the performance of the Work, or because of other actions or conduct of the Contractor or those for which Contractor is responsible, Contractor shall (a) take immediate corrective or remedial action as required by Paragraph 7.13, or otherwise; (b) promptly attempt to settle the claim as to all parties through negotiations with such owner or occupant, or otherwise resolve the claim by arbitration or other dispute resolution proceeding, or in a court of competent jurisdiction; and (c) to the fullest extent permitted by Laws and Regulations, indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each and any of them, from and against any such claim, and against all costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to any claim or action, legal or equitable, brought by any such owner or occupant against Owner, Engineer, or any other party indemnified hereunder to the extent caused directly or indirectly, in whole or in part by, or based upon, Contractor's performance of the Work, or because of other actions or conduct of the Contractor or those for which Contractor is responsible.

B. *Removal of Debris During Performance of the Work*: During the progress of the Work the Contractor shall keep the Site and other adjacent areas free from accumulations of waste materials, rubbish, and other debris. Removal and disposal of such waste materials, rubbish, and other debris will conform to applicable Laws and Regulations.

C. *Cleaning*: Prior to Substantial Completion of the Work Contractor shall clean the Site and the Work and make it ready for utilization by Owner. At the completion of the Work Contractor shall remove from the Site and adjacent areas all tools, appliances, construction equipment

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

and machinery, and surplus materials and shall restore to original condition all property not designated for alteration by the Contract Documents.

D. *Loading of Structures*: Contractor shall not load nor permit any part of any structure to be loaded in any manner that will endanger the structure, nor shall Contractor subject any part of the Work or adjacent structures or land to stresses or pressures that will endanger them.

5.03 *Subsurface and Physical Conditions*

A. *Reports and Drawings*: The Supplementary Conditions identify:

1. Those reports of explorations and tests of subsurface conditions at or adjacent to the Site that contain Technical Data;

2. Those drawings of existing physical conditions at or adjacent to the Site, including those drawings depicting existing surface or subsurface structures at or adjacent to the Site (except Underground Facilities), that contain Technical Data; and

3. Technical Data contained in such reports and drawings.

B. *Underground Facilities*: Underground Facilities are shown or indicated on the Drawings, pursuant to Paragraph 5.05, and not in the drawings referred to in Paragraph 5.03.A. Information and data regarding the presence or location of Underground Facilities are not intended to be categorized, identified, or defined as Technical Data.

C. *Reliance by Contractor on Technical Data*: Contractor may rely upon the accuracy of the Technical Data expressly identified in the Supplementary Conditions with respect to such reports and drawings, but such reports and drawings are not Contract Documents. If no such express identification has been made, then Contractor may rely upon the accuracy of the Technical Data as defined in Paragraph 1.01.A.46.b.

D. *Limitations of Other Data and Documents*: Except for such reliance on Technical Data, Contractor may not rely upon or make any claim against Owner or Engineer, or any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors, with respect to:

1. the completeness of such reports and drawings for Contractor's purposes, including, but not limited to, any aspects of the means, methods, techniques, sequences, and procedures of construction to be employed by Contractor, and safety precautions and programs incident thereto;

2. other data, interpretations, opinions, and information contained in such reports or shown or indicated in such drawings;

3. the contents of other Site-related documents made available to Contractor, such as record drawings from other projects at or adjacent to the Site, or Owner's archival documents concerning the Site; or

4. any Contractor interpretation of or conclusion drawn from any Technical Data or any such other data, interpretations, opinions, or information.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

5.04 *Differing Subsurface or Physical Conditions*

A. *Notice by Contractor*: If Contractor believes that any subsurface or physical condition that is uncovered or revealed at the Site:

1. is of such a nature as to establish that any Technical Data on which Contractor is entitled to rely as provided in Paragraph 5.03 is materially inaccurate;

2. is of such a nature as to require a change in the Drawings or Specifications;

3. differs materially from that shown or indicated in the Contract Documents; or

4. is of an unusual nature, and differs materially from conditions ordinarily encountered and generally recognized as inherent in work of the character provided for in the Contract Documents;

then Contractor shall, promptly after becoming aware thereof and before further disturbing the subsurface or physical conditions or performing any Work in connection therewith (except in an emergency as required by Paragraph 7.15), notify Owner and Engineer in writing about such condition. Contractor shall not further disturb such condition or perform any Work in connection therewith (except with respect to an emergency) until receipt of a written statement permitting Contractor to do so.

B. *Engineer's Review*: After receipt of written notice as required by the preceding paragraph, Engineer will promptly review the subsurface or physical condition in question; determine whether it is necessary for Owner to obtain additional exploration or tests with respect to the condition; conclude whether the condition falls within any one or more of the differing site condition categories in Paragraph 5.04.A; obtain any pertinent cost or schedule information from Contractor; prepare recommendations to Owner regarding the Contractor's resumption of Work in connection with the subsurface or physical condition in question and the need for any change in the Drawings or Specifications; and advise Owner in writing of Engineer's findings, conclusions, and recommendations.

C. *Owner's Statement to Contractor Regarding Site Condition*: After receipt of Engineer's written findings, conclusions, and recommendations, Owner shall issue a written statement to Contractor (with a copy to Engineer) regarding the subsurface or physical condition in question, addressing the resumption of Work in connection with such condition, indicating whether any change in the Drawings or Specifications will be made, and adopting or rejecting Engineer's written findings, conclusions, and recommendations, in whole or in part.

D. *Early Resumption of Work*: If at any time Engineer determines that Work in connection with the subsurface or physical condition in question may resume prior to completion of Engineer's review or Owner's issuance of its statement to Contractor, because the condition in question has been adequately documented, and analyzed on a preliminary basis, then the Engineer may at its discretion instruct Contractor to resume such Work.

E. *Possible Price and Times Adjustments*

1. Contractor shall be entitled to an equitable adjustment in Contract Price or Contract Times, to the extent that the existence of a differing subsurface or physical condition, or any related delay, disruption, or interference, causes an increase or decrease in

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Contractor's cost of, or time required for, performance of the Work; subject, however, to the following:

a. Such condition must fall within any one or more of the categories described in Paragraph 5.04.A;

b. With respect to Work that is paid for on a unit price basis, any adjustment in Contract Price will be subject to the provisions of Paragraph 13.03; and,

c. Contractor's entitlement to an adjustment of the Contract Times is subject to the provisions of Paragraphs 4.05.D and 4.05.E.

2. Contractor shall not be entitled to any adjustment in the Contract Price or Contract Times with respect to a subsurface or physical condition if:

a. Contractor knew of the existence of such condition at the time Contractor made a commitment to Owner with respect to Contract Price and Contract Times by the submission of a Bid or becoming bound under a negotiated contract, or otherwise;

b. The existence of such condition reasonably could have been discovered or revealed as a result of any examination, investigation, exploration, test, or study of the Site and contiguous areas expressly required by the Bidding Requirements or Contract Documents to be conducted by or for Contractor prior to Contractor's making such commitment; or

c. Contractor failed to give the written notice required by Paragraph 5.04.A.

3. If Owner and Contractor agree regarding Contractor's entitlement to and the amount or extent of any adjustment in the Contract Price or Contract Times, then any such adjustment will be set forth in a Change Order.

4. Contractor may submit a Change Proposal regarding its entitlement to or the amount or extent of any adjustment in the Contract Price or Contract Times, no later than 30 days after Owner's issuance of the Owner's written statement to Contractor regarding the subsurface or physical condition in question.

F. *Underground Facilities; Hazardous Environmental Conditions*: Paragraph 5.05 governs rights and responsibilities regarding the presence or location of Underground Facilities. Paragraph 5.06 governs rights and responsibilities regarding Hazardous Environmental Conditions. The provisions of Paragraphs 5.03 and 5.04 are not applicable to the presence or location of Underground Facilities, or to Hazardous Environmental Conditions.

5.05 *Underground Facilities*

A. *Contractor's Responsibilities*: Unless it is otherwise expressly provided in the Supplementary Conditions, the cost of all of the following are included in the Contract Price, and Contractor shall have full responsibility for:

1. reviewing and checking all information and data regarding existing Underground Facilities at the Site;

2. complying with applicable state and local utility damage prevention Laws and Regulations;

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

3. verifying the actual location of those Underground Facilities shown or indicated in the Contract Documents as being within the area affected by the Work, by exposing such Underground Facilities during the course of construction;

4. coordination of the Work with the owners (including Owner) of such Underground Facilities, during construction; and

5. the safety and protection of all existing Underground Facilities at the Site, and repairing any damage thereto resulting from the Work.

B. *Notice by Contractor*: If Contractor believes that an Underground Facility that is uncovered or revealed at the Site was not shown or indicated on the Drawings, or was not shown or indicated on the Drawings with reasonable accuracy, then Contractor shall, promptly after becoming aware thereof and before further disturbing conditions affected thereby or performing any Work in connection therewith (except in an emergency as required by Paragraph 7.15), notify Owner and Engineer in writing regarding such Underground Facility.

C. *Engineer's Review*: Engineer will:

1. promptly review the Underground Facility and conclude whether such Underground Facility was not shown or indicated on the Drawings, or was not shown or indicated with reasonable accuracy;

2. identify and communicate with the owner of the Underground Facility; prepare recommendations to Owner (and if necessary issue any preliminary instructions to Contractor) regarding the Contractor's resumption of Work in connection with the Underground Facility in question;

3. obtain any pertinent cost or schedule information from Contractor; determine the extent, if any, to which a change is required in the Drawings or Specifications to reflect and document the consequences of the existence or location of the Underground Facility; and

4. advise Owner in writing of Engineer's findings, conclusions, and recommendations.

During such time, Contractor shall be responsible for the safety and protection of such Underground Facility.

D. *Owner's Statement to Contractor Regarding Underground Facility*: After receipt of Engineer's written findings, conclusions, and recommendations, Owner shall issue a written statement to Contractor (with a copy to Engineer) regarding the Underground Facility in question addressing the resumption of Work in connection with such Underground Facility, indicating whether any change in the Drawings or Specifications will be made, and adopting or rejecting Engineer's written findings, conclusions, and recommendations in whole or in part.

E. *Early Resumption of Work*: If at any time Engineer determines that Work in connection with the Underground Facility may resume prior to completion of Engineer's review or Owner's issuance of its statement to Contractor, because the Underground Facility in question and conditions affected by its presence have been adequately documented, and analyzed on a preliminary basis, then the Engineer may at its discretion instruct Contractor to resume such Work.

F. *Possible Price and Times Adjustments*

1. Contractor shall be entitled to an equitable adjustment in the Contract Price or Contract Times, to the extent that any existing Underground Facility at the Site that was not shown

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

or indicated on the Drawings, or was not shown or indicated with reasonable accuracy, or any related delay, disruption, or interference, causes an increase or decrease in Contractor's cost of, or time required for, performance of the Work; subject, however, to the following:

a. With respect to Work that is paid for on a unit price basis, any adjustment in Contract Price will be subject to the provisions of Paragraph 13.03;

b. Contractor's entitlement to an adjustment of the Contract Times is subject to the provisions of Paragraphs 4.05.D and 4.05.E; and

c. Contractor gave the notice required in Paragraph 5.05.B.

2. If Owner and Contractor agree regarding Contractor's entitlement to and the amount or extent of any adjustment in the Contract Price or Contract Times, then any such adjustment will be set forth in a Change Order.

3. Contractor may submit a Change Proposal regarding its entitlement to or the amount or extent of any adjustment in the Contract Price or Contract Times, no later than 30 days after Owner's issuance of the Owner's written statement to Contractor regarding the Underground Facility in question.

4. The information and data shown or indicated on the Drawings with respect to existing Underground Facilities at the Site is based on information and data (a) furnished by the owners of such Underground Facilities, or by others, (b) obtained from available records, or (c) gathered in an investigation conducted in accordance with the current edition of ASCE 38, Standard Guideline for the Collection and Depiction of Existing Subsurface Utility Data, by the American Society of Civil Engineers. If such information or data is incorrect or incomplete, Contractor's remedies are limited to those set forth in this Paragraph 5.05.F.

5.06 *Hazardous Environmental Conditions at Site*

A. *Reports and Drawings*: The Supplementary Conditions identify:

1. those reports known to Owner relating to Hazardous Environmental Conditions that have been identified at or adjacent to the Site;

2. drawings known to Owner relating to Hazardous Environmental Conditions that have been identified at or adjacent to the Site; and

3. Technical Data contained in such reports and drawings.

B. *Reliance by Contractor on Technical Data Authorized*: Contractor may rely upon the accuracy of the Technical Data expressly identified in the Supplementary Conditions with respect to such reports and drawings, but such reports and drawings are not Contract Documents. If no such express identification has been made, then Contractor may rely on the accuracy of the Technical Data as defined in Paragraph 1.01.A.46.b. Except for such reliance on Technical Data, Contractor may not rely upon or make any claim against Owner or Engineer, or any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors, with respect to:

1. the completeness of such reports and drawings for Contractor's purposes, including, but not limited to, any aspects of the means, methods, techniques, sequences and procedures

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

of construction to be employed by Contractor, and safety precautions and programs incident thereto;

2. other data, interpretations, opinions, and information contained in such reports or shown or indicated in such drawings; or

3. any Contractor interpretation of or conclusion drawn from any Technical Data or any such other data, interpretations, opinions or information.

C. Contractor shall not be responsible for removing or remediating any Hazardous Environmental Condition encountered, uncovered, or revealed at the Site unless such removal or remediation is expressly identified in the Contract Documents to be within the scope of the Work.

D. Contractor shall be responsible for controlling, containing, and duly removing all Constituents of Concern brought to the Site by Contractor, Subcontractors, Suppliers, or anyone else for whom Contractor is responsible, and for any associated costs; and for the costs of removing and remediating any Hazardous Environmental Condition created by the presence of any such Constituents of Concern.

E. If Contractor encounters, uncovers, or reveals a Hazardous Environmental Condition whose removal or remediation is not expressly identified in the Contract Documents as being within the scope of the Work, or if Contractor or anyone for whom Contractor is responsible creates a Hazardous Environmental Condition, then Contractor shall immediately: (1) secure or otherwise isolate such condition; (2) stop all Work in connection with such condition and in any area affected thereby (except in an emergency as required by Paragraph 7.15); and (3) notify Owner and Engineer (and promptly thereafter confirm such notice in writing). Owner shall promptly consult with Engineer concerning the necessity for Owner to retain a qualified expert to evaluate such condition or take corrective action, if any. Promptly after consulting with Engineer, Owner shall take such actions as are necessary to permit Owner to timely obtain required permits and provide Contractor the written notice required by Paragraph 5.06.F. If Contractor or anyone for whom Contractor is responsible created the Hazardous Environmental Condition in question, then Owner may remove and remediate the Hazardous Environmental Condition, and impose a set-off against payments to account for the associated costs.

F. Contractor shall not resume Work in connection with such Hazardous Environmental Condition or in any affected area until after Owner has obtained any required permits related thereto, and delivered written notice to Contractor either (1) specifying that such condition and any affected area is or has been rendered safe for the resumption of Work, or (2) specifying any special conditions under which such Work may be resumed safely.

G. If Owner and Contractor cannot agree as to entitlement to or on the amount or extent, if any, of any adjustment in Contract Price or Contract Times, as a result of such Work stoppage, such special conditions under which Work is agreed to be resumed by Contractor, or any costs or expenses incurred in response to the Hazardous Environmental Condition, then within 30 days of Owner's written notice regarding the resumption of Work, Contractor may submit a Change Proposal, or Owner may impose a set-off. Entitlement to any such adjustment is subject to the provisions of Paragraphs 4.05.D, 4.05.E, 11.07, and 11.08.

H. If, after receipt of such written notice, Contractor does not agree to resume such Work based on a reasonable belief it is unsafe, or does not agree to resume such Work under such special

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

conditions, then Owner may order the portion of the Work that is in the area affected by such condition to be deleted from the Work, following the contractual change procedures in Article 11. Owner may have such deleted portion of the Work performed by Owner's own forces or others in accordance with Article 8.

I. To the fullest extent permitted by Laws and Regulations, Owner shall indemnify and hold harmless Contractor, Subcontractors, and Engineer, and the officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them, from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals, and all court, arbitration, or other dispute resolution costs) arising out of or relating to a Hazardous Environmental Condition, provided that such Hazardous Environmental Condition (1) was not shown or indicated in the Drawings, Specifications, or other Contract Documents, identified as Technical Data entitled to limited reliance pursuant to Paragraph 5.06.B, or identified in the Contract Documents to be included within the scope of the Work, and (2) was not created by Contractor or by anyone for whom Contractor is responsible. Nothing in this Paragraph 5.06.I obligates Owner to indemnify any individual or entity from and against the consequences of that individual's or entity's own negligence.

J. To the fullest extent permitted by Laws and Regulations, Contractor shall indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them, from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to the failure to control, contain, or remove a Constituent of Concern brought to the Site by Contractor or by anyone for whom Contractor is responsible, or to a Hazardous Environmental Condition created by Contractor or by anyone for whom Contractor is responsible. Nothing in this Paragraph 5.06.J obligates Contractor to indemnify any individual or entity from and against the consequences of that individual's or entity's own negligence.

K. The provisions of Paragraphs 5.03, 5.04, and 5.05 do not apply to the presence of Constituents of Concern or to a Hazardous Environmental Condition uncovered or revealed at the Site.

ARTICLE 6—BONDS AND INSURANCE

6.01 *Performance, Payment, and Other Bonds*

A. Contractor shall furnish a performance bond and a payment bond, each in an amount at least equal to the Contract Price, as security for the faithful performance and payment of Contractor's obligations under the Contract. These bonds must remain in effect until one year after the date when final payment becomes due or until completion of the correction period specified in Paragraph 15.08, whichever is later, except as provided otherwise by Laws or Regulations, the terms of a prescribed bond form, the Supplementary Conditions, or other provisions of the Contract.

B. Contractor shall also furnish such other bonds (if any) as are required by the Supplementary Conditions or other provisions of the Contract.

C. All bonds must be in the form included in the Bidding Documents or otherwise specified by Owner prior to execution of the Contract, except as provided otherwise by Laws or

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Regulations, and must be issued and signed by a surety named in "Companies Holding Certificates of Authority as Acceptable Sureties on Federal Bonds and as Acceptable Reinsuring Companies" as published in Department Circular 570 (as amended and supplemented) by the Bureau of the Fiscal Service, U.S. Department of the Treasury. A bond signed by an agent or attorney-in-fact must be accompanied by a certified copy of that individual's authority to bind the surety. The evidence of authority must show that it is effective on the date the agent or attorney-in-fact signed the accompanying bond.

D. Contractor shall obtain the required bonds from surety companies that are duly licensed or authorized, in the state or jurisdiction in which the Project is located, to issue bonds in the required amounts.

E. If the surety on a bond furnished by Contractor is declared bankrupt or becomes insolvent, or the surety ceases to meet the requirements above, then Contractor shall promptly notify Owner and Engineer in writing and shall, within 20 days after the event giving rise to such notification, provide another bond and surety, both of which must comply with the bond and surety requirements above.

F. If Contractor has failed to obtain a required bond, Owner may exclude the Contractor from the Site and exercise Owner's termination rights under Article 16.

G. Upon request to Owner from any Subcontractor, Supplier, or other person or entity claiming to have furnished labor, services, materials, or equipment used in the performance of the Work, Owner shall provide a copy of the payment bond to such person or entity.

H. Upon request to Contractor from any Subcontractor, Supplier, or other person or entity claiming to have furnished labor, services, materials, or equipment used in the performance of the Work, Contractor shall provide a copy of the payment bond to such person or entity.

6.02 *Insurance—General Provisions*

A. Owner and Contractor shall obtain and maintain insurance as required in this article and in the Supplementary Conditions.

B. All insurance required by the Contract to be purchased and maintained by Owner or Contractor shall be obtained from insurance companies that are duly licensed or authorized in the state or jurisdiction in which the Project is located to issue insurance policies for the required limits and coverages. Unless a different standard is indicated in the Supplementary Conditions, all companies that provide insurance policies required under this Contract shall have an A.M. Best rating of A-VII or better.

C. Alternative forms of insurance coverage, including but not limited to self-insurance and "Occupational Accident and Excess Employer's Indemnity Policies," are not sufficient to meet the insurance requirements of this Contract, unless expressly allowed in the Supplementary Conditions.

D. Contractor shall deliver to Owner, with copies to each additional insured identified in the Contract, certificates of insurance and endorsements establishing that Contractor has obtained and is maintaining the policies and coverages required by the Contract. Upon request by Owner or any other insured, Contractor shall also furnish other evidence of such required insurance, including but not limited to copies of policies, documentation of applicable self-insured retentions (if allowed) and deductibles, full disclosure of all relevant exclusions, and evidence of insurance required to be purchased and maintained by

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Subcontractors or Suppliers. In any documentation furnished under this provision, Contractor, Subcontractors, and Suppliers may block out (redact) (1) any confidential premium or pricing information and (2) any wording specific to a project or jurisdiction other than those applicable to this Contract.

E. Owner shall deliver to Contractor, with copies to each additional insured identified in the Contract, certificates of insurance and endorsements establishing that Owner has obtained and is maintaining the policies and coverages required of Owner by the Contract (if any). Upon request by Contractor or any other insured, Owner shall also provide other evidence of such required insurance (if any), including but not limited to copies of policies, documentation of applicable self-insured retentions (if allowed) and deductibles, and full disclosure of all relevant exclusions. In any documentation furnished under this provision, Owner may block out (redact) (1) any confidential premium or pricing information and (2) any wording specific to a project or jurisdiction other than those relevant to this Contract.

F. Failure of Owner or Contractor to demand such certificates or other evidence of the other party's full compliance with these insurance requirements, or failure of Owner or Contractor to identify a deficiency in compliance from the evidence provided, will not be construed as a waiver of the other party's obligation to obtain and maintain such insurance.

G. In addition to the liability insurance required to be provided by Contractor, the Owner, at Owner's option, may purchase and maintain Owner's own liability insurance. Owner's liability policies, if any, operate separately and independently from policies required to be provided by Contractor, and Contractor cannot rely upon Owner's liability policies for any of Contractor's obligations to the Owner, Engineer, or third parties.

H. Contractor shall require:

1. Subcontractors to purchase and maintain worker's compensation, commercial general liability, and other insurance that is appropriate for their participation in the Project, and to name as additional insureds Owner and Engineer (and any other individuals or entities identified in the Supplementary Conditions as additional insureds on Contractor's liability policies) on each Subcontractor's commercial general liability insurance policy; and

2. Suppliers to purchase and maintain insurance that is appropriate for their participation in the Project.

I. If either party does not purchase or maintain the insurance required of such party by the Contract, such party shall notify the other party in writing of such failure to purchase prior to the start of the Work, or of such failure to maintain prior to any change in the required coverage.

J. If Contractor has failed to obtain and maintain required insurance, Contractor's entitlement to enter or remain at the Site will end immediately, and Owner may impose an appropriate set-off against payment for any associated costs (including but not limited to the cost of purchasing necessary insurance coverage), and exercise Owner's termination rights under Article 16.

K. Without prejudice to any other right or remedy, if a party has failed to obtain required insurance, the other party may elect (but is in no way obligated) to obtain equivalent insurance to protect such other party's interests at the expense of the party who was required to provide such coverage, and the Contract Price will be adjusted accordingly.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

L. Owner does not represent that insurance coverage and limits established in this Contract necessarily will be adequate to protect Contractor or Contractor's interests. Contractor is responsible for determining whether such coverage and limits are adequate to protect its interests, and for obtaining and maintaining any additional insurance that Contractor deems necessary.

M. The insurance and insurance limits required herein will not be deemed as a limitation on Contractor's liability, or that of its Subcontractors or Suppliers, under the indemnities granted to Owner and other individuals and entities in the Contract or otherwise.

N. All the policies of insurance required to be purchased and maintained under this Contract will contain a provision or endorsement that the coverage afforded will not be canceled, or renewal refused, until at least 10 days prior written notice has been given to the purchasing policyholder. Within three days of receipt of any such written notice, the purchasing policyholder shall provide a copy of the notice to each other insured and Engineer.

6.03 *Contractor's Insurance*

A. *Required Insurance*: Contractor shall purchase and maintain Worker's Compensation, Commercial General Liability, and other insurance pursuant to the specific requirements of the Supplementary Conditions.

B. *General Provisions*: The policies of insurance required by this Paragraph 6.03 as supplemented must:

1. include at least the specific coverages required;

2. be written for not less than the limits provided, or those required by Laws or Regulations, whichever is greater;

3. remain in effect at least until the Work is complete (as set forth in Paragraph 15.06.D), and longer if expressly required elsewhere in this Contract, and at all times thereafter when Contractor may be correcting, removing, or replacing defective Work as a warranty or correction obligation, or otherwise, or returning to the Site to conduct other tasks arising from the Contract;

4. apply with respect to the performance of the Work, whether such performance is by Contractor, any Subcontractor or Supplier, or by anyone directly or indirectly employed by any of them to perform any of the Work, or by anyone for whose acts any of them may be liable; and

5. include all necessary endorsements to support the stated requirements.

C. *Additional Insureds*: The Contractor's commercial general liability, automobile liability, employer's liability, umbrella or excess, pollution liability, and unmanned aerial vehicle liability policies, if required by this Contract, must:

1. include and list as additional insureds Owner and Engineer, and any individuals or entities identified as additional insureds in the Supplementary Conditions;

2. include coverage for the respective officers, directors, members, partners, employees, and consultants of all such additional insureds;

3. afford primary coverage to these additional insureds for all claims covered thereby (including as applicable those arising from both ongoing and completed operations);

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

4. not seek contribution from insurance maintained by the additional insured; and

5. as to commercial general liability insurance, apply to additional insureds with respect to liability caused in whole or in part by Contractor's acts or omissions, or the acts and omissions of those working on Contractor's behalf, in the performance of Contractor's operations.

6.04 *Builder's Risk and Other Property Insurance*

A. *Builder's Risk*: Unless otherwise provided in the Supplementary Conditions, Contractor shall purchase and maintain builder's risk insurance upon the Work on a completed value basis, in the amount of the Work's full insurable replacement cost (subject to such deductible amounts as may be provided in the Supplementary Conditions or required by Laws and Regulations). The specific requirements applicable to the builder's risk insurance are set forth in the Supplementary Conditions.

B. *Property Insurance for Facilities of Owner Where Work Will Occur*: Owner is responsible for obtaining and maintaining property insurance covering each existing structure, building, or facility in which any part of the Work will occur, or to which any part of the Work will attach or be adjoined. Such property insurance will be written on a special perils (all-risk) form, on a replacement cost basis, providing coverage consistent with that required for the builder's risk insurance, and will be maintained until the Work is complete, as set forth in Paragraph 15.06.D.

C. *Property Insurance for Substantially Complete Facilities*: Promptly after Substantial Completion, and before actual occupancy or use of the substantially completed Work, Owner will obtain property insurance for such substantially completed Work, and maintain such property insurance at least until the Work is complete, as set forth in Paragraph 15.06.D. Such property insurance will be written on a special perils (all-risk) form, on a replacement cost basis, and provide coverage consistent with that required for the builder's risk insurance. The builder's risk insurance may terminate upon written confirmation of Owner's procurement of such property insurance.

D. *Partial Occupancy or Use by Owner*: If Owner will occupy or use a portion or portions of the Work prior to Substantial Completion of all the Work, as provided in Paragraph 15.04, then Owner (directly, if it is the purchaser of the builder's risk policy, or through Contractor) will provide advance notice of such occupancy or use to the builder's risk insurer, and obtain an endorsement consenting to the continuation of coverage prior to commencing such partial occupancy or use.

E. *Insurance of Other Property; Additional Insurance*: If the express insurance provisions of the Contract do not require or address the insurance of a property item or interest, then the entity or individual owning such property item will be responsible for insuring it. If Contractor elects to obtain other special insurance to be included in or supplement the builder's risk or property insurance policies provided under this Paragraph 6.04, it may do so at Contractor's expense.

6.05 *Property Losses; Subrogation*

A. The builder's risk insurance policy purchased and maintained in accordance with Paragraph 6.04 (or an installation floater policy if authorized by the Supplementary Conditions), will contain provisions to the effect that in the event of payment of any loss or damage the insurer will have no rights of recovery against any insureds thereunder, or against

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Engineer or its consultants, or their officers, directors, members, partners, employees, agents, consultants, or subcontractors.

1. Owner and Contractor waive all rights against each other and the respective officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them, for all losses and damages caused by, arising out of, or resulting from any of the perils, risks, or causes of loss covered by such policies and any other property insurance applicable to the Work; and, in addition, waive all such rights against Engineer, its consultants, all individuals or entities identified in the Supplementary Conditions as builder's risk or installation floater insureds, and the officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them, under such policies for losses and damages so caused.
2. None of the above waivers extends to the rights that any party making such waiver may have to the proceeds of insurance held by Owner or Contractor as trustee or fiduciary, or otherwise payable under any policy so issued.

B. Any property insurance policy maintained by Owner covering any loss, damage, or consequential loss to Owner's existing structures, buildings, or facilities in which any part of the Work will occur, or to which any part of the Work will attach or adjoin; to adjacent structures, buildings, or facilities of Owner; or to part or all of the completed or substantially completed Work, during partial occupancy or use pursuant to Paragraph 15.04, after Substantial Completion pursuant to Paragraph 15.03, or after final payment pursuant to Paragraph 15.06, will contain provisions to the effect that in the event of payment of any loss or damage the insurer will have no rights of recovery against any insureds thereunder, or against Contractor, Subcontractors, or Engineer, or the officers, directors, members, partners, employees, agents, consultants, or subcontractors of each and any of them, and that the insured is allowed to waive the insurer's rights of subrogation in a written contract executed prior to the loss, damage, or consequential loss.

1. Owner waives all rights against Contractor, Subcontractors, and Engineer, and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each and any of them, for all losses and damages caused by, arising out of, or resulting from fire or any of the perils, risks, or causes of loss covered by such policies.

C. The waivers in this Paragraph 6.05 include the waiver of rights due to business interruption, loss of use, or other consequential loss extending beyond direct physical loss or damage to Owner's property or the Work caused by, arising out of, or resulting from fire or other insured peril, risk, or cause of loss.

D. Contractor shall be responsible for assuring that each Subcontract contains provisions whereby the Subcontractor waives all rights against Owner, Contractor, all individuals or entities identified in the Supplementary Conditions as insureds, the Engineer and its consultants, and the officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them, for all losses and damages caused by, arising out of, relating to, or resulting from fire or other peril, risk, or cause of loss covered by builder's risk insurance, installation floater, and any other property insurance applicable to the Work.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

6.06 *Receipt and Application of Property Insurance Proceeds*

A. Any insured loss under the builder's risk and other policies of property insurance required by Paragraph 6.04 will be adjusted and settled with the named insured that purchased the policy. Such named insured shall act as fiduciary for the other insureds, and give notice to such other insureds that adjustment and settlement of a claim is in progress. Any other insured may state its position regarding a claim for insured loss in writing within 15 days after notice of such claim.

B. Proceeds for such insured losses may be made payable by the insurer either jointly to multiple insureds, or to the named insured that purchased the policy in its own right and as fiduciary for other insureds, subject to the requirements of any applicable mortgage clause. A named insured receiving insurance proceeds under the builder's risk and other policies of insurance required by Paragraph 6.04 shall maintain such proceeds in a segregated account, and distribute such proceeds in accordance with such agreement as the parties in interest may reach, or as otherwise required under the dispute resolution provisions of this Contract or applicable Laws and Regulations.

C. If no other special agreement is reached, Contractor shall repair or replace the damaged Work, using allocated insurance proceeds.

ARTICLE 7—CONTRACTOR'S RESPONSIBILITIES

7.01 *Contractor's Means and Methods of Construction*

A. Contractor shall be solely responsible for the means, methods, techniques, sequences, and procedures of construction.

B. If the Contract Documents note, or Contractor determines, that professional engineering or other design services are needed to carry out Contractor's responsibilities for construction means, methods, techniques, sequences, and procedures, or for Site safety, then Contractor shall cause such services to be provided by a properly licensed design professional, at Contractor's expense. Such services are not Owner-delegated professional design services under this Contract, and neither Owner nor Engineer has any responsibility with respect to (1) Contractor's determination of the need for such services, (2) the qualifications or licensing of the design professionals retained or employed by Contractor, (3) the performance of such services, or (4) any errors, omissions, or defects in such services.

7.02 *Supervision and Superintendence*

A. Contractor shall supervise, inspect, and direct the Work competently and efficiently, devoting such attention thereto and applying such skills and expertise as may be necessary to perform the Work in accordance with the Contract Documents.

B. At all times during the progress of the Work, Contractor shall assign a competent resident superintendent who will not be replaced without written notice to Owner and Engineer except under extraordinary circumstances.

7.03 *Labor; Working Hours*

A. Contractor shall provide competent, suitably qualified personnel to survey and lay out the Work and perform construction as required by the Contract Documents. Contractor shall maintain good discipline and order at the Site.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

B. Contractor shall be fully responsible to Owner and Engineer for all acts and omissions of Contractor's employees; of Suppliers and Subcontractors, and their employees; and of any other individuals or entities performing or furnishing any of the Work, just as Contractor is responsible for Contractor's own acts and omissions.

C. Except as otherwise required for the safety or protection of persons or the Work or property at the Site or adjacent thereto, and except as otherwise stated in the Contract Documents, all Work at the Site will be performed during regular working hours, Monday through Friday. Contractor will not perform Work on a Saturday, Sunday, or any legal holiday. Contractor may perform Work outside regular working hours or on Saturdays, Sundays, or legal holidays only with Owner's written consent, which will not be unreasonably withheld.

7.04 *Services, Materials, and Equipment*

A. Unless otherwise specified in the Contract Documents, Contractor shall provide and assume full responsibility for all services, materials, equipment, labor, transportation, construction equipment and machinery, tools, appliances, fuel, power, light, heat, telephone, water, sanitary facilities, temporary facilities, and all other facilities and incidentals necessary for the performance, testing, start up, and completion of the Work, whether or not such items are specifically called for in the Contract Documents.

B. All materials and equipment incorporated into the Work must be new and of good quality, except as otherwise provided in the Contract Documents. All special warranties and guarantees required by the Specifications will expressly run to the benefit of Owner. If required by Engineer, Contractor shall furnish satisfactory evidence (including reports of required tests) as to the source, kind, and quality of materials and equipment.

C. All materials and equipment must be stored, applied, installed, connected, erected, protected, used, cleaned, and conditioned in accordance with instructions of the applicable Supplier, except as otherwise may be provided in the Contract Documents.

7.05 *"Or Equals"*

A. *Contractor's Request; Governing Criteria*: Whenever an item of equipment or material is specified or described in the Contract Documents by using the names of one or more proprietary items or specific Suppliers, the Contract Price has been based upon Contractor furnishing such item as specified. The specification or description of such an item is intended to establish the type, function, appearance, and quality required. Unless the specification or description contains or is followed by words reading that no like, equivalent, or "or equal" item is permitted, Contractor may request that Engineer authorize the use of other items of equipment or material, or items from other proposed Suppliers, under the circumstances described below.

1. If Engineer in its sole discretion determines that an item of equipment or material proposed by Contractor is functionally equal to that named and sufficiently similar so that no change in related Work will be required, Engineer will deem it an "or equal" item. For the purposes of this paragraph, a proposed item of equipment or material will be considered functionally equal to an item so named if:

a. in the exercise of reasonable judgment Engineer determines that the proposed item:

1) is at least equal in materials of construction, quality, durability, appearance, strength, and design characteristics;

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

2) will reliably perform at least equally well the function and achieve the results imposed by the design concept of the completed Project as a functioning whole;

3) has a proven record of performance and availability of responsive service; and

4) is not objectionable to Owner.

b. Contractor certifies that, if the proposed item is approved and incorporated into the Work:

1) there will be no increase in cost to the Owner or increase in Contract Times; and

2) the item will conform substantially to the detailed requirements of the item named in the Contract Documents.

B. *Contractor's Expense*: Contractor shall provide all data in support of any proposed "or equal" item at Contractor's expense.

C. *Engineer's Evaluation and Determination*: Engineer will be allowed a reasonable time to evaluate each "or-equal" request. Engineer may require Contractor to furnish additional data about the proposed "or-equal" item. Engineer will be the sole judge of acceptability. No "or-equal" item will be ordered, furnished, installed, or utilized until Engineer's review is complete and Engineer determines that the proposed item is an "or-equal," which will be evidenced by an approved Shop Drawing or other written communication. Engineer will advise Contractor in writing of any negative determination.

D. *Effect of Engineer's Determination*: Neither approval nor denial of an "or-equal" request will result in any change in Contract Price. The Engineer's denial of an "or-equal" request will be final and binding, and may not be reversed through an appeal under any provision of the Contract.

E. *Treatment as a Substitution Request*: If Engineer determines that an item of equipment or material proposed by Contractor does not qualify as an "or-equal" item, Contractor may request that Engineer consider the item a proposed substitute pursuant to Paragraph 7.06.

7.06 *Substitutes*

A. *Contractor's Request; Governing Criteria*: Unless the specification or description of an item of equipment or material required to be furnished under the Contract Documents contains or is followed by words reading that no substitution is permitted, Contractor may request that Engineer authorize the use of other items of equipment or material under the circumstances described below. To the extent possible such requests must be made before commencement of related construction at the Site.

1. Contractor shall submit sufficient information as provided below to allow Engineer to determine if the item of material or equipment proposed is functionally equivalent to that named and an acceptable substitute therefor. Engineer will not accept requests for review of proposed substitute items of equipment or material from anyone other than Contractor.

2. The requirements for review by Engineer will be as set forth in Paragraph 7.06.B, as supplemented by the Specifications, and as Engineer may decide is appropriate under the circumstances.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

3. Contractor shall make written application to Engineer for review of a proposed substitute item of equipment or material that Contractor seeks to furnish or use. The application:

    a. will certify that the proposed substitute item will:

        1) perform adequately the functions and achieve the results called for by the general design;

        2) be similar in substance to the item specified; and

        3) be suited to the same use as the item specified.

    b. will state:

        1) the extent, if any, to which the use of the proposed substitute item will necessitate a change in Contract Times;

        2) whether use of the proposed substitute item in the Work will require a change in any of the Contract Documents (or in the provisions of any other direct contract with Owner for other work on the Project) to adapt the design to the proposed substitute item; and

        3) whether incorporation or use of the proposed substitute item in connection with the Work is subject to payment of any license fee or royalty.

    c. will identify:

        1) all variations of the proposed substitute item from the item specified; and

        2) available engineering, sales, maintenance, repair, and replacement services.

    d. will contain an itemized estimate of all costs or credits that will result directly or indirectly from use of such substitute item, including but not limited to changes in Contract Price, shared savings, costs of redesign, and claims of other contractors affected by any resulting change.

B. *Engineer's Evaluation and Determination*: Engineer will be allowed a reasonable time to evaluate each substitute request, and to obtain comments and direction from Owner. Engineer may require Contractor to furnish additional data about the proposed substitute item. Engineer will be the sole judge of acceptability. No substitute will be ordered, furnished, installed, or utilized until Engineer's review is complete and Engineer determines that the proposed item is an acceptable substitute. Engineer's determination will be evidenced by a Field Order or a proposed Change Order accounting for the substitution itself and all related impacts, including changes in Contract Price or Contract Times. Engineer will advise Contractor in writing of any negative determination.

C. *Special Guarantee*: Owner may require Contractor to furnish at Contractor's expense a special performance guarantee or other surety with respect to any substitute.

D. *Reimbursement of Engineer's Cost*: Engineer will record Engineer's costs in evaluating a substitute proposed or submitted by Contractor. Whether or not Engineer approves a substitute so proposed or submitted by Contractor, Contractor shall reimburse Owner for the reasonable charges of Engineer for evaluating each such proposed substitute. Contractor shall also reimburse Owner for the reasonable charges of Engineer for making changes in the Contract Documents (or in the provisions of any other direct contract with Owner) resulting from the acceptance of each proposed substitute.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

E. *Contractor's Expense*: Contractor shall provide all data in support of any proposed substitute at Contractor's expense.

F. *Effect of Engineer's Determination*: If Engineer approves the substitution request, Contractor shall execute the proposed Change Order and proceed with the substitution. The Engineer's denial of a substitution request will be final and binding, and may not be reversed through an appeal under any provision of the Contract. Contractor may challenge the scope of reimbursement costs imposed under Paragraph 7.06.D, by timely submittal of a Change Proposal.

7.07 *Concerning Subcontractors and Suppliers*

A. Contractor may retain Subcontractors and Suppliers for the performance of parts of the Work. Such Subcontractors and Suppliers must be acceptable to Owner. The Contractor's retention of a Subcontractor or Supplier for the performance of parts of the Work will not relieve Contractor's obligation to Owner to perform and complete the Work in accordance with the Contract Documents.

B. Contractor shall retain specific Subcontractors and Suppliers for the performance of designated parts of the Work if required by the Contract to do so.

C. Subsequent to the submittal of Contractor's Bid or final negotiation of the terms of the Contract, Owner may not require Contractor to retain any Subcontractor or Supplier to furnish or perform any of the Work against which Contractor has reasonable objection.

D. Prior to entry into any binding subcontract or purchase order, Contractor shall submit to Owner the identity of the proposed Subcontractor or Supplier (unless Owner has already deemed such proposed Subcontractor or Supplier acceptable during the bidding process or otherwise). Such proposed Subcontractor or Supplier shall be deemed acceptable to Owner unless Owner raises a substantive, reasonable objection within 5 days.

E. Owner may require the replacement of any Subcontractor or Supplier. Owner also may require Contractor to retain specific replacements; provided, however, that Owner may not require a replacement to which Contractor has a reasonable objection. If Contractor has submitted the identity of certain Subcontractors or Suppliers for acceptance by Owner, and Owner has accepted it (either in writing or by failing to make written objection thereto), then Owner may subsequently revoke the acceptance of any such Subcontractor or Supplier so identified solely on the basis of substantive, reasonable objection after due investigation. Contractor shall submit an acceptable replacement for the rejected Subcontractor or Supplier.

F. If Owner requires the replacement of any Subcontractor or Supplier retained by Contractor to perform any part of the Work, then Contractor shall be entitled to an adjustment in Contract Price or Contract Times, with respect to the replacement; and Contractor shall initiate a Change Proposal for such adjustment within 30 days of Owner's requirement of replacement.

G. No acceptance by Owner of any such Subcontractor or Supplier, whether initially or as a replacement, will constitute a waiver of the right of Owner to the completion of the Work in accordance with the Contract Documents.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

H. On a monthly basis, Contractor shall submit to Engineer a complete list of all Subcontractors and Suppliers having a direct contract with Contractor, and of all other Subcontractors and Suppliers known to Contractor at the time of submittal.

I. Contractor shall be solely responsible for scheduling and coordinating the work of Subcontractors and Suppliers.

J. The divisions and sections of the Specifications and the identifications of any Drawings do not control Contractor in dividing the Work among Subcontractors or Suppliers, or in delineating the Work to be performed by any specific trade.

K. All Work performed for Contractor by a Subcontractor or Supplier must be pursuant to an appropriate contractual agreement that specifically binds the Subcontractor or Supplier to the applicable terms and conditions of the Contract for the benefit of Owner and Engineer.

L. Owner may furnish to any Subcontractor or Supplier, to the extent practicable, information about amounts paid to Contractor for Work performed for Contractor by the Subcontractor or Supplier.

M. Contractor shall restrict all Subcontractors and Suppliers from communicating with Engineer or Owner, except through Contractor or in case of an emergency, or as otherwise expressly allowed in this Contract.

7.08 *Patent Fees and Royalties*

A. Contractor shall pay all license fees and royalties and assume all costs incident to the use in the performance of the Work or the incorporation in the Work of any invention, design, process, product, or device which is the subject of patent rights or copyrights held by others. If an invention, design, process, product, or device is specified in the Contract Documents for use in the performance of the Work and if, to the actual knowledge of Owner or Engineer, its use is subject to patent rights or copyrights calling for the payment of any license fee or royalty to others, the existence of such rights will be disclosed in the Contract Documents.

B. To the fullest extent permitted by Laws and Regulations, Owner shall indemnify and hold harmless Contractor, and its officers, directors, members, partners, employees, agents, consultants, and subcontractors, from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals, and all court or arbitration or other dispute resolution costs) arising out of or relating to any infringement of patent rights or copyrights incident to the use in the performance of the Work or resulting from the incorporation in the Work of any invention, design, process, product, or device specified in the Contract Documents, but not identified as being subject to payment of any license fee or royalty to others required by patent rights or copyrights.

C. To the fullest extent permitted by Laws and Regulations, Contractor shall indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each and any of them, from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to any infringement of patent rights or copyrights incident to the use in the performance of the Work or resulting from the incorporation in the Work of any invention, design, process, product, or device not specified in the Contract Documents.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

7.09 *Permits*

A. Unless otherwise provided in the Contract Documents, Contractor shall obtain and pay for all construction permits, licenses, and certificates of occupancy. Owner shall assist Contractor, when necessary, in obtaining such permits and licenses. Contractor shall pay all governmental charges and inspection fees necessary for the prosecution of the Work which are applicable at the time of the submission of Contractor's Bid (or when Contractor became bound under a negotiated contract). Owner shall pay all charges of utility owners for connections for providing permanent service to the Work.

7.10 *Taxes*

A. Contractor shall pay all sales, consumer, use, and other similar taxes required to be paid by Contractor in accordance with the Laws and Regulations of the place of the Project which are applicable during the performance of the Work.

7.11 *Laws and Regulations*

A. Contractor shall give all notices required by and shall comply with all Laws and Regulations applicable to the performance of the Work. Neither Owner nor Engineer shall be responsible for monitoring Contractor's compliance with any Laws or Regulations.

B. If Contractor performs any Work or takes any other action knowing or having reason to know that it is contrary to Laws or Regulations, Contractor shall bear all resulting costs and losses, and shall indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants, and subcontractors of each and any of them, from and against all claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to such Work or other action. It is not Contractor's responsibility to make certain that the Work described in the Contract Documents is in accordance with Laws and Regulations, but this does not relieve Contractor of its obligations under Paragraph 3.03.

C. Owner or Contractor may give written notice to the other party of any changes after the submission of Contractor's Bid (or after the date when Contractor became bound under a negotiated contract) in Laws or Regulations having an effect on the cost or time of performance of the Work, including but not limited to changes in Laws or Regulations having an effect on procuring permits and on sales, use, value-added, consumption, and other similar taxes. If Owner and Contractor are unable to agree on entitlement to or on the amount or extent, if any, of any adjustment in Contract Price or Contract Times resulting from such changes, then within 30 days of such written notice Contractor may submit a Change Proposal, or Owner may initiate a Claim.

7.12 *Record Documents*

A. Contractor shall maintain in a safe place at the Site one printed record copy of all Drawings, Specifications, Addenda, Change Orders, Work Change Directives, Field Orders, written interpretations and clarifications, and approved Shop Drawings. Contractor shall keep such record documents in good order and annotate them to show changes made during construction. These record documents, together with all approved Samples, will be available to Engineer for reference. Upon completion of the Work, Contractor shall deliver these record documents to Engineer.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

7.13 *Safety and Protection*

A. Contractor shall be solely responsible for initiating, maintaining, and supervising all safety precautions and programs in connection with the Work. Such responsibility does not relieve Subcontractors of their responsibility for the safety of persons or property in the performance of their work, nor for compliance with applicable safety Laws and Regulations.

B. Contractor shall designate a qualified and experienced safety representative whose duties and responsibilities are the prevention of Work-related accidents and the maintenance and supervision of safety precautions and programs.

C. Contractor shall take all necessary precautions for the safety of, and shall provide the necessary protection to prevent damage, injury, or loss to:

1. all persons on the Site or who may be affected by the Work;

2. all the Work and materials and equipment to be incorporated therein, whether in storage on or off the Site; and

3. other property at the Site or adjacent thereto, including trees, shrubs, lawns, walks, pavements, roadways, structures, other work in progress, utilities, and Underground Facilities not designated for removal, relocation, or replacement in the course of construction.

D. All damage, injury, or loss to any property referred to in Paragraph 7.13.C.2 or 7.13.C.3 caused, directly or indirectly, in whole or in part, by Contractor, any Subcontractor, Supplier, or any other individual or entity directly or indirectly employed by any of them to perform any of the Work, or anyone for whose acts any of them may be liable, shall be remedied by Contractor at its expense (except damage or loss attributable to the fault of Drawings or Specifications or to the acts or omissions of Owner or Engineer or anyone employed by any of them, or anyone for whose acts any of them may be liable, and not attributable, directly or indirectly, in whole or in part, to the fault or negligence of Contractor or any Subcontractor, Supplier, or other individual or entity directly or indirectly employed by any of them).

E. Contractor shall comply with all applicable Laws and Regulations relating to the safety of persons or property, or to the protection of persons or property from damage, injury, or loss; and shall erect and maintain all necessary safeguards for such safety and protection.

F. Contractor shall notify Owner; the owners of adjacent property; the owners of Underground Facilities and other utilities (if the identity of such owners is known to Contractor); and other contractors and utility owners performing work at or adjacent to the Site, in writing, when Contractor knows that prosecution of the Work may affect them, and shall cooperate with them in the protection, removal, relocation, and replacement of their property or work in progress.

G. Contractor shall comply with the applicable requirements of Owner's safety programs, if any. Any Owner's safety programs that are applicable to the Work are identified or included in the Supplementary Conditions or Specifications.

H. Contractor shall inform Owner and Engineer of the specific requirements of Contractor's safety program with which Owner's and Engineer's employees and representatives must comply while at the Site.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

I. Contractor's duties and responsibilities for safety and protection will continue until all the Work is completed, Engineer has issued a written notice to Owner and Contractor in accordance with Paragraph 15.06.C that the Work is acceptable, and Contractor has left the Site (except as otherwise expressly provided in connection with Substantial Completion).

J. Contractor's duties and responsibilities for safety and protection will resume whenever Contractor or any Subcontractor or Supplier returns to the Site to fulfill warranty or correction obligations, or to conduct other tasks arising from the Contract Documents.

7.14 *Hazard Communication Programs*

A. Contractor shall be responsible for coordinating any exchange of safety data sheets (formerly known as material safety data sheets) or other hazard communication information required to be made available to or exchanged between or among employers at the Site in accordance with Laws or Regulations.

7.15 *Emergencies*

A. In emergencies affecting the safety or protection of persons or the Work or property at the Site or adjacent thereto, Contractor is obligated to act to prevent damage, injury, or loss. Contractor shall give Engineer prompt written notice if Contractor believes that any significant changes in the Work or variations from the Contract Documents have been caused by an emergency, or are required as a result of Contractor's response to an emergency. If Engineer determines that a change in the Contract Documents is required because of an emergency or Contractor's response, a Work Change Directive or Change Order will be issued.

7.16 *Submittals*

A. *Shop Drawing and Sample Requirements*

1. Before submitting a Shop Drawing or Sample, Contractor shall:

a. review and coordinate the Shop Drawing or Sample with other Shop Drawings and Samples and with the requirements of the Work and the Contract Documents;

b. determine and verify:

1) all field measurements, quantities, dimensions, specified performance and design criteria, installation requirements, materials, catalog numbers, and similar information with respect to the Submittal;

2) the suitability of all materials and equipment offered with respect to the indicated application, fabrication, shipping, handling, storage, assembly, and installation pertaining to the performance of the Work; and

3) all information relative to Contractor's responsibilities for means, methods, techniques, sequences, and procedures of construction, and safety precautions and programs incident thereto;

c. confirm that the Submittal is complete with respect to all related data included in the Submittal.

2. Each Shop Drawing or Sample must bear a stamp or specific written certification that Contractor has satisfied Contractor's obligations under the Contract Documents with respect to Contractor's review of that Submittal, and that Contractor approves the Submittal.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

3. With each Shop Drawing or Sample, Contractor shall give Engineer specific written notice of any variations that the Submittal may have from the requirements of the Contract Documents. This notice must be set forth in a written communication separate from the Submittal; and, in addition, in the case of a Shop Drawing by a specific notation made on the Shop Drawing itself.

B. *Submittal Procedures for Shop Drawings and Samples*: Contractor shall label and submit Shop Drawings and Samples to Engineer for review and approval in accordance with the accepted Schedule of Submittals.

1. *Shop Drawings*

a. Contractor shall submit the number of copies required in the Specifications.

b. Data shown on the Shop Drawings must be complete with respect to quantities, dimensions, specified performance and design criteria, materials, and similar data to show Engineer the services, materials, and equipment Contractor proposes to provide, and to enable Engineer to review the information for the limited purposes required by Paragraph 7.16.C.

2. *Samples*

a. Contractor shall submit the number of Samples required in the Specifications.

b. Contractor shall clearly identify each Sample as to material, Supplier, pertinent data such as catalog numbers, the use for which intended and other data as Engineer may require to enable Engineer to review the Submittal for the limited purposes required by Paragraph 7.16.C.

3. Where a Shop Drawing or Sample is required by the Contract Documents or the Schedule of Submittals, any related Work performed prior to Engineer's review and approval of the pertinent submittal will be at the sole expense and responsibility of Contractor.

C. *Engineer's Review of Shop Drawings and Samples*

1. Engineer will provide timely review of Shop Drawings and Samples in accordance with the accepted Schedule of Submittals. Engineer's review and approval will be only to determine if the items covered by the Submittals will, after installation or incorporation in the Work, comply with the requirements of the Contract Documents, and be compatible with the design concept of the completed Project as a functioning whole as indicated by the Contract Documents.

2. Engineer's review and approval will not extend to means, methods, techniques, sequences, or procedures of construction, or to safety precautions or programs incident thereto.

3. Engineer's review and approval of a separate item as such will not indicate approval of the assembly in which the item functions.

4. Engineer's review and approval of a Shop Drawing or Sample will not relieve Contractor from responsibility for any variation from the requirements of the Contract Documents unless Contractor has complied with the requirements of Paragraph 7.16.A.3 and Engineer has given written approval of each such variation by specific written notation thereof incorporated in or accompanying the Shop Drawing or Sample. Engineer will

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

document any such approved variation from the requirements of the Contract Documents in a Field Order or other appropriate Contract modification.

5. Engineer's review and approval of a Shop Drawing or Sample will not relieve Contractor from responsibility for complying with the requirements of Paragraphs 7.16.A and B.

6. Engineer's review and approval of a Shop Drawing or Sample, or of a variation from the requirements of the Contract Documents, will not, under any circumstances, change the Contract Times or Contract Price, unless such changes are included in a Change Order.

7. Neither Engineer's receipt, review, acceptance, or approval of a Shop Drawing or Sample will result in such item becoming a Contract Document.

8. Contractor shall perform the Work in compliance with the requirements and commitments set forth in approved Shop Drawings and Samples, subject to the provisions of Paragraph 7.16.C.4.

D. *Resubmittal Procedures for Shop Drawings and Samples*

1. Contractor shall make corrections required by Engineer and shall return the required number of corrected copies of Shop Drawings and submit, as required, new Samples for review and approval. Contractor shall direct specific attention in writing to revisions other than the corrections called for by Engineer on previous Submittals.

2. Contractor shall furnish required Shop Drawing and Sample submittals with sufficient information and accuracy to obtain required approval of an item with no more than two resubmittals. Engineer will record Engineer's time for reviewing a third or subsequent resubmittal of a Shop Drawing or Sample, and Contractor shall be responsible for Engineer's charges to Owner for such time. Owner may impose a set-off against payments due Contractor to secure reimbursement for such charges.

3. If Contractor requests a change of a previously approved Shop Drawing or Sample, Contractor shall be responsible for Engineer's charges to Owner for its review time, and Owner may impose a set-off against payments due Contractor to secure reimbursement for such charges, unless the need for such change is beyond the control of Contractor.

E. *Submittals Other than Shop Drawings, Samples, and Owner-Delegated Designs*

1. The following provisions apply to all Submittals other than Shop Drawings, Samples, and Owner-delegated designs:

   a. Contractor shall submit all such Submittals to the Engineer in accordance with the Schedule of Submittals and pursuant to the applicable terms of the Contract Documents.

   b. Engineer will provide timely review of all such Submittals in accordance with the Schedule of Submittals and return such Submittals with a notation of either Accepted or Not Accepted. Any such Submittal that is not returned within the time established in the Schedule of Submittals will be deemed accepted.

   c. Engineer's review will be only to determine if the Submittal is acceptable under the requirements of the Contract Documents as to general form and content of the Submittal.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

d. If any such Submittal is not accepted, Contractor shall confer with Engineer regarding the reason for the non-acceptance, and resubmit an acceptable document.

2. Procedures for the submittal and acceptance of the Progress Schedule, the Schedule of Submittals, and the Schedule of Values are set forth in Paragraphs 2.03. 2.04, and 2.05.

F. Owner-delegated Designs: Submittals pursuant to Owner-delegated designs are governed by the provisions of Paragraph 7.19.

7.17 *Contractor's General Warranty and Guarantee*

A. Contractor warrants and guarantees to Owner that all Work will be in accordance with the Contract Documents and will not be defective. Engineer is entitled to rely on Contractor's warranty and guarantee.

B. Owner's rights under this warranty and guarantee are in addition to, and are not limited by, Owner's rights under the correction period provisions of Paragraph 15.08. The time in which Owner may enforce its warranty and guarantee rights under this Paragraph 7.17 is limited only by applicable Laws and Regulations restricting actions to enforce such rights; provided, however, that after the end of the correction period under Paragraph 15.08:

1. Owner shall give Contractor written notice of any defective Work within 60 days of the discovery that such Work is defective; and

2. Such notice will be deemed the start of an event giving rise to a Claim under Paragraph 12.01.B, such that any related Claim must be brought within 30 days of the notice.

C. Contractor's warranty and guarantee hereunder excludes defects or damage caused by:

1. abuse, or improper modification, maintenance, or operation, by persons other than Contractor, Subcontractors, Suppliers, or any other individual or entity for whom Contractor is responsible; or

2. normal wear and tear under normal usage.

D. Contractor's obligation to perform and complete the Work in accordance with the Contract Documents is absolute. None of the following will constitute an acceptance of Work that is not in accordance with the Contract Documents, a release of Contractor's obligation to perform the Work in accordance with the Contract Documents, or a release of Owner's warranty and guarantee rights under this Paragraph 7.17:

1. Observations by Engineer;

2. Recommendation by Engineer or payment by Owner of any progress or final payment;

3. The issuance of a certificate of Substantial Completion by Engineer or any payment related thereto by Owner;

4. Use or occupancy of the Work or any part thereof by Owner;

5. Any review and approval of a Shop Drawing or Sample submittal;

6. The issuance of a notice of acceptability by Engineer;

7. The end of the correction period established in Paragraph 15.08;

8. Any inspection, test, or approval by others; or

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

9. Any correction of defective Work by Owner.

E. If the Contract requires the Contractor to accept the assignment of a contract entered into by Owner, then the specific warranties, guarantees, and correction obligations contained in the assigned contract will govern with respect to Contractor's performance obligations to Owner for the Work described in the assigned contract.

7.18 *Indemnification*

A. To the fullest extent permitted by Laws and Regulations, and in addition to any other obligations of Contractor under the Contract or otherwise, Contractor shall indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each and any of them, from losses, damages, costs, and judgments (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals, and all court or arbitration or other dispute resolution costs) arising from third-party claims or actions relating to or resulting from the performance or furnishing of the Work, provided that any such claim, action, loss, cost, judgment or damage is attributable to bodily injury, sickness, disease, or death, or to damage to or destruction of tangible property (other than the Work itself), including the loss of use resulting therefrom, but only to the extent caused by any negligent act or omission of Contractor, any Subcontractor, any Supplier, or any individual or entity directly or indirectly employed by any of them to perform any of the Work, or anyone for whose acts any of them may be liable.

B. In any and all claims against Owner or Engineer, or any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors, by any employee (or the survivor or personal representative of such employee) of Contractor, any Subcontractor, any Supplier, or any individual or entity directly or indirectly employed by any of them to perform any of the Work, or anyone for whose acts any of them may be liable, the indemnification obligation under Paragraph 7.18.A will not be limited in any way by any limitation on the amount or type of damages, compensation, or benefits payable by or for Contractor or any such Subcontractor, Supplier, or other individual or entity under workers' compensation acts, disability benefit acts, or other employee benefit acts.

7.19 *Delegation of Professional Design Services*

A. Owner may require Contractor to provide professional design services for a portion of the Work by express delegation in the Contract Documents. Such delegation will specify the performance and design criteria that such services must satisfy, and the Submittals that Contractor must furnish to Engineer with respect to the Owner-delegated design.

B. Contractor shall cause such Owner-delegated professional design services to be provided pursuant to the professional standard of care by a properly licensed design professional, whose signature and seal must appear on all drawings, calculations, specifications, certifications, and Submittals prepared by such design professional. Such design professional must issue all certifications of design required by Laws and Regulations.

C. If a Shop Drawing or other Submittal related to the Owner-delegated design is prepared by Contractor, a Subcontractor, or others for submittal to Engineer, then such Shop Drawing or other Submittal must bear the written approval of Contractor's design professional when submitted by Contractor to Engineer.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

D. Owner and Engineer shall be entitled to rely upon the adequacy, accuracy, and completeness of the services, certifications, and approvals performed or provided by the design professionals retained or employed by Contractor under an Owner-delegated design, subject to the professional standard of care and the performance and design criteria stated in the Contract Documents.

E. Pursuant to this Paragraph 7.19, Engineer's review, approval, and other determinations regarding design drawings, calculations, specifications, certifications, and other Submittals furnished by Contractor pursuant to an Owner-delegated design will be only for the following limited purposes:

1. Checking for conformance with the requirements of this Paragraph 7.19;

2. Confirming that Contractor (through its design professionals) has used the performance and design criteria specified in the Contract Documents; and

3. Establishing that the design furnished by Contractor is consistent with the design concept expressed in the Contract Documents.

F. Contractor shall not be responsible for the adequacy of performance or design criteria specified by Owner or Engineer.

G. Contractor is not required to provide professional services in violation of applicable Laws and Regulations.

ARTICLE 8—OTHER WORK AT THE SITE

8.01 *Other Work*

A. In addition to and apart from the Work under the Contract Documents, the Owner may perform other work at or adjacent to the Site. Such other work may be performed by Owner's employees, or through contracts between the Owner and third parties. Owner may also arrange to have third-party utility owners perform work on their utilities and facilities at or adjacent to the Site.

B. If Owner performs other work at or adjacent to the Site with Owner's employees, or through contracts for such other work, then Owner shall give Contractor written notice thereof prior to starting any such other work. If Owner has advance information regarding the start of any third-party utility work that Owner has arranged to take place at or adjacent to the Site, Owner shall provide such information to Contractor.

C. Contractor shall afford proper and safe access to the Site to each contractor that performs such other work, each utility owner performing other work, and Owner, if Owner is performing other work with Owner's employees, and provide a reasonable opportunity for the introduction and storage of materials and equipment and the execution of such other work.

D. Contractor shall do all cutting, fitting, and patching of the Work that may be required to properly connect or otherwise make its several parts come together and properly integrate with such other work. Contractor shall not endanger any work of others by cutting, excavating, or otherwise altering such work; provided, however, that Contractor may cut or alter others' work with the written consent of Engineer and the others whose work will be affected.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

E. If the proper execution or results of any part of Contractor's Work depends upon work performed by others, Contractor shall inspect such other work and promptly report to Engineer in writing any delays, defects, or deficiencies in such other work that render it unavailable or unsuitable for the proper execution and results of Contractor's Work. Contractor's failure to so report will constitute an acceptance of such other work as fit and proper for integration with Contractor's Work except for latent defects and deficiencies in such other work.

F. The provisions of this article are not applicable to work that is performed by third-party utilities or other third-party entities without a contract with Owner, or that is performed without having been arranged by Owner. If such work occurs, then any related delay, disruption, or interference incurred by Contractor is governed by the provisions of Paragraph 4.05.C.3.

8.02 *Coordination*

A. If Owner intends to contract with others for the performance of other work at or adjacent to the Site, to perform other work at or adjacent to the Site with Owner's employees, or to arrange to have utility owners perform work at or adjacent to the Site, the following will be set forth in the Supplementary Conditions or provided to Contractor prior to the start of any such other work:

1. The identity of the individual or entity that will have authority and responsibility for coordination of the activities among the various contractors;

2. An itemization of the specific matters to be covered by such authority and responsibility; and

3. The extent of such authority and responsibilities.

B. Unless otherwise provided in the Supplementary Conditions, Owner shall have sole authority and responsibility for such coordination.

8.03 *Legal Relationships*

A. If, in the course of performing other work for Owner at or adjacent to the Site, the Owner's employees, any other contractor working for Owner, or any utility owner that Owner has arranged to perform work, causes damage to the Work or to the property of Contractor or its Subcontractors, or delays, disrupts, interferes with, or increases the scope or cost of the performance of the Work, through actions or inaction, then Contractor shall be entitled to an equitable adjustment in the Contract Price or the Contract Times. Contractor must submit any Change Proposal seeking an equitable adjustment in the Contract Price or the Contract Times under this paragraph within 30 days of the damaging, delaying, disrupting, or interfering event. The entitlement to, and extent of, any such equitable adjustment will take into account information (if any) regarding such other work that was provided to Contractor in the Contract Documents prior to the submittal of the Bid or the final negotiation of the terms of the Contract, and any remedies available to Contractor under Laws or Regulations concerning utility action or inaction. When applicable, any such equitable adjustment in Contract Price will be conditioned on Contractor assigning to Owner all Contractor's rights against such other contractor or utility owner with respect to the damage, delay, disruption, or interference that is the subject of the adjustment. Contractor's entitlement to an adjustment of the Contract Times or Contract Price is subject to the provisions of Paragraphs 4.05.D and 4.05.E.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

B. Contractor shall take reasonable and customary measures to avoid damaging, delaying, disrupting, or interfering with the work of Owner, any other contractor, or any utility owner performing other work at or adjacent to the Site.

1. If Contractor fails to take such measures and as a result damages, delays, disrupts, or interferes with the work of any such other contractor or utility owner, then Owner may impose a set-off against payments due Contractor, and assign to such other contractor or utility owner the Owner's contractual rights against Contractor with respect to the breach of the obligations set forth in this Paragraph 8.03.B.

2. When Owner is performing other work at or adjacent to the Site with Owner's employees, Contractor shall be liable to Owner for damage to such other work, and for the reasonable direct delay, disruption, and interference costs incurred by Owner as a result of Contractor's failure to take reasonable and customary measures with respect to Owner's other work. In response to such damage, delay, disruption, or interference, Owner may impose a set-off against payments due Contractor.

C. If Contractor damages, delays, disrupts, or interferes with the work of any other contractor, or any utility owner performing other work at or adjacent to the Site, through Contractor's failure to take reasonable and customary measures to avoid such impacts, or if any claim arising out of Contractor's actions, inactions, or negligence in performance of the Work at or adjacent to the Site is made by any such other contractor or utility owner against Contractor, Owner, or Engineer, then Contractor shall (1) promptly attempt to settle the claim as to all parties through negotiations with such other contractor or utility owner, or otherwise resolve the claim by arbitration or other dispute resolution proceeding or at law, and (2) indemnify and hold harmless Owner and Engineer, and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each and any of them from and against any such claims, and against all costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to such damage, delay, disruption, or interference.

ARTICLE 9—OWNER'S RESPONSIBILITIES

9.01 *Communications to Contractor*

A. Except as otherwise provided in these General Conditions, Owner shall issue all communications to Contractor through Engineer.

9.02 *Replacement of Engineer*

A. Owner may at its discretion appoint an engineer to replace Engineer, provided Contractor makes no reasonable objection to the replacement engineer. The replacement engineer's status under the Contract Documents will be that of the former Engineer.

9.03 *Furnish Data*

A. Owner shall promptly furnish the data required of Owner under the Contract Documents.

9.04 *Pay When Due*

A. Owner shall make payments to Contractor when they are due as provided in the Agreement.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

9.05 *Lands and Easements; Reports, Tests, and Drawings*

A. Owner's duties with respect to providing lands and easements are set forth in Paragraph 5.01.

B. Owner's duties with respect to providing engineering surveys to establish reference points are set forth in Paragraph 4.03.

C. Article 5 refers to Owner's identifying and making available to Contractor copies of reports of explorations and tests of conditions at the Site, and drawings of physical conditions relating to existing surface or subsurface structures at the Site.

9.06 *Insurance*

A. Owner's responsibilities, if any, with respect to purchasing and maintaining liability and property insurance are set forth in Article 6.

9.07 *Change Orders*

A. Owner's responsibilities with respect to Change Orders are set forth in Article 11.

9.08 *Inspections, Tests, and Approvals*

A. Owner's responsibility with respect to certain inspections, tests, and approvals is set forth in Paragraph 14.02.B.

9.09 *Limitations on Owner's Responsibilities*

A. The Owner shall not supervise, direct, or have control or authority over, nor be responsible for, Contractor's means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or for any failure of Contractor to comply with Laws and Regulations applicable to the performance of the Work. Owner will not be responsible for Contractor's failure to perform the Work in accordance with the Contract Documents.

9.10 *Undisclosed Hazardous Environmental Condition*

A. Owner's responsibility in respect to an undisclosed Hazardous Environmental Condition is set forth in Paragraph 5.06.

9.11 *Evidence of Financial Arrangements*

A. Upon request of Contractor, Owner shall furnish Contractor reasonable evidence that financial arrangements have been made to satisfy Owner's obligations under the Contract (including obligations under proposed changes in the Work).

9.12 *Safety Programs*

A. While at the Site, Owner's employees and representatives shall comply with the specific applicable requirements of Contractor's safety programs of which Owner has been informed.

B. Owner shall furnish copies of any applicable Owner safety programs to Contractor.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 10—ENGINEER'S STATUS DURING CONSTRUCTION

10.01 *Owner's Representative*

A. Engineer will be Owner's representative during the construction period. The duties and responsibilities and the limitations of authority of Engineer as Owner's representative during construction are set forth in the Contract.

10.02 *Visits to Site*

A. Engineer will make visits to the Site at intervals appropriate to the various stages of construction as Engineer deems necessary in order to observe, as an experienced and qualified design professional, the progress that has been made and the quality of the various aspects of Contractor's executed Work. Based on information obtained during such visits and observations, Engineer, for the benefit of Owner, will determine, in general, if the Work is proceeding in accordance with the Contract Documents. Engineer will not be required to make exhaustive or continuous inspections on the Site to check the quality or quantity of the Work. Engineer's efforts will be directed toward providing for Owner a greater degree of confidence that the completed Work will conform generally to the Contract Documents. On the basis of such visits and observations, Engineer will keep Owner informed of the progress of the Work and will endeavor to guard Owner against defective Work.

B. Engineer's visits and observations are subject to all the limitations on Engineer's authority and responsibility set forth in Paragraph 10.07. Particularly, but without limitation, during or as a result of Engineer's visits or observations of Contractor's Work, Engineer will not supervise, direct, control, or have authority over or be responsible for Contractor's means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or for any failure of Contractor to comply with Laws and Regulations applicable to the performance of the Work.

10.03 *Resident Project Representative*

A. If Owner and Engineer have agreed that Engineer will furnish a Resident Project Representative to represent Engineer at the Site and assist Engineer in observing the progress and quality of the Work, then the authority and responsibilities of any such Resident Project Representative will be as provided in the Supplementary Conditions, and limitations on the responsibilities thereof will be as provided in the Supplementary Conditions and in Paragraph 10.07.

B. If Owner designates an individual or entity who is not Engineer's consultant, agent, or employee to represent Owner at the Site, then the responsibilities and authority of such individual or entity will be as provided in the Supplementary Conditions.

10.04 *Engineer's Authority*

A. Engineer has the authority to reject Work in accordance with Article 14.

B. Engineer's authority as to Submittals is set forth in Paragraph 7.16.

C. Engineer's authority as to design drawings, calculations, specifications, certifications and other Submittals from Contractor in response to Owner's delegation (if any) to Contractor of professional design services, is set forth in Paragraph 7.19.

D. Engineer's authority as to changes in the Work is set forth in Article 11.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

E. Engineer's authority as to Applications for Payment is set forth in Article 15.

10.05 *Determinations for Unit Price Work*

A. Engineer will determine the actual quantities and classifications of Unit Price Work performed by Contractor as set forth in Paragraph 13.03.

10.06 *Decisions on Requirements of Contract Documents and Acceptability of Work*

A. Engineer will render decisions regarding the requirements of the Contract Documents, and judge the acceptability of the Work, pursuant to the specific procedures set forth herein for initial interpretations, Change Proposals, and acceptance of the Work. In rendering such decisions and judgments, Engineer will not show partiality to Owner or Contractor, and will not be liable to Owner, Contractor, or others in connection with any proceedings, interpretations, decisions, or judgments conducted or rendered in good faith.

10.07 *Limitations on Engineer's Authority and Responsibilities*

A. Neither Engineer's authority or responsibility under this Article 10 or under any other provision of the Contract, nor any decision made by Engineer in good faith either to exercise or not exercise such authority or responsibility or the undertaking, exercise, or performance of any authority or responsibility by Engineer, will create, impose, or give rise to any duty in contract, tort, or otherwise owed by Engineer to Contractor, any Subcontractor, any Supplier, any other individual or entity, or to any surety for or employee or agent of any of them.

B. Engineer will not supervise, direct, control, or have authority over or be responsible for Contractor's means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto, or for any failure of Contractor to comply with Laws and Regulations applicable to the performance of the Work. Engineer will not be responsible for Contractor's failure to perform the Work in accordance with the Contract Documents.

C. Engineer will not be responsible for the acts or omissions of Contractor or of any Subcontractor, any Supplier, or of any other individual or entity performing any of the Work.

D. Engineer's review of the final Application for Payment and accompanying documentation, and all maintenance and operating instructions, schedules, guarantees, bonds, certificates of inspection, tests and approvals, and other documentation required to be delivered by Contractor under Paragraph 15.06.A, will only be to determine generally that their content complies with the requirements of, and in the case of certificates of inspections, tests, and approvals, that the results certified indicate compliance with the Contract Documents.

E. The limitations upon authority and responsibility set forth in this Paragraph 10.07 also apply to the Resident Project Representative, if any.

10.08 *Compliance with Safety Program*

A. While at the Site, Engineer's employees and representatives will comply with the specific applicable requirements of Owner's and Contractor's safety programs of which Engineer has been informed.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 11—CHANGES TO THE CONTRACT

11.01 *Amending and Supplementing the Contract*

A. The Contract may be amended or supplemented by a Change Order, a Work Change Directive, or a Field Order.

B. If an amendment or supplement to the Contract includes a change in the Contract Price or the Contract Times, such amendment or supplement must be set forth in a Change Order.

C. All changes to the Contract that involve (1) the performance or acceptability of the Work, (2) the design (as set forth in the Drawings, Specifications, or otherwise), or (3) other engineering or technical matters, must be supported by Engineer's recommendation. Owner and Contractor may amend other terms and conditions of the Contract without the recommendation of the Engineer.

11.02 *Change Orders*

A. Owner and Contractor shall execute appropriate Change Orders covering:

1. Changes in Contract Price or Contract Times which are agreed to by the parties, including any undisputed sum or amount of time for Work actually performed in accordance with a Work Change Directive;

2. Changes in Contract Price resulting from an Owner set-off, unless Contractor has duly contested such set-off;

3. Changes in the Work which are: (a) ordered by Owner pursuant to Paragraph 11.05, (b) required because of Owner's acceptance of defective Work under Paragraph 14.04 or Owner's correction of defective Work under Paragraph 14.07, or (c) agreed to by the parties, subject to the need for Engineer's recommendation if the change in the Work involves the design (as set forth in the Drawings, Specifications, or otherwise) or other engineering or technical matters; and

4. Changes that embody the substance of any final and binding results under: Paragraph 11.03.B, resolving the impact of a Work Change Directive; Paragraph 11.09, concerning Change Proposals; Article 12, Claims; Paragraph 13.02.D, final adjustments resulting from allowances; Paragraph 13.03.D, final adjustments relating to determination of quantities for Unit Price Work; and similar provisions.

B. If Owner or Contractor refuses to execute a Change Order that is required to be executed under the terms of Paragraph 11.02.A, it will be deemed to be of full force and effect, as if fully executed.

11.03 *Work Change Directives*

A. A Work Change Directive will not change the Contract Price or the Contract Times but is evidence that the parties expect that the modification ordered or documented by a Work Change Directive will be incorporated in a subsequently issued Change Order, following negotiations by the parties as to the Work Change Directive's effect, if any, on the Contract Price and Contract Times; or, if negotiations are unsuccessful, by a determination under the terms of the Contract Documents governing adjustments, expressly including Paragraph 11.07 regarding change of Contract Price.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

B. If Owner has issued a Work Change Directive and:

1. Contractor believes that an adjustment in Contract Times or Contract Price is necessary, then Contractor shall submit any Change Proposal seeking such an adjustment no later than 30 days after the completion of the Work set out in the Work Change Directive.

2. Owner believes that an adjustment in Contract Times or Contract Price is necessary, then Owner shall submit any Claim seeking such an adjustment no later than 60 days after issuance of the Work Change Directive.

11.04 *Field Orders*

A. Engineer may authorize minor changes in the Work if the changes do not involve an adjustment in the Contract Price or the Contract Times and are compatible with the design concept of the completed Project as a functioning whole as indicated by the Contract Documents. Such changes will be accomplished by a Field Order and will be binding on Owner and also on Contractor, which shall perform the Work involved promptly.

B. If Contractor believes that a Field Order justifies an adjustment in the Contract Price or Contract Times, then before proceeding with the Work at issue, Contractor shall submit a Change Proposal as provided herein.

11.05 *Owner-Authorized Changes in the Work*

A. Without invalidating the Contract and without notice to any surety, Owner may, at any time or from time to time, order additions, deletions, or revisions in the Work. Changes involving the design (as set forth in the Drawings, Specifications, or otherwise) or other engineering or technical matters will be supported by Engineer's recommendation.

B. Such changes in the Work may be accomplished by a Change Order, if Owner and Contractor have agreed as to the effect, if any, of the changes on Contract Times or Contract Price; or by a Work Change Directive. Upon receipt of any such document, Contractor shall promptly proceed with the Work involved; or, in the case of a deletion in the Work, promptly cease construction activities with respect to such deleted Work. Added or revised Work must be performed under the applicable conditions of the Contract Documents.

C. Nothing in this Paragraph 11.05 obligates Contractor to undertake work that Contractor reasonably concludes cannot be performed in a manner consistent with Contractor's safety obligations under the Contract Documents or Laws and Regulations.

11.06 *Unauthorized Changes in the Work*

A. Contractor shall not be entitled to an increase in the Contract Price or an extension of the Contract Times with respect to any work performed that is not required by the Contract Documents, as amended, modified, or supplemented, except in the case of an emergency as provided in Paragraph 7.15 or in the case of uncovering Work as provided in Paragraph 14.05.C.2.

11.07 *Change of Contract Price*

A. The Contract Price may only be changed by a Change Order. Any Change Proposal for an adjustment in the Contract Price must comply with the provisions of Paragraph 11.09. Any Claim for an adjustment of Contract Price must comply with the provisions of Article 12.

B. An adjustment in the Contract Price will be determined as follows:

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

1. Where the Work involved is covered by unit prices contained in the Contract Documents, then by application of such unit prices to the quantities of the items involved (subject to the provisions of Paragraph 13.03);

2. Where the Work involved is not covered by unit prices contained in the Contract Documents, then by a mutually agreed lump sum (which may include an allowance for overhead and profit not necessarily in accordance with Paragraph 11.07.C.2); or

3. Where the Work involved is not covered by unit prices contained in the Contract Documents and the parties do not reach mutual agreement to a lump sum, then on the basis of the Cost of the Work (determined as provided in Paragraph 13.01) plus a Contractor's fee for overhead and profit (determined as provided in Paragraph 11.07.C).

C. *Contractor's Fee*: When applicable, the Contractor's fee for overhead and profit will be determined as follows:

1. A mutually acceptable fixed fee; or

2. If a fixed fee is not agreed upon, then a fee based on the following percentages of the various portions of the Cost of the Work:

a. For costs incurred under Paragraphs 13.01.B.1 and 13.01.B.2, the Contractor's fee will be 15 percent;

b. For costs incurred under Paragraph 13.01.B.3, the Contractor's fee will be 5 percent;

c. Where one or more tiers of subcontracts are on the basis of Cost of the Work plus a fee and no fixed fee is agreed upon, the intent of Paragraphs 11.07.C.2.a and 11.07.C.2.b is that the Contractor's fee will be based on: (1) a fee of 15 percent of the costs incurred under Paragraphs 13.01.B.1 and 13.01.B.2 by the Subcontractor that actually performs the Work, at whatever tier, and (2) with respect to Contractor itself and to any Subcontractors of a tier higher than that of the Subcontractor that actually performs the Work, a fee of 5 percent of the amount (fee plus underlying costs incurred) attributable to the next lower tier Subcontractor; provided, however, that for any such subcontracted Work the maximum total fee to be paid by Owner will be no greater than 27 percent of the costs incurred by the Subcontractor that actually performs the Work;

d. No fee will be payable on the basis of costs itemized under Paragraphs 13.01.B.4, 13.01.B.5, and 13.01.C;

e. The amount of credit to be allowed by Contractor to Owner for any change which results in a net decrease in Cost of the Work will be the amount of the actual net decrease in Cost of the Work and a deduction of an additional amount equal to 5 percent of such actual net decrease in Cost of the Work; and

f. When both additions and credits are involved in any one change or Change Proposal, the adjustment in Contractor's fee will be computed by determining the sum of the costs in each of the cost categories in Paragraph 13.01.B (specifically, payroll costs, Paragraph 13.01.B.1; incorporated materials and equipment costs, Paragraph 13.01.B.2; Subcontract costs, Paragraph 13.01.B.3; special consultants costs, Paragraph 13.01.B.4; and other costs, Paragraph 13.01.B.5) and applying to each such cost category sum the appropriate fee from Paragraphs 11.07.C.2.a through 11.07.C.2.e, inclusive.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

11.08 *Change of Contract Times*

A. The Contract Times may only be changed by a Change Order. Any Change Proposal for an adjustment in the Contract Times must comply with the provisions of Paragraph 11.09. Any Claim for an adjustment in the Contract Times must comply with the provisions of Article 12.

B. Delay, disruption, and interference in the Work, and any related changes in Contract Times, are addressed in and governed by Paragraph 4.05.

11.09 *Change Proposals*

A. *Purpose and Content*: Contractor shall submit a Change Proposal to Engineer to request an adjustment in the Contract Times or Contract Price; contest an initial decision by Engineer concerning the requirements of the Contract Documents or relating to the acceptability of the Work under the Contract Documents; challenge a set-off against payment due; or seek other relief under the Contract. The Change Proposal will specify any proposed change in Contract Times or Contract Price, or other proposed relief, and explain the reason for the proposed change, with citations to any governing or applicable provisions of the Contract Documents. Each Change Proposal will address only one issue, or a set of closely related issues.

B. *Change Proposal Procedures*

1. *Submittal*: Contractor shall submit each Change Proposal to Engineer within 30 days after the start of the event giving rise thereto, or after such initial decision.

2. *Supporting Data*: The Contractor shall submit supporting data, including the proposed change in Contract Price or Contract Time (if any), to the Engineer and Owner within 15 days after the submittal of the Change Proposal.

    a. Change Proposals based on or related to delay, interruption, or interference must comply with the provisions of Paragraphs 4.05.D and 4.05.E.

    b. Change proposals related to a change of Contract Price must include full and detailed accounts of materials incorporated into the Work and labor and equipment used for the subject Work.

    The supporting data must be accompanied by a written statement that the supporting data are accurate and complete, and that any requested time or price adjustment is the entire adjustment to which Contractor believes it is entitled as a result of said event.

3. *Engineer's Initial Review*: Engineer will advise Owner regarding the Change Proposal, and consider any comments or response from Owner regarding the Change Proposal. If in its discretion Engineer concludes that additional supporting data is needed before conducting a full review and making a decision regarding the Change Proposal, then Engineer may request that Contractor submit such additional supporting data by a date specified by Engineer, prior to Engineer beginning its full review of the Change Proposal.

4. *Engineer's Full Review and Action on the Change Proposal*: Upon receipt of Contractor's supporting data (including any additional data requested by Engineer), Engineer will conduct a full review of each Change Proposal and, within 30 days after such receipt of the Contractor's supporting data, either approve the Change Proposal in whole, deny it in whole, or approve it in part and deny it in part. Such actions must be in writing, with a copy provided to Owner and Contractor. If Engineer does not take action on the Change

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Proposal within 30 days, then either Owner or Contractor may at any time thereafter submit a letter to the other party indicating that as a result of Engineer's inaction the Change Proposal is deemed denied, thereby commencing the time for appeal of the denial under Article 12.

5. *Binding Decision*: Engineer's decision is final and binding upon Owner and Contractor, unless Owner or Contractor appeals the decision by filing a Claim under Article 12.

C. *Resolution of Certain Change Proposals*: If the Change Proposal does not involve the design (as set forth in the Drawings, Specifications, or otherwise), the acceptability of the Work, or other engineering or technical matters, then Engineer will notify the parties in writing that the Engineer is unable to resolve the Change Proposal. For purposes of further resolution of such a Change Proposal, such notice will be deemed a denial, and Contractor may choose to seek resolution under the terms of Article 12.

D. *Post-Completion*: Contractor shall not submit any Change Proposals after Engineer issues a written recommendation of final payment pursuant to Paragraph 15.06.B.

11.10 *Notification to Surety*

A. If the provisions of any bond require notice to be given to a surety of any change affecting the general scope of the Work or the provisions of the Contract Documents (including, but not limited to, Contract Price or Contract Times), the giving of any such notice will be Contractor's responsibility. The amount of each applicable bond will be adjusted to reflect the effect of any such change.

ARTICLE 12—CLAIMS

12.01 *Claims*

A. *Claims Process*: The following disputes between Owner and Contractor are subject to the Claims process set forth in this article:

1. Appeals by Owner or Contractor of Engineer's decisions regarding Change Proposals;

2. Owner demands for adjustments in the Contract Price or Contract Times, or other relief under the Contract Documents;

3. Disputes that Engineer has been unable to address because they do not involve the design (as set forth in the Drawings, Specifications, or otherwise), the acceptability of the Work, or other engineering or technical matters; and

4. Subject to the waiver provisions of Paragraph 15.07, any dispute arising after Engineer has issued a written recommendation of final payment pursuant to Paragraph 15.06.B.

B. *Submittal of Claim*: The party submitting a Claim shall deliver it directly to the other party to the Contract promptly (but in no event later than 30 days) after the start of the event giving rise thereto; in the case of appeals regarding Change Proposals within 30 days of the decision under appeal. The party submitting the Claim shall also furnish a copy to the Engineer, for its information only. The responsibility to substantiate a Claim rests with the party making the Claim. In the case of a Claim by Contractor seeking an increase in the Contract Times or Contract Price, Contractor shall certify that the Claim is made in good faith, that the supporting data are accurate and complete, and that to the best of Contractor's knowledge

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

and belief the amount of time or money requested accurately reflects the full amount to which Contractor is entitled.

C. *Review and Resolution*: The party receiving a Claim shall review it thoroughly, giving full consideration to its merits. The two parties shall seek to resolve the Claim through the exchange of information and direct negotiations. The parties may extend the time for resolving the Claim by mutual agreement. All actions taken on a Claim will be stated in writing and submitted to the other party, with a copy to Engineer.

D. *Mediation*

1. At any time after initiation of a Claim, Owner and Contractor may mutually agree to mediation of the underlying dispute. The agreement to mediate will stay the Claim submittal and response process.

2. If Owner and Contractor agree to mediation, then after 60 days from such agreement, either Owner or Contractor may unilaterally terminate the mediation process, and the Claim submittal and decision process will resume as of the date of the termination. If the mediation proceeds but is unsuccessful in resolving the dispute, the Claim submittal and decision process will resume as of the date of the conclusion of the mediation, as determined by the mediator.

3. Owner and Contractor shall each pay one-half of the mediator's fees and costs.

E. *Partial Approval*: If the party receiving a Claim approves the Claim in part and denies it in part, such action will be final and binding unless within 30 days of such action the other party invokes the procedure set forth in Article 17 for final resolution of disputes.

F. *Denial of Claim*: If efforts to resolve a Claim are not successful, the party receiving the Claim may deny it by giving written notice of denial to the other party. If the receiving party does not take action on the Claim within 90 days, then either Owner or Contractor may at any time thereafter submit a letter to the other party indicating that as a result of the inaction, the Claim is deemed denied, thereby commencing the time for appeal of the denial. A denial of the Claim will be final and binding unless within 30 days of the denial the other party invokes the procedure set forth in Article 17 for the final resolution of disputes.

G. *Final and Binding Results*: If the parties reach a mutual agreement regarding a Claim, whether through approval of the Claim, direct negotiations, mediation, or otherwise; or if a Claim is approved in part and denied in part, or denied in full, and such actions become final and binding; then the results of the agreement or action on the Claim will be incorporated in a Change Order or other written document to the extent they affect the Contract, including the Work, the Contract Times, or the Contract Price.

ARTICLE 13—COST OF THE WORK; ALLOWANCES; UNIT PRICE WORK

13.01 *Cost of the Work*

A. *Purposes for Determination of Cost of the Work*: The term Cost of the Work means the sum of all costs necessary for the proper performance of the Work at issue, as further defined below. The provisions of this Paragraph 13.01 are used for two distinct purposes:

1. To determine Cost of the Work when Cost of the Work is a component of the Contract Price, under cost-plus-fee, time-and-materials, or other cost-based terms; or

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

2. When needed to determine the value of a Change Order, Change Proposal, Claim, set-off, or other adjustment in Contract Price. When the value of any such adjustment is determined on the basis of Cost of the Work, Contractor is entitled only to those additional or incremental costs required because of the change in the Work or because of the event giving rise to the adjustment.

B. *Costs Included*: Except as otherwise may be agreed to in writing by Owner, costs included in the Cost of the Work will be in amounts no higher than those commonly incurred in the locality of the Project, will not include any of the costs itemized in Paragraph 13.01.C, and will include only the following items:

1. Payroll costs for employees in the direct employ of Contractor in the performance of the Work under schedules of job classifications agreed upon by Owner and Contractor in advance of the subject Work. Such employees include, without limitation, superintendents, foremen, safety managers, safety representatives, and other personnel employed full time on the Work. Payroll costs for employees not employed full time on the Work will be apportioned on the basis of their time spent on the Work. Payroll costs include, but are not limited to, salaries and wages plus the cost of fringe benefits, which include social security contributions, unemployment, excise, and payroll taxes, workers' compensation, health and retirement benefits, sick leave, and vacation and holiday pay applicable thereto. The expenses of performing Work outside of regular working hours, on Saturday, Sunday, or legal holidays, will be included in the above to the extent authorized by Owner.

2. Cost of all materials and equipment furnished and incorporated in the Work, including costs of transportation and storage thereof, and Suppliers' field services required in connection therewith. All cash discounts accrue to Contractor unless Owner deposits funds with Contractor with which to make payments, in which case the cash discounts will accrue to Owner. All trade discounts, rebates, and refunds and returns from sale of surplus materials and equipment will accrue to Owner, and Contractor shall make provisions so that they may be obtained.

3. Payments made by Contractor to Subcontractors for Work performed by Subcontractors. If required by Owner, Contractor shall obtain competitive bids from subcontractors acceptable to Owner and Contractor and shall deliver such bids to Owner, which will then determine, with the advice of Engineer, which bids, if any, will be acceptable. If any subcontract provides that the Subcontractor is to be paid on the basis of Cost of the Work plus a fee, the Subcontractor's Cost of the Work and fee will be determined in the same manner as Contractor's Cost of the Work and fee as provided in this Paragraph 13.01.

4. Costs of special consultants (including but not limited to engineers, architects, testing laboratories, surveyors, attorneys, and accountants) employed or retained for services specifically related to the Work.

5. Other costs consisting of the following:

a. The proportion of necessary transportation, travel, and subsistence expenses of Contractor's employees incurred in discharge of duties connected with the Work.

b. Cost, including transportation and maintenance, of all materials, supplies, equipment, machinery, appliances, office, and temporary facilities at the Site, which are

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

consumed in the performance of the Work, and cost, less market value, of such items used but not consumed which remain the property of Contractor.

1) In establishing included costs for materials such as scaffolding, plating, or sheeting, consideration will be given to the actual or the estimated life of the material for use on other projects; or rental rates may be established on the basis of purchase or salvage value of such items, whichever is less. Contractor will not be eligible for compensation for such items in an amount that exceeds the purchase cost of such item.

c. *Construction Equipment Rental*

1) Rentals of all construction equipment and machinery, and the parts thereof, in accordance with rental agreements approved by Owner as to price (including any surcharge or special rates applicable to overtime use of the construction equipment or machinery), and the costs of transportation, loading, unloading, assembly, dismantling, and removal thereof. All such costs will be in accordance with the terms of said rental agreements. The rental of any such equipment, machinery, or parts must cease when the use thereof is no longer necessary for the Work.

2) Costs for equipment and machinery owned by Contractor or a Contractor-related entity will be paid at a rate shown for such equipment in the equipment rental rate book specified in the Supplementary Conditions. An hourly rate will be computed by dividing the monthly rates by 176. These computed rates will include all operating costs.

3) With respect to Work that is the result of a Change Order, Change Proposal, Claim, set-off, or other adjustment in Contract Price ("changed Work"), included costs will be based on the time the equipment or machinery is in use on the changed Work and the costs of transportation, loading, unloading, assembly, dismantling, and removal when directly attributable to the changed Work. The cost of any such equipment or machinery, or parts thereof, must cease to accrue when the use thereof is no longer necessary for the changed Work.

d. Sales, consumer, use, and other similar taxes related to the Work, and for which Contractor is liable, as imposed by Laws and Regulations.

e. Deposits lost for causes other than negligence of Contractor, any Subcontractor, or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable, and royalty payments and fees for permits and licenses.

f. Losses and damages (and related expenses) caused by damage to the Work, not compensated by insurance or otherwise, sustained by Contractor in connection with the performance of the Work (except losses and damages within the deductible amounts of builder's risk or other property insurance established in accordance with Paragraph 6.04), provided such losses and damages have resulted from causes other than the negligence of Contractor, any Subcontractor, or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable. Such losses include settlements made with the written consent and approval of Owner. No such losses, damages, and expenses will be included in the Cost of the Work for the purpose of determining Contractor's fee.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

g. The cost of utilities, fuel, and sanitary facilities at the Site.

h. Minor expenses such as communication service at the Site, express and courier services, and similar petty cash items in connection with the Work.

i. The costs of premiums for all bonds and insurance that Contractor is required by the Contract Documents to purchase and maintain.

C. *Costs Excluded*: The term Cost of the Work does not include any of the following items:

1. Payroll costs and other compensation of Contractor's officers, executives, principals, general managers, engineers, architects, estimators, attorneys, auditors, accountants, purchasing and contracting agents, expediters, timekeepers, clerks, and other personnel employed by Contractor, whether at the Site or in Contractor's principal or branch office for general administration of the Work and not specifically included in the agreed upon schedule of job classifications referred to in Paragraph 13.01.B.1 or specifically covered by Paragraph 13.01.B.4. The payroll costs and other compensation excluded here are to be considered administrative costs covered by the Contractor's fee.

2. The cost of purchasing, renting, or furnishing small tools and hand tools.

3. Expenses of Contractor's principal and branch offices other than Contractor's office at the Site.

4. Any part of Contractor's capital expenses, including interest on Contractor's capital employed for the Work and charges against Contractor for delinquent payments.

5. Costs due to the negligence of Contractor, any Subcontractor, or anyone directly or indirectly employed by any of them or for whose acts any of them may be liable, including but not limited to, the correction of defective Work, disposal of materials or equipment wrongly supplied, and making good any damage to property.

6. Expenses incurred in preparing and advancing Claims.

7. Other overhead or general expense costs of any kind and the costs of any item not specifically and expressly included in Paragraph 13.01.B.

D. *Contractor's Fee*

1. When the Work as a whole is performed on the basis of cost-plus-a-fee, then:

a. Contractor's fee for the Work set forth in the Contract Documents as of the Effective Date of the Contract will be determined as set forth in the Agreement.

b. for any Work covered by a Change Order, Change Proposal, Claim, set-off, or other adjustment in Contract Price on the basis of Cost of the Work, Contractor's fee will be determined as follows:

1) When the fee for the Work as a whole is a percentage of the Cost of the Work, the fee will automatically adjust as the Cost of the Work changes.

2) When the fee for the Work as a whole is a fixed fee, the fee for any additions or deletions will be determined in accordance with Paragraph 11.07.C.2.

2. When the Work as a whole is performed on the basis of a stipulated sum, or any other basis other than cost-plus-a-fee, then Contractor's fee for any Work covered by a Change

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Order, Change Proposal, Claim, set-off, or other adjustment in Contract Price on the basis of Cost of the Work will be determined in accordance with Paragraph 11.07.C.2.

E. *Documentation and Audit*: Whenever the Cost of the Work for any purpose is to be determined pursuant to this Article 13, Contractor and pertinent Subcontractors will establish and maintain records of the costs in accordance with generally accepted accounting practices. Subject to prior written notice, Owner will be afforded reasonable access, during normal business hours, to all Contractor's accounts, records, books, correspondence, instructions, drawings, receipts, vouchers, memoranda, and similar data relating to the Cost of the Work and Contractor's fee. Contractor shall preserve all such documents for a period of three years after the final payment by Owner. Pertinent Subcontractors will afford such access to Owner, and preserve such documents, to the same extent required of Contractor.

13.02 *Allowances*

A. It is understood that Contractor has included in the Contract Price all allowances so named in the Contract Documents and shall cause the Work so covered to be performed for such sums and by such persons or entities as may be acceptable to Owner and Engineer.

B. *Cash Allowances*: Contractor agrees that:

1. the cash allowances include the cost to Contractor (less any applicable trade discounts) of materials and equipment required by the allowances to be delivered at the Site, and all applicable taxes; and

2. Contractor's costs for unloading and handling on the Site, labor, installation, overhead, profit, and other expenses contemplated for the cash allowances have been included in the Contract Price and not in the allowances, and no demand for additional payment for any of the foregoing will be valid.

C. *Owner's Contingency Allowance*: Contractor agrees that an Owner's contingency allowance, if any, is for the sole use of Owner to cover unanticipated costs.

D. Prior to final payment, an appropriate Change Order will be issued as recommended by Engineer to reflect actual amounts due Contractor for Work covered by allowances, and the Contract Price will be correspondingly adjusted.

13.03 *Unit Price Work*

A. Where the Contract Documents provide that all or part of the Work is to be Unit Price Work, initially the Contract Price will be deemed to include for all Unit Price Work an amount equal to the sum of the unit price for each separately identified item of Unit Price Work times the estimated quantity of each item as indicated in the Agreement.

B. The estimated quantities of items of Unit Price Work are not guaranteed and are solely for the purpose of comparison of Bids and determining an initial Contract Price. Payments to Contractor for Unit Price Work will be based on actual quantities.

C. Each unit price will be deemed to include an amount considered by Contractor to be adequate to cover Contractor's overhead and profit for each separately identified item.

D. Engineer will determine the actual quantities and classifications of Unit Price Work performed by Contractor. Engineer will review with Contractor the Engineer's preliminary determinations on such matters before rendering a written decision thereon (by recommendation of an Application for Payment or otherwise). Engineer's written decision

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

thereon will be final and binding (except as modified by Engineer to reflect changed factual conditions or more accurate data) upon Owner and Contractor, and the final adjustment of Contract Price will be set forth in a Change Order, subject to the provisions of the following paragraph.

E. *Adjustments in Unit Price*

1. Contractor or Owner shall be entitled to an adjustment in the unit price with respect to an item of Unit Price Work if:

a. the quantity of the item of Unit Price Work performed by Contractor differs materially and significantly from the estimated quantity of such item indicated in the Agreement; and

b. Contractor's unit costs to perform the item of Unit Price Work have changed materially and significantly as a result of the quantity change.

2. The adjustment in unit price will account for and be coordinated with any related changes in quantities of other items of Work, and in Contractor's costs to perform such other Work, such that the resulting overall change in Contract Price is equitable to Owner and Contractor.

3. Adjusted unit prices will apply to all units of that item.

ARTICLE 14—TESTS AND INSPECTIONS; CORRECTION, REMOVAL, OR ACCEPTANCE OF DEFECTIVE WORK

14.01 *Access to Work*

A. Owner, Engineer, their consultants and other representatives and personnel of Owner, independent testing laboratories, and authorities having jurisdiction have access to the Site and the Work at reasonable times for their observation, inspection, and testing. Contractor shall provide them proper and safe conditions for such access and advise them of Contractor's safety procedures and programs so that they may comply with such procedures and programs as applicable.

14.02 *Tests, Inspections, and Approvals*

A. Contractor shall give Engineer timely notice of readiness of the Work (or specific parts thereof) for all required inspections and tests, and shall cooperate with inspection and testing personnel to facilitate required inspections and tests.

B. Owner shall retain and pay for the services of an independent inspector, testing laboratory, or other qualified individual or entity to perform all inspections and tests expressly required by the Contract Documents to be furnished and paid for by Owner, except that costs incurred in connection with tests or inspections of covered Work will be governed by the provisions of Paragraph 14.05.

C. If Laws or Regulations of any public body having jurisdiction require any Work (or part thereof) specifically to be inspected, tested, or approved by an employee or other representative of such public body, Contractor shall assume full responsibility for arranging and obtaining such inspections, tests, or approvals, pay all costs in connection therewith, and furnish Engineer the required certificates of inspection or approval.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

D. Contractor shall be responsible for arranging, obtaining, and paying for all inspections and tests required:

1. by the Contract Documents, unless the Contract Documents expressly allocate responsibility for a specific inspection or test to Owner;

2. to attain Owner's and Engineer's acceptance of materials or equipment to be incorporated in the Work;

3. by manufacturers of equipment furnished under the Contract Documents;

4. for testing, adjusting, and balancing of mechanical, electrical, and other equipment to be incorporated into the Work; and

5. for acceptance of materials, mix designs, or equipment submitted for approval prior to Contractor's purchase thereof for incorporation in the Work.

Such inspections and tests will be performed by independent inspectors, testing laboratories, or other qualified individuals or entities acceptable to Owner and Engineer.

E. If the Contract Documents require the Work (or part thereof) to be approved by Owner, Engineer, or another designated individual or entity, then Contractor shall assume full responsibility for arranging and obtaining such approvals.

F. If any Work (or the work of others) that is to be inspected, tested, or approved is covered by Contractor without written concurrence of Engineer, Contractor shall, if requested by Engineer, uncover such Work for observation. Such uncovering will be at Contractor's expense unless Contractor had given Engineer timely notice of Contractor's intention to cover the same and Engineer had not acted with reasonable promptness in response to such notice.

14.03 *Defective Work*

A. *Contractor's Obligation*: It is Contractor's obligation to assure that the Work is not defective.

B. *Engineer's Authority*: Engineer has the authority to determine whether Work is defective, and to reject defective Work.

C. *Notice of Defects*: Prompt written notice of all defective Work of which Owner or Engineer has actual knowledge will be given to Contractor.

D. *Correction, or Removal and Replacement*: Promptly after receipt of written notice of defective Work, Contractor shall correct all such defective Work, whether or not fabricated, installed, or completed, or, if Engineer has rejected the defective Work, remove it from the Project and replace it with Work that is not defective.

E. *Preservation of Warranties*: When correcting defective Work, Contractor shall take no action that would void or otherwise impair Owner's special warranty and guarantee, if any, on said Work.

F. *Costs and Damages*: In addition to its correction, removal, and replacement obligations with respect to defective Work, Contractor shall pay all claims, costs, losses, and damages arising out of or relating to defective Work, including but not limited to the cost of the inspection, testing, correction, removal, replacement, or reconstruction of such defective Work, fines levied against Owner by governmental authorities because the Work is defective, and the costs of repair or replacement of work of others resulting from defective Work. Prior to final payment, if Owner and Contractor are unable to agree as to the measure of such claims, costs,

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

losses, and damages resulting from defective Work, then Owner may impose a reasonable set-off against payments due under Article 15.

14.04 *Acceptance of Defective Work*

A. If, instead of requiring correction or removal and replacement of defective Work, Owner prefers to accept it, Owner may do so (subject, if such acceptance occurs prior to final payment, to Engineer's confirmation that such acceptance is in general accord with the design intent and applicable engineering principles, and will not endanger public safety). Contractor shall pay all claims, costs, losses, and damages attributable to Owner's evaluation of and determination to accept such defective Work (such costs to be approved by Engineer as to reasonableness), and for the diminished value of the Work to the extent not otherwise paid by Contractor. If any such acceptance occurs prior to final payment, the necessary revisions in the Contract Documents with respect to the Work will be incorporated in a Change Order. If the parties are unable to agree as to the decrease in the Contract Price, reflecting the diminished value of Work so accepted, then Owner may impose a reasonable set-off against payments due under Article 15. If the acceptance of defective Work occurs after final payment, Contractor shall pay an appropriate amount to Owner.

14.05 *Uncovering Work*

A. Engineer has the authority to require additional inspection or testing of the Work, whether or not the Work is fabricated, installed, or completed.

B. If any Work is covered contrary to the written request of Engineer, then Contractor shall, if requested by Engineer, uncover such Work for Engineer's observation, and then replace the covering, all at Contractor's expense.

C. If Engineer considers it necessary or advisable that covered Work be observed by Engineer or inspected or tested by others, then Contractor, at Engineer's request, shall uncover, expose, or otherwise make available for observation, inspection, or testing as Engineer may require, that portion of the Work in question, and provide all necessary labor, material, and equipment.

1. If it is found that the uncovered Work is defective, Contractor shall be responsible for all claims, costs, losses, and damages arising out of or relating to such uncovering, exposure, observation, inspection, and testing, and of satisfactory replacement or reconstruction (including but not limited to all costs of repair or replacement of work of others); and pending Contractor's full discharge of this responsibility the Owner shall be entitled to impose a reasonable set-off against payments due under Article 15.

2. If the uncovered Work is not found to be defective, Contractor shall be allowed an increase in the Contract Price or an extension of the Contract Times, directly attributable to such uncovering, exposure, observation, inspection, testing, replacement, and reconstruction. If the parties are unable to agree as to the amount or extent thereof, then Contractor may submit a Change Proposal within 30 days of the determination that the Work is not defective.

14.06 *Owner May Stop the Work*

A. If the Work is defective, or Contractor fails to supply sufficient skilled workers or suitable materials or equipment, or fails to perform the Work in such a way that the completed Work will conform to the Contract Documents, then Owner may order Contractor to stop the Work,

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

or any portion thereof, until the cause for such order has been eliminated; however, this right of Owner to stop the Work will not give rise to any duty on the part of Owner to exercise this right for the benefit of Contractor, any Subcontractor, any Supplier, any other individual or entity, or any surety for, or employee or agent of any of them.

14.07 *Owner May Correct Defective Work*

A. If Contractor fails within a reasonable time after written notice from Engineer to correct defective Work, or to remove and replace defective Work as required by Engineer, then Owner may, after 7 days' written notice to Contractor, correct or remedy any such deficiency.

B. In exercising the rights and remedies under this Paragraph 14.07, Owner shall proceed expeditiously. In connection with such corrective or remedial action, Owner may exclude Contractor from all or part of the Site, take possession of all or part of the Work and suspend Contractor's services related thereto, and incorporate in the Work all materials and equipment stored at the Site or for which Owner has paid Contractor but which are stored elsewhere. Contractor shall allow Owner, Owner's representatives, agents and employees, Owner's other contractors, and Engineer and Engineer's consultants access to the Site to enable Owner to exercise the rights and remedies under this paragraph.

C. All claims, costs, losses, and damages incurred or sustained by Owner in exercising the rights and remedies under this Paragraph 14.07 will be charged against Contractor as set-offs against payments due under Article 15. Such claims, costs, losses and damages will include but not be limited to all costs of repair, or replacement of work of others destroyed or damaged by correction, removal, or replacement of Contractor's defective Work.

D. Contractor shall not be allowed an extension of the Contract Times because of any delay in the performance of the Work attributable to the exercise by Owner of Owner's rights and remedies under this Paragraph 14.07.

ARTICLE 15—PAYMENTS TO CONTRACTOR; SET-OFFS; COMPLETION; CORRECTION PERIOD

15.01 *Progress Payments*

A. *Basis for Progress Payments*: The Schedule of Values established as provided in Article 2 will serve as the basis for progress payments and will be incorporated into a form of Application for Payment acceptable to Engineer. Progress payments for Unit Price Work will be based on the number of units completed during the pay period, as determined under the provisions of Paragraph 13.03. Progress payments for cost-based Work will be based on Cost of the Work completed by Contractor during the pay period.

B. *Applications for Payments*

1. At least 20 days before the date established in the Agreement for each progress payment (but not more often than once a month), Contractor shall submit to Engineer for review an Application for Payment filled out and signed by Contractor covering the Work completed as of the date of the Application and accompanied by such supporting documentation as is required by the Contract Documents.

2. If payment is requested on the basis of materials and equipment not incorporated in the Work but delivered and suitably stored at the Site or at another location agreed to in writing, the Application for Payment must also be accompanied by: (a) a bill of sale, invoice, copies of subcontract or purchase order payments, or other documentation

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

establishing full payment by Contractor for the materials and equipment; (b) at Owner's request, documentation warranting that Owner has received the materials and equipment free and clear of all Liens; and (c) evidence that the materials and equipment are covered by appropriate property insurance, a warehouse bond, or other arrangements to protect Owner's interest therein, all of which must be satisfactory to Owner.

3. Beginning with the second Application for Payment, each Application must include an affidavit of Contractor stating that all previous progress payments received by Contractor have been applied to discharge Contractor's legitimate obligations associated with prior Applications for Payment.

4. The amount of retainage with respect to progress payments will be as stipulated in the Agreement.

C. *Review of Applications*

1. Engineer will, within 10 days after receipt of each Application for Payment, including each resubmittal, either indicate in writing a recommendation of payment and present the Application to Owner, or return the Application to Contractor indicating in writing Engineer's reasons for refusing to recommend payment. In the latter case, Contractor may make the necessary corrections and resubmit the Application.

2. Engineer's recommendation of any payment requested in an Application for Payment will constitute a representation by Engineer to Owner, based on Engineer's observations of the executed Work as an experienced and qualified design professional, and on Engineer's review of the Application for Payment and the accompanying data and schedules, that to the best of Engineer's knowledge, information and belief:

   a. the Work has progressed to the point indicated;

   b. the quality of the Work is generally in accordance with the Contract Documents (subject to an evaluation of the Work as a functioning whole prior to or upon Substantial Completion, the results of any subsequent tests called for in the Contract Documents, a final determination of quantities and classifications for Unit Price Work under Paragraph 13.03, and any other qualifications stated in the recommendation); and

   c. the conditions precedent to Contractor's being entitled to such payment appear to have been fulfilled in so far as it is Engineer's responsibility to observe the Work.

3. By recommending any such payment Engineer will not thereby be deemed to have represented that:

   a. inspections made to check the quality or the quantity of the Work as it has been performed have been exhaustive, extended to every aspect of the Work in progress, or involved detailed inspections of the Work beyond the responsibilities specifically assigned to Engineer in the Contract; or

   b. there may not be other matters or issues between the parties that might entitle Contractor to be paid additionally by Owner or entitle Owner to withhold payment to Contractor.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

4. Neither Engineer's review of Contractor's Work for the purposes of recommending payments nor Engineer's recommendation of any payment, including final payment, will impose responsibility on Engineer:

    a. to supervise, direct, or control the Work;

    b. for the means, methods, techniques, sequences, or procedures of construction, or the safety precautions and programs incident thereto;

    c. for Contractor's failure to comply with Laws and Regulations applicable to Contractor's performance of the Work;

    d. to make any examination to ascertain how or for what purposes Contractor has used the money paid by Owner; or

    e. to determine that title to any of the Work, materials, or equipment has passed to Owner free and clear of any Liens.

5. Engineer may refuse to recommend the whole or any part of any payment if, in Engineer's opinion, it would be incorrect to make the representations to Owner stated in Paragraph 15.01.C.2.

6. Engineer will recommend reductions in payment (set-offs) necessary in Engineer's opinion to protect Owner from loss because:

    a. the Work is defective, requiring correction or replacement;

    b. the Contract Price has been reduced by Change Orders;

    c. Owner has been required to correct defective Work in accordance with Paragraph 14.07, or has accepted defective Work pursuant to Paragraph 14.04;

    d. Owner has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible; or

    e. Engineer has actual knowledge of the occurrence of any of the events that would constitute a default by Contractor and therefore justify termination for cause under the Contract Documents.

D. *Payment Becomes Due*

1. Ten days after presentation of the Application for Payment to Owner with Engineer's recommendation, the amount recommended (subject to any Owner set-offs) will become due, and when due will be paid by Owner to Contractor.

E. *Reductions in Payment by Owner*

1. In addition to any reductions in payment (set-offs) recommended by Engineer, Owner is entitled to impose a set-off against payment based on any of the following:

    a. Claims have been made against Owner based on Contractor's conduct in the performance or furnishing of the Work, or Owner has incurred costs, losses, or damages resulting from Contractor's conduct in the performance or furnishing of the Work, including but not limited to claims, costs, losses, or damages from workplace injuries, adjacent property damage, non-compliance with Laws and Regulations, and patent infringement;

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

b. Contractor has failed to take reasonable and customary measures to avoid damage, delay, disruption, and interference with other work at or adjacent to the Site;

c. Contractor has failed to provide and maintain required bonds or insurance;

d. Owner has been required to remove or remediate a Hazardous Environmental Condition for which Contractor is responsible;

e. Owner has incurred extra charges or engineering costs related to submittal reviews, evaluations of proposed substitutes, tests and inspections, or return visits to manufacturing or assembly facilities;

f. The Work is defective, requiring correction or replacement;

g. Owner has been required to correct defective Work in accordance with Paragraph 14.07, or has accepted defective Work pursuant to Paragraph 14.04;

h. The Contract Price has been reduced by Change Orders;

i. An event has occurred that would constitute a default by Contractor and therefore justify a termination for cause;

j. Liquidated or other damages have accrued as a result of Contractor's failure to achieve Milestones, Substantial Completion, or final completion of the Work;

k. Liens have been filed in connection with the Work, except where Contractor has delivered a specific bond satisfactory to Owner to secure the satisfaction and discharge of such Liens; or

l. Other items entitle Owner to a set-off against the amount recommended.

2. If Owner imposes any set-off against payment, whether based on its own knowledge or on the written recommendations of Engineer, Owner will give Contractor immediate written notice (with a copy to Engineer) stating the reasons for such action and the specific amount of the reduction, and promptly pay Contractor any amount remaining after deduction of the amount so withheld. Owner shall promptly pay Contractor the amount so withheld, or any adjustment thereto agreed to by Owner and Contractor, if Contractor remedies the reasons for such action. The reduction imposed will be binding on Contractor unless it duly submits a Change Proposal contesting the reduction.

3. Upon a subsequent determination that Owner's refusal of payment was not justified, the amount wrongfully withheld will be treated as an amount due as determined by Paragraph 15.01.D.1 and subject to interest as provided in the Agreement.

15.02 *Contractor's Warranty of Title*

A. Contractor warrants and guarantees that title to all Work, materials, and equipment furnished under the Contract will pass to Owner free and clear of (1) all Liens and other title defects, and (2) all patent, licensing, copyright, or royalty obligations, no later than 7 days after the time of payment by Owner.

15.03 *Substantial Completion*

A. When Contractor considers the entire Work ready for its intended use Contractor shall notify Owner and Engineer in writing that the entire Work is substantially complete and request that Engineer issue a certificate of Substantial Completion. Contractor shall at the same time

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

submit to Owner and Engineer an initial draft of punch list items to be completed or corrected before final payment.

B. Promptly after Contractor's notification, Owner, Contractor, and Engineer shall make an inspection of the Work to determine the status of completion. If Engineer does not consider the Work substantially complete, Engineer will notify Contractor in writing giving the reasons therefor.

C. If Engineer considers the Work substantially complete, Engineer will deliver to Owner a preliminary certificate of Substantial Completion which will fix the date of Substantial Completion. Engineer shall attach to the certificate a punch list of items to be completed or corrected before final payment. Owner shall have 7 days after receipt of the preliminary certificate during which to make written objection to Engineer as to any provisions of the certificate or attached punch list. If, after considering the objections to the provisions of the preliminary certificate, Engineer concludes that the Work is not substantially complete, Engineer will, within 14 days after submission of the preliminary certificate to Owner, notify Contractor in writing that the Work is not substantially complete, stating the reasons therefor. If Owner does not object to the provisions of the certificate, or if despite consideration of Owner's objections Engineer concludes that the Work is substantially complete, then Engineer will, within said 14 days, execute and deliver to Owner and Contractor a final certificate of Substantial Completion (with a revised punch list of items to be completed or corrected) reflecting such changes from the preliminary certificate as Engineer believes justified after consideration of any objections from Owner.

D. At the time of receipt of the preliminary certificate of Substantial Completion, Owner and Contractor will confer regarding Owner's use or occupancy of the Work following Substantial Completion, review the builder's risk insurance policy with respect to the end of the builder's risk coverage, and confirm the transition to coverage of the Work under a permanent property insurance policy held by Owner. Unless Owner and Contractor agree otherwise in writing, Owner shall bear responsibility for security, operation, protection of the Work, property insurance, maintenance, heat, and utilities upon Owner's use or occupancy of the Work.

E. After Substantial Completion the Contractor shall promptly begin work on the punch list of items to be completed or corrected prior to final payment. In appropriate cases Contractor may submit monthly Applications for Payment for completed punch list items, following the progress payment procedures set forth above.

F. Owner shall have the right to exclude Contractor from the Site after the date of Substantial Completion subject to allowing Contractor reasonable access to remove its property and complete or correct items on the punch list.

15.04 *Partial Use or Occupancy*

A. Prior to Substantial Completion of all the Work, Owner may use or occupy any substantially completed part of the Work which has specifically been identified in the Contract Documents, or which Owner, Engineer, and Contractor agree constitutes a separately functioning and usable part of the Work that can be used by Owner for its intended purpose without

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

significant interference with Contractor's performance of the remainder of the Work, subject to the following conditions:

1. At any time, Owner may request in writing that Contractor permit Owner to use or occupy any such part of the Work that Owner believes to be substantially complete. If and when Contractor agrees that such part of the Work is substantially complete, Contractor, Owner, and Engineer will follow the procedures of Paragraph 15.03.A through 15.03.E for that part of the Work.

2. At any time, Contractor may notify Owner and Engineer in writing that Contractor considers any such part of the Work substantially complete and request Engineer to issue a certificate of Substantial Completion for that part of the Work.

3. Within a reasonable time after either such request, Owner, Contractor, and Engineer shall make an inspection of that part of the Work to determine its status of completion. If Engineer does not consider that part of the Work to be substantially complete, Engineer will notify Owner and Contractor in writing giving the reasons therefor. If Engineer considers that part of the Work to be substantially complete, the provisions of Paragraph 15.03 will apply with respect to certification of Substantial Completion of that part of the Work and the division of responsibility in respect thereof and access thereto.

4. No use or occupancy or separate operation of part of the Work may occur prior to compliance with the requirements of Paragraph 6.04 regarding builder's risk or other property insurance.

15.05 *Final Inspection*

A. Upon written notice from Contractor that the entire Work or an agreed portion thereof is complete, Engineer will promptly make a final inspection with Owner and Contractor and will notify Contractor in writing of all particulars in which this inspection reveals that the Work, or agreed portion thereof, is incomplete or defective. Contractor shall immediately take such measures as are necessary to complete such Work or remedy such deficiencies.

15.06 *Final Payment*

A. *Application for Payment*

1. After Contractor has, in the opinion of Engineer, satisfactorily completed all corrections identified during the final inspection and has delivered, in accordance with the Contract Documents, all maintenance and operating instructions, schedules, guarantees, bonds, certificates or other evidence of insurance, certificates of inspection, annotated record documents (as provided in Paragraph 7.12), and other documents, Contractor may make application for final payment.

2. The final Application for Payment must be accompanied (except as previously delivered) by:

   a. all documentation called for in the Contract Documents;

   b. consent of the surety, if any, to final payment;

   c. satisfactory evidence that all title issues have been resolved such that title to all Work, materials, and equipment has passed to Owner free and clear of any Liens or other title defects, or will so pass upon final payment.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

d. a list of all duly pending Change Proposals and Claims; and

e. complete and legally effective releases or waivers (satisfactory to Owner) of all Lien rights arising out of the Work, and of Liens filed in connection with the Work.

3. In lieu of the releases or waivers of Liens specified in Paragraph 15.06.A.2 and as approved by Owner, Contractor may furnish receipts or releases in full and an affidavit of Contractor that: (a) the releases and receipts include all labor, services, material, and equipment for which a Lien could be filed; and (b) all payrolls, material and equipment bills, and other indebtedness connected with the Work for which Owner might in any way be responsible, or which might in any way result in liens or other burdens on Owner's property, have been paid or otherwise satisfied. If any Subcontractor or Supplier fails to furnish such a release or receipt in full, Contractor may furnish a bond or other collateral satisfactory to Owner to indemnify Owner against any Lien, or Owner at its option may issue joint checks payable to Contractor and specified Subcontractors and Suppliers.

B. *Engineer's Review of Final Application and Recommendation of Payment*: If, on the basis of Engineer's observation of the Work during construction and final inspection, and Engineer's review of the final Application for Payment and accompanying documentation as required by the Contract Documents, Engineer is satisfied that the Work has been completed and Contractor's other obligations under the Contract have been fulfilled, Engineer will, within 10 days after receipt of the final Application for Payment, indicate in writing Engineer's recommendation of final payment and present the final Application for Payment to Owner for payment. Such recommendation will account for any set-offs against payment that are necessary in Engineer's opinion to protect Owner from loss for the reasons stated above with respect to progress payments. Otherwise, Engineer will return the Application for Payment to Contractor, indicating in writing the reasons for refusing to recommend final payment, in which case Contractor shall make the necessary corrections and resubmit the Application for Payment.

C. *Notice of Acceptability*: In support of its recommendation of payment of the final Application for Payment, Engineer will also give written notice to Owner and Contractor that the Work is acceptable, subject to stated limitations in the notice and to the provisions of Paragraph 15.07.

D. *Completion of Work*: The Work is complete (subject to surviving obligations) when it is ready for final payment as established by the Engineer's written recommendation of final payment and issuance of notice of the acceptability of the Work.

E. *Final Payment Becomes Due*: Upon receipt from Engineer of the final Application for Payment and accompanying documentation, Owner shall set off against the amount recommended by Engineer for final payment any further sum to which Owner is entitled, including but not limited to set-offs for liquidated damages and set-offs allowed under the provisions of this Contract with respect to progress payments. Owner shall pay the resulting balance due to Contractor within 30 days of Owner's receipt of the final Application for Payment from Engineer.

15.07 *Waiver of Claims*

A. By making final payment, Owner waives its claim or right to liquidated damages or other damages for late completion by Contractor, except as set forth in an outstanding Claim,

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

appeal under the provisions of Article 17, set-off, or express reservation of rights by Owner. Owner reserves all other claims or rights after final payment.

B. The acceptance of final payment by Contractor will constitute a waiver by Contractor of all claims and rights against Owner other than those pending matters that have been duly submitted as a Claim, or appealed under the provisions of Article 17.

15.08 *Correction Period*

A. If within one year after the date of Substantial Completion (or such longer period of time as may be prescribed by the Supplementary Conditions or the terms of any applicable special guarantee required by the Contract Documents), Owner gives Contractor written notice that any Work has been found to be defective, or that Contractor's repair of any damages to the Site or adjacent areas has been found to be defective, then after receipt of such notice of defect Contractor shall promptly, without cost to Owner and in accordance with Owner's written instructions:

1. correct the defective repairs to the Site or such adjacent areas;
2. correct such defective Work;
3. remove the defective Work from the Project and replace it with Work that is not defective, if the defective Work has been rejected by Owner, and
4. satisfactorily correct or repair or remove and replace any damage to other Work, to the work of others, or to other land or areas resulting from the corrective measures.

B. Owner shall give any such notice of defect within 60 days of the discovery that such Work or repairs is defective. If such notice is given within such 60 days but after the end of the correction period, the notice will be deemed a notice of defective Work under Paragraph 7.17.B.

C. If, after receipt of a notice of defect within 60 days and within the correction period, Contractor does not promptly comply with the terms of Owner's written instructions, or in an emergency where delay would cause serious risk of loss or damage, Owner may have the defective Work corrected or repaired or may have the rejected Work removed and replaced. Contractor shall pay all costs, losses, and damages (including but not limited to all fees and charges of engineers, architects, attorneys, and other professionals and all court or arbitration or other dispute resolution costs) arising out of or relating to such correction or repair or such removal and replacement (including but not limited to all costs of repair or replacement of work of others). Contractor's failure to pay such costs, losses, and damages within 10 days of invoice from Owner will be deemed the start of an event giving rise to a Claim under Paragraph 12.01.B, such that any related Claim must be brought within 30 days of the failure to pay.

D. In special circumstances where a particular item of equipment is placed in continuous service before Substantial Completion of all the Work, the correction period for that item may start to run from an earlier date if so provided in the Specifications.

E. Where defective Work (and damage to other Work resulting therefrom) has been corrected or removed and replaced under this paragraph, the correction period hereunder with respect to such Work will be extended for an additional period of one year after such correction or removal and replacement has been satisfactorily completed.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

F. Contractor's obligations under this paragraph are in addition to all other obligations and warranties. The provisions of this paragraph are not to be construed as a substitute for, or a waiver of, the provisions of any applicable statute of limitation or repose.

ARTICLE 16—SUSPENSION OF WORK AND TERMINATION

16.01 *Owner May Suspend Work*

A. At any time and without cause, Owner may suspend the Work or any portion thereof for a period of not more than 90 consecutive days by written notice to Contractor and Engineer. Such notice will fix the date on which Work will be resumed. Contractor shall resume the Work on the date so fixed. Contractor shall be entitled to an adjustment in the Contract Price or an extension of the Contract Times directly attributable to any such suspension. Any Change Proposal seeking such adjustments must be submitted no later than 30 days after the date fixed for resumption of Work.

16.02 *Owner May Terminate for Cause*

A. The occurrence of any one or more of the following events will constitute a default by Contractor and justify termination for cause:

1. Contractor's persistent failure to perform the Work in accordance with the Contract Documents (including, but not limited to, failure to supply sufficient skilled workers or suitable materials or equipment, or failure to adhere to the Progress Schedule);

2. Failure of Contractor to perform or otherwise to comply with a material term of the Contract Documents;

3. Contractor's disregard of Laws or Regulations of any public body having jurisdiction; or

4. Contractor's repeated disregard of the authority of Owner or Engineer.

B. If one or more of the events identified in Paragraph 16.02.A occurs, then after giving Contractor (and any surety) 10 days' written notice that Owner is considering a declaration that Contractor is in default and termination of the Contract, Owner may proceed to:

1. declare Contractor to be in default, and give Contractor (and any surety) written notice that the Contract is terminated; and

2. enforce the rights available to Owner under any applicable performance bond.

C. Subject to the terms and operation of any applicable performance bond, if Owner has terminated the Contract for cause, Owner may exclude Contractor from the Site, take possession of the Work, incorporate in the Work all materials and equipment stored at the Site or for which Owner has paid Contractor but which are stored elsewhere, and complete the Work as Owner may deem expedient.

D. Owner may not proceed with termination of the Contract under Paragraph 16.02.B if Contractor within 7 days of receipt of notice of intent to terminate begins to correct its failure to perform and proceeds diligently to cure such failure.

E. If Owner proceeds as provided in Paragraph 16.02.B, Contractor shall not be entitled to receive any further payment until the Work is completed. If the unpaid balance of the Contract Price exceeds the cost to complete the Work, including all related claims, costs, losses, and damages (including but not limited to all fees and charges of engineers, architects,

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

attorneys, and other professionals) sustained by Owner, such excess will be paid to Contractor. If the cost to complete the Work including such related claims, costs, losses, and damages exceeds such unpaid balance, Contractor shall pay the difference to Owner. Such claims, costs, losses, and damages incurred by Owner will be reviewed by Engineer as to their reasonableness and, when so approved by Engineer, incorporated in a Change Order. When exercising any rights or remedies under this paragraph, Owner shall not be required to obtain the lowest price for the Work performed.

F. Where Contractor's services have been so terminated by Owner, the termination will not affect any rights or remedies of Owner against Contractor then existing or which may thereafter accrue, or any rights or remedies of Owner against Contractor or any surety under any payment bond or performance bond. Any retention or payment of money due Contractor by Owner will not release Contractor from liability.

G. If and to the extent that Contractor has provided a performance bond under the provisions of Paragraph 6.01.A, the provisions of that bond will govern over any inconsistent provisions of Paragraphs 16.02.B and 16.02.D.

16.03 *Owner May Terminate for Convenience*

A. Upon 7 days' written notice to Contractor and Engineer, Owner may, without cause and without prejudice to any other right or remedy of Owner, terminate the Contract. In such case, Contractor shall be paid for (without duplication of any items):

1. completed and acceptable Work executed in accordance with the Contract Documents prior to the effective date of termination, including fair and reasonable sums for overhead and profit on such Work;

2. expenses sustained prior to the effective date of termination in performing services and furnishing labor, materials, or equipment as required by the Contract Documents in connection with uncompleted Work, plus fair and reasonable sums for overhead and profit on such expenses; and

3. other reasonable expenses directly attributable to termination, including costs incurred to prepare a termination for convenience cost proposal.

B. Contractor shall not be paid for any loss of anticipated profits or revenue, post-termination overhead costs, or other economic loss arising out of or resulting from such termination.

16.04 *Contractor May Stop Work or Terminate*

A. If, through no act or fault of Contractor, (1) the Work is suspended for more than 90 consecutive days by Owner or under an order of court or other public authority, or (2) Engineer fails to act on any Application for Payment within 30 days after it is submitted, or (3) Owner fails for 30 days to pay Contractor any sum finally determined to be due, then Contractor may, upon 7 days' written notice to Owner and Engineer, and provided Owner or Engineer do not remedy such suspension or failure within that time, terminate the contract and recover from Owner payment on the same terms as provided in Paragraph 16.03.

B. In lieu of terminating the Contract and without prejudice to any other right or remedy, if Engineer has failed to act on an Application for Payment within 30 days after it is submitted, or Owner has failed for 30 days to pay Contractor any sum finally determined to be due, Contractor may, 7 days after written notice to Owner and Engineer, stop the Work until payment is made of all such amounts due Contractor, including interest thereon. The

provisions of this paragraph are not intended to preclude Contractor from submitting a Change Proposal for an adjustment in Contract Price or Contract Times or otherwise for expenses or damage directly attributable to Contractor's stopping the Work as permitted by this paragraph.

ARTICLE 17—FINAL RESOLUTION OF DISPUTES

17.01 *Methods and Procedures*

A. *Disputes Subject to Final Resolution*: The following disputed matters are subject to final resolution under the provisions of this article:

1. A timely appeal of an approval in part and denial in part of a Claim, or of a denial in full, pursuant to Article 12; and

2. Disputes between Owner and Contractor concerning the Work, or obligations under the Contract Documents, that arise after final payment has been made.

B. *Final Resolution of Disputes*: For any dispute subject to resolution under this article, Owner or Contractor may:

1. elect in writing to invoke the dispute resolution process provided for in the Supplementary Conditions;

2. agree with the other party to submit the dispute to another dispute resolution process; or

3. if no dispute resolution process is provided for in the Supplementary Conditions or mutually agreed to, give written notice to the other party of the intent to submit the dispute to a court of competent jurisdiction.

ARTICLE 18—MISCELLANEOUS

18.01 *Giving Notice*

A. Whenever any provision of the Contract requires the giving of written notice to Owner, Engineer, or Contractor, it will be deemed to have been validly given only if delivered:

1. in person, by a commercial courier service or otherwise, to the recipient's place of business;

2. by registered or certified mail, postage prepaid, to the recipient's place of business; or

3. by e-mail to the recipient, with the words "Formal Notice" or similar in the e-mail's subject line.

18.02 *Computation of Times*

A. When any period of time is referred to in the Contract by days, it will be computed to exclude the first and include the last day of such period. If the last day of any such period falls on a Saturday or Sunday or on a day made a legal holiday by the law of the applicable jurisdiction, such day will be omitted from the computation.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

18.03 *Cumulative Remedies*

A. The duties and obligations imposed by these General Conditions and the rights and remedies available hereunder to the parties hereto are in addition to, and are not to be construed in any way as a limitation of, any rights and remedies available to any or all of them which are otherwise imposed or available by Laws or Regulations, by special warranty or guarantee, or by other provisions of the Contract. The provisions of this paragraph will be as effective as if repeated specifically in the Contract Documents in connection with each particular duty, obligation, right, and remedy to which they apply.

18.04 *Limitation of Damages*

A. With respect to any and all Change Proposals, Claims, disputes subject to final resolution, and other matters at issue, neither Owner nor Engineer, nor any of their officers, directors, members, partners, employees, agents, consultants, or subcontractors, shall be liable to Contractor for any claims, costs, losses, or damages sustained by Contractor on or in connection with any other project or anticipated project.

18.05 *No Waiver*

A. A party's non-enforcement of any provision will not constitute a waiver of that provision, nor will it affect the enforceability of that provision or of the remainder of this Contract.

18.06 *Survival of Obligations*

A. All representations, indemnifications, warranties, and guarantees made in, required by, or given in accordance with the Contract, as well as all continuing obligations indicated in the Contract, will survive final payment, completion, and acceptance of the Work or termination of the Contract or of the services of Contractor.

18.07 *Controlling Law*

A. This Contract is to be governed by the law of the state in which the Project is located.

18.08 *Assignment of Contract*

A. Unless expressly agreed to elsewhere in the Contract, no assignment by a party to this Contract of any rights under or interests in the Contract will be binding on the other party without the written consent of the party sought to be bound; and, specifically but without limitation, money that may become due and money that is due may not be assigned without such consent (except to the extent that the effect of this restriction may be limited by law), and unless specifically stated to the contrary in any written consent to an assignment, no assignment will release or discharge the assignor from any duty or responsibility under the Contract.

18.09 *Successors and Assigns*

A. Owner and Contractor each binds itself, its successors, assigns, and legal representatives to the other party hereto, its successors, assigns, and legal representatives in respect to all covenants, agreements, and obligations contained in the Contract Documents.

18.10 *Headings*

A. Article and paragraph headings are inserted for convenience only and do not constitute parts of these General Conditions.

SUPPLEMENTARY CONDITIONS OF THE CONSTRUCTION CONTRACT

These Supplementary Conditions amend or supplement EJCDC® C-700, Standard General Conditions of the Construction Contract (2018). The General Conditions remain in full force and effect except as amended.

The terms used in these Supplementary Conditions have the meanings stated in the General Conditions. Additional terms used in these Supplementary Conditions have the meanings stated below, which are applicable to both the singular and plural thereof.

The address system used in these Supplementary Conditions is the same as the address system used in the General Conditions, with the prefix "SC" added—for example, “Paragraph SC-4.05.”

ARTICLE 1—DEFINITIONS AND TERMINOLOGY

1.01 *Defined Terms*

SC-1.01.A.3. Add the following language to the end of Paragraph 1.01.A.3:

The Application for Payment form to be used on this Project is included in Division I, EJCDC C-620.

SC-1.01.A.8. Add the following language to the end of Paragraph 1.01.A.8:

The Change Order form to be used on this Project is included in Division I, EJCDC C-941.

SC-1.01.A.23. Add the following language to the end of Paragraph 1.01.A.23:

The Field Order form to be used on this Project is included in Division I, EJCDC C-942.

SC-1.01.A.42. Add the following language to the end of Paragraph 1.01.A.42:

The Certificate of Substantial Completion form to be used on this Project is included in Division I, EJCDC C-625.

SC-1.01.A.50. Add the following language to the end of Paragraph 1.01.A.50:

The Work Change Directive form to be used on this Project is included in Division I, EJCDC C-940.

ARTICLE 2—PRELIMINARY MATTERS

SC-2.03.A.4. Add a new paragraph immediately after Paragraph 2.03.A.3 of the General Conditions which is to read as follows:

4. a schedule (list) of construction equipment with hourly rates, owned or rented by the CONTRACTOR and all Subcontractors that will be used in the performance of the Work. The equipment schedule will include information necessary to confirm the hourly rates per Paragraph 13.01.B.5.c of the General Conditions and these Supplementary Conditions including: make, model, and year of manufacture as well as the horse power, capacity or weight, and accessories.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

2.06 *Electronic Transmittals*

SC-2.06 Delete Paragraphs 2.06.B and 2.06.C in their entirety and insert the following in their place:

B. *Electronic Documents Protocol:* The parties shall conform to the following provisions in Paragraphs 2.06.B and 2.06.C, together referred to as the Electronic Documents Protocol ("EDP" or "Protocol") for exchange of electronic transmittals.

1. *Basic Requirements*

a. To the fullest extent practical, the parties agree to and will transmit and accept Electronic Documents in an electronic or digital format using the procedures described in this Protocol. Use of the Electronic Documents and any information contained therein is subject to the requirements of this Protocol and other provisions of the Contract.

b. The contents of the information in any Electronic Document will be the responsibility of the transmitting party.

c. Electronic Documents as exchanged by this Protocol may be used in the same manner as the printed versions of the same documents that are exchanged using non-electronic format and methods, subject to the same governing requirements, limitations, and restrictions, set forth in the Contract Documents.

d. Except as otherwise explicitly stated herein, the terms of this Protocol will be incorporated into any other agreement or subcontract between a party and any third party for any portion of the Work on the Project, or any Project-related services, where that third party is, either directly or indirectly, required to exchange Electronic Documents with a party or with Engineer. Nothing herein will modify the requirements of the Contract regarding communications between and among the parties and their subcontractors and consultants.

e. When transmitting Electronic Documents, the transmitting party makes no representations as to long term compatibility, usability, or readability of the items resulting from the receiving party's use of software application packages, operating systems, or computer hardware differing from those established in this Protocol.

f. Nothing herein negates any obligation 1) in the Contract to create, provide, or maintain an original printed record version of Drawings and Specifications, signed and sealed according to applicable Laws and Regulations; 2) to comply with any applicable Law or Regulation governing the signing and sealing of design documents or the signing and electronic transmission of any other documents; or 3) to comply with the notice requirements of Paragraph 18.01 of the General Conditions.

2. *System Infrastructure for Electronic Document Exchange*

a. Each party will provide hardware, operating system(s) software, internet, e-mail, and large file transfer functions ("System Infrastructure") at its own cost and sufficient for complying with the EDP requirements. With the exception of minimum standards set forth in this EDP, and any explicit system requirements

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

specified by attachment to this EDP, it is the obligation of each party to determine, for itself, its own System Infrastructure.

1) The maximum size of an email attachment for exchange of Electronic Documents under this EDP is **30** MB. Attachments larger than that may be exchanged using large file transfer functions or physical media.

2) Each Party assumes full and complete responsibility for any and all of its own costs, delays, deficiencies, and errors associated with converting, translating, updating, verifying, licensing, or otherwise enabling its System Infrastructure, including operating systems and software, for use with respect to this EDP.

b. Each party is responsible for its own system operations, security, back-up, archiving, audits, printing resources, and other Information Technology ("IT") for maintaining operations of its System Infrastructure during the Project, including coordination with the party's individual(s) or entity responsible for managing its System Infrastructure and capable of addressing routine communications and other IT issues affecting the exchange of Electronic Documents.

c. Each party will operate and maintain industry-standard, industry-accepted, ISO-standard, commercial-grade security software and systems that are intended to protect the other party from: software viruses and other malicious software like worms, trojans, adware; data breaches; loss of confidentiality; and other threats in the transmission to or storage of information from the other parties, including transmission of Electronic Documents by physical media such as CD/DVD/flash drive/hard drive. To the extent that a party maintains and operates such security software and systems, it shall not be liable to the other party for any breach of system security.

d. In the case of disputes, conflicts, or modifications to the EDP required to address issues affecting System Infrastructure, the parties shall cooperatively resolve the issues; but, failing resolution, the Owner is authorized to make and require reasonable and necessary changes to the EDP to effectuate its original intent. If the changes cause additional cost or time to Contractor, not reasonably anticipated under the original EDP, Contractor may seek an adjustment in price or time under the appropriate process in the Contract.

e. Each party is responsible for its own back-up and archive of documents sent and received during the term of the contract under this EDP, unless this EDP establishes a Project document archive, either as part of a mandatory Project website or other communications protocol, upon which the parties may rely for document archiving during the specified term of operation of such Project document archive. Further, each party remains solely responsible for its own post-Project back-up and archive of Project documents after the term of the Contract, or after termination of the Project document archive, if one is established, for as long as required by the Contract and as each party deems necessary for its own purposes.

f. If a receiving party receives an obviously corrupted, damaged, or unreadable Electronic Document, the receiving party will advise the sending party of the incomplete transmission.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

g. The parties will bring any non-conforming Electronic Documents into compliance with the EDP. The parties will attempt to complete a successful transmission of the Electronic Document or use an alternative delivery method to complete the communication.

C. *Software Requirements for Electronic Document Exchange; Limitations*

1. Each party will acquire the software and software licenses necessary to create and transmit Electronic Documents and to read and to use any Electronic Documents received from the other party (and if relevant from third parties), using the software formats required in this section of the EDP.

a. Prior to using any updated version of the software required in this section for sending Electronic Documents to the other party, the originating party will first notify and receive concurrence from the other party for use of the updated version or adjust its transmission to comply with this EDP.

2. The parties agree not to intentionally edit, reverse engineer, decrypt, remove security or encryption features, or convert to another format for modification purposes any Electronic Document or information contained therein that was transmitted in a software data format, including Portable Document Format (PDF), intended by sender not to be modified, unless the receiving party obtains the permission of the sending party or is citing or quoting excerpts of the Electronic Document for Project purposes.

3. Software and data formats for exchange of Electronic Documents will conform to the requirements set forth in Exhibit A to this EDP, including software versions, if listed.

SC-2.06 Supplement Paragraph 2.06 of the General Conditions by adding the following paragraph:

D. *Requests by Contractor for Electronic Documents in Other Formats*

1. Release of any Electronic Document versions of the Project documents in formats other than those identified in the Electronic Documents Protocol (if any) or elsewhere in the Contract will be at the sole discretion of the Owner.

2. To extent determined by Owner, in its sole discretion, to be prudent and necessary, release of Electronic Documents versions of Project documents and other Project information requested by Contractor ("Request") in formats other than those identified in the Electronic Documents Protocol (if any) or elsewhere in the Contract will be subject to the provisions of the Owner's response to the Request, and to the following conditions to which Contractor agrees:

a. The content included in the Electronic Documents created by Engineer and covered by the Request was prepared by Engineer as an internal working document for Engineer's purposes solely, and is being provided to Contractor on an "AS IS" basis without any warranties of any kind, including, but not limited to any implied warranties of fitness for any purpose. As such, Contractor is advised and acknowledges that the content may not be suitable for Contractor's application, or may require substantial modification and independent verification by Contractor. The content may include limited resolution of models, not-to-scale schematic representations and symbols, use of notes to convey design concepts in lieu of accurate graphics, approximations, graphical simplifications, undocumented intermediate revisions, and other devices that may affect subsequent reuse.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

b. Electronic Documents containing text, graphics, metadata, or other types of data that are provided by Engineer to Contractor under the request are only for convenience of Contractor. Any conclusion or information obtained or derived from such data will be at the Contractor's sole risk and the Contractor waives any claims against Engineer or Owner arising from use of data in Electronic Documents covered by the Request.

c. Contractor shall indemnify and hold harmless Owner and Engineer and their subconsultants from all claims, damages, losses, and expenses, including attorneys' fees and defense costs arising out of or resulting from Contractor's use, adaptation, or distribution of any Electronic Documents provided under the Request.

d. Contractor agrees not to sell, copy, transfer, forward, give away or otherwise distribute this information (in source or modified file format) to any third party without the direct written authorization of Engineer, unless such distribution is specifically identified in the Request and is limited to Contractor's subcontractors. Contractor warrants that subsequent use by Contractor's subcontractors complies with all terms of the Contract Documents and Owner's response to Request.

3. In the event that Owner elects to provide or directs the Engineer to provide to Contractor any Contractor-requested Electronic Document versions of Project information that is not explicitly identified in the Contract Documents as being available to Contractor, the Owner shall be reimbursed by Contractor on an hourly basis (at $**120** per hour) for any engineering costs necessary to create or otherwise prepare the data in a manner deemed appropriate by Engineer.

ARTICLE 4—COMMENCEMENT AND PROGRESS OF THE WORK

SC-4.01.A. Delete Paragraph 4.01.A in its entirety and insert the following in its place:

A. The Contract Times will commence to run on the thirtieth day after the Effective Date of the Agreement or, if a Notice to Proceed is given, on the day indicated in the Notice to Proceed. A Notice to Proceed may be given at any time within thirty (30) days after the Effective Date of the Agreement.

ARTICLE 5—SITE, SUBSURFACE AND PHYSICAL CONDITIONS, HAZARDOUS ENVIRONMENTAL CONDITIONS

SC-5.03.A. *Subsurface and Physical Conditions:* The OWNER and ENGINEER have no record of reports of explorations and tests of subsurface conditions at or adjacent to the Site that contain Technical Data.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 6—BONDS AND INSURANCE

6.01 *Performance, Payment, and Other Bonds*

SC-6.01 Replace the first sentence of Paragraph 6.01.A. with following:

A. Contractor shall furnish a performance bond and a payment bond, each in an amount at least equal to 125% of the Contract Price, as security for the faithful performance and payment of Contractor's obligations under the Contract. …

6.03 *Contractor's Insurance*

SC-6.03 Supplement Paragraph 6.03 with the following provisions after Paragraph 6.03.C:

D. *Other Additional Insureds:* As a supplement to the provisions of Paragraph 6.03.C of the General Conditions, the commercial general liability, automobile liability, umbrella or excess, pollution liability, and unmanned aerial vehicle liability policies must include as additional insureds (in addition to Owner and Engineer) the following: **Nelson Engineering.**

E. *Workers' Compensation and Employer's Liability:* Contractor shall purchase and maintain workers' compensation and employer's liability insurance, including, as applicable, United States Longshoreman and Harbor Workers' Compensation Act, Jones Act, stop-gap employer's liability coverage for monopolistic states, and foreign voluntary workers' compensation (from available sources, notwithstanding the jurisdictional requirement of Paragraph 6.02.B of the General Conditions).

Workers' Compensation and Related Policies	Policy limits of not less than:
Workers' Compensation	
State	Statutory
Applicable Federal (e.g., Longshoreman's)	Statutory
Foreign voluntary workers' compensation (employer's responsibility coverage), if applicable	Statutory
Employer's Liability	
Bodily Injury, each accident	$1,000,000
Bodily injury by disease, each employee	$1,000,000
Bodily injury/ disease aggregate	$1,000,000

F. *Commercial General Liability—Claims Covered:* Contractor shall purchase and maintain commercial general liability insurance, covering all operations by or on behalf of Contractor, on an occurrence basis, against claims for:

1. damages because of bodily injury, sickness or disease, or death of any person other than Contractor's employees,
2. damages insured by reasonably available personal injury liability coverage, and
3. damages because of injury to or destruction of tangible property wherever located, including loss of use resulting therefrom.

G. *Commercial General Liability—Form and Content:* Contractor's commercial liability policy must be written on a 1996 (or later) Insurance Services Organization, Inc. (ISO) commercial

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

general liability form (occurrence form) and include the following coverages and endorsements:

1. Products and completed operations coverage.
    a. Such insurance must be maintained for three years after final payment.
    b. Contractor shall furnish Owner and each other additional insured (as identified in the Supplementary Conditions or elsewhere in the Contract) evidence of continuation of such insurance at final payment and three years thereafter.
2. Blanket contractual liability coverage, including but not limited to coverage of Contractor's contractual indemnity obligations in Paragraph 7.18.
3. Severability of interests and no insured-versus-insured or cross-liability exclusions.
4. Underground, explosion, and collapse coverage.
5. Personal injury coverage.
6. Additional insured endorsements that include both ongoing operations and products and completed operations coverage through ISO Endorsements CG 20 10 10 01 and CG 20 37 10 01 (together). If Contractor demonstrates to Owner that the specified ISO endorsements are not commercially available, then Contractor may satisfy this requirement by providing equivalent endorsements.
7. For design professional additional insureds, ISO Endorsement CG 20 32 07 04 "Additional Insured—Engineers, Architects or Surveyors Not Engaged by the Named Insured" or its equivalent.

H. *Commercial General Liability—Excluded Content:* The commercial general liability insurance policy, including its coverages, endorsements, and incorporated provisions, must not include any of the following:

1. Any modification of the standard definition of "insured contract" (except to delete the railroad protective liability exclusion if Contractor is required to indemnify a railroad or others with respect to Work within 50 feet of railroad property).
2. Any exclusion for water intrusion or water damage.
3. Any provisions resulting in the erosion of insurance limits by defense costs other than those already incorporated in ISO form CG 00 01.
4. Any exclusion of coverage relating to earth subsidence or movement.
5. Any exclusion for the insured's vicarious liability, strict liability, or statutory liability (other than worker's compensation).
6. Any limitation or exclusion based on the nature of Contractor's work.
7. Any professional liability exclusion broader in effect than the most recent edition of ISO form CG 22 79.

I.

Commercial General Liability—Minimum Policy Limits

Commercial General Liability	Policy limits of not less than:
General Aggregate	$2,000,000
Products—Completed Operations Aggregate	$1,000,000
Personal and Advertising Injury	$1,000,000
Bodily Injury and Property Damage—Each Occurrence	$1,000,000

J. *Automobile Liability:* Contractor shall purchase and maintain automobile liability insurance for damages because of bodily injury or death of any person or property damage arising out of the ownership, maintenance, or use of any motor vehicle. The automobile liability policy must be written on an occurrence basis.

Automobile Liability	Policy limits of not less than:
Bodily Injury	
Each Person	$500,000
Each Accident	$1,000,000
Property Damage	
Each Accident	$500,000
[or]	
Combined Single Limit	
Combined Single Limit (Bodily Injury and Property Damage)	$1,000,000

K. *Umbrella or Excess Liability:* Contractor shall purchase and maintain umbrella or excess liability insurance written over the underlying employer's liability, commercial general liability, and automobile liability insurance described in the Paragraphs above. The coverage afforded must be at least as broad as that of each and every one of the underlying policies.

Excess or Umbrella Liability	Policy limits of not less than:
Each Occurrence	1,000,000
General Aggregate	2,000,000

L. *Contractor's Pollution Liability Insurance:* Contractor shall purchase and maintain a policy covering third-party injury and property damage, including cleanup costs, as a result of pollution conditions arising from Contractor's operations and completed operations. This insurance must be maintained for no less than three years after final completion.

Contractor's Pollution Liability	Policy limits of not less than:
Each Occurrence/Claim	$1,000,000
General Aggregate	$2,000,000

6.04 *Builder's Risk and Other Property Insurance*

SC-6.04 Delete Paragraph 6.04.A of the General Conditions and substitute the following in its place:

A. *Installation Floater*

1. Contractor shall provide and maintain installation floater insurance on a broad form or "all risk" policy providing coverage for materials, supplies, machinery, fixtures, and equipment that will be incorporated into the Work ("Covered Property"). Coverage under the Contractor's installation floater will include loss from covered "all risk" causes (perils) to Covered Property:

   a. of the Contractor, and Covered Property of others that is in Contractor's care, custody, and control;

   b. while in transit to the Site, including while at temporary storage sites;

   c. while at the Site awaiting and during installation, erection, and testing;

   d. continuing at least until the installation or erection of the Covered Property is completed, and the Work into which it is incorporated is accepted by Owner.

2. The installation floater coverage cannot be contingent on an external cause or risk, or limited to property for which the Contractor is legally liable.

3. The installation floater coverage will be in an amount sufficient to protect Contractor's interest in the Covered Property. The Contractor will be solely responsible for any deductible carried under this coverage.

4. This policy will include a waiver of subrogation applicable to Owner, Contractor, Engineer, all Subcontractors, and the officers, directors, partners, employees, agents and other consultants and subcontractors of any of them.

ARTICLE 7—CONTRACTOR'S RESPONSIBILITIES

SC-7.07 Concerning Subcontractors, Suppliers, and Others

SC-7.07.A. Add a new sentence at the end of Paragraph 7.07.A of the General Conditions which is to read as follows:

Contractor shall not award Work to Subcontractor(s) in excess of 50% of the Contract Price without prior written approval of Owner.

SC-7.11.D Add the following paragraphs after 7.11.C. in the General Conditions:

D. Each and every provision of law and clause required by law to be inserted in the Contract shall be deemed to be inserted herein and the Contract shall be read and enforced as though it were included herein, and if through mistake or otherwise, any such provision is not inserted, or is not correctly inserted, then upon application of either party, the Contract shall forthwith be physically amended in writing to make such insertion or correction.

Contractor shall comply with all Wyoming Statutes dealing with public works projects, including but not limited to, W.S. 16-6-101 through -121, 16-6-201 through-206, 16-6-701 through -708, 16-6-1001, and 15-1-113. Contractor shall also comply with all applicable federal laws and regulations.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

Contractor shall comply with the following:

1. Wyoming Statute 16-6-121(f), which requires Contractor to post on the construction site a prominent sign citing Wyoming Statute 16-6-121(f) and stating that any subcontractor or materialman shall give notice to the prime contractor of a right to protection under the bond or guarantee and that failure to provide the notice shall waive the subcontractor or materialman's protection under the bond or guarantee and shall waive any right to a lien for materials or services provided.
2. Wyoming Workmen's Compensation Act
3. Wage Payment Bond, Wyoming Statute 27-1-106 (2013 Edition)
4. Wyoming Preference Act of 1971. (Wyoming Statute 16-6-201 through 206)

ARTICLE 10—ENGINEER'S STATUS DURING CONSTRUCTION

10.03 *Resident Project Representative*

SC-10.03 Add the following new paragraphs immediately after Paragraph 10.03.B:

C. The Resident Project Representative (RPR) will be Engineer's representative at the Site. RPR's dealings in matters pertaining to the Work in general will be with Engineer and Contractor. RPR's dealings with Subcontractors will only be through or with the full knowledge or approval of Contractor. The RPR will:

1. *Conferences and Meetings:* Attend meetings with Contractor, such as preconstruction conferences, progress meetings, job conferences, and other Project-related meetings (but not including Contractor's safety meetings), and as appropriate prepare and circulate copies of minutes thereof.
2. *Safety Compliance:* Comply with Site safety programs, as they apply to RPR, and if required to do so by such safety programs, receive safety training specifically related to RPR's own personal safety while at the Site.
3. *Liaison*
    a. Serve as Engineer's liaison with Contractor. Working principally through Contractor's authorized representative or designee, assist in providing information regarding the provisions and intent of the Contract Documents.
    b. Assist Engineer in serving as Owner's liaison with Contractor when Contractor's operations affect Owner's on-Site operations.
    c. Assist in obtaining from Owner additional details or information, when required for Contractor's proper execution of the Work.
4. *Review of Work; Defective Work*
    a. Conduct on-Site observations of the Work to assist Engineer in determining, to the extent set forth in Paragraph 10.02, if the Work is in general proceeding in accordance with the Contract Documents.
    b. Observe whether any Work in place appears to be defective.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

c. Observe whether any Work in place should be uncovered for observation, or requires special testing, inspection or approval.

5. *Inspections and Tests*

   a. Observe Contractor-arranged inspections required by Laws and Regulations, including but not limited to those performed by public or other agencies having jurisdiction over the Work.

   b. Accompany visiting inspectors representing public or other agencies having jurisdiction over the Work.

6. *Payment Requests:* Review Applications for Payment with Contractor.

7. *Completion*

   a. Participate in Engineer's visits regarding Substantial Completion.

   b. Assist in the preparation of a punch list of items to be completed or corrected.

   c. Participate in Engineer's visit to the Site in the company of Owner and Contractor regarding completion of the Work, and prepare a final punch list of items to be completed or corrected by Contractor.

   d. Observe whether items on the final punch list have been completed or corrected.

D. The RPR will not:

1. Authorize any deviation from the Contract Documents or substitution of materials or equipment (including "or-equal" items).

2. Exceed limitations of Engineer's authority as set forth in the Contract Documents.

3. Undertake any of the responsibilities of Contractor, Subcontractors, or Suppliers.

4. Advise on, issue directions relative to, or assume control over any aspect of the means, methods, techniques, sequences or procedures of construction.

5 Advise on, issue directions regarding, or assume control over security or safety practices, precautions, and programs in connection with the activities or operations of Owner or Contractor.

6. Participate in specialized field or laboratory tests or inspections conducted off-site by others except as specifically authorized by Engineer.

7. Authorize Owner to occupy the Project in whole or in part.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 13—COST OF WORK; ALLOWANCES, UNIT PRICE WORK

13.01 *Cost of the Work*

13.01.B.5.c *Construction Equipment Rental*

13.01.B.5.c.1) Add a new sentence at the end of Paragraph 13.01.B.5.c.1) of the General Conditions which is to read as follows:

Transportation costs will not be included for equipment already on the Site which is being used for other portions of the Work.

13.01.B.5.c.2) Delete Paragraph 13.01.B.5.c.2) of the General Conditions in its entirety and insert the following in its place:

2) Costs for equipment and machinery owned by Contractor or a Contractor-related entity will be paid at a rate shown for such equipment in the approved rate schedule submitted according to SC 2.03 or will be calculated from the Rental Rate Blue Book for Construction. An hourly rate will be computed by dividing the monthly rates by 176. These computed rates will include all operating costs. For equipment on standby, the hourly rate shall be 50% of the monthly rental hourly rate divided by 176 hours per month, and the hourly operating cost shall not be applied.

13.03 *Unit Price Work*

SC-13.03.E Delete Paragraph 13.03.E in its entirety and insert the following in its place:

E. *Adjustments in Unit Price*

1. Contractor or Owner shall be entitled to an adjustment in the unit price with respect to an item of Unit Price Work if:

   a. the extended price of a particular item of Unit Price Work amounts to fifteen percent (15%) or more of the Contract Price (based on estimated quantities at the time of Contract formation) and the variation in the quantity of that particular item of Unit Price Work actually furnished or performed by Contractor differs by more than thirty percent (30%) from the estimated quantity of such item indicated in the Agreement; and

   b. Contractor's unit costs to perform the item of Unit Price Work have changed materially and significantly as a result of the quantity change.

2. The adjustment in unit price will account for and be coordinated with any related changes in quantities of other items of Work, and in Contractor's costs to perform such other Work, such that the resulting overall change in Contract Price is equitable to Owner and Contractor.

3. Adjusted unit prices will apply to all units of that item.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 15—PAYMENTS TO CONTRACTOR, SET OFFS; COMPLETIONS; CORRECTION PERIOD

15.01 *Progress Payments*

SC-15.01.B Applications for Payments

SC-15.01.B.1. Delete the first sentence of Paragraph 15.01.B.1. of the General Conditions in its entirety and insert the following in its place:

15.01.B.1. On or before the last day of each month, the Contractor shall submit to the Engineer for review an Application for Payment filled out and signed by the Contractor covering the work completed as of the date of application and accompanied by such supporting documentation as is required by the Contract Documents and also as Engineer may reasonably require.*15.01.C Review of Applications*

SC-15.01.C.1. Delete Paragraph 15.01.C.1. of the General Conditions in its entirety and insert the following in its place:

15.01.C.1. The Engineer will, within five (5) days after receipt of each Application for Payment, either indicate in writing a recommendation of payment and present the application to the Owner, or return the application to the Contractor indicating in writing the Engineer's reason for refusing to recommend payment. In the latter case, the Contractor may make necessary changes and resubmit the application.

15.01.D Payment Becomes Due

SC-15.01.D.1. Delete Paragraph 15.01.D.1. of the General Conditions in its entirety and insert the following in its place:

15.01.D.1. Thirty days after presentation of the Application for Payment to Owner with Engineer's recommendation, the amount recommended will (subject to the provisions of Paragraph 15.01.E) become due, and when due will be paid by Owner to Contractor.

SC-15.06 Final Payment

SC-15.06.E. Delete Paragraph 15.06.E of the General conditions in its entirety and insert the following in its place:

15.06.E. *Final Payment Becomes Due*: Ten days after receipt from Engineer of the final Application for Payment and accompanying documentation, Owner shall set off against the amount recommended by Engineer for final payment any further sum to which Owner is entitled, including but not limited to set-offs for liquidated damages and set-offs allowed under the provisions of this Contract with respect to progress payments. Owner shall, in accordance with Wyoming Statute 16-6-116 publish once a week for three consecutive weeks and post in three conspicuous places on the project, a notice stating that the Owner has accepted the work as completed in accordance with the plans and specifications and rules set forth in this contract and that the CONTRACTOR is entitled to final payment therefore. Notice shall set forth that subsequent to the 41st day after the first publication of the notice the OWNER will make final payment to the Contractor. If there are no claims against the project

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

payment will become due on the 41st day after the first publication of the notice and will, within twenty (20) days thereafter be paid by the Owner to Contractor

15.08 *Correction Period*

SC-15.08.A Replace the words "one year" with "two years" in the first sentence of Paragraph 15.08.A.

ARTICLE 17—FINAL RESOLUTIONS OF DISPUTES

SC-17.01 *Methods and Procedures*

SC-17.01B. Add a new paragraph immediately after Paragraph 17.01.B of the General Conditions which is to read as follows:

C. If a dispute resolution agreement has not been reached, then all claims, counterclaims, disputes, and other matters in question between the Owner and Contractor arising out of or relating to the Contract Documents or the breach thereof, will be decided in a court of competent jurisdiction in Teton County in the State of Wyoming.

ARTICLE 18—MISCELLANEOUS

SC 18.07 *Controlling Law*

SC-18.07.A Revise Paragraph 18.07.A of the General Conditions to reads as follows:

A. This Contract shall be constructed, performed and enforced in accordance with, and governed by, the laws of the State of Wyoming, without giving effect to the principles of conflict of laws thereof. The Parties hereto irrevocably elect as the sole judicial forum for the adjudication of any matters arising under or in connection with this Contract, and consent to the jurisdiction of, the courts of the County of Teton, State of Wyoming, or the United States of America for the District of Wyoming. This Agreement was negotiated by both parties hereto and thus it shall not be construed against or in favor of any party by virtue of which party drafted it or any portion thereof.

SC-18.07.B Add a new paragraph immediately after Paragraph 18.07.A of the General Conditions which is to read as follows:

B. Governmental Immunity. The Owner does not waive its governmental or sovereign immunity by entering into the Contract, and fully retains all immunities and defenses provided by law with respect to any action based on or occurring as a result of the Contract.

SECTION 01010

SUMMARY OF WORK

PART 1 GENERAL

1.1 SUMMARY

A. Apply for, obtain, and pay for permits required to perform the work.

B. Comply with applicable codes and regulations of authorities having jurisdiction.

C. Field-verify dimensions indicated on drawings before fabricating or ordering materials. Do not scale drawings.

D. Notify OWNER of existing conditions differing from those indicated on the drawings. Verify the existence and location of underground utilities along the route of proposed work. Omission of an existing utility location on the Drawings is not to be considered as its nonexistence. Inclusion of existing utility locations on the Drawings is not to be considered as its definite location. Do not remove or alter existing utilities without prior written approval.

E. The Contract Documents are intended to provide the basis for proper completion of the work suitable for the intended use of OWNER. Anything not expressly set forth but which is reasonably implied or necessary for proper performance of the project shall be included.

F. Portions of the Contract Documents are written in the imperative mode. Except where specifically intended otherwise, the subject of all imperative statements is CONTRACTOR. For example, “Furnish...” means “CONTRACTOR shall furnish...”, “Provide...” means “CONTRACTOR shall provide...”.

G. This project requires the CONTRACTOR to supply all materials, equipment, labor and miscellaneous supplies necessary for project completion. No such items are to be supplied by the OWNER.

H. It is the intent of these documents that the CONTRACTOR provide upon project completion, a totally operational system free of physical encumbrances.

I. The Project Engineer will designate a part-time Resident Project Representative (RPR) to observe progress and quality of the work. The RPR will have access to and be skilled in the operation of nuclear soil density measuring equipment and will conduct spot density checks on an “as needed” basis.

J. Water required for dust control, moisture conditioning for compaction purposes, and for testing purposes will be supplied by the Town of Jackson at the metering location located at the Fair Building along Snow King Avenue. No usage fees will be charged.

K. Unless specifically stated otherwise in the specifications, hours for non-emergency construction work within the project site shall be limited to 7:00 AM to 7:00 PM Monday through Friday, unless approved by the Town.

L. All existing sewer and water pipe encountered inside of the excavated trench shall be removed and disposed of at the CONTRACTOR's expense. Manholes shall be completely removed from the site unless specifically stated on the drawings.

M. All dump fees shall be paid by the CONTRACTOR.

PART 2 PRODUCTS – NOT USED

PART 3 EXECUTION – NOT USED

PART 4 MEASUREMENT AND PAYMENT

4.1 MEASUREMENT

No separate measurement will be made for work completed under this Section.

4.2 PAYMENT

No separate payment will be made for work included under this Section. Full compensation for completing work herein described will be considered as included in the bid price of the item for which the work applies.

END OF SECTION

SECTION 01018

CONSTRUCTION STAKING

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Offset stakes for location and grade for pipelines, manholes, curb and gutter, roadway centerline, and appurtenants.

1.2 ENGINEER'S RESPONSIBILITIES

A. Set basic project control monuments.

B. Set construction stakes for the items listed under Section 1.1 upon request from CONTRACTOR.

1.3 CONTRACTOR'S RESPONSIBILITIES

A. Provide ENGINEER six (6) working days prior notice to the time stakes are required.

B. Determine the location for offset stakes.

C. Preserve the location of all stakes, monuments, and property corners after they have been set.

D. Pay OWNER for the replacement of any stakes, monuments, or property comers, which are lost or destroyed.

PART 2 PRODUCTS NOT USED

PART 3 EXECUTION NOT USED

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

No separate measurement or payment will be made for items under this section. Full compensation shall be considered as included in the prices paid for the various contract items and no additional compensation will be allowed therefore.

END OF SECTION

SECTION 01025

MEASUREMENT AND PAYMENT

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Measurement and payment criteria applicable to portions of the Work performed under a unit price payment method.

B. Defect assessment and non-payment for rejected work.

1.2 AUTHORITY

A. Measurement methods delineated in the individual specification sections complement the criteria of this section. In the event of conflict, the requirements of the individual specification section govern.

B. Take all measurements and compute quantities.

C. Assist by providing necessary equipment, workers, and survey personnel as required.

1.3 UNIT QUANTITIES SPECIFIED

A. Quantities indicated in the Bid Form are for bidding and contract purposes only. Quantities and measurements supplied or placed in the Work and verified by the RPR determine payment.

B. If the actual Work requires more or fewer quantities than those quantities indicated, provide the required quantities at the unit sum/prices contracted.

1.4 MEASUREMENT OF QUANTITIES

A. Measurement Devices:

1. Weigh Scales: Inspected, tested and certified by the Wyoming Department of Agriculture Weights and Measures department within the past year.

2. Platform Scales: Of sufficient size and capacity to accommodate the conveying vehicle.

B. Measurement by Weight: Certain imported earthen materials for backfill purposes, aggregate materials and asphalt paving materials will be measured by scale weight.

C. Measurement by Volume: Measured by cubic dimension using mean length, width and height or thickness.

D. Measurement by Area: Measured by square dimension using mean length and width or radius.

E. Linear Measurement: Measured by linear dimension, at the item centerline or mean chord.

1.5 PAYMENT

A. Payment Includes: Full compensation for all required labor, Products, tools, equipment, plant, transportation, services and incidentals; erection, application or installation of an item of the Work; overhead and profit.

B. Final payment for Work governed by unit prices will be made on the basis of the actual measurements and quantities accepted by the Engineer multiplied by the unit sum/price for Work which is incorporated in or made necessary by the Work.

1.6 DEFECT ASSESSMENT

A. Replace the Work, or portions of the Work, not conforming to specified requirements, or,

B. If, in the opinion of the Engineer it is not practical to remove and replace the Work, the Engineer may direct one of the following remedies:

1. The defective Work may remain, but the unit sum/price will be adjusted to a new sum/price at the discretion of the Engineer.

2. The defective Work will be partially repaired to the instructions of the Engineer, and the unit sum/price will be adjusted to a new sum/price at the discretion of the Engineer.

C. The authority of the Engineer to assess the defect and identify payment adjustment, is final.

1.7 NON-PAYMENT FOR REJECTED PRODUCTS

A. Payment will not be made for any of the following:

1. Products wasted or disposed of in a manner that is not acceptable.

2. Products determined as unacceptable before or after placement.

3. Products not completely unloaded from the transporting vehicle.

4. Products placed beyond the lines and levels of the required Work.

5. Products remaining on hand after completion of the Work.

6. Loading, hauling and disposing of rejected Products.

PART 2 PRODUCTS – NOT USED

PART 3 EXECUTION – NOT USED

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT – NOT USED

END OF SECTION

SECTION 01039

COORDINATION AND MEETINGS

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Coordination.

B. Preconstruction meeting.

C. Progress meetings.

D. Preconstruction Video

1.2 COORDINATION

A. Coordinate scheduling, submittals, and Work of the various sections of the Project Manual to assure efficient and orderly sequence of installation of interdependent construction elements, with provisions for accommodating items installed later.

B. Coordinate completion and cleanup of Work of separate sections in preparation for Substantial Completion and for portions of Work.

1.3 PRIVATE UTILITY COORDINATION

A. Contractor shall be responsible for coordination with all buried wire utility owners to facility the locating and relocation if needed of wire utilities.

1.4 PRECONSTRUCTION MEETING

A. Engineer will schedule the time and location of a preconstruction meeting.

B. Attendance Required: Owner, Engineer, Special Consultants, Contractor, Contractor's Superintendent, and major Subcontractors.

C. Engineer will record minutes and distribute copies within seven (7) days after meeting with one copy to Contractor, Owner, participants, and those affected by decisions made.

1.5 PROGRESS MEETINGS

A. Schedule meetings throughout progress of the Work at weekly intervals.

B. Engineer will make arrangements for meetings, prepare agenda with copies for participants, preside at meetings.

C. Attendance Required: Job superintendent, major Subcontractors and suppliers, Owner, Engineer, as appropriate to agenda topics for each meeting.

D. Agenda:

1. Review minutes of previous meetings.

2. Review of Work progress.

3. Field observations, problems, and decisions.

4. Identification of problems which impede planned progress.

5. Review of submittals schedule and status of submittals.

6. Review of off-site fabrication and delivery schedules.

7. Maintenance of progress schedule.

8. Corrective measures to regain projected schedules.

9. Planned progress during succeeding work period.

10. Coordination of projected progress.

11. Maintenance of quality and work standards.

12. Effect of proposed changes on progress schedule and coordination.

13. Other business relating to Work.

E. Engineer will record minutes and distribute copies within seven (7) days after meeting with one copy to Contractor, Owner, participants, and those affected by decisions made

1.6 VIDEO OF WORKSITE

A. Prior to execution of work within street rights-of-way, the Contractor shall walk the entire project site in the presence of the Owner and Engineer and video the entire alignment, focusing on the interface between pubic and private properties. Recorded video information will be utilized to ascertain pre-existing conditions prior to contract execution.

PART 2 PRODUCTS – NOT USED

PART 3 EXECUTION – NOT USED

PART 4 MEASUREMENT AND PAYMENT

4.1 MEASUREMENT

No separate measurement will be made for work completed under this Section.

4.2 PAYMENT

No separate payment will be made for work included under this Section. Full compensation for completing work herein described will be considered as included in the bid price of the item for which the work applies.

END OF SECTION

SECTION 01340

SUBMITTALS

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Submission of all shop drawings and product data as required by the Contract Documents for all equipment and materials to be furnished under this contract unless specifically indicated otherwise.

1.2 RELATED SECTIONS

A. Section 01700—Contract Closeout

B. Sections for Divisions 1 through 3—Required Submittals

1.3 SUBMITTALS

A. Submittal information shall be submitted and reviewed prior to installing the applicable item.

B. No progress payments shall be made for any specific contract item until all related submittal and certification information for the item has been reviewed and accepted by the ENGINEER.

C. CONTRACTOR shall supply all manuals, maintenance data, manufacturer warranty, certificates, record drawings, and other equipment and material prior to submitting the application for final payment.

D. Submittals required shall include, but not be limited to, the following:

1. Project progress schedule

2. Traffic control plan

3. General construction plan

4. Bypass pumping plan (if required)

5. Temporary water service plan (if required)

6. List of material suppliers

7. List of subcontractors

8. Labor and equipment hourly rates

9. Pipe materials

10. Pipe bedding materials

11. Precast Manholes

12. Aggregate gradation

13. Asphalt mix certificates

14. Concrete mix certificates

15. Seed mixture and reclamation certificates

16. Project record drawings

E. Shop Drawings—Drawings shall be presented in a clear and thorough manner:

1. Identify details by reference to sheet and detail or schedule shown on Contract Drawings

2. Identify equipment by reference to equipment name and tag number shown on Contract Drawings

3. Scale and Measurements: Make drawings accurate to a scale with sufficient detail to show the kind, size, arrangement and function of component materials and devices

4. Minimum sheet size: 8 1/2" by 11"

5. Fabrication drawing size: 11" x 17" or 22" x 34"

F. Product Data—Preparation

1. Clearly mark each copy to identify pertinent products or models submitted for review

2. Identify equipment by reference to equipment name and tag number

3. Catalog cut sheets: Cross-out or delete irrelevant data

4. Show performance characteristics and capacities

5. Show dimensions and clearances required for installation and maintenance

6. Show wiring or piping diagrams and controls

7. Show external connections, anchorages, and supports required

G. "Certificate of Compliance"

1. Provided by manufacturer or supplier in lieu of submittal data required

2. Certifies that product data or item identified in certificate is in total compliance with Contract Document requirements

3. Specifically identifies project name and that there is no deviation from Contract Documents

4. Identify equipment by reference to equipment name and tag number

5. Identify limits of equipment, materials or work provided

6. Provide for specific product data or item only as indicated herein

H. Construction Schedule:

1. Designate in the construction schedule, or in a separate coordinated shop drawing schedule, the dates for submission and the dates that reviewed Shop Drawings and Product Data will be needed

I. Manufacturer's standard schematic drawings and diagrams

1. Modify drawings and diagrams to delete information which is not applicable to the Work by crossing out or omitting irrelevant data

2. Supplement standard information to provide information specifically applicable to the Work

1.4 CONTRACTOR RESPONSIBILITIES

A. Review shop drawings and product data prior to submission for accuracy and completeness of each submission

B. Approve and stamp each submission before submitting it

C. Determine and verify:

1. Field measurements

2. Field construction criteria

3. Catalog numbers and similar data

4. Conformance with drawings and specifications

D. Prior to each submission, carefully review and coordinate all aspects of each item being submitted

E. Verify that each item and the submittal conform in all respects with specified requirements of the Work and of the Contract Documents with respect to means, methods, techniques, sequences, and operations of construction, and safety precautions and programs incidental thereto

F. Make submissions promptly in accordance with Construction Schedule, and in such sequence as to cause no delay in the Work or in the work of any other Contractor

G. Notify Engineer in writing, at time of submission, of any deviations in the submittals from Contract Document requirements

H. Identify and tabulate all deviations in transmittal letter

I. Indicate essential details of all changes proposed, including modifications to other facilities that may be a result of the deviation

J. Include required piping and wiring diagrams

1.5 SUBMISSION REQUIREMENTS

A. Make submissions far enough in advance of scheduled dates for installation to provide time required for reviews, for securing necessary approvals, for possible revisions and resubmissions, and for placing orders and securing delivery

B. In scheduling, allow a minimum of 14 calendar days for review by Engineer following receipt of submission in Engineer's office

1. Time required to mail submissions or resubmissions is not considered a part of review period

C. Consecutively number all submissions

1. Assign a unique number to include all shop drawings, product data and other information required for individual specification sections

D. Number of Submittals Required

1. Shop Drawings and Product Data: Submit an electronic copy for review by the Engineer.

E. Accompany each submission with a letter of transmittal showing all information required for identification and checking. Include:

1. Submittal number

2. Date of submission and dates of any previous submissions

3. Project title and number

4. Owner Contract identification number if applicable

5. The names of

    a. Contractor

    b. Supplier

    c. Manufacturer

6. Identification of the product, with the specification section number

7. Field dimensions, clearly identified as such

8. Relation to adjacent or critical features of the Work or materials

9. Applicable standards, such as ASTM or Federal Specification numbers

10. Identification of deviations from Contract Documents

11. Identification of revisions on resubmissions

12. An 8" by 4" blank space for Contractor's and Engineer's stamps

13. Stamp cover sheet of each submittal as identified in letter of transmittal

14. Contractor's stamp: Initialed or signed, certifying review and approval of submittal, verification of products, field measurements and field construction criteria, and coordination of the information within the submittal with requirements of the Work and of Contract Documents. Use stamp to include wording similar to the following:

This submittal has been reviewed by [*Name of Contractor*] and approved with respect to the means, methods, techniques, sequences, and procedures of construction, and safety precautions and programs incidental thereto. [*Name of Contractor*] also warrants that this submittal complies with contract documents and comprises no deviations thereto: Section No: _____ Submittal No: _____ Date:_____ By: _____

F. Submittal Log:

1. Maintain an accurate submittal log for duration of the Work showing current status of all submissions

2. Show submittal number, section number, section title, submittal description dates and disposition of submittal

3. Make submittal log available to Engineer for Engineer's review upon request

G. Unless specified otherwise, make submissions in groups to facilitate efficient review and approval

H. Include all associated items from individual specification sections to assure that all information is available for checking each item when it is received

I. Submit a complete initial submittal including all components when an item consists of components from several sources

J. Partial submittals may be rejected as not complying with provisions of the Contract

K. Engineer will not be held liable for delays due to poorly organized or incomplete submissions

L. Do not include items from more than one specification section for any one submittal number

M. Contractor may require subcontractors to provide drawings, setting diagrams and similar information to help coordinate the Work, but such data

shall remain between Contractor and his subcontractors and will not be reviewed by Engineer unless specifically called for within the Contract Documents

1.6 DISPOSITION OF SHOP DRAWINGS AND PRODUCT DATA

A. "No Exceptions Taken": Approved with No Exceptions Noted

1. One copy sent to Owner

2. One copy sent to Resident Project Representative

3. One copy retained in Engineer's file

4. Remaining copies returned to Contractor for his use

5. One copy to be kept on file at Contractor's office at job site

6. Remaining copies for Contractor's office file, suppliers, or subcontractors

7. No corrections or comments noted on submittal or in transmittal letter

8. Issues or miscellaneous comments pertaining to other related items of the Work may be included in transmittal letter

9. Resubmission not required

B. "Make Corrections Noted": Approved with Corrections Noted

1. One copy sent to Owner

2. One copy sent to Resident Project Representative

3. One copy retained in Engineer's file

4. Remaining copies returned to Contractor for his use

5. One copy to be kept on file at Contractor's office at job site

6. Remaining copies for Contractor's office file, suppliers or subcontractors

7. Copies of submittal data in operation and maintenance manuals to be revised according to corrections

8. Comply with corrections or comments as noted on submittal and in transmittal letter

9. Resubmission not required

C. "Amend and Resubmit": Incorrect or Specific Information Still Required

1. One copy sent to Resident Project Representative

2. One copy retained in Engineer's file

3. All remaining copies returned to Contractor for revision and resubmittal

4. Copy of transmittal letter sent to Owner. An "Approved As Submitted" or "Exceptions Noted" submittal will be forwarded to Owner upon resubmission and review per above disposition requirements

5. Submittal is either: incorrectly annotated; specific comments need to be addressed and incorporated in resubmittal; and/or additional information may be required as noted in transmittal letter

6. Submitted information may not include or address specific item required per the specification as identified in transmittal letter

7. Specific information related to identified item may be required for final approval of submittal

8. Resubmission of entire submittal may be required or resubmission of specific item may be required as identified in transmittal letter.

D. "Rejected - See Remarks": Returned for Correction

1. One copy sent to Resident Project Representative

2. One copy retained in Engineer's file

3. All remaining copies returned to Contractor

4. Copy of transmittal letter sent to Owner

5. Contractor required to resubmit complete submittal package in accordance with Contract Documents

6. Submittal does not comply with provisions of Contract Documents as noted in transmittal letter

7. Resubmission required

E. "Receipt Acknowledged": For Reference Purposes Only or for Record Copy

1. One copy sent to Resident Project Representative

2. One copy retained in Engineer's file

3. One copy returned to Contractor

4. Copy of transmittal letter sent to Owner

5. Remaining submittal copies destroyed

6. Detailed review and comment by Engineer not required

7. Resubmission not required

1.7 RESUBMISSION REQUIREMENTS

A. Make any corrections or changes in submittals required by Engineer and resubmit until approved

B. Transmit each resubmission under new letter of transmittal. Use number of original submittal followed directly by a capital letter corresponding to the number of times a submittal is resubmitted (i.e., 1, 1A, 1B, etc.)

C. Shop Drawings and Product Data:

1. Revise initial drawings or data and resubmit as specified for the initial submittal

2. Indicate any changes which have been made other than those requested by Engineer

D. Samples: Submit new samples as required for initial submittal

E. Reimbursement of Resubmission Review Costs:

1. Review of first submittal and one resubmittal will be performed by Engineer at no cost to the Contractor

2. Costs for review of subsequent resubmissions will be directly paid by Contractor

3. Engineer will document work-hours required for review and costs for Engineer review will be deducted from payments due Contractor as Change Order deducts

4. Charges for review of resubmissions will include Engineer at maximum rate of $200 per hour and Submittal Clerk at maximum rate of $85 per hour

1.8 ENGINEER'S DUTIES

A. Review submittals with reasonable promptness and in accord with approved submission schedule provided that each submittal has been called for by the Contract Documents and is stamped by Contractor as indicated above

B. In the event that Engineer will require more than 14 calendar days to perform an expedited submittal review as requested by Contractor, Engineer shall so notify Contractor or indicate so on the submission schedule

C. No extensions of time are allowed due to Engineer's delay in reviewing submittals unless all the following criteria are met:

1. Contractor has notified Engineer in writing that an expedited review of particular submittal in question is critical to the progress of the Work and Contractor has identified the requested submittal return date.

2. Engineer has failed to return submittal within 14 days of receipt of the submittal or receipt of said notice, whichever is later

3. Contractor demonstrates that delay in progress of the Work was directly attributable to Engineer's failure to return submittal within 14 days

D. No extensions of time are allowed due to delays in progress of the Work caused by rejection and subsequent resubmission of data, including multiple resubmissions

E. Review drawings and data submitted only for general conformity with Contract Documents:

1. Engineer's review of drawings and data returned marked "Approved As Submitted" or "Exceptions Noted" does not indicate a thorough review of all dimensions, quantities, and details of material, equipment device or items shown

2. Engineer's review does not relieve Contractor of responsibility for errors, omissions or deviations nor responsibility for compliance with the Contract Documents

3. Engineer's review shall not extend to means, methods, techniques, sequences, operations of construction, and safety precautions and programs incidental thereto. No information regarding these items will be reviewed whether or not included in submittals

F. Assume that no shop drawing or related submittal comprises a deviation to the Contract Documents unless Contractor advises Engineer otherwise in writing which is acknowledged by Engineer in writing

G. Consider and review only those deviations from the Contract Documents clearly identified as such in submittal and tabulated in the Letter of Transmittal

H. Return submittals to Contractor for distribution or for resubmission

I. Transmit, unreviewed, to Contractor all copies of submittals received directly from suppliers, manufacturers and subcontractors

J. Transmit, unreviewed, to Contractor all copies of submittals not called for by the Contract Documents or which have not been approved by Contractor

K. Engineer will not review uncalled-for shop drawings or product data except by special arrangement

L. Affix stamp and indicate approval for submittal or resubmission requirements with the following stamp:

REVIEW IS FOR GENERAL COMPLIANCE
WITH CONTRACT DOCUMENTS
NO RESPONSIBILITY IS ASSUMED FOR
CORRECTNESS OF DIMENSIONS OR DETAILS
_____ NO EXCEPTIONS TAKEN
_____ MAKE CORRECTIONS NOTED
_____ AMEND & RESUBMIT
_____ REJECTED – SEE REMARKS
NELSON ENGINEERING CONSULTANTS
BOX 1599
JACKSON, WYOMING 83001
DATE _____ BY _____
REMARKS

1.9 SUBMITTAL SCHEDULE

A. Unless indicated otherwise, provide all submittals required by individual sections of the Contract Documents to establish compliance with the specified requirements

PART 2 PRODUCTS – NOT USED

PART 3 EXECUTION – NOT USED

PART 4 MEASUREMENT AND PAYMENT – NOT USED

END OF SECTION

SECTION 01505

TEMPORARY FACILITIES

PART 1 GENERAL

1.1 SUMMARY

A. Furnish temporary services and utilities, including use fees and operation costs:

1. Potable and non-potable water
2. Lighting and power
3. Materials storage
4. Bypass pumping as required
5. Temporary water service as required

B. Furnish construction facilities, including utility costs:

1. Construction equipment
2. Dewatering and pumping
3. Temporary water service

C. Furnish security and protection requirements:

1. Fire extinguishers
2. Site enclosure fence, barricades, warning signs, and lights
3. Snow and ice removal, if applicable

D. Furnish personnel support facilities:

1. Sanitary facilities
2. Drinking water
3. First aid facilities
4. Coordinate emergency medical services

5. Trash removal

E. Safety Signing and Barricades

1. Provide and maintain safety signing and barricades to prevent the public from entering work areas.

2. Install and maintain safety fence around all open trenches and hazardous areas when CONTRACTOR personnel and operations are not active.

1.2 SUMMARY OF OWNER PROVIDED FACILITIES

A. Owner Provided Staging Areas

1. Owner will allow Contractor a staging area along as indicated on the drawings. The area shall be denoted with orange construction fencing. Contractor is responsible for maintaining the integrity of the asphalt and curb and gutter along this area and will be responsible for any repairs resulting from Contractor actions. Area of the lot is approximately .2 acres.

2. Contractor shall use the premises for the storage of construction materials. These materials shall include, but shall not be limited to soils, construction materials and equipment, and parking of personal vehicles. The storage of materials shall be completed in compliance with all applicable Town of Jackson standards and shall including the fencing of the area, and erosion control systems. The storage of petroleum products or environmentally sensitive materials shall not be allowed on these sites.

B. Additional Staging Areas

1. Additional or substitute stagging areas will be allowed but Contractor must obtain permission from the respective land owner as well and the Town of Jackson to occupy the property for stagging area uses.

PART 2 PRODUCTS – NOT USED

PART 3 EXECUTION – NOT USED

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. No separate measurement will be made for items under this section. Full compensation shall be considered as included in the prices paid for the

various contract items and no additional compensation will be allowed therefor.

4.2 BASIS OF PAYMENT

A. No separate payment will be made for items under this section. Full compensation shall be considered as included in the prices paid for the various contract items and no additional compensation will be allowed therefor.

END OF SECTION

SECTION 01570

TEMPORARY TRAFFIC AND ACCESS CONTROL

PART 1 GENERAL

1.1 SECTION INCLUDES

A. This section sets forth the minimum requirements for Temporary Traffic Control associated with the proposed work within the Town of Jackson Rights-Of-Way, easements, and/or work zone areas. Temporary Traffic Control includes, but is not limited to, neighborhood and business access, vehicular traffic, construction zones, pedestrian traffic, bicycle traffic, temporary closures, detours, etc.

B. The project area is defined in the Construction Drawings and includes these general areas:

1. Vine Street from Kelly Avenue to Snow King Avenue.

2. Extents of Temporary Traffic Control will extend, as necessary, to provide adequate access and circulation through and around the project work area.

C. Installation and maintenance of traffic control signs, barricades, and warning devices.

D. Flag persons to direct traffic through or around the project as required

1.2 REFERENCES

A. Manual on Uniform Traffic Control Devices for Streets and Highways (MUTCD) Current Edition and associated revisions.

B. Wyoming Department of Transportation (WYDOT) Traffic Control for Roadway Work Operations.

C. General Construction Specifications from these contract documents.

1.3 QUALITY ASSURANCE

A. Contractor shall complete submittal in accordance with the requirements of this specification and meet all requirements of Specification 01340.

B. All equipment/material/execution of the Temporary Traffic Control Plan shall generally conform to the current edition of the Manual on Uniform Traffic Control Devices for Streets and Highways (MUTCD), the current Wyoming Department of Transportation (WYDOT) Traffic Control for Roadway Work Operations, and General Construction Specifications from the current edition of the Wyoming Public Works Standard Specifications.

C. Contractor shall maintain the Temporary Traffic Control (TTC) throughout the duration of construction and shall be responsible for the TTC and execution of the TTC throughout the duration of the project.

1.4 SUBMITTALS

A. Submit to the Engineer a scaled drawing(s) showing the proposed Temporary Traffic Control plan complete with signage and all traffic control elements through the entire length of Construction. The Contractor shall develop a TTC plan and submit to the Engineer 5 days prior to the Pre-Construction meeting for review by the Engineer and the Town of Jackson.

B. Submit to the Engineer a TTC Schedule including dates of different stages of the TTC plan. The document shall include anticipated dates impacting the normal flow of traffic and shall include necessary time frames for each element of the TTC allowing for the installation of all materials associated with the proposed work including pipe, flow fill and concrete curing time, surfacing time, etc.

C. The submitted plan and schedule will be reviewed by the Engineer and the Owner.

D. No construction activity shall occur on the site until the traffic control plan has been approved and all traffic control equipment, supplies, and materials are on-site. Work can commence once the TTC is being executed in accordance to the work being completed on the project.

PART 2 PRODUCTS

2.1 MATERIALS

A. All supplies, materials, and equipment utilized for traffic control during construction operations shall be in conformance with the latest edition of the Manual on Uniform Traffic Control Devices for Streets and Highways (MUTCD).

B. All materials supplied shall be in good condition and shall be maintained in good condition throughout the duration of construction. Damaged materials shall be replaced as required.

PART 3 EXECUTION

3.1 GENERAL REQUIREMENTS

A. Road user movement, including vehicular, bus, bicycle, and pedestrian traffic, should be inhibited as little as practical. Closures shall be kept to the minimum time that is practical.

B. Frequent and abrupt changes in geometrics such as lane narrowing, dropped lanes, or main roadway transitions that require rapid maneuvers, shall be avoided.

C. Bicyclists and pedestrians, including those with disabilities, should be provided with access and reasonably safe passage through or around the TTC zone.

D. Business Access shall be maintained during the duration of construction to all businesses within and around the project area.

E. Temporary facilities, including pedestrian routes around worksites, are also covered by the accessibility requirements of the Americans with Disabilities Act

of 1990 (ADA) (Public Law 101-336, 104 Sta. 327, July 26, 1990. 42 U.S.C. 12101-12213 (as amended)).

F. The CONTRACTOR shall designate a TTC Plan foreman that shall be onsite during construction activities and shall manage, maintain, and direct the construction crew to fully execute the TTC plan. The TTC foreman shall be identified with the TTC submittal.

G. The beginning and end of the TTC plan shall be indicated with the appropriate signage.

3.2 ACCESS REQUIREMENTS

A. To the extent possible, two-Way traffic shall be provided through the project area during all off-work hours including evenings, weekends, and holidays. Traffic through the active work zone may be closed completely when accompanied by alternative routes.

B. The Contractor shall maintain a "Road Closed" sign at the beginning and end of each work zone. The effect of the signage will be to prohibit all traffic throughout the immediate segment in which the work is taking place.

C. Access requirements through the work zone are as follows:

1. Emergency traffic shall be accommodated immediately at any location in the project area at any time.

2. A work zone may be closed to all pedestrian and vehicular traffic, including local, during normal working hours, when alternative routes are provided. The Contractor shall be responsible for providing 24-hour advance notification in writing to affected adjacent properties in cases of periodic local access closures, as well as providing 48-hour advance notice to the RPR so that the Town of Jackson can be notified and issue appropriate press releases regarding the closure.

3. All work zones shall be returned to use and made accessible by local vehicular traffic at all times when construction activities are not in progress; i.e., nights and weekends. "Accessible" means temporary gravel surfacing, where required, leading to all driveways and approaches, which shall also remain accessible. Excavations remaining during non-working hours shall be barricaded and lit with flashing lights for the safety of local traffic. Longitudinal "drop offs" of four inches or more shall be separated from traffic lanes by 36-inch plastic barrels.

4. The Contractor shall provide for trash removal and assist in making trash receptacles accessible.

5. When the work zone is closed to through traffic and alternate routes are not available, the Contractor must allow up to eight hours per week to allow large vehicles through the work zone. Work is not required to stop during this time but should be managed to allow the access.

6. Unless otherwise approved by the Owner, no more than one intersection or cross street shall be closed at any given time.

7. The Contractor shall place appropriate “No Parking” signs as necessary along the street/alley in the work zone. Parking along the street/alley may be permitted in the evening and on weekends.

D. Any “Local Access Only” roadways due to detours shall be properly signed.

E. Temporary detours and traffic control are limited to the time limits for allowed construction for the project.

3.3 SIGNAGE

A. Signs installed for up to three weeks - may be mounted on portable sign support stands or clamped to delineator posts. Portable sign supports shall meet NCHRP 350 or MASH compliance. A mounting height of 1-foot from the ground should be used.

B. Signs installed for longer than three weeks - shall be on posts with acceptable breakaway characteristics.

C. Permanent Signs in the work area that are not applicable because of the work operation should be completely removed or covered. Portable signs that are not applicable shall be completely removed or covered, such as if work is shut down for the night and the roadway is fully opened to traffic.

D. Regulatory signs in work zones shall follow the same color and shape format as permanent signs.

3.4 PUBLIC SAFETY

A. Accommodation shall be made for the safety of all users.

B. This Project occurs within the Town of Jackson with residential and commercial activities. The CONTRACTOR shall exercise the utmost caution and implement any and all construction site safety measured necessary to protect the public welfare during construction.

C. The project area is used by vehicles, bicycles, and pedestrians. Accommodations shall be made for the safety of all users.

D. Project fencing and work area delineation shall be provided during construction. The proposed placement of fencing and delineators shall be part to the TTC plan and properly maintained/executed through the duration of the project.

3.5 PEDESTIAN SAFETY

A. Accommodation shall be made for the safety of all users. Adequate pedestrian access and walkways shall be provided as part of the TTC plan.

B. A TTC plan requiring pedestrians to “retrace” their steps to a previous intersection as part of the standard execution of the plan is not allowable.

C. Pedestrian shall not be led into conflicts with vehicles moving through or around the worksite or into conflicts with equipment and operations of construction.

D. Pedestrians shall be provided with a convenient and accessible path that replicates as nearly as practical the most desirable characteristics of the existing sidewalk.

E. A pedestrian route shall not be severed or moved for non-construction activities such as parking for vehicles or equipment.

F. All temporary pedestrian routes shall be ADA compliant and maintain a minimum of 60 inches of width throughout the route. When it is not possible to maintain a minimum 60-inch width, the pedestrian way shall have a 60 x 60-inch passing space at least every 200 feet to allow individuals in wheelchairs to pass.

G. Blocked routes, alternate crossings, and sign and signal information should be communicated to pedestrians with visual disabilities by providing devices such as audible information devices, accessible pedestrian signals, or barriers and channelizing devices that are detectable to the pedestrians traveling with the aid of a long cane or who have low vision.

H. When channelization is used to delineate a pedestrian facility, a continuous detectable edging shall be provided for the entire length of the facility.

3.6 WORKER SAFETY

A. The CONTRACTOR shall be responsible for all workers within the work area and shall conform to the Occupational Safety and Health Administration Regulations.

3.7 ADHERENCE AND MAINTENANCE OF THE TTC PLAN

A. Adherence to the approved traffic control plan shall be required at all times. The CONTRACTOR shall regularly review the traffic control plan with the ENGINEER and OWNER.

B. The CONTRACTOR shall procure all traffic control devices, materials, and supplies in quantities as designated in the approved TTC Plan.

C. If the CONTRACTOR approved traffic control plan is found, during the course of the work, to be in need of modification for any reason concerning issues of public safety, the CONTRACTOR shall procure any and all additional traffic control devices, materials, and supplies deemed necessary by the OWNER in order to meet the intent of this specification.

D. The CONTRACTOR shall provide updates to the TTC Plan Schedule as required per the Submittal on a weekly basis to the ENGINEER and OWNER.

E. The CONTRACTOR shall maintain the integrity and the placement of all traffic control materials during the construction process to include the following:

1. Continual maintenance by normal construction personnel during the regular working day with special emphasis at morning arrival and evening departure times.

2. Continual monitoring and maintenance form evening departure times to morning arrival times is not required, however, a designated CONTRACTOR REPRESNTATIVE residing within 45 minutes of the work site, whose name and telephone number shall be provided to the local police, shall be on call, and available in case of an emergency.

3. Monitoring and maintenance during weekends and holidays IS required. A designated CONTRACTOR REPRESENTATIVE residing within 45 minutes of the work site, shall be on call and available in case of an emergency. The designated CONTRACTOR REPRESENTATIVE shall visit the work site a minimum of one time per day during daylight hours for the purpose of maintaining the traffic control for the area.

F. The Contractor is expected to be continually and promptly responsive to the provisions of this specification section. Unresponsiveness on the part of the Contractor will result in written notification from the Owner providing twenty-four (24) hours to rectify non-complying situations. If after twenty-four (24) hours, resolution is not obtained to the satisfaction of the Owner, a remedy and deduction of all costs will be made from the Contract amount.

3.8 OTHER

A. If part of the TTC plan, Flagging Operations shall conform to the current edition of the Manual on Uniform Traffic Control Devices for Streets and Highways (MUTCD) and the current edition of the Wyoming Department of Transportation (WYDOT) Traffic Control for Roadway Work Operations.

B. Public notice of any closures is the responsibility of the Town. A 48-hour notice shall be given to the Town of Jackson for the purpose of executing the public notices and the larger Public Relations on the Project.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. Work under this section shall be measured as a single work item.

4.2 BASIS OF PAYMENT

A. Payment for Traffic Control and the fulfillment of all requirements thereof **project-wide** shall be made at the Lump Sum Price as indicated in the proposal. Payment of the total lump sum price bid, however, will be made incrementally in proportion to the percentage of work completed on the overall project.

B. Payment of this item shall constitute full compensation for development and implementation of the plan as described herein including submittal of approved Traffic Control Plans, supply and maintenance of all traffic control

devices, advance public notification, returning of streets to use, work scheduling, flagmen, and periodic monitoring of the project site as described herein.

END OF SECTION

SECTION 01700

CONTRACT CLOSEOUT

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Closeout procedures

B. Final cleaning

C. Adjusting

D. Contractor's closeout submittals

E. Project record documents

F. Warranties

G. Spare parts and maintenance materials

H. Delivery to Owner

I. Substantial completion

J. Final inspection

K. Reinspection fees

L. Final adjustments of accounts

M. Final application for payment

1.2 CLOSEOUT PROCEDURES

A. Comply with requirements stated in Conditions of the Contract and in specifications for administrative procedures in closing out the Work

B. Submit written certification that Contract Documents have been reviewed, Work has been inspected, and that Work is complete in accordance with Contract Documents and ready for Engineer's inspection

C. Provide submittals to Engineer/Owner that are required by governing or other authorities

D. Submit final Application for Payment identifying total adjusted Contract Sum, previous payments, and sum remaining due

1.3 FINAL CLEANING

A. Clean equipment to a sanitary condition

B. Remove waste and surplus materials, rubbish, and construction facilities from the entire alignment

1.4 ADJUSTING

A. Adjusting operating Products and equipment to ensure smooth and unhindered operation

1.5 CONTRACTOR'S CLOSEOUT SUBMITTALS

A. Project Record Documents

B. Spare Parts and Maintenance Materials: As specified in the individual sections and herein

C. Evidence of Payment and Release of Liens: As specified in the General and Supplementary Conditions

D. Two copies of each specified special bond, warranty, and service contract

E. Final inspection reports by all regulatory agencies demonstrating the agencies' final approval

F. At Contract close-out, deliver Record Documents to Engineer for the Owner

G. Accompany Submittal with Transmittal Letter in Duplicate, Containing

1. Date

2. Project title and number

3. Contractor's name and address

4. Title and number of each Record Document

5. Signature of Contractor or his authorized representative

1.6 PROJECT RECORD DOCUMENTS

A. Maintain on site, one set of the following record documents; record actual revisions to the Work:

1. Contract Drawings

2. Specifications

3. Addenda

4. Change Orders and other Modifications to the Contract

5. Reviewed shop drawings, product data, and samples

6. Field test reports

7. Construction photographs

B. Store Record Documents and samples separate from documents used for construction

1. Provide files and racks for storage of documents

C. Record information concurrent with construction progress

1. Do not conceal any work until required information is recorded

2. Legibly mark to record actual construction

D. Specifications and Addenda: Legibly mark and record at each Product section description of actual Products installed, including the following:

1. Manufacturer's name, product model, number, trade name and supplies

2. Product substitutions or alternates utilized

3. Changes made by Addenda, field order or change order

E. Record Documents and Shop Drawings: Legibly mark each item to record actual construction including:

1. Measured horizontal and vertical locations of underground utilities and appurtenances, referenced to permanent surface improvements

2. Measured locations of internal utilities and appurtenances concealed in construction, referenced to visible and accessible features of the Work

3. Field changes of dimension and detail

4. Details not on original Contract Drawings

5. Changes made by Field Order or by Change Order

F. Submit documents to Engineer with claim for final Application for Payment

G. File documents and samples in accordance with Data Filing Format of the Uniform Construction Index

H. Maintain documents in a clean, dry, legible condition and in good order. Do not use record documents for construction purposes

I. Make documents and samples available at all times for inspection by Engineer

J. Label each document "Project Record" in neat, large printed letters

1.7 WARRANTIES

A. Provide duplicate notarized copies

B. Execute and assemble documents from Subcontractors, suppliers, and manufacturers

C. Provide Table of Contents and assemble in three D side ring binder with durable plastic cover

D. Submit prior to final Application for Payment

E. For items of Work delayed beyond date of Substantial Completion, provide updated submittal within ten days after acceptance, listing date of acceptance as start of warranty period

1.8 SPARE PARTS AND MAINTENANCE MATERIALS

A. Provide products, spare parts, maintenance and extra materials in quantities specified in individual specification sections

B. Deliver to Project site; obtain receipt prior to final payment

C. Store the items in a clean, dry, heated, storage shed or bonded warehouse

D. Protect all items from damage during storage. Store in sturdy wooden boxes or crates with lid

1.9 DELIVERY TO OWNER

A. At or prior to the time of the inspection for substantial completion deliver all required items to

1. Owner at the place on the site designated by Owner

2. Contractor and representatives of Owner and Engineer shall inspect and inventory all items delivered

B. Submit to Engineer a Detailed Invoice of All Items Delivered

1. Organize invoice by specification sections

2. Indicate on invoice any items delivered which were damaged or defective

3. Contractor and Owner's an Engineer's representatives shall sign invoice certifying that all items listed were delivered and that, unless otherwise noted on the invoice, all items were in good condition at the time of delivery to Owner

C. Engineer will review invoice for completeness and inform Contractor promptly of any deficiencies therein

D. Contractor shall deliver all additional items identified by Engineer and replace all damaged and defective items noted on the original invoice before requesting final inspection

E. Invoices for additional and replacement items, signed by Contractor and Owner's and Engineer's representatives, shall be submitted

1.10 SUBSTANTIAL COMPLETION

A. When Contractor considers the Work is substantially complete, he shall submit to Engineer

1. A written notice that the Work or designated portion thereof is substantially complete

2. A list of items to be completed or corrected

B. Within a reasonable time after receipt of such notice, Engineer will make an inspection to determine the status of completion

C. Should Engineer determine that the Work is not substantially complete

1. Engineer will promptly notify the Contractor in writing, giving the reasons therefore

2. Contractor shall remedy the deficiencies in the Work and send a second written notice of substantial completion to Engineer

3. Engineer will reinspect the Work

D. When Engineer finds that the Work is substantially complete, he will

1. Prepare and deliver to Owner a tentative Certificate of Substantial Completion with a tentative list of items to be completed or corrected before final payment

2. After consideration of any objections made by the Owner as provided in Conditions of the Contract and when Engineer considers the Work

substantially complete, he will execute and deliver to the Owner and the Contractor a definite Certificate of Substantial Completion with a revised tentative list of items to be completed or corrected

E. No Certificate of Substantial Completion will be issued by Engineer until required invoices are submitted for review.

F. Advertisement for final payment will be sent to the local paper to begin advertising.

G. Final payment will not be made until all specified spare parts, maintenance materials, and special tools have been delivered to Owner in acceptable condition

1.11 FINAL INSPECTION

A. When Contractor considers the Work is complete, he shall submit written certification that

1. Contract Documents have been reviewed

2. Work has been inspected for compliance with Contract Documents

3. Work has been completed in accordance with Contract Documents

4. Equipment and systems have been tested in the presence of the Owner's representative and are operational

5. Work is completed and ready for final inspection

B. Engineer and Consultant will make an inspection to verify the status of completion with reasonable promptness after receipt of such certification

C. Should Engineer consider that the Work is incomplete or defective

1. Engineer will promptly notify the Contractor in writing listing the incomplete or defective work

2. Contractor shall take immediate steps to remedy the stated deficiencies and send a second written certification to Engineer that the Work is complete

3. Engineer will reinspect the Work

D. When the Engineer finds that the Work is acceptable under the Contract Documents, he shall request the Contractor to make closeout submittals

1.12 REINSPECTION FEES

A. Should Engineer and Consultant perform reinspections due to failure of the Work to comply with the claims of status of completion made by the Contractor

1. Owner will compensate Engineer for such additional services of Consultant

2. Owner will deduct the amount of such compensation from the final payment to the Contractor

1.13 FINAL ADJUSTMENTS OF ACCOUNTS

A. Submit a Final Statement of Accounting to Engineer

B. Statement Shall Reflect All Adjustments to the Contract Sum

1. The original Contract Sum

2. Additions and deductions resulting from

a. Previous Change Orders

b. Deductions for uncorrected Work

c. Deductions for liquidated damages

d. Deductions for reinspection payments

e. Other adjustments

3. Total Contract Sum, as adjusted

4. Previous payments

5. Sum remaining due

1.14 FINAL APPLICATION FOR PAYMENT

A. Contractor shall submit the final Application for Payment in accordance with procedures and requirements stated in the Conditions of the Contract

PART 2 PRODUCT – NOT USED

PART 3 EXECUTION – NOT USED

PART 4 MEASUREMENT AND PAYMENT – NOT USED

END OF SECTION

SECTION 02000

MOBILIZATION

PART 1 GENERAL – NOT USED

PART 2 PRODUCTS – NOT USED

PART 3 EXECUTION – NOT USED

PART 4 MEASUREMENT AND PAYMENT

4.1 DESCRIPTION

A. Payment will be made for "Mobilization" to cover the costs of preparatory work and operation including, but not limited to

1. Those necessary for the movement of personnel, equipment, supplies and incidentals to the project sites;

2. For the establishment of all facilities necessary for the work on the project;

3. For the costs of obtaining the required bonds and insurance;

4. And for all other work and operations which must be performed, or costs incurred prior to beginning work on the various items on the project.

4.2 METHOD OF MEASUREMENT

A. When the percentage of the original total contract amount shown below is earned, the percentage of the Contract Lump Sum price for "Mobilization" shown below will be paid.

Percentage of Original Contract Amount Earned	**Percentage of Lump Sum Price for Mobilization Earned**
5	20
10	50
25	60
65	75
90	90
100	100

4.3 BASIS OF PAYMENT

A. Mobilization will be paid on a lump sum basis **limited to eight percent (8%) of the total amount for each individual bid schedule.** Periodic payments of the lump sum amount will be made in accordance with the table in Section 4.2 A above.

END OF SECTION

SECTION 02005

FORCE ACCOUNT WORK

PART 1 GENERAL

1.1 SUMMARY

A. This section consists of the supply of labor, materials, equipment, and supplies necessary to perform special work items which are outside the scope of the project requirements authorized by the Owner. Payment for accomplishing these items will be made on a time-and-materials basis.

B. This section also includes the supply of materials, equipment, and supplies necessary to perform installation and repair of irrigation systems requirements authorized by the Owner. Payment for accomplishing these items will be made on a time-and-materials basis

PART 2 PRODUCTS - NOT USED

PART 3 EXECUTION

3.1 ADMINISTRATIVE MATTERS

A. In general, items included in the category of Force Account Work, include the following:

1. Force Account Project Wide - None at this time.

2. Force Account – Irrigations - Additional landscape items other than sod (which is paid for under an installed quantity) as approved by the Town of Jackson.

B. Each bidder shall supply as part of his bid, an hourly rate sheet covering all equipment and personnel within his organization. Hourly rates for equipment shall include the operator. The hourly rate sheet of the successful bidder will establish personnel and equipment force account rates for the extent of the project. It is assumed that Force Account Work will require equipment and personnel already onsite, therefore mobilization and demobilization costs will not be paid. No Force Account Work will be paid at overtime labor rates.

C. Materials and supplies required under Force Account Work will be paid at 15% above invoice costs. Invoices must be supplied to support material costs.

D. The means by which Force Account Work is accomplished will be determined in advance and must be authorized in advance by the RPR and the Town of Jackson

E. Force Account Work shall be reconciled with time sheets and material invoices between the Contractor and the RPR on a daily basis to insure proper accounting.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. No quantity measurement will be made for Force Account Work other than time and materials required to complete each work item. Time will begin when all equipment and personnel are present at the site of the proposed work and will end when all work at the site is complete. No time will be allowed for travel to and from the site.

B. No quantity measurement will be made for Irrigation Force Account Work other than time and materials required to complete each work item. Time will begin when all equipment and personnel are present at the site of the proposed work and will end when all work at the site is complete. No time will be allowed for travel to and from the site

4.2 BASIS OF PAYMENT

A. Force Account Work **Project-Wide** will be paid on a time-and-material basis as stated herein. Note that the bid amount for this item has been placed within the Bid Schedule in order to preserve the competitiveness of the bid process. Note also that there is no guarantee that any of the line item will be expended.

B. Force Account Work **Irrigation** will be paid on a time-and-material basis as stated herein. Note that the bid amount for this item has been placed within the Bid Schedule in order to preserve the competitiveness of the bid process. Note also that there is no guarantee that any of the line item will be expended.

END OF SECTION

SECTION 02015

LOCATING UTILITIES

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Locating existing utilities within the project.

1.2 UTILITY LOCATIONS INDICATED ON THE DRAWINGS

A. Underground utility locations indicated on the drawings are provided from information supplied by the various utility companies and are intended to reflect the general location of underground facilities. No warranty of accuracy of the provided information is implied.

PART 2 PRODUCTS – NOT USED

PART 3 EXECUTION

3.1 REQUIREMENTS

A. Coordinate with all utility providers to locate existing buried utility facilities within the project.

B. Verify utility locations indicated on the drawings.

C. Record existing utility locations that are incorrect or not shown on the drawings.

D. Protect existing utilities to prevent damage during construction.

E. Verify safe working distances from the existing utilities considering the construction operations to be utilized.

F. Verify depth and location of any existing utilities that have potential to conflict with the work.

G. Coordinate with each utility as needed to shut down the service as required to construct the work and to facilitate any upgrade or relocation work to be performed by the utility.

H. Provide utility location and safe clearance information to ENGINEER.

I. Notify ENGINEER of any utility conflicts that are not adequately addressed in the project design plans and the construction contract.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

No separate measurement or payment will be made for items under this section. Full compensation shall be considered as included in the prices paid for the various contract items and no additional compensation will be allowed therefore.

END OF SECTION

SECTION 02050

REMOVAL AND DISPOSAL OF STRUCTURES AND OBSTRUCTIONS

PART 1 GENERAL

1.1 SUMMARY

A. The work involved in this category shall consist of removing and satisfactorily disposing of existing asphalt pavement, portland cement pavement, concrete curb, combined curb and gutter, sidewalk, private driveways, crosswalks, fences, abandoned pipe lines, buildings, trees, stumps, shrubs, Decks, and any other structure or obstruction designated for removal on the plans.

B. Removed items shall be properly disposed of as approved by the ENGINEER.

C. It shall also include the salvaging of designated material, as shown on the plans, and backfilling the resulting trenches, holes, and pits.

D. Materials removed and not designated to be salvaged or incorporated into the work shall become the property of the CONTRACTOR.

E. Materials shall be recycled where applicable, existing manhole ring and covers shall be delivered to the TOJ Public Works if requested by Owner.

1.2 RELATED WORK SPECIFIED ELSEWHERE

A. Demolition of Asphalt and Portland Cement Concrete. Section 02075

B. Stripping Surface Cover and Removal/Replacement of Miscellaneous Features. Section 02110

PART 2 PRODUCTS – NOT USED

PART 3 EXECUTION

3.1 CONSTRUCTION METHODS

A. Demolition and disposal.

1. All existing pavement, curb, gutter, sidewalks, driveways, crosswalks, fences, abandoned pipelines, buildings or any other structure or obstruction specified for removal on the plans or as directed by the ENGINEER, shall be removed and disposed of by the CONTRACTOR. No abandoned pipeline encountered shall be left in place.

2. Care shall be exercised in such removal to assure that adjacent facilities or structures which are to remain shall not be disturbed.

3. Any damage to such existing facilities or structures resulting from carelessness or negligence on the CONTRACTOR's part shall be satisfactorily restored to its original condition at the CONTRACTOR's expense.

4. Existing pavement shall be cut and removed to the lines indicated on the plans, or as directed by the ENGINEER.

3.2 REMOVAL OF EXISTING SEWER PIPE

A. All existing sewer, service, and main pipe, which lies in the same trench as the proposed main and service shall be removed and disposed of at the CONTRACTOR's expense.

3.3 REMOVAL AND REPLACEMENT OF FENCE

A. Fence shall be removed and replaced to original or better condition for the entire length of the fence. Contractor shall carefully remove boards, wire, poles, and posts so that the original materials may be reused. If the fence materials are damaged or not suitable for reuse, new materials matching the original materials shall be used. Fences shall not be removed unless absolutely necessary. Fences shall be replaced at the same location or as directed by the Engineer.

3.4 TREE AND BRUSH REMOVAL

A. Contractor shall remove and dispose of all trees and shrubs as indicated on the drawings.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

No separate measurement will be made for items under this section.

4.2 BASIS OF PAYMENT

No separate payment will be made for items under this section. Full compensation shall be considered as included in the prices paid for the various contract items and no additional compensation will be allowed therefore.

END OF SECTION

SECTION 02075

DEMOLITION OF ASPHALT AND PORTLAND CEMENT CONCRETE

PART 1 GENERAL

1.1 SUMMARY

A. This section consists of removal of all surfacing material encountered.

1.2 RELATED WORK SPECIFIED ELSEWHERE

A. Removal and Disposal of Structures and Obstructions. Section 02050.

B. Stripping of Surface Cover and Removal/Replacement of Miscellaneous Features. Section 02110

PART 2 PRODUCTS – NOT USED

PART 3 EXECUTION

3.1 PAVEMENT REMOVAL

A. Where trench excavation or structure excavation requires the removal of curb and gutter, concrete sidewalks, or asphaltic or concrete pavement, the pavement or concrete shall be cut in a straight line parallel to the edge of the excavation by use of a spadebitted air hammer, concrete saw or similar approved equipment to obtain a straight, square clean break. Pavement cuts shall be two (2) feet wider than the actual trench opening and centered over such trench.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT (This work will not be measured for payment)

A. No separate measurement will be made for items under this section. Full compensation shall be considered as included in the prices paid for the various contract items and no additional compensation will be allowed therefore.

4.2 BASIS OF PAYMENT

A. No separate payment will be made for items under this section. Full compensation shall be considered as included in the prices paid for the various contract items and no additional compensation will be allowed therefore.

END OF SECTION

SECTION 02109

STORM WATER POLLUTION PREVENTION PLAN

PART 1 GENERAL

1.1 SUMMARY

A. This section consists of contractor development of a Storm Water Pollution Prevention Plan, implementation of the plan throughout the project area, and periodic self-monitoring and inspection of the construction operation to insure compliance with the plan. Also included herein is the responsibility for communication with the Wyoming Department of Environmental Quality, the agency responsible for administration of the temporary NPDES permit program for construction projects which will disturb five or less surface acres.

PART 2 PRODUCTS – NOT USED

PART 3 EXECUTION

3.1 STORM WATER POLLUTION PREVENTION PLAN

A. The Contractor shall develop and implement the Storm Water Pollution Prevention Plan based on the State requirements. The Contractor shall be free to utilize his own means and methods in development and implementation of the plan to the extent compliance with regulatory requirements is assured.

3.2 NOTICE OF INTENT (NOI)

A. The Contractor, as the prospective permit holder and operator, shall fill out and submit the NOI to WDEQ.

B. The Contractor shall remain the permit holder and operator throughout the construction period as well as throughout the warranty period or period for correction of defective work as designated in the General Conditions. At the expiration of said period, the Contractor shall file a termination notice ending his responsibility under this section.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. Work under this section shall be measured as a single work item.

4.2 BASIS OF PAYMENT

A. Payment for development and implementation of the Storm Water Pollution Prevention Plan and the fulfillment of all requirements thereof shall be made at the Lump Sum Price as indicated in the proposal. Payment of the total lump sum price bid, however, will be made incrementally at each pay request in equal proportion to the percentage of total work included within that specific pay request.

END OF SECTION

SECTION 02110

STRIPPING OF SURFACE COVER AND REMOVAL/REPLACEMENT OF MISCELLANEOUS FEATURES

PART 1 GENERAL

1.1 SUMMARY

A. This section includes:

1. Removal and disposal or reclamation of existing asphalt surfacing and demolition and disposal of concrete curb, concrete flatwork and concrete paving necessary to install the intended improvements and as authorized on the drawings.

2. Stripping of topsoil and vegetation.

3. Replacement of stripped soil material as Final Surface Cover.

4. Temporary removal and storage of all traffic control signs, street name signs, and other miscellaneous features required in order to execute the project.

5. Clearing, grubbing, removing, and disposing of vegetation and debris within the limits of the construction area. Vegetation and objects designated to remain shall be preserved from injury or defacement.

6. Also covered herein is project-wide dust control.

PART 2 PRODUCTS

2.1 STRIPPED TOPSOIL

A. All topsoil stripped and stockpiled for use as Final Surface Cover shall be free of any rock greater than 2".

PART 3 EXECUTION

3.1 GENERAL

A. In no case, without prior consent of the RPR or the Owner, shall surface disturbance occur outside of easements, rights-of-way, or limits of trench disturbance as indicated on the drawings or defined herein. All existing asphalt paving scheduled for removal shall be cut to a neat straight line. Negligent destruction or removal of unnecessary structures or asphalt paving

outside the construction limit lines will require replacement at the Contractor's expense.

B. From the time that any surface cover throughout the project is removed until that surface cover is replaced, the Contractor shall be responsible for providing water for dust control in quantities and at frequency as determined by the Engineer, including weekends and holidays, if required.

C. In order to insure adequate attention to dust control during weekends and holidays when normal construction operations are not being conducted, a designated CONTRACTOR Representative(s) residing within a ten minute drive from the Town of Jackson, whose name and telephone number shall be provided to the Owner, shall be on call, and available for immediate response in case of a need for dust abatement. In addition, the designated CONTRACTOR Representative shall visit the work site once per day during daylight hours on weekends and holidays for the purpose of conducting dust control operations by watering down disturbed areas.

3.2 SPECIFIC ELEMENTS OF WORK

A. Asphalt Reclamation (Milling)

1. The typical street section within the project consists of 3-5 inches of asphalt paving over 3 inches of aggregate base. The entire existing asphalt paving thickness, together with the top 2 inches of existing aggregate base, shall be milled and uniformly mixed. When appropriate and in conformance with the construction schedule, the entire milled mixture shall then be stripped in compliance with Sections 01010 and 01570 and stockpiled in the staging area or Owner approved location for use as Reclaimed Aggregate Base Course later in the project.

2. Reclaimed Aggregate Base Course produced under this section will be utilized as base material under final asphalt paving in place of imported aggregate base course as described in Section 02231 of these specifications.

3. The milling machine shall be operated such that a maximum asphalt size resulting from the operation is one inch (1"). Multiple passes shall be provided if necessary to provide the maximum size.

4. Locate all underground utilities, valve boxes, manholes, etc. and sweep surface prior to milling. Manholes and valve boxes will not be lowered to accommodate the milling operation; the machine will come up to obstacles, lift up, cross over, lower and resume operation. Limit lines of pavement removal shall be placed on the asphalt prior to the milling process.

5. Operator shall use caution to not mill to a depth that will contaminate the finish material with underlying material

B. Should Contractor elect to not reclaim existing asphalt then removal of existing asphalt surfacing on all streets, driveways and approaches shall be limited to the areas indicated on the drawings and shall occur only when beginning construction in a new work zone. Removed asphalt shall be disposed of offsite at Contractor's expense. All existing asphalt paving scheduled for removal shall be cut to a neat straight line. After haul-off of the removed asphalt, remaining crushed gravel base within the stripped area shall be "dished" to feather the surface of the exposed gravel flush with the top of asphalt and curb lip around the edge of the disturbed area. The material shall then be re-compacted in-place and maintained as required to enable quality vehicular access across the stripped area in advance of repaving.

C. In the road right of ways outside of gravel or asphalt surfacing, topsoil and vegetation shall be stripped to a minimum 4" depth, windrowed to one or both sides of the work area, and relayed as final cover material outside of new surface improvements subsequent to all construction activities. Final contouring of work areas shall be free of abrupt elevation or grade changes and performed to the satisfaction of the RPR.

D. All existing asphalt surfacing on all asphalt roadways and driveway crossings shall be stripped at the dimensions noted on the drawings. The resulting material shall be loaded into trucks and hauled off at the CONTRACTOR's expense. Any additional asphalt removed outside of the asphalt cut lines indicated on the drawings without RPR approval shall be paid for at the Contractor's expense.

E. After haul-off of the asphalt, remaining crushed gravel base within the stripped area shall be "dished" to feather the surface of the exposed gravel flush with the top of asphalt and curb lip around the edge of the disturbed area. The material shall then be re-compacted in-place and maintained as required to enable quality vehicular access across the stripped area in advance of trenching operations.

F. Within the allowable contractor disturbance area, topsoil and vegetation shall be stripped to a minimum 4" depth, and stockpiled or temporarily removed from the work area in a segregated area which preserves the inherent quality of the topsoil material without contamination from subsoil materials until replaced as Final Surface Cover in sections required on the drawings.

G. All previously stripped soil materials shall be relayed and replaced as Final Surface Cover material at a minimum depth of 4 inches immediately upon

completion of paving and concrete flatwork activities. Final contouring of work areas shall be in general conformance to pre-existing grade lines and elevations, free of abrupt elevation or grade changes and performed to the satisfaction of the Engineer. All rock shall be removed from the minimum 4 inches of Final Surface Cover material.

H. Existing curb, gutter, and flatwork (sidewalk and valley gutters) as authorized on the drawings shall be removed as required to install the proposed improvements. With the approval of the RPR concrete components may be cut at the nearest existing control joint outside of the construction limit width indicated on the drawings. Removed concrete components shall be hauled offsite and properly disposed of at Contractor's expense.

I. All stumps, roots, logs or other timber, and all brush matted roots and other debris within the disturbed shall be removed to a depth of not less than 6" below finish grade.

J. At the appropriate time and when approved by the Owner, the Contractor shall be required to remove traffic control signage and street signage if needed. The Contractor shall be required to place temporary traffic control signs as needed to maintain pre-existing traffic control patterns.

K. The Contractor shall reinstall the signs at the locations dictated by the Owner.

L. Any remaining miscellaneous surface features within the work area that are removable, including, but not limited to, traffic signs, street name signs, components of existing utilities, or any other feature not described above shall be removed, secured, stored and replaced in "like" condition subsequent to construction activities.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. Measurement of Stripping of Existing Asphalt Surfacing will be made on a square yard basis of existing pavement milled or stripped, including stripping of chip seal material located in the alleys.

B. Measurement of Removal of Existing Concrete Curb and Gutter will be made on a lineal foot basis.

C. Measurement of Removal of Existing Concrete Flatwork will be made on a square foot basis.

D. Measurement of Tree/Brush Removal will be made on a unit basis for each removed.

E. No separate measurement will be made herein for stripping of existing gravel driveway surfacing.

F. No separate measurement will be made herein for stripping and replacement of topsoil/vegetation areas.

G. No separate measurement will be made for Removal and Storage of Area Signage.

H. No separate measurement will be made for Fence Removal and Replacement.

I. No separate measurement will be made herein for project-wide dust control, or removal, storage and replacement of miscellaneous surface features.

4.2 BASIS OF PAYMENT

A. Payment for Stripping of Existing Asphalt Surfacing will be made at the contract unit price per square yard of removed material; said price being full compensation for cutting, milling, stripping and haul, stockpiling or disposal as well as "dishing", compacting, and maintenance of the resulting gravel surface as described herein.

B. Payment for Removal of Existing Curb and Gutter will be made at the contract unit price per lineal foot of material removed, said price being full compensation for cutting, removal and disposal as required herein.

C. Payment for Removal of Existing Concrete Flatwork will be made at the contract unit price per square foot of material removed, said price being full compensation for cutting, removal, and disposal as required herein.

D. Payment for Tree/Brush Removal will be made at the contract unit price each, said price being full compensation for cutting, removal and disposal as required.

E. No separate payment will be made for stripping of existing gravel driveway surfacing. Payment for these operations, including equipment costs, will be considered as subsidiary to all other elements of work.

F. No separate payment will be made for stripping and replacement of topsoil/vegetation areas. Payment for these operations, including equipment costs, will be considered as subsidiary to all other elements of work.

G. No separate payment will be made for Removal and Storage of Existing Area Signage. Payment for these operations, including equipment costs, will be considered as subsidiary to all other elements of work.

H. No separate payment for Fence Removal and Replacement will be made. Payment for this will be considered as subsidiary to all other elements of work.

I. No separate payment will be made herein for project-wide dust control, or removal, storage, and replacement of miscellaneous surface features. Payment for these operations, including equipment costs, will be considered as subsidiary to all other elements of work.

END OF SECTION

SECTION 02150

SHORING AND UNDERPINNING

PART 1 GENERAL

1.1 SUMMARY

A. This section consists of all necessary bracing, shoring and protection, required for open excavations.

PART 2 PRODUCTS - NOT USED

PART 3 EXECUTION

3.1 CONSTRUCTION

A. All excavation, trenching and shoring, and the like, under this contract shall be performed in a manner that meets with the latest edition of the OSHA Department of Labor, Safety and Health Regulations for Construction.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. No separate measurement or payment will be made for items under this section, full compensation shall be considered as included in the prices paid for the various contract items and no additional compensation will be allowed therefore.

4.2 BASIS OF PAYMENT

A. No separate payment will be made for items under this section. Full compensation shall be considered as included in the prices paid for the various contract items and no additional compensation will be allowed therefore.

END OF SECTION

SECTION 02190

AGGREGATES

PART 1 GENERAL

1.1 SUMMARY

A. This section includes the preparation and stockpiling of aggregates for portland cement concrete, bases, bituminous pavements and surface treatments, cover coats, bed courses, drains, pervious backfill and riprap.

B. This section is a material specification only and is subsidiary to other sections which address placement of the materials prepared under same.

1.2 RELATED WORK

A. Section 02231, Aggregate Base Course.

B. Section 03304, Portland Cement Concrete.

C. Section 02512, Plan Mix Pavements.

1.3 QUALITY ASSURANCE

A. AASHTO M 6: Fine Aggregate for Portland Cement Concrete.

B. AASHTO M 80: Course Aggregate for Portland Cement Concrete.

C. AASHTO M 92: Wire-cloth Sieve for Testing Purposes.

D. AASHTO T 2: Sampling Aggregates.

E. AASHTO T 27: Wyoming Modified Sieve Analysis of Fine and Course Aggregates.

F. AASHTO T 96: Resistance to Abrasion of Small Size Course Aggregate by Use of the Los Angeles Machine.

G. AASHTO T 104: Soundness of Aggregate by use of Sodium Sulfate or Magnesium Sulfate.

H. ASTM C 33: Concrete Aggregates.

I. ASTM C 127: Specific Gravity and Moisture Absorption of Coarse Aggregate.

J. ASTM C 136: Sieve or Screen Analysis of Fine and Coarse Aggregate.

1.4 SUBMITTALS

A. Sampling and testing of aggregates for flexible pavements shall be in accordance with the following standard methods of the American Association of State Highway Transportation Officials (AASHTO):

1.	Sampling	T 2
2.	Percentage of Wear	T 96
3.	Soundness	T 104
4.	Sieve Analysis	T 27, Wyoming Modified
5.	Sieve Analysis	ASTM C 136

B. Sampling and testing of aggregates for portland cement concrete shall be in accordance with the following standard methods of the American Association of State Highway Transportation Officials (AASHTO):

1.	Fine Aggregate	M 6
2.	Course Aggregate	M 80
3.	Sieve Analysis	T 27, Wyoming Modified
4.	Percentage of Wear	T 96
5.	Soundness	T 104

1.5 DEFINITIONS

A. Coarse aggregate shall mean materials retained on a #4 sieve.

B. Fine aggregate shall mean materials passing a #4 sieve.

C. Sub-base shall be crushed sub-base unless otherwise specified.

D. Base shall be crushed base unless otherwise specified.

E. Gradation requirements, as listed herein, shall be the percentage of material by weight passing laboratory sieves having square openings. Sieve sizes or designations will be in accordance with AASHTO M 92 and ASTM C 33.

PART 2 PRODUCTS

2.1 MATERIALS

A. When crushed aggregate for sub-base, bases, surfacing or bituminous pavements is specified, all boulders in the pit up six (6") in diameter shall be crushed to meet the

required specifications and shall be uniformly distributed in the remainder of the material, unless otherwise specified.

B. Before production of any of the following materials, all vegetation and stripping material shall be removed from the pit. Only designated portions of the pit will be used. The composite materials shall be free from clay balls, vegetable matter, and other deleterious substances, and shall not contain an excess of thin or elongated pieces.

2.2 AGGREGATE FOR PORTLAND CEMENT CONCRETE

A. FINE AGGREGATE

1. Fine aggregate for concrete shall conform to the requirements of AASHTO M 6 with the following exceptions:

	Max. % by Weight
Clay Lumps	1.0
Coal, Lignite, or Shale	1.0
Material Passing No. 200 Sieve	4.0

The sum of the above materials and other deleterious substances such as shale, alkali, mica, coated grains, or soft and flaky particles shall not exceed 4% by weight.

2. Fine aggregate shall be well graded from coarse to fine and shall conform to the following gradation requirements:

Sieve Designation	Percentage Passing
3/8”	100
#4	95 – 100
#16	45 – 80
#50	10 – 30
#100	2 – 10

B. COARSE AGGREGATE

1. Coarse aggregates shall consist of crushed stone, gravel, or other approved inert materials of similar characteristics, or combinations thereof, having strong and durable pieces. The aggregate shall be free from vegetable matter, lumps or balls of clay, adherent films of clay, or other matter that would prevent thorough bonding in accordance with Paragraph 2.

2. Coarse aggregate shall conform the requirements of AASHTO M 80 with the following exceptions:

a. The amount of deleterious substances shall not exceed the following limits:

	Max. % by Weight
Clay Lumps	0.5
Coal, Lignite, or Shale	1.0
Material Passing #200 Sieve	4.0
Other deleterious substances such as friable, thin, elongated or laminated pieces	3.0

The sum of the above material and other deleterious substances shall not exceed 5% by weight.

b. Coarse aggregates shall have a percentage of wear of not more than 40 when tested in accordance with AASHTO T 96 or show a sodium sulfate loss not to exceed 12% when tested in accordance with AASHTO T 104. The wear and soundness requirements may be waived, or modified, by ENGINEER provided that the coarse aggregate has a proven service record for similar conditions.

c. Coarse aggregate shall meet the following gradation limits for the concrete class specified. Other sizes or combinations of sizes may be used when otherwise specified. If not specified, Type No. 57 shall be the gradation used.

Sieve Designation	Type No. 57	Type No. 67
1 1/2"	100	---
1”	95 – 100	100
3/4"	---	90 – 100
1/2"	25 – 60	---
3/8”	---	20 – 55
* #4	2 – 15	0 – 15

* Not more than five percent (5%) shall pass the #8 Sieve.

2.3 AGGREGATE FOR UNTREATED SUB-BASE AND BASE

A. The composite materials shall be free from clay balls, vegetable matter, and other deleterious substances, and shall not contain an excess of thin or elongated pieces.

B. Crushed sub-base and crushed base shall be crushed stone or crushed gravel and an approved soil binder or natural filler, where required, conforming to the following requirements, unless otherwise designated in the Contract Documents.

1. Coarse aggregate shall consist of hard, durable particles or fragments of stone or gravel. Materials that break up when alternately frozen and thawed or wetted and dried shall not be used. Unless otherwise specified, the coarse aggregate shall have a percentage of wear of not more than 50.

2. Fine aggregate shall consist of crushed stone, crushed gravel, or natural sand. The fraction passing the #200 sieve shall not be greater than two-thirds of the fraction passing the #40 sieve. The fraction passing the #40 sieve shall have a liquid limit not greater than 25 and a plasticity index not greater than 6 except that, when the plasticity index is nonplastic (NP), the liquid limit shall not be more than 30.

3. Crushed base and crushed sub-base shall meet one of the following gradation requirements as specified in the Contract Documents:

Sieve Designation	Grading D	Grading G	Grading H	Grading J	Grading K	Grading W
2”	100	100	---	100	---	---
1 1/2"	95 – 100	95 – 100	---	95 – 100	100	100
1”	---	---	100	---	95 – 100	95 – 100
3/4"	---	---	95 – 100	---	---	---
#4	50 – 85	---	45 – 65	35 – 75	40 – 65	46 – 65
#8	40 – 70	---	33 – 53	---	30 – 55	33 – 53
#200	2 – 15	0 – 15	3 – 12	0 – 15	3 – 15	3 – 12

C. Crusher run sub-base and crusher run base shall be crusher run material of the maximum size as called for in the Contract Documents, not to exceed 3".

D. Pit run or screened sub-base and base shall be pit run or screened material of the maximum size called for in the Contract Documents, not to exceed 3".

E. Placement of sub-base materials with aggregates greater than 3" shall not be allowed unless otherwise specified by ENGINEER in the Special Provisions.

2.4 AGGREGATE FOR PLANT MIX BITUMINOUS BASE

A. GENERAL - Aggregate shall be composed of coarse and fine aggregates combined in the proper proportions to meet the grading requirements for Grading W of Subsection 2.03 herein, AGGREGATE FOR UNTREATED SUB-BASE AND BASE, unless otherwise noted in the Contract Documents. Aggregates shall be composed of clean, tough, durable fragments free from an excess of flat, elongated, soft, or disintegrated pieces and free from fragments coated with dirt or other objectionable matter.

B. COARSE AGGREGATE - Coarse aggregate shall be crushed stone, crushed gravel, or natural gravel. Unless otherwise shown noted in the Contract Documents, the material shall have a percentage of wear of not more than 50 when tested in accordance with AASHTO T 96. The sodium sulfate soundness loss shall not exceed 12% in accordance with AASHTO T 104.

C. FINE AGGREGATE - Fine aggregate shall consist of crushed stone, crushed gravel, or natural sand. The fraction passing the #200 sieve shall not be greater than two-thirds of the fraction passing the #40 sieve. The fraction passing the #40 sieve shall have a liquid limit not greater than 25 and a plasticity index not greater than 3, except that when the plasticity index is nonplastic (NP), the liquid limit shall be not more than 30.

2.5 AGGREGATE FOR ROAD MIX BITUMINOUS BASE

A. Aggregates for road mix bituminous base shall meet the requirements for Crushed Base of Subsection 2.03 herein, AGGREGATE FOR UNTREATED SUB-BASE AND BASE and unless otherwise specified by ENGINEER in the Special Provisions, the combined aggregate and natural filler, where required, shall meet the gradation requirements for Grading W or H.

2.6 AGGREGATE FOR FLEXIBLE PAVEMENTS

A. GENERAL - Aggregates shall be of uniform quality, crushed to size as necessary, and shall be composed of sound, tough, durable pebbles or fragments with or without natural or mineral fillers, as required. The aggregate shall be free from vegetable matter, lumps or balls of clay, adherent films of clay or other matter that would prevent thorough coating with bituminous material and shall be free of an excess of flat or elongated pieces. The crushed aggregate shall have a percentage of wear of not more than 40, show a sodium sulfate loss of not more than 12%, and the plasticity index shall not exceed 3 unless otherwise provided for in the Contract Documents or as approved by ENGINEER.

B. COARSE AGGREGATE - Coarse aggregate shall be crushed stone or crushed gravel of such gradation that when combined with other required aggregate fractions and fillers in proper proportion, the resultant mixture shall meet the gradation requirements under the composition of mixture for the specific material type. Only one kind shall be used on the Project except as approved by ENGINEER.

C. FINE AGGREGATE - Fine aggregate shall consist of crushed stone, crushed gravel, or natural sand. Fine aggregate shall be of such gradation that when combined with other required aggregate fractions in proper proportion, the resultant mixture shall meet the gradation requirements under the composition of mixture for the specific material type. Only one kind shall be used on the Project except as approved by ENGINEER.

2.7 AGGREGATE FOR HOT PLANT MIX BITUMINOUS PAVEMENT

A. Type I Pavement aggregate shall be composed of coarse and fine aggregates combined as shown and in conformance with Subsection 2.04 herein, AGGREGATE FOR PLANT MIX BITUMINOUS BASE.

B. Type II Pavement aggregate material, prior to crushing, shall be of such size that not less than 95% shall be retained on a sieve with square openings 1/4" larger than the maximum size mineral aggregate being produced, unless otherwise specified by ENGINEER in the Special Provisions.

C. Type III Pavement aggregate shall have not less than 50% of the materials by weight retained on the #4 sieve with at least one fractured face, unless a different percentage of fractured faces is otherwise specified in the Contract Documents.

D. The several aggregate fractions for the mixture shall be sized, graded, and combined in such proportions that the resulting composite blend meets one of the grading

requirements in the following table as specified in the Contract Documents. If not specified, CONTRACTOR shall use the 3/4" maximum material grading specification.

Sieve Designation	% by Weight Passing 3/4" Max.	1/2" Max.
1”	100	---
3/4"	97 – 100	100
1/2"	---	97 – 100
3/8”	60 – 85	---
#4	40 – 65	45 – 70
#8	25 – 55	25 – 55
#30	10 – 35	15 – 40
#200	2 – 10	2 – 11

2.8 AGGREGATE FOR PLANT MIX WEARING COURSE

A. The aggregate for plant mix wearing course shall be crushed stone or gravel composed of hard, durable pebbles or fragments and a filler of finely crushed stone, gravel, or sand, where required, to provide a composition of aggregates meeting the following requirements for the type specified:

Sieve Designation	% by Weight Passing Type A	Type B
1/2"	100	100
3/8”	97 – 100	97 – 100
#4	25 – 45	20 – 40
#8	10 – 25	10 – 20
#200	2 – 7	2 – 7

B. The aggregate shall be free from vegetable matter, lumps or balls of clay, adherent films of clay, or other matter that would prevent thorough coating with bituminous material. Unless otherwise shown on the plans, at least 75% of the material by weight retained on the #4 sieve shall be particles having at least one fractured face and shall have a percentage of wear of not more than 35.

C. When either Type A or Type B wearing course is specified, the aggregate material, prior to crushing, shall be of such size that not less than 95% shall be retained on a sieve with square openings of 3/8".

2.9 AGGREGATE FOR ROAD MIX BITUMINOUS PAVEMENT

A. Aggregates shall be composed of clean, tough, durable fragments of crushed stone, or crushed or natural gravel free from an excess of flat, elongated, soft, or disintegrated pieces. The aggregate shall be free from vegetable matter, lumps or balls of clay, adherent films or other matter that would prevent thorough coating with bituminous material.

B. Unless otherwise specified, the coarse aggregate shall have a percentage of wear of not more than 50. The sodium sulfate soundness loss shall not exceed 12% and the plasticity index shall not exceed 3. The combined coarse and fine aggregate shall meet the following gradation requirements:

Sieve Designation	% by Weight Passing
1”	100
3/4"	95 – 100
#4	45 – 65
#8	33 – 53
#200	3 – 12

2.10 AGGREGATE FOR COVER COAT

A. Only one type of aggregate shall be used on the project unless alternate types are approved.

B. Cover aggregate for seal coats shall be crushed stone, crushed ledge rock, crushed or natural gravel, or sand.

C. Cover aggregate material for bituminous surface treatment shall consist of clean, tough, durable fragments free from an excess of flat, elongated, soft or disintegrated pieces and free from coatings of dirt or other objectionable matter. The aggregate shall have neither a percentage of wear of more than 40 nor a plasticity index in excess of 3. The aggregate material shall be well graded from coarse to fine within the following limits:

Sieve Designation	% by Weight Passing
3/4"	100
1/2"	95 – 100
#4	50 – 70
#8	33 – 63
#200	3 - 10

D. Type A, B, C, D, E and S aggregate material produced shall be well graded from coarse to fine within the following limits:

Sieve	% by Weight Passing					
Designation	Type A	Type B	Type C	Type D	Type E	Type S
1”	100	---	---	---	---	---
3/4"	95 – 100	100	---	100	100	---
1/2”	30 – 60	95 – 100	100	95 – 100	95 – 100	100
3/8"	---	---	95 – 100	---	---	95 – 100
#4	0 – 15	0 – 15	0 – 20	0 – 15	35 – 70	85 – 100
#8	0 – 7	0 – 7	0 – 12	0 – 7	---	---
#200	0 – 2	0 – 2	0 – 2	0 – 2	0 – 10	0 – 5

E. Material used for the production of Type A, B, or C cover aggregate shall be stone, ledge rock, or boulders of such size that prior to crushing not more than 5% will pass a 3/4" screen for Type A or a 1/2" screen for Type B and Type C.

F. Type D cover aggregate shall be crushed stone, crushed gravel, or clean pea gravel.

G. Types A, B, C, or D shall have a percentage of wear of not more than 35, unless a different percentage of wear is specificed by ENGINEER in the Special Provisions.

H. Type E cover aggregate shall be crushed sand-gravel. Type S cover aggregate shall be screened or pit-run sand. The plasticity index of either Type E or Type S shall not exceed 3.

2.11 AGGREGATE FOR BLOTTER

A. Blotter material shall be either sand or screenings, free from vegetable matter, clay, or other deleterious matter. The material shall be of such size that 100% of the material will pass through a 3/8" sieve, the fraction passing the #4 sieve shall be from 85% to 100% and the fraction passing the #200 sieve shall not be greater than 20%. The plastic index shall not exceed 6.

2.12 AGGREGATE FOR FILLER

A. Filler shall consist of clean, hard, durable grains of naturally occurring granular material taken either from locations shown on the Drawings or from approved sources as otherwise specified in the Contract Documents.

2.13 AGGREGATE FOR BED COURSE MATERIAL

A. Bed course material for sidewalks and curbing shall consist of graded gravel, crushed stone, or other approved material of such that all particles will pass through a sieve having 1/2" square openings.

2.14 AGGREGATE FOR DRAINS

A. Gravel for drains shall be crushed or natural sand and gravel or other approved free-draining material. The material shall be uniformly graded from coarse to fine within the following gradation requirements for the material type indicated in the Contract Documents. When the grading is not indicated in the Contract Documents, Grading B shall be used.

Sieve	% by Weight Passing		
Designation	Grading A	Grading B	Grading C
2”	100	---	---
1 1/2"	95 – 100	100	---
1”	---	95 – 100	---
3/4"	35 – 75	---	100
3/8”	10 – 30	---	95 – 100
#4	0 – 5	0 – 10	---
#8	---	---	65 – 95
#16	---	---	5 – 30
#100	---	---	0 – 10

2.15 AGGREGATE FOR MAINTENANCE STOCKPILES

A. Type A aggregate shall consist of clean, hard, durable particles of crushed gravel or stone free from soft, thin, elongated, or laminated pieces or organic material, and shall show a percentage of wear of not more than 50. The fraction passing the #40 sieve shall have a liquid limit not greater than 25 and a plasticity index not greater than 3, except that, when the plasticity index is nonplastic (NP), the liquid limit shall not be more than 30. The material placed in the stockpile shall meet the following gradation requirements for the maximum size specified:

Sieve Designation	% by Weight Passing	
	1/2" Max.	3/8" Max.
3/4"	100	---
1/2"	95 – 100	100
3/8"	---	95 – 100
#4	45 – 65	50 – 70
#8	37 – 57	33 – 63
#200	3 – 12	3 – 12

B. Type B aggregate shall consist of clean, hard, durable particles of crusher-run gravel or stone free from soft, thin, elongated, or laminated pieces or organic material. Material shall be obtained from designated portions of the pit. The plasticity index shall not be greater than 6. The material placed in the stockpile shall meet the following gradation requirements for the maximum size specified:

Sieve Designation	% by Weight Passing
Maximum Designated	95 – 100
#4	0 – 75
#200	0 – 15

C. Type C aggregate shall consist of crusher-run scoria. Not less than 95% of the material placed in the stockpile shall pass a 1/2" sieve.

D. Type D aggregate shall consist of clean, hard, durable particles of screened sand free from soft, thin, elongated or laminated pieces, or organic material. The plasticity index shall not be greater than 6. The material placed in the stockpile shall meet the following gradation requirements:

Sieve Designation	% by Weight Passing
1/2"	100
3/8"	95 – 100
#4	85 – 100
#200	3 – 12

2.16 AGGREGATE FOR PERVIOUS BACKFILL MATERIAL

A. Pervious Backfill Material shall consist of gravel, crushed gravel, crushed rock, natural sands, manufactured sands, or combinations thereof, and shall meet the following gradation requirements:

Sieve Designation	% by Weight Passing
2"	100
#4	0 – 50
#40	0 – 30
#100	0 – 10
#200	0 – 4

B. In addition, the fraction passing the #40 sieve shall be nonplastic (NP) and shall have a liquid limit not greater than 30.

2.17 AGGREGATE FOR RIPRAP

A. Aggregate for riprap shall be hard, durable, crushed, quarried, or natural stone, or broken concrete having an apparent specific gravity of 2.4 or greater. The absorption shall not exceed 4 % unless otherwise approved by ENGINEER in the Special Provisions. The stone shall be free of weak laminations and cleavages, and shall be of a quality that will not disintegrate on exposure to water or weathering. The aggregate for the various types of riprap shall meet the following additional requirements:

1. Class l Riprap aggregate shall consist of two sizes of stone.

   a. Primary stones shall be not less than 3" thick and shall weigh not less than 50 pounds. At least 60 percent of the stones shall weigh more than 80 pounds each.

   b. Choke stones shall be fragments or spalls of the proper size to satisfactorily wedge between the primary stones as placed.

2. Class 2 Riprap aggregate shall be graded with a sufficient amount of smaller stones uniformly distributed throughout. At least 60 percent of the stones shall weigh more than 80 pounds each.

3. Grouted Riprap aggregate shall conform to the specifications for Class 1 or Class 2 Riprap. If not specified, Class 1 Riprap shall be used.

4. Wire Enclosed Riprap aggregate shall be round or angular stones. Not less than 95% of the stone shall be retained on a screen or wire having 2" square openings.

5. Sacked Concrete Riprap aggregate shall consist of either a sandy or gravelly pit-run material. This material shall be clean and free from roots, vegetable matter, or other deleterious substances. The aggregate shall meet the following gradation requirements:

Sieve Designation	% by Weight Passing
2"	80 – 100
#200	0 – 4

2.18 AGGREGATE FOR RIPRAP FILTER

A. Filter aggregates for riprap shall be hard, durable particles or fragments of crushed stone or natural gravel, screened or crushed to meet the following gradation requirements:

Sieve Designation	% by Weight Passing
3"	100
#4	20 – 50
#200	0 – 10

PART 3 EXECUTION

3.1 STOCKPILED AGGREGATE

A. This work shall consist of storing aggregate material which will be used in construction projects in accordance with these specifications at locations shown on the Drawings, noted in the Contract Documents, or as otherwise designated by ENGINEER.

B. The aggregates shall meet applicable parts of this section for the type of material required.

C. Sites for aggregate stockpiles shall be grubbed and cleaned prior to storing aggregates, and the site shall be firm and smooth and well drained. A bed of aggregate suitable to avoid the inclusion of soil or foreign material shall be maintained.

D. The stockpiles shall be built in layers not exceeding four feet in height, and each layer shall be completely in place before the next layer is started so as to prevent segregation. The material shall be deposited in such manner as to prevent coning, except in the case of fine aggregate composed of material approximately 90% finer than a #4 sieve.

E. Dumping, casting, or pushing over sides of stockpiles is prohibited except in the case of fine aggregate materials.

F. Stockpiles of different types or sizes of aggregates shall be spaced far enough apart or separated by suitable walls or partitions to prevent the mixing of the aggregates.

G. Any stockpiling of materials derived by wet pit or dredging operations, other than those stockpiles previously mentioned, are subject to prior approval of ENGINEER and must be specified and submitted in the CONTRACTOR's plan of operations.

H. When it is necessary to operate trucks or other equipment on the stockpile in the process of building that stockpile, it should be done in a manner approved by ENGINEER. Any method of stockpiling aggregate which allows the stockpile to become contaminated with foreign matter or causes excessive degradation of the aggregate will not be permitted. Excessive degradation will be determined by sieve tests of samples taken from any portion of the stockpile over which equipment has operated. Failure of such samples to meet all grading requirements for the aggregate shall be considered cause for discontinuance of such stockpiling procedures.

I. The aggregate shall be transferred from the stockpiles in such a way as to obtain a material having a uniform grading.

3.2 PROTECTION FOR AGGREGATE

A. The equipment and methods utilized in the production, storage, transportation and final placement of aggregate materials shall be such as to provide in-place materials meeting all requirements as specified.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. No separate measurement will be made for items under this section. Full compensation shall be considered as included in the prices paid for the various contract items and no additional compensation will be allowed therefore.

4.2 BASIS OF PAYMENT

A. No separate payment will be made for items under this section. Full compensation shall be considered as included in the prices paid for the various contract items and no additional compensation will be allowed therefore.

END OF SECTION

SECTION 02210

EXCAVATION AND EMBANKMENT

PART 1 GENERAL

1.1 SUMMARY

A. This work shall consist of excavation, disposal, or compaction of all materials not being removed under some other item, which is encountered within the limits of the work necessary for the construction of the roadway subgrade in accordance with the specifications and in conformity with the lines, grades, thicknesses, and typical cross sections shown in the plans. All excavation will be denoted as unclassified excavation as hereafter.

B. For the purpose of this specification, roadway subgrade is defined as the cross-sectional lines comprising the proposed bottom of aggregate base course.

PART 2 PRODUCTS

2.1 MUCK EXCAVATION

A. Muck excavation shall consist of the removal and disposal of saturated organic mixtures of soils or organic matter from within the roadway, which requires additional work or equipment which would not normally be required for unclassified excavation. When it is necessary that the muck excavation be stockpiled prior to final placement, classification of the material for the second handling shall be determined by the ENGINEER.

2.2 UNCLASSIFIED EXCAVATION

A. Unclassified excavation shall consist of the excavation and placement of all material encountered in the work, not classified under other items of the contract. Note that all excess excavated material not utilized on site shall be disposed of elsewhere.

PART 3 EXECUTION

3.1 CONSTRUCTION

A. All excavation and embankment work shall be constructed to the neat lines and elevations staked by the ENGINEER or shown on the plans. No materials shall be wasted without permission from the ENGINEER. All grading and related operations shall be conducted so that the terrain outside of the limits of slopes will not be disturbed. Prior to the commencement of grading operations, all necessary clearing and grubbing in the area shall have been performed in accordance with Section 02110, Stripping of Surface Cover and Removal/Replacement of Miscellaneous Features.

B. When embankments are to be placed on a hillside, or where new fill is to be placed against existing embankment, the slope of the original hillside, or old fill respectively, shall be benched or stepped by cutting into it horizontally, for a minimum distance of twelve (12”) to provide for secure bonding or the

embankment while it is being brought up in layers. Each bench shall be cut as close to the one below as the slope of the ground will permit. Material thus cut out of the benches shall be incorporated into the new fill at the CONTRACTOR's expense.

C. If it should become necessary, because of weather or other conditions, to suspend grading operations, the entire area worked upon shall be bladed until smooth, free of depressions and ruts, and crowned so that no water can collect or be impounded.

D. Embankment placed adjacent to structures shall be brought up in equal layers on all sides to prevent distortion of any of these parts. If is necessary to deposit embankment on only one side of abutments, wing walls, piers, or culvert headwalls, compaction shall be accomplished without causing overturning of or excessive pressure against the structure. Areas inaccessible to tamping rollers or power rollers shall be compacted by hand or mechanical tampers or other means until the density conforms to adjacent embankment, compacted in accordance with these specifications.

E. Embankment material shall be placed in uniform approximate horizontal layers not exceeding eight inches (8") (200 mm) in loose thickness, for the entire width of the embankment. Each layer of embankment shall be completed, leveled and compacted before the succeeding layer is placed.

F. Embankment which has been subjected to freezing shall be refinished to grade, cross-section and compaction requirements after the frost is out of the ground and the embankment is in suitable condition of work.

G. Excess material shall be removed from the site at Contractors expense.

H. If subgrade as determined in the field by the RPR to be inadequate for road construction, excavation below subgrade will be required to a depth as determined in the field.

3.2 MOISTURE AND DENSITY CONTROL

A. The CONTRACTOR shall provide watering and rolling as required to obtain the density of 90% of maximum dry density for all the embankment placed and no separate pay compensation shall be allowed for rolling and watering other than the earthwork bid item or items listed on the Proposal. In the case of embankment material with Plasticity Indexes greater than zero, as determined by ASTM D-424, the amount of water required for rolling shall be within plus two or minus four percentage points of optimum moisture content as determined by AASHTO T-180, Modified Proctor Density, Maximum densities will be determined by AASHTO T-180, Modified Proctor Density.

B. Within the areas indicated on the plans or as directed by the ENGINEER, earth shall be removed to the designated depth below subgrade, except for the lower six-inch (6") (150 mm) layer. This six-inch (6") (150 mm) layer shall be thoroughly scarified, the moisture content increased or reduced as necessary, and then compacted to not less than 85 percent of the maximum density. The

remainder of the area up to subgrade elevation shall be constructed of suitable material compacted to not less than 90 percent of maximum density.

3.3 FINE GRADING

A. After the earthwork has been substantially completed and after all underground utilities, manholes, catch basins, valve boxes, etc., have been installed or adjusted to grade, the subgrade shall be brought to the lines, grades, and cross-sections shown on the plans, and compacted to the required density.

B. All soft and unstable material and other portions of the subgrade which, in the opinion of the ENGINEER, cannot be compacted satisfactorily shall be removed to lines and grades as directed by the ENGINEER.

C. All boulders appearing in the earth excavation shall be removed or broken off to a depth of not less than four inches (4") (100 mm) below subgrade. All rock sections shall be brought to grade by depositing a satisfactory cushion material to a depth authorized by the ENGINEER.

D. If the surface of an old stone or gravel roadbed conforms approximately to the surface of the finished subgrade, such sections shall be scarified superficially for the full width of the subgrade to a depth sufficient to eliminate all depressions and to permit uniform reshaping and compaction.

E. At all times, ditches and drains along the subgrade shall be so maintained as to drain effectively. When ruts of two inches (2") (50 mm) or more in depth are formed, the subgrade shall be brought to grade and if necessary be reshaped and rerolled. In no case shall any surface coarse or pavement be placed on a frozen or muddy subgrade. The top six inches (6") (150 mm) of the subgrade shall have a minimum compacted density as specified for embankment.

F. In addition, the finish grade shall not deviate more than one-tenth foot (1/10') (2.5 mm**)** at any point from the staked elevation. Until the subgrade has been checked and approved, no surface coarse or pavement shall be laid thereon. Under the square yard method of measurement and payment the CONTRACTOR has the option of deviating from the above tolerances as long as the specified base coarse section and profile is maintained.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. Unclassified Excavation Above Subgrade will be measured by the number of cubic yards, measured in its original position, computed to the neat lines and grades shown on the plans.

B. Unclassified Excavation Below Subgrade will be measured in the field by calculating the number of yards removed as directed by the RPR below the indicated subgrade.

4.2 METHOD OF PAYMENT

A. Unclassified Excavation Above Subgrade shall be paid for at the contract unit price bid per cubic yard measured as excavated, which price and payment shall constitute full compensation for all labor, equipment, tools and incidentals necessary to complete the work.

B. Unclassified Excavation Below Subgrade shall be paid for by the cubic yards of material removed which price and payment shall constitute full compensation for all labor, equipment, tools, and incidentals necessary to complete the excavation and disposal of unstable material below indicated subgrade on the drawings. The cost of material and work to prepare subgrade will be paid for under Section 02231.

Note: For design and bidding purposes an assumed amount of unclassified excavation below subgrade will be used

END OF SECTION

SECTION 02215

EXPLORATORY EXCAVATION

PART 1 GENERAL

1.1 SUMMARY

A. This section consists of excavation, visual location, and subsequent backfill required in order to locate unknown or unanticipated utilities not shown or referred to on the drawings.

B. Also included is excavation and visual location of known but not previously exposed underground utilities specifically called out on the drawings.

PART 2 PRODUCTS – NOT USED

PART 3 EXECUTION

3.1 EXPLORATORY EXCAVATION

A. The CONTRACTOR shall supply the following:

1. A rubber-tired backhoe (minimum Case 580, or equivalent in good working condition), minimum 24-inch backhoe bucket and a skilled operator.

2. A laborer with appropriate hand tools (shovel, rod probe, and metal detector).

3. A Wacker-type hand compactor for compaction of backfill, if required.

4. Supplies adequate to mark or annotate the horizontal and vertical location of the utility when located.

5. A builder's level and rod in good condition adequate to establish the elevation of the utility from benchmarks provided, if necessary.

B. When exploratory excavation is authorized, the CONTRACTOR shall coordinate with the utility owner for the OWNER's presence during the work, if required.

C. The CONTRACTOR shall be solely responsible for executing exploratory excavation in a manner which does not damage any underground utility. Damage which does occur shall be repaired to the satisfaction of the utility owner at the CONTRACTOR's expense.

D. All exploratory excavation shall be requested by and/or authorized in advance by the Resident Project Representative.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. No quantity measurement will be made for exploratory excavation other than time required to complete each authorized excavation. Time will begin when all equipment and personnel are present at the site of the proposed excavation and will end when all work at the site is complete. No time will be allowed for mobilization and demobilization to and from the site.

4.2 BASIS OF PAYMENT

A. Exploratory Excavation will be paid at the contract unit price per hour as set forth in the Contract Bid Schedule; said payment being full compensation for all items included within this section.

END OF SECTION

SECTION 02216

TRENCH DEWATERING

PART 1 GENERAL

1.1 SUMMARY

A. This section covers trench alignment subsoil dewatering required during trench excavation and backfill operations in areas where groundwater is present above the proposed utility grade line. Note for this project it is assumed project dewatering will not be required.

PART 2 PRODUCTS – NOT USED

PART 3 EXECUTION

3.1 PERFORMANCE SPECIFICATIONS

A. The dewatering process shall lower the existing free groundwater elevation within the trench excavation to an elevation one foot below the planned invert of the utility pipe OR to the elevation of the bottom of pipe bedding when underlying unsaturated strata form the bottom of the trench. Additionally, dewatering shall lower the groundwater elevation in the trench vicinity sufficiently to provide slope stability of trench walls and allow for trench excavation within the limitations of existing easement widths, provide adequate protection for adjacent existing utilities, and minimize the required volume of excavated material to the greatest extent possible.

B. The dewatering process shall be continued as required during trench backfill operations so as not to introduce free groundwater into backfill lifts as they are placed.

C. Discharge of dewatering operations shall be directed to either the existing drainage washes or approved locations approved by the ENGINEER, in conformance with the Wyoming Department of Environmental Quality NPDES Program.

1. Contractor to Acquire State DEQ Permit for Temporary Discharge for Dewatering Operations.

a. The Contractor, as the prospective permit holder and operator, shall file with the State of Wyoming, Department of Environmental Quality, Water Quality Division, a Notice of Intent (NOI) on Department forms along with supplemental material, requesting coverage under the general permit for temporary discharge due to construction dewatering. The

Contractor shall be solely responsible for the temporary discharge. All discharges shall meet the effluent limitations and monitoring requirements established by the DEQ.

b. Upon completion of construction dewatering as required under this project, the Contractor shall file with WYDEQ, a termination notice certifying completion of this activity.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. No separate measurement will be made for items under this section. Full compensation shall be considered as included in the prices paid for the various contract items and no additional compensation will be allowed therefore.

4.2 BASIS OF PAYMENT

A. No separate payment will be made for items under this section. Full compensation shall be considered as included in the prices paid for the various contract items and no additional compensation will be allowed therefore.

END OF SECTION

SECTION 02220

TRENCH EXCAVATION

PART 1 GENERAL

1.1 SUMMARY

A. This section consists of excavation and trenching for all sewer, water, and storm sewer main and service piping, and all related appurtenances, as well as handling and storage of materials and preparation of subgrade. Note that trench-excavated material under this contract is unclassified in nature and includes any and all materials encountered, regardless of their consistency or the manner in which they are removed.

B. In no case shall surface disturbance caused by the effects of trench excavation occur outside of easement, right-of-way or limits of trench disturbance as shown or referenced on the drawings.

PART 2 PRODUCTS – NOT USED

PART 3 EXECUTION

3.1 CONSTRUCTION

A. During excavation, materials suitable for backfilling shall be piled in an orderly manner a sufficient distance from the banks of the trench to avoid overloading and to prevent slides or cave-ins. All existing surface features and structures outside of the limits of trench disturbance including but not limited to utility structures, fences, paving, curb, gutter and sidewalk, etc. shall be retained and protected from the excavation stockpile and from the methods used in replacement of the material in the trench under the backfilling process.

B. All excavated materials not required or suitable for backfill shall be removed from the site and disposed of in a manner and/or by methods acceptable to jurisdictional government agencies.

C. Grading shall be done as may be necessary to prevent surface water from flowing into excavations, and any other water accumulating therein shall be promptly removed. Under no circumstances shall water be permitted to rise in unbackfilled trenches until after the pipe has been placed, tested and covered with backfill. Any pipe having its alignment or grade changed as a result of a flooded trench shall be relayed at no additional cost to the Owner.

D. Adequate provisions shall be made for maintaining the flow of sewers, drains and water courses encountered during construction. Culverts, ditches, fences,

crosswalks and structures which are disturbed by this construction shall be satisfactorily restored to their original condition upon completion of the work.

3.2 SITE CONDITIONS

A. CONTRACTOR'S SAFETY RESPONSIBILITIES

1. Whether utilizing Type 1 or Type 2 trench excavation, the CONTRACTOR shall be responsible for enforcing safety and maintaining safe working conditions in all trenching and shoring operations to conform to OSHA regulations.

2. The CONTRACTOR shall employ qualified, properly trained personnel to design shoring, perform safety inspections of the trenches, and supervise the handling of all operations involving safety procedures, as prescribed by OSHA.

3.3 TRAFFIC CONTROL AND WARNING DEVICES

A. The CONTRACTOR shall plan and construct the project in such a manner as to minimize the interruption of the use of roads, highways, streets and sidewalks involved and shall provide for emergency access to adjacent property and fire hydrant access at all times. See Section 01570, Temporary Traffic Control.

B. THE CONTRACTOR is responsible for providing and maintaining adequate barricades of high visibility design, flares, lanterns, signs, flaggers and prewarning devices to alert the public, motorists and pedestrians of hazardous conditions in accordance with the latest edition of the Manual on Uniform Traffic Control Devices for Streets and Highways published by the U.S. Department of Transportation.

3.4 STRUCTURES

A. The CONTRACTOR shall exercise every precaution to prevent damage to existing buildings, fences, or other private structures in the vicinity of his work. In the event of such damages, he shall replace or repair them to the satisfaction of the owner of the damaged structure and at no cost to the OWNER.

3.5 OVERHEAD UTILITIES

A. The CONTRACTOR shall use extreme caution to avoid a conflict, contact or damage to overhead utilities, such as power lines, street lights, telephone lines, television lines, poles or other appurtenances during the course of construction of this Project.

B. Numerous areas exist onsite where existing aboveground utility poles, pedestals, or other features are in close proximity to proposed underground pipeline alignments or structures in either a crossing or parallel scenario. Unless the

plans indicate otherwise, the CONTRACTOR is expected to retain and protect said utility lines in their existing position during execution of the work. Protection includes engaging the services of the structure owner, if appropriate, to temporarily support the structure while excavation and subsequent adjacent construction is being completed. The CONTRACTOR shall, however, have the option, with consent of the utility Owner, to temporarily or permanently relocate the aboveground utility at his sole expense. Onsite relocation costs, supervisory costs, inspection costs, or costs of providing temporary support to aboveground structures, if any, charged by utility companies while work is progressing adjacent to their facilities shall be the responsibility of the CONTRACTOR.

3.6 SURVEY MARKERS AND MONUMENTS

A. The CONTRACTOR shall use every care and precaution to protect and not disturb any survey marker or monuments, such as those that might be located at lot or block corners, property pins, intersection of street monuments, or additional line demarcation. Such protection shall include marking with flagged high lath and close supervision. Survey markers or monuments which must be removed or destroyed in order to install project components shall be referenced prior to disturbance, and replaced in their exact pre-existing position by the CONTRACTOR'S surveying subcontractor. Any survey marker or monument that is disturbed or destroyed by the CONTRACTOR during the construction of this Project shall be replaced at no cost to the Owner by a licensed land surveyor employed by the CONTRACTOR.

3.7 TYPE 1 TRENCH EXCAVATION

A. Excavation performed as Type 1 will not be shored or sheathed. The sides of all trenches shall be sloped back to preclude collapse in accordance with OSHA Regulations (29 CFR PART 1926.650 through 1926.652) SUBPART P.

3.8 TYPE 2 TRENCH EXCAVATION

A. Excavation performed as Type 2 shall be adequately shored and sheathed in accordance with the minimum requirements of OSHA Regulations (29 CFR PART 1926.650 through 1926.652) SUBPART P.

B. Portable trench boxes or sliding trench shields may be used for performing Type 2 excavation in lieu of a shoring system provided they are designed, constructed, and maintained in a manner which will provide protection equal to or greater than the sheathing or shoring required for the trench.

3.9 CHOICE OF TRENCH EXCAVATION TYPES

A. At all locations in the project Type 2 Trench Excavation shall be required. For Type 2 Trench Excavation, a full height trench box shall be provided.

3.10 PREPARATION

A. PROTECTION OF EXISTING PROPERTIES

1. Prior to beginning construction, the CONTRACTOR must fulfill and meet the requirements of Wyoming Statutes 37-12-301 through 37-12-304 relating to public utilities; providing definitions; providing that notice of intended excavation be given to public utilities with underground facilities located in the area of proposed excavation; and providing for exceptions. See attached copy of Title 37, Public Utilities. Within the limitations of the statute, the CONTRACTOR shall be responsible for damage done by him to any underground utility.

   Underground utility locations indicated on the drawings are provided from information supplied by the various utility companies and are intended to reflect the general location of underground facilities. No warranty of accuracy of the provided information is implied.

3.11 UNDERGROUND UTILITIES

A. Numerous areas exist on the drawings where existing live underground utility lines are in close proximity to proposed underground pipeline alignments in either a crossing or parallel scenario. Unless the plans or specifications indicate otherwise, the CONTRACTOR is expected to retain and protect said utility lines in their existing position during execution of the work. Retain and protect means that the Contractor shall be responsible for maintaining the integrity and safety of the utility lines during construction as specified by the utility owner. The CONTRACTOR shall, however, have the option, with consent of the utility Owner, to temporarily or permanently relocate the underground utility at his sole expense. On-site relocation, supervisory, or inspection costs, if any, charged by utility companies while work is progressing adjacent to their lines shall be the responsibility of the CONTRACTOR.

3.12 SHORING, SHEETING AND BRACING

A. The CONTRACTOR shall do all shoring, bracing and tight sheeting required to prevent caving and to protect his workmen, in accordance with Occupational Safety and Health Regulation Requirements, and to protect adjacent property and structures.

3.13 GENERAL EXCAVATION OPERATIONS

A. The CONTRACTOR shall excavate as necessary at the locations shown on the drawings, staked in the field or otherwise specified for the installation of pipelines. Excavations shall be made at each location by one of the two methods specified herein—either Type 1 or as Type 2 trench excavation.

B. Whether trench excavation is by Type 1 or Type 2, the CONTRACTOR shall take precautions and protect all adjoining private and public property and facilities, including underground and overhead utilities, curbs, sidewalks, driveways, structures, and fences. Any disturbed or damaged facilities will be suitably restored or replaced at no cost to the Owner.

3.14 TRENCH DIMENSIONS

A. Trench dimensions for sewer, water, and storm sewer mains shall be as specified below:

1. Trench width from the trench bottom to a point six inches above the top of the pipe shall be no less than the outside diameter of the pipe plus twe;ve (12) inches to allow proper compactive effort along both sides of the pipe. If multiple pipes are to be installed in the same trench, the six inch vertical requirement shall be above the largest pipe, and a minimum of nine (9) inches shall be provided from the outside of each pipe to the trench wall.

a. Depth of the excavated trench shall be 6" below the proposed pipe(s) bottom if insitu soil material encountered at the pipe bottom grade does not meet the Specifications for Type 1 Pipe Bedding material in Section 02225 Trench Backfill. If the insitu material does meet the Type 1 Pipe Bedding Specification, the depth of the excavated trench shall be to the proposed pipe bottom.

b. When soft or unstable material or rock is encountered at the subgrade, which will not uniformly support the pipe(s), such material shall be excavated to an additional depth as directed by the ENGINEER and backfilled with Type 2 Bedding Material as described in Section 02225 Trench Backfill.

B. TRENCH BOTTOM

a. For sewer and storm sewer, the bottom of the trenches shall be accurately graded to the required line and grade. Bedding material shall provide uniform bearing and support for each section of the pipe at every point along its entire length. Bell holes and depressions for joints shall be dug after the trench bedding has been graded, and shall be only of such length, depth and width as required for properly making the particular type joint. Unauthorized overdepths shall be backfilled with bedding material at the CONTRACTOR's expense.

3.15 TIME OF OPEN TRENCHES

A. The CONTRACTOR will be required to conduct his work so that trenches will remain open a minimum possible time so as to reduce, to the greatest extent possible, any limitation on residential access throughout the project.

B. No trench excavating shall begin until approved compaction equipment is at the site where the excavating is to take place. All backfill and compacting shall be completed in all trenching and structural excavations within a maximum distance of 50 feet behind the end of newly installed pipe and the maximum distance between the newly installed pipe and the excavator shall be 50 feet. For each work group consisting of trench excavator, a pipelaying crew, and a backfilling and compacting crew, the maximum allowable open ditch at any time will be 100 feet. Excavations may only be left open overnight if backfilling operations in the area are to resume on the next consecutive day. No excavation shall be left open over a weekend or holiday.

C. Certain conditions, regarding issues of public safety, property protection, or emergency access onto or through public streets or access to private property may necessitate the backfilling of certain sections of trench prior to daily shutdown.

3.16 EQUIPMENT

A. The use of trench digging machinery will be permitted except in places where its operation will cause damage to existing structures or features, in which case hand methods shall be employed.

B. Any equipment on tracks, which is to be used on pavement, shall be equipped with suitable pads to prevent damage to the pavement. All pavement damaged during construction by the CONTRACTOR's equipment shall be restored to its original condition by the CONTRACTOR. No compensation will be allowed for pavement replacement other than as specified elsewhere.

3.17 SITE ACCESS AND EGRESS

A. The Contractor shall be solely responsible for providing access and egress to all areas of trench alignments in order to carry on trench excavation as required.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. No separate measurement will be made for Trench Excavation.

4.2 BASIS OF PAYMENT

A. No separate payment will be made for Trench Excavation. Full compensation for performing Type 2 Trench Excavation including around appurtenances and connections according to the provisions stated herein, and all other work necessary or incidental for completion of this item will be considered as included in the prices paid for supply and installation of sewer mains and services, and no additional compensation will be allowed therefore.

(COPY)

ARTICLE 3. DAMAGE TO UNDERGROUND PUBLIC UTILITY FACILITIES

37-12-301 Definitions

A. As used in this act:

1. "Business day" means any day other than Saturday, Sunday or legal holiday;
2. "Excavation" means any operation in which earth, rock or other material on or below the ground is moved or otherwise displaced by means of power tools, power equipment or explosives, and includes grading, trenching, digging, ditching, drilling, auguring, tunneling, scraping and cable or pipe blowing and driving, except tilling of soil and gardening or agricultural purposes;
3. "Person" means an individual, partnership, municipality, state, county, political subdivision, utility, joint venture or corporation, and includes the employer of an individual; and
4. "Underground facility" means any item of personal property buried or placed below ground for use in connection with the storage or conveyance of water, sewage, electronic, telephonic or telegraphic communications, electric energy, oil, gas or other substances and including but not limited to pipes, sewers, conduits, cables, valves, lines, wires, manholes, attachments and those parts of poles below ground;
5. "This act" means W.S. 37-12-301 through 37-12-304. (Laws 1978, ch. 46, para. 1.)

37-12-302 Public utilities to file names and addresses of Owners of underground facilities with county clerk; notice of excavation by excavator; public utilities to supply information upon notice; exceptions.

A. Every person having the right to bury underground facilities shall file with the county clerk in each county where underground facilities are located a general description of the area served together with the name, address and telephone number of the person in that county from whom necessary information may be obtained concerning the location of underground facilities within that county.

In counties where an association pursuant to W.S. 37-12-304 is established, the name, address and telephone number of the association shall be filed with the county clerk on behalf of all participating members.

2. Architects, engineers, or other persons designing or requiring excavation shall obtain information from persons with underground facilities, as to the nature and location of underground facilities and then make such information and location a part of the plan by which the contractors operate.

3. Except as hereafter provided, no person shall make or begin excavation without first notifying any person having underground facilities in the area of the proposed excavation except an employee with respect to his employer's facility. Notice shall be given by telephone or in person. If an association exists within the county pursuant to W.S. 37-12-304, notice to the association is notice to each member thereof in the county.

D. A person shall, upon receipt of the notice provided for in subsection © of this section, advise the excavator of the location and size of underground facilities in the proposed excavation area by marking the location of the facilities with stakes, paint or by other clearly identifiable marking within eighteen (18) inches horizontally from the exterior sides of the underground facilities, and the depth of the underground facility, if known. The person providing information shall respond no later than two (2) full business days after receipt of the notice.

E. Emergency excavations are exempt from the provisions of subsections © and (d) of this section.

F. If information requested pursuant to subsections © and (d) of this section is not provided within the time specified therein, or if the information provided fails to identify the location of the underground facilities in accordance with subsection (d) of this section, then any person damaging or injuring underground facilities shall not be liable for such damage or injury except on proof of negligence.

G. Compliance with this section does not excuse a person from acting in a careful and prudent manner, nor does compliance with this section excuse a person from liability for damage or injury for failure to so act. (Laws 1978, ch. 46, para. 1.)

37-12-303 Notice to public utilities of damages to underground facilities.

A person who, in the course of excavation, contacts or damages an underground facility shall immediately notify the person owning the facility. (Laws 1978, ch. 46, para. 1.)

37-12-304 Association of public utilities; formation; duties.

A. Two (2) or more public utilities, municipalities or other persons having underground facilities may form an association providing for mutual receipt of notification of excavation activities in a specified area. In areas where an association is formed, public utilities, municipalities or other persons with underground facilities in the area shall become members of the association, receive the service furnished by the association and pay their share of the cost for the service provided.

B. The association shall:

1. File with the county clerk a description of the geographical area served by the association;
2. List the name, address and telephone number of every member and submit the list to the county clerk; and
3. Maintain adequate records documenting compliance with the requirements of this act. (Laws 1978, ch. 46, para. 1.)

Effective date - Section 2, ch. 46, Laws 1978, makes the act effective May 27, 1978.

END OF SECTION

SECTION 02225

TRENCH BACKFILL

PART 1 GENERAL

1.1 SUMMARY

A. This section consists of handling, storage, and placement of materials to be used for backfill of sewer mains, sewer services, water mains, water services, and all related appurtenances.

1.2 SUBMITTALS

A. Submit lab-performed gradation analysis, determination of Atterberg Limits, and moisture-density relationship curve utilizing ASTM D698 (Standard Proctor) for initially proposed Imported Type 1 bedding. Note that as the project progresses, if delivered material changes in consistency, an additional submittal(s) will be required.

B. Submit lab-performed gradation analysis for proposed Imported Type 2 bedding.

PART 2 PRODUCTS

2.1 MATERIALS

A. TYPE 1 PIPE BEDDING MATERIAL

1. Type 1 Pipe Bedding material around the pipe or pipes from six (6) inches under the pipe to twelve (12) inches over the pipe shall consist of select coarse-grained soils with a maximum particle size of ¾". Type 1 Pipe Bedding shall meet Unified Soil Classifications GW, GW-GM, GP, or GP-GM, or as specifically approved by the ENGINEER. Bedding material shall be free from clods or frozen material, and when installed shall be within ±2% of optimum moisture content as determined by ASTM D698.

2. Three methods are available for providing Type 1 pipe bedding material:

a. The CONTRACTOR shall <u>procure suitable native pipe bedding material</u> which meets the required specification, if available, from trench cuttings at the trench location where bedding operations are being conducted, or

b. The CONTRACTOR shall procure suitable native pipe bedding material which meets the required specification, if available, by manually sorting and redistributing material available from other areas of open trench elsewhere throughout the project alignment, or,

c. The CONTRACTOR shall supply Imported Type 1 Pipe Bedding material meeting the above specification from a source of his choice.

Note that "procurement" of suitable Type 1 bedding material as defined in Section 2a. b, and c. above is considered subsidiary to pipe installation, and no additional payment will be made therefore.

B. IMPORTED TYPE 2 PIPE BEDDING MATERIAL

Type 2 Pipe Bedding Material required for foundation in over-excavated trenches shall consist of the bedding material from six (6) inches under the pipe(s) and down. The bedding material shall consist of 4"-1½" screened gravel.

C. FINAL TRENCH BACKFILL ABOVE THE PIPE EMBEDMENT ZONE

1. Native trench cuttings free of organic debris, frozen chunks, and stones in excess of eight (8) inches in their greatest dimension may be utilized for Final Trench Backfill, except that no stone larger than 3" shall be placed within two feet of the utility line.

D. CEMENT TREATED FILL (FloFill)

Cement-treated fill, when required, shall meet the following criteria:

INGREDIENTS	LBS/CY
Cement (0.45 sack)	42
Water (39 gallons)	325 (or as needed)
Coarse Aggregate (Size No. 57)	1700
Sand (ASTM C-33)	1845

The maximum 28-day strength is 60 psi.

PART 3 EXECUTION

3.1 CONSTRUCTION

A. COMMON AND SELECT BACKFILL

1. All trenches shall be backfilled immediately after grade, alignment and jointing of the pipe has been inspected and approved by the ENGINEER. Leakage tests, pressure tests or tests for alignment and grade shall be performed after backfill. If any test fails, the CONTRACTOR shall be responsible for work required to correct the defects at no additional cost to the OWNER.

2. After the select pipe bedding/initial backfill material has been placed and compacted as specified, Final Trench Backfill shall be installed, including around appurtenances. All backfill material shall be free from cinders, ashes, refuse, organic and frozen material, boulders, or other materials that are unsuitable. From the top of the pipe bedding/initial backfill material to the subgrade elevation for streets or paved surfaces, or finish elevations elsewhere, material containing stones up to eight (8") inches in the greatest dimension may be used, except that no stone larger than 3" shall be placed within two feet of the utility line.

B. TYPE A TRENCH BACKFILL

1. Materials used for Type A Trench Backfill, including around appurtenances, shall be carefully deposited in compacted lifts not to exceed eight (8) inches in thickness, wetted and uniformly mixed to 2% below to 2% above optimum moisture content, and mechanically-compacted to at least 95% of maximum density as determined by ASTM D698 (Standard Proctor).

2. In order to verify adequate trench backfill compaction, tests will be run at no greater than 100-foot intervals at varying locations throughout the trench cross section. Tests may be taken at the surface of an intermediate backfill lift or at an elevation below the backfill surface. In the latter case, the Contractor shall provide excavation and backfill equipment to provide access to testing personnel at the trench depth desired. Should any compaction test fail, all deficiencies shall be corrected by the Contractor at his expense.

3. Maximum density of material containing more than 30% oversize (greater than ¾" diameter) cannot be determined by use of the ASTM Designation D 698. In this case, a field maximum density may be determined by a test strip method. The material shall be compacted at or near optimum moisture content and a field density test shall be taken after each pass of the compaction equipment. This sequence shall continue until the maximum field density is achieved. This maximum field density shall be used for subsequent field compaction

tests. Enough density tests should be taken to monitor proper compaction.

4. In addition to density testing of compacted material, trench sections shall be proof rolled with heavy equipment (loader or haul truck) supplied by the Contractor at the request of the RPR.

C. FINAL CLEANUP

1. Following trench backfill, the entire trench alignment, upon completion of backfill operations, shall be machine graded to a surface contour condition similar to pre-existing. Excess materials not utilized during backfill operations shall be removed from the site.

3.2 INSTALLATION OF TYPE 1 BEDDING MATERIAL

A. If in-situ trench material encountered at the proposed bottom of pipe(s) does not meet the specifications for Type 1 Pipe Bedding Material, the nonconforming material shall be excavated to 6" below the proposed pipe bottom as indicated under Section 02220, Trench Excavation. Procured or Imported Type 1 Bedding Material shall be moisture conditioned, installed in the trench bottom, leveled and consolidated to a finish six-inch thickness with multiple passes of a vibratory plate compactor prior to pipe installation within the trench.

B. If the in-situ trench material encountered at the proposed bottom of pipe(s) does meet the specification for Type 1 Pipe Bedding Material, excavation will only be required to the proposed pipe bottom.

C. Whether the pipe(s) is to be installed over in-situ, procured, or imported bedding material, the interface between the pipe bottom and the bedding material shall be constructed to provide uniform and stable support for the full length of the pipe. Excavation for each bell shall be provided at each bell location.

D. Remaining bedding material shall be moisture conditioned, installed, leveled, and consolidated in maximum 6-inch lifts to a finish elevation of twelve (12") inches above the highest pipe crown by use of a mechanical compactor capable of assuring complete and uniform soil support around the pipe haunches without resulting damage to the pipe. The CONTRACTOR will be required to partially re-excavate installed bedding by pothole excavation on a periodic basis to demonstrate that soil support around the pipe haunches is being provided.

E. Variations from this process will be required when field investigations indicate that uniform support under the pipe haunches is not being provided.

3.3 INSTALLATION OF TYPE 2 PIPE BEDDING FOUNDATION MATERIAL

A. In areas designated by the RPR or Owner, material shall be deposited in the over-excavated trench bottom in maximum 12-inch lifts and mechanically consolidated to provide a firm pipe foundation.

3.4 INSTALLATION OF CEMENT TREATED FILL

A. Cement treated fill shall be installed in locations as shown on the drawings or as dictated by the RPR. Refer to detail sheets for typical trench sections for utility crossings.

3.5 TESTING

A. Field density testing of Type A Trench Backfill above the pipe(s), and pipe bedding material where required, will be run at all levels. These tests will be performed by the RPR. The CONTRACTOR shall provide necessary equipment to dig test holes. The CONTRACTOR shall be responsible for correction of any areas failing compaction tests, and the expense of such correction shall be borne by the CONTRACTOR.

3.6 TRENCH GUARANTEE

A. In areas where Type A Trench Backfill is required, the CONTRACTOR shall, for a period of two (2) years after completion and final acceptance of the work, repair any trench settlement which may occur and shall make suitable repairs to any pavement, sidewalks or other structures which may become damaged as a result of backfill settlement.

B. If the CONTRACTOR elects to perform such repairs by subcontract with others, he shall furnish the OWNER and the ENGINEER a copy of such subcontract or authorization as evidence of his faithful intention to perform the work.

3.7 WORK AREA CLEANUP

A. Upon completion of trench backfill operations in areas outside of streets, the entire disturbed area along the alignment shall be machine contoured. Final contouring of work areas shall be in general conformance to pre-existing grades and elevations, free of abrupt elevation or grade changes and performed to the satisfaction of the RPR.

3.8 SITE ACCESS AND EGRESS

A. The Contractor shall be solely responsible for providing access and egress for material delivery to all areas of the trench alignment in order to carry on trench backfill operations, as required.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. No separate measurement will be made for Trench Backfill except as follows:

1. Supply and installation of cement treated fill or "Flo-Fill" within the trench envelope shall be measured in cubic yards of fill material in final position.

2. Supply and Installation of Type 2 Pipe Bedding as replacement foundation material shall be measured in cubic yards installed in final position.

4.2 BASIS OF PAYMENT

A. Other than for items discussed below, no separate payment will be made for trench backfill around any utility pipe including related appurtenances. The cost of procurement or importing of Type 1 bedding material around sewer mains and services and the installation of Type A Final Trench Backfill, will be considered as included in the prices paid for Sewer Services and Services Mains and Services (Section 02700) and no addition compensation will be allowed therefore.

1. Payment for supply and installation of cement treated fill will be made at the contract unit price per cubic yard, which bid price shall include the additional cost of excavation and supply and installation of the fill material.

2. Payment for Supply and Installation of Type 2 Pipe Bedding will be made at the contract unit price per cubic yard, said payment being full compensation for supply and installation, as described herein, including additional excavation and dewatering at the trench bottom, and offsite material disposal.

END OF SECTION

SECTION 02231

AGGREGATE BASECOURSE

PART 1 GENERAL

1.1 SUMMARY

A. This work shall consist of furnishing and placing one or more courses of Aggregate Subbase and Base Course on prepared roadway subgrade in accordance with these specifications and in reasonably close conformity with the lines and grades as shown on the plans or established by ENGINEER. This work shall also include furnishing and placing Subbase Course where excavation below subgrade is required.

B. For the purposes of this specification, Aggregate Base Course if divided into two categories:

1. Imported Aggregate Base Course – utilized in the final street structural section directly beneath the proposed asphalt paving, curbs, sidewalks, brick pavers, and valley gutters.

2. Reclaimed Aggregate Base Course – material milled, stripped and stockpiled from the project work site under Section 02110. Reclaimed Aggregate Base Course will be utilized as in the final street structural section directly beneath the proposed asphalt paving, curbs, brick pavers, valley gutters, and sidewalks.

1.2 RELATED SECTIONS

A. Section 02110 – Stripping and Replacement of Surface Cover and Removal and Replacement of Miscellaneous Features

B. Section 02190 - Aggregates.

C. Section 02210 – Excavation and Embankment

D. Section 02225 - Trenching and Backfill.

1.3 REFERENCES

A. ASTM D698 - Test Methods for Moisture-Density Relations of Soils and Soil-Aggregate Mixtures Using 5.5 lb (2.27 Kg) Rammer and 12 inch (305 mm) Drop.

B. ASTM D1556 - Test Method for Density of Soil and Soil Aggregates In-Place by Sand Cone Method.

C. ASTM D2922 - Test Methods for Density of Soil and Soil-Aggregate in Place by Nuclear Methods (Shallow Depth).

D. ASTM D3017 - Test Methods for Moisture Content of Soil and Soil-Aggregate Mixtures.

PART 2 PRODUCTS

2.1 MATERIALS

A. The Subbase aggregate must mee the requirements of Section 02190, Aggregates.

B. Aggregate base course shall conform to Fill Type Grading H or W: As specified in Section 02190.

PART 3 EXECUTION

3.1 EXAMINATION

A. Verify substrate has been inspected, gradients and elevations are correct, and is dry.

3.2 PREPARATION

A. Correct irregularities in substrate gradient and elevation by scarifying, reshaping, and re-compacting.

B. Do not place fill on soft, muddy, or frozen surfaces.

3.3 RECLAIMED AND IMPORTED AGGREGATE BASE COURSE FOR USE IN THE FINAL STREET SECTION

A. After material for each layer of the course has been placed, the materials shall be processed while in the range of plus 2% or minus 4% of optimum moisture content, by means of motor graders or other approved equipment until the mixture is uniform throughout. In the case of Reclaimed Aggregate Base Course, chunks of material in excess of 2 inches shall be rebroken to a 1-inch size by machine methods; remaining unbroken chunks shall be manually removed.

3.4 AGGREGATE PLACEMENT

A. Spread aggregate over prepared substrate to a total compacted thickness as called for on the plans.

B. Place aggregate in maximum eight-inch layers and roller compact to specified density.

C. Level and contour surfaces to elevations and gradients indicated.

D. Add water to assist compaction. If excess water is apparent, remove aggregate and aerate to reduce moisture content.

E. Use mechanical tamping equipment in areas inaccessible to compaction equipment.

F. Prior to installation of Aggregate Base Course, the existing gravel road surface shall be graded to allow a leveling course of base material to be installed over the surface to allow for a smooth base course prior to paving.

3.5 TOLERANCES

A. Flatness: Maximum variation of 1/4 inch measured with 10 foot (3 m) straight edge.

B. Scheduled Compacted Thickness: Within 1/4 inch.

C. Variation From Design Elevation: Within 3/8 inch (9 mm).

3.6 FIELD QUALITY CONTROL

A. Compaction testing will be performed in accordance with ASTM D-698 and AASHTO T99 using methods prescribed by ASTM D1556 or ASTSM D2922.

B. If tests indicate Work does not meet specified requirements, remove Work, replace, and retest.

C. Frequency of Tests: One test every 500 sq.ft./layer.

3.7 SCHEDULES

A. Under Asphalt Pavement:

1. Compact placed aggregate materials to achieve dry density compaction of 95 percent as determined by ASTM D-698 Standard Proctor test.

B. Under Concrete Pavement:

1. Compact placed aggregate materials to achieve dry density compaction of 95 percent as determined by ASTM D-698.

C. Aggregate Base Course as Finish Surface:

1. Compact placed aggregate materials to achieve dry density compaction of 95 percent as determined by ASTM D-698.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. Supply and Installation of Aggregate Subbase Course will be measured by the ton. Natural moisture and water added to the material prior to the material being weighed will be measured as the material and not be deducted from the weight measurement.

B. Supply and Installation of Imported Aggregate Base Course will be measured by ton. Natural moisture and water added to the material prior to the material being weighed will be measured as the material and not be deducted from the weight measurement.

C. Reclaimed Aggregate Base Course for use within the final street section will be measured by the cubic yard in its final compacted position.

4.2 BASIS OF PAYMENT

A. Payment for Supply and Installation of Aggregate Subbase Course will be made at the contract unit price per ton; said payment being full compensation for shaping and compaction of any excavation below subgrade supply, transportation, watering, mixing, shaping, and compaction of the material as well as all associated work as described herein.

B. Payment for Supply and Installation of Imported Aggregate Base Course will be made at the contract unit price per ton; said payment being full compensation for shaping and compaction of subgrade, supply, transportation, watering, mixing, shaping, any grading work on the existing road surface, and compaction of the material as well as all associated work as described herein.

C. Payment for Reclaimed Aggregate Base Course for use Within the Final Street Section will be made at the contract unit price per cubic yard; said payment being full compensation for shaping and compaction of subgrade, supply, transportation, watering, mixing, shaping, and compaction of the gravel base/surfacing material as well as all associated work as described herein

END OF SECTION

SECTION 02280

IMPORTED TOPSOIL

PART 1 GENERAL

1.1 SUMMARY

A. This section covers the procurement and installation of imported topsoil obtained from a borrow source and placed directly in its final location. Imported topsoil shall only be used at the direction of the RPR and Owner.

B. All topsoil excavated on site shall remain and be replaced as Final Surface Cover per specification 02110 Stripping and Replacement of Surface Cover and Removal.

PART 2 PRODUCTS

2.1 IMPORTED TOPSOIL

A. Topsoil shall consist of any soil suitable for the growth of grass or other cover crops reasonably free from hard dirt, clay, rocks, or other materials, or other materials which would inhibit the germination of seeds or the growth of the cover crop. Classification of soils suitable for topsoil will be at the discretion of the ENGINEER.

PART 3 EXECUTION

3.1 PREPARATION OF AREAS

A. The embankment or cut slope areas to be covered with imported topsoil shall be completed to the designated lines and grades. Areas that have become crusted or hardpacked shall be scarified to a depth of approximately three inches, prior to placement of topsoil.

3.2 PLACING IMPORTED TOPSOIL

A. No imported topsoil shall be placed without the approval of the RPR.

B. Imported topsoil shall be placed in a uniform manner to a depth of 4-inches.

C. After topsoil has been spread, large stiff clods, stones, or other foreign material that would seriously affect the effectiveness or appearance of the topsoil, shall be raked up and removed from the area. Topsoil shall be keyed to the underlying material by scarifying.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. Imported Topsoil will be measured by the Ton. Natural moisture and water added to the material prior to the material being weighed will be measured as the material and will not be deducted from the weight measurement

4.2 BASIS OF PAYMENT

A. Payment for supply and installation of Imported Topsoil will be made at the contract unit price per ton; said payment being full compensation for shaping and compaction, supply, transportation, mixing, removal of all rocks, grading, and all associated work as described herein.

END OF SECTION

SECTION 02290

WATERING

PART 1 GENERAL

1.1 SUMMARY

A. This item shall consist of furnishing and applying water required in the compaction of embankments, subgrades, base courses and surface course, or for the control of dust for the safety and convenience of the public, for the reduction of the dust nuisance with adjacent property, or for other purpose as directed by the ENGINEER, in accordance with the requirements of these specifications.

PART 2 MATERIALS

2.1 WATER SOURCE

A. Water required for compaction of embankments, subgrade and gravel courses may be obtained from the South Park Service Center ISD, or from other sources as designated or approved by the ENGINEER. CONTRACTOR'S operations and use shall conform to the requirements of any water use agreements and all Federal, State, and local government regulations. CONTRACTOR shall provide all pumps, piping, and equipment required to utilize the water.

PART 3 EXECUTION

3.1 WATER ADDED

A. Deficiencies in moisture content of embankment materials, aggregate sub-base, base, or surfacing courses shall be corrected by the addition of water by approved water distribution equipment. Water for dust control, finishing operations, and seeding shall be applied by approved distributor equipment.

1. Grading Operations. Prewetting does not guarantee that additional water will not be required. Water added to embankment material during grading operations shall be distributed in a manner that will avoid ponding or overwetting materials for the full width of each layer of material placed.

2. Aggregate Courses. Water added to aggregate courses shall be applied to the material immediately prior to mixing and placing the material.

3. Finishing Operations. Water added during finishing operations shall be uniformly applied in a fine spray across the full width of the course by means of controllable pressures and spray bars or nozzles.

4. Seeding. Water added to seeded areas shall be applied in a spray that will not wash or erode the seeded area.

5. Dust Control. Water ordered for dust control measures for the protection and safety of traffic, for abatement of air pollution, or for other purposes, shall be applied in a manner that will best accomplish the elimination of dust.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

No separate measurement or payment will be made for items under this section. Full compensation shall be considered as included in the prices paid for the various contract items and no additional compensation will be allowed therefore.

END OF SECTION

SECTION 02512

PLANT MIX BITUMINOUS PAVEMENTS

PART 1 GENERAL

1.1 SUMMARY

A. This work shall consist of one or more courses of bituminous mixture constructed on the prepared foundation in accordance with these specifications and the specific requirements of the type under contract, and in reasonably close conformity with the lines, grades, thickness and typical cross sections shown on the plans or established by ENGINEER.

1.2 SUBMITTALS

A. CONTRACTOR shall submit for ENGINEER's approval an asphalt paving hot mix design proposed for the project. The mix design shall be completed under the Marshall Method. The mix design shall include the following:

1. Graphs of unit weight, % air voids, Marshall stability, % VMA and flow as a percentage of asphalt content.

2. Recommended optimum asphalt content and a tabulation of all Marshall Design properties at the recommended asphalt content.

3. Type and grade of bituminous material.

4. Recommended mixing and compaction temperature ranges.

5. Aggregate gradation.

PART 2 PRODUCTS

2.1 MATERIALS

A. BITUMINOUS MATERIALS

1. The percentage of bituminous material to be added to the job-mix formula will be designated by ENGINEER.

2. The type and grade of bituminous material shall be PG58-28F, or equivalent. The grade may be changed one step by ENGINEER during construction at no change in unit price.

3. The bituminous material shall meet all applicable requirements of Section 02545, BITUMINOUS MATERIALS, of the latest edition of the Wyoming Public Works Standard Specifications.

B. AGGREGATE MATERIALS

1. Aggregates shall meet all requirements of subsections 2.06 and 2.07 of Section 02190 of the 2001 Edition of the Wyoming Public Works Standard Specifications for Type III pavement aggregate, 1/2" maximum aggregate size.

2. During crushing operations, the coarse and fine aggregates shall be stockpiled in separate piles in such manner that they can later be combined to meet the required specifications.

3. Stockpiled material shall meet all requirements of Subsection 3.01 of Section 02190 of the 2001 Edition of the Wyoming Public Works Standard Specifications.

4. Natural filler, when required, shall be stockpiled separately. The plans may limit or prohibit the use of crusher rejects or material from the same source as the aggregate material.

C. COMPOSITION OF MIXTURES

1. The bituminous plant mix shall be composed of a mixture of aggregate, natural filler or commercial additive, if required, and bituminous material. The several aggregate fractions shall be sized, uniformly graded, and combined in such proportions that the resultant composite blend meets the job-mix formula.

2. After the job-mix formula is established, all mixtures furnished for the project shall conform thereto within the following ranges of tolerances:

   Passing #4 and Larger Sieves -7 to +7 percent

   Passing #8 to #100 Sieves -5 to +5 percent

   Passing #200 Sieve -3 to +3 percent

   Bituminous Material -0.5 to +0.5 percent

   Mixing Temperature -20 to +20 degrees F

3. In general, the point of acceptance for the aggregate will be after the material has passed through the gradation unit and prior to the addition of bituminous material. If this point of acceptance proves unsatisfactory, an alternate point of acceptance may be selected by ENGINEER. The bituminous material will be conditionally accepted at the source. The plant-mixed material will be accepted after blending and mixing at the plant.

D. Bituminous material for tack shall be SS-1h in conformance with Section 02551 of the 2001 Edition of the Wyoming Public Works Standard Specifications.

PART 3 EXECUTION

3.1 PREPARATION

A. FINAL CONDITIONING OF EXISTING SURFACE

1. Irregular surfaces of bases shall be brought to uniform grade and cross section as directed.

2. Install tack coat over the previous lift of multiple lift installations and on vertical edges of existing paving and concrete curb and gutter and valley gutter. Vertical faces of concrete shall be tacked by hand methods taking care not to apply tack oil to horizontal concrete surfaces. Tack coat shall be applied in conformance with Section 02551 of the 2001 Edition of the Wyoming Public Works Standard Specifications. The rate of application and areas to be treated shall be approved by the RPR before application.

B. PREPARATION OF BITUMINOUS MATERIAL

1. The bituminous material shall be heated to the specified temperature in a manner that will avoid local overheating and provide a continuous supply of the bituminous material to the mixer at a uniform temperature at all times. Charts showing specified temperature range for each source of supply are available from the Headquarters Laboratory of the Wyoming Department of Transportation.

C. PREPARATION OF AGGREGATE

1. The aggregates for the mixture shall be dried and heated to the required temperature. Flames used for drying and heating shall be properly adjusted to avoid damage to the aggregate or coating the aggregate with soot, oil, or other contaminants. Burner fuels may be specified by ENGINEER in the Special Provisions.

2. The aggregates, immediately after heating and drying, shall be screened into two or more fractions and conveyed into separate compartments ready for batching and mixing with bituminous materials. Screening shall be at such rate and in such a manner that the coarse aggregate bin or bins shall contain less than 10% of minus #4 sieve material and the fine bin shall contain less than 10% of plus #4 sieve material.

D. MIXING

1. The dried aggregate shall be combined in the mixer in the amount of each fraction of aggregates required to meet the job-mix formula. The

bituminous material shall be measured or gauged and introduced into the mixer in the amount specified by the job-mix formula.

2. After the required amounts of aggregate and bituminous material have been introduced into the mixer, unless otherwise specified, the materials shall be mixed until a complete and uniform coating of the particles and a thorough distribution of the bituminous material throughout the aggregate is secured.

3. For hot mix bituminous pavement, the mixture shall be produced at the lowest possible temperature that will produce a workable mix within the application temperatures specified. The bituminous material and aggregate shall be introduced into the mixer within the specified temperature range and shall be within 25ºF of each other.

E. BITUMINOUS MIXING PLANT - GENERAL

1. Sufficient storage space shall be provided for each size of aggregate, and the different aggregate sizes shall be kept separated until they have been delivered to the cold elevator feeding the drier.

2. Plants used for preparation of bituminous mixtures shall conform to all requirements under Subsection 3.01(F) below, except that scale requirements shall apply only where weight proportioning is used. In addition, batch mixing plants shall conform to the requirements under Subsection 3.01(G) herein, continuous mixing plants shall conform to the requirements under Subsection 3.01(H) herein, and dryer-drum mixers shall conform to the requirements under Subsection 3.01(I) herein.

3. Mixing plants shall be of sufficient capacity and coordinated to adequately handle the proposed bituminous construction.

F. REQUIREMENTS FOR ALL PLANTS

1. Plant Scales - Scales shall be accurate to 0.5% of the maximum load that may be required. Poises shall be designed to be secured in any position to prevent inadvertent change of position. CONTRACTOR may provide an approved automatic printer system which will print the weights of the material delivered, provided the system is used in conjunction with an approved automatic batching and mixing control system. Such weights shall be evidenced by a weigh ticket for each load.

2. Equipment for Preparation of Bituminous Material - Tanks for the storage of bituminous material shall be equipped to heat and hold the material at the required temperatures. The heating shall be accomplished by steam coils, electricity, or other approved means so that no flame shall be in contact with the tank. The circulating system for the bituminous material shall be designed to assure proper and continuous

circulation during the operating period. Provision shall be made for measuring and sampling storage tanks.

3. Feeder for Drier - The plant shall be provided with accurate mechanical means for uniformly feeding the aggregate into the drier so that uniform production and uniform temperature will be obtained.

4. Drier - The plant shall include a drier or driers which continuously agitate the aggregate during the heating and drying process. For cold-type bituminous mix, equipment for mechanical cooling of the dried aggregate to the temperature prescribed for cold mixtures shall be provided and shall be capable of supplying prepared material for the mixer to operate at full capacity.

5. Screens - Plant screens, capable of screening all aggregates to the specified sizes and proportions and having normal capacities in excess of the full capacity of the mixer, shall be provided.

6. Bins - The plant shall include storage bins of sufficient capacity to supply the mixer when it is operating at full capacity. Bins shall be arranged to assure separate and adequate storage of appropriate fractions of the mineral aggregates. Separate dry storage shall be provided for commercial additives when used, and the plant shall be equipped to feed such material into the mixer. Each bin shall be provided with overflow pipes of such size and at such location as to prevent backing up of material into other compartments or bins. Each compartment shall be provided with its individual outlet gate, constructed so that when closed, there shall be no leakage. The gates shall cut off quickly and completely. Bins shall be so constructed that samples can be readily obtained. Bins shall be equipped with adequate telltale devices to indicate the position of the aggregates in the bins at the lower quarter points.

7. Sampling Facilities - The plant shall be equipped with suitable sampling devices or facilities to insure representative samples. If ENGINEER is unable to obtain samples which represent the material being accepted for incorporation into the project, CONTRACTOR shall make necessary adjustments or revisions to the plant before any further mixing is done.

8. Bituminous Control Unit - Satisfactory means, either by weighing or metering, shall be provided to obtain the proper amount of bituminous material in the mix. The accuracy of bituminous content measured either by weighing or metering may be checked by computing the daily yield of total material being processed.

9. Thermometric Equipment

    a. An armored thermometer of adequate range in temperature reading shall be fixed in the bituminous feed line at a suitable location near the charging valve at the mixer unit.

b. The plant shall also be equipped with an approved temperature recording device so placed at the discharge chute of the drier as to register automatically or indicate the temperature of the heated aggregates. The printed temperature recordings shall be furnished to ENGINEER after each day's run.

10. Dust Collector - The plant shall be equipped with a dust collector constructed to waste or return uniformly to the hot elevator all or any part of the material collected as directed.

11. Truck Scales - The bituminous mixture shall be weighed on approved scales. Such scales shall be inspected as often as ENGINEER deems necessary to assure their accuracy.

G. REQUIREMENTS FOR BATCHING PLANTS

1. Weigh Box or Hopper - The equipment shall include a means for accurately weighing each size of aggregate in a weigh box or hopper suspended on scales and of ample size to hold a full batch without running over. The gate shall close tightly so that no material is allowed to leak into the mixer while a batch is being weighed.

2. Bituminous Control

a. The equipment used to measure the bituminous material shall be accurate to plus or minus 0.5%.

b. The bituminous material bucket shall be non-tilting type with a loose sheet metal cover. The capacity of the bituminous material bucket shall be at least 15% in excess of the weight of bituminous material required in any batch. The length of the discharge opening or spray bar shall be not less than three-quarters of the length of the mixer, and it shall discharge directly into the mixer. The size and spacing of the spray bar openings shall provide a uniform application of bituminous material the full length of the mixer.

c. The bituminous material bucket, its discharge valve or valves, and spray bar shall be adequately heated. Steam jackets, if used, shall be efficiently drained, and all connections shall be so constructed that they will not interfere with the efficient operation of the bituminous scales. The plant shall have an adequately heated quick-acting, nondrip, charging valve located directly over the bituminous material bucket.

d. The indicator dial shall have a capacity of at least 15% in excess of the quantity of bituminous material used in a batch. The controls shall be constructed so that they may be secured at any dial setting and will automatically reset to that reading after the

addition of bituminous material to each batch. The dial shall be in full view of the mixer operator. The flow of bituminous material shall be automatically controlled so that it will begin when the dry mixing period is over and all of the bituminous material required for one batch will be discharged in not more than 15 seconds after the flow has started.

3. Mixer

a. The batch mixer shall be an approved twin pugmill type capable of producing a uniform mixture within the job-mix tolerances. If not enclosed, the mixer box shall be equipped with a dust hood to prevent loss of dust.

b. The clearance of blades from all fixed and moving parts shall not exceed 1".

c. The mixer shall be equipped with an accurate time lock to control the operations of a complete mixing cycle. It shall lock the weigh box gate after the charging of the mixer until the closing of the mixer gate at the completion of the cycle. It shall lock the bituminous material bucket throughout the dry mixing period and shall lock the mixer gate throughout the dry and wet mixing periods. The dry mixing period is defined as the interval of time between the opening of the weigh box gate and the start of introduction of bituminous material. The wet mixing period is the interval of time between the start of introduction of bituminous material and the opening of the mixing gate.

d. The control of the timing shall be flexible and capable of being set at intervals of 5 seconds or less throughout a total cycle of up to 3 minutes.

e. The setting of time intervals shall be performed in the presence of ENGINEER, who shall then lock the case covering the timing device until such time as a change is to be made in the timing periods.

H. REQUIREMENTS FOR CONTINUOUS MIXING PLANTS

1. Aggregate Proportioning

a. The plant shall include means for accurately proportioning each size of aggregate.

b. The plant shall have a feeder mounted under each compartment bin. Each compartment bin shall have an accurately controlled, individual gate to form an orifice for volumetrically measuring the material drawn from each compartment. The feeding orifice

shall be rectangular with one dimension adjustable by positive mechanical means and secured against inadvertent movement.

c. Indicators shall be provided for each gate to show the respective opening in inches.

2. Weight Calibration of Aggregate Feed - The plant shall include a means for calibration of gate openings by weighing test samples. Provision shall be made so that materials fed out of individual orifices may be bypassed to individual test boxes. The plant shall be equipped to conveniently handle individual test samples weighing not less than 200 pounds, and accurate scales shall be provided by CONTRACTOR to weigh such test samples.

3. Synchronization of Aggregate Feed and Bituminous Material Feed - Satisfactory means shall be provided to afford positive interlocking control between the flow of aggregate from the bins and the flow of bituminous material from the meter or other proportioning device. This control shall be accomplished by interlocking mechanical means or by any other positive, satisfactory method.

4. Mixer

a. The plant shall include a continuous mixer of an approved twin pugmill type, adequately heated and capable of producing a uniform mixture within the job-mix tolerances.

b. It shall be equipped with a discharge hopper with dump gates which will permit rapid and complete discharge of the mixture. The paddles shall be adjustable for angular position on the shafts and reversible to retard the flow of the mix. The mixer shall have a manufacturer's plate giving the net volumetric contents of the mixer at the several heights inscribed on a permanent gauge. Charts shall be provided showing the rate of feed of aggregate per minute for the aggregate being used.

c. The clearance of blades from all fixed and moving parts shall not exceed 1".

I. REQUIREMENTS FOR DRYER-DRUM MIXER

1. The plant shall be equipped to control aggregate gradation as described for cold feed control. The total cold aggregate feed shall be weighed continuously by an approved belt scale. When tested for accuracy, the weighing system shall register within plus and minus 0.5%. Provisions shall be made for determining the moisture content of the cold feed and correcting the aggregate weight to a dry weight.

2. An automatic digital record of the dry aggregate and the asphalt shall be displayed, recorded and totaled in appropriate units of weight and time. A positive interlock shall be provided between the dry weight of the aggregate and the bituminous material. The flow of the bituminous material shall be adjusted to compensate for the changes in the dry weight of the aggregate.

3. The dryer-drum mixer shall be capable of drying and heating the aggregate to the moisture and temperature requirements. A uniform mixture of aggregates and bituminous material shall be produced. The plant shall have a temperature recording device at the discharge chute of the dryer.

3.2 APPLICATION

A. The temperature of the mixture prior to laydown shall not be more than 25ºF less than the mixing temperature.

B. Bituminous plant mix shall not be placed on any wet surface; when the atmospheric temperatures are less than those specified in the following table; or, when weather conditions otherwise prevent the proper handling or finishing of the bituminous mixtures:

Compacted Thickness	* Minimum Ambient Temperature (ºF) Surface Course	Subsurface Course
Less than 1"	60	55
1" to and including 2"	40	40
More than 2"	40	35

* May 1 to October 15 or as specified in the Contract Documents.

C. Spot leveling or the bottom lift of a leveling course may be placed at 50ºF if additional courses are placed on the same contract.

D. HAULING EQUIPMENT

1. Trucks used for hauling bituminous mixtures shall have tight, clean, smooth, metal beds which have been thinly coated with a minimum amount of paraffin oil or other approved material to prevent the mixture from adhering to the beds. This material shall not be used in amounts which will contaminate the mixture. When required, each truck shall have a cover of canvas or other suitable material of such size as to protect the mixture from the weather. When necessary, so that the

mixture will be delivered on the road at the specified temperature, truck beds shall be insulated and covers shall be securely fastened.

E. SPREADING AND FINISHING

1. The mixture shall be laid upon an approved surface, spread, and struck off to the grade and elevation established. Bituminous pavers shall be used to distribute the mixture either over the entire width or over such partial width as may be practicable.

2. When the total compacted thickness of the mat is to be in excess of 3", it shall be placed in two or more lifts. The compacted thickness of any one lift in multiple-lift construction shall not exceed 3".

3. Except on tapers, narrow median areas, shoulders, and other such areas of irregular shape, limited length or restrictive width, or such other areas as directed, the paver screed shall be controlled by the automatic screed control described under Subsection 3.02(G) herein.

4. ENGINEER will perform such engineering as may be required to establish controls for the work and will set references for line and grade controls at reasonable intervals along the work.

5. CONTRACTOR shall furnish, place, and maintain such materials, devices, and equipment as may be required to provide specified independent line and grade control references and other controls which may be required for proper execution of the work.

6. Line and grade control for use with automatic paver control systems shall be an independent control reference consisting of:

   a. A tightly stretched wire or string line offset and paralleling true line for pavement edge and established grade for pavement surface;

   b. A floating beam of not less than 20' in length attached to the paver and riding on previously placed base or pavement material. The beam shall be equipped with a floating string or other device that will actuate the automatic screed control in reference to the base on which it is riding. Unless otherwise permitted by ENGINEER, the first ribbon of the first course of pavement material shall be controlled by the independent control wire. Subsequent ribbons may be controlled by the beam reference system.

7. The longitudinal joint in one layer shall offset that in the layer immediately below, by at least 6". Longitudinal joint locations may be otherwise specified in the Contract Documents.

8. Defects caused by trucks bumping into the laydown machine or by unnecessary stopping due to lack of coordination between mixing, hauling, and laydown shall be removed and replaced in accordance with Subsection 3.04.

9. On areas where irregularities or unavoidable obstacles make the use of mechanical spreading and finishing equipment impracticable, the mixture shall be spread, raked and luted by hand tools. For such areas the mixture shall be dumped, spread, and screeded to give the required compacted thickness.

10. Plant mix surfacing ribbons shall be brought up approximately even at the end of each shift on those projects being constructed under traffic.

F. BITUMINOUS PAVERS

1. Bituminous pavers shall be self-contained, power-propelled units, provided with an activated screed or strikeoff assembly, heated if necessary, and capable of spreading and finishing courses of bituminous plant mix material in lane widths applicable to the specified typical section and thickness shown on the plans. Pavers used for shoulders and similar construction shall be capable of spreading and finishing courses of bituminous plant mix material in widths shown on the plans.

2. The paver shall be equipped with a receiving hopper having sufficient capacity for a uniform spreading operation. The hopper shall be equipped with a distribution system to place the mixture uniformly in front of the screed.

3. The screed or strikeoff assembly shall effectively produce a finished surface of the required evenness and texture without tearing, shoving, or gouging the mixture.

4. Pavers shall be equipped with a paver control system which will automatically control the laying of the mixture to specified transverse slope and established longitudinal grade. The paver control system shall be automatically actuated from an independent line and grade control reference and through a system of mechanical sensors and sensor directed devices which shall maintain the paver screed at the proper transverse slope and at proper height to establish the top surface of the finally compacted mixture at specified slope and grade. In case of failure of the control system, the paver shall be operated by mechanical control only until the material under production at the time of breakdown is laid.

5. The paver shall be capable of being operated, when laying mixtures, at forward speeds consistent with satisfactory laying of the mixture.

6. A paving leveler shall be used when specified as shall be described in the Special Provisions.

G. ROLLERS

1. All rollers shall be in good condition, capable of reversing without backlash, and shall be operated at speeds slow enough to avoid displacement of the bituminous mixture. The number and weight of rollers shall be sufficient to compact the mixture to the required density while it is still in a workable condition. The use of equipment which results in excessive crushing of the aggregate will not be permitted.

2. The pneumatic-tired roller shall be self propelled with a total weight, including ballast, not greater than 30 tons. The roller shall be constructed so contact pressure may be varied between 40 psi and 90 psi.

3. Wobble wheel rollers are not permitted. Each roller shall be equipped with not less than 7 wheels with tires of equal size and ply and having a smooth tread design. The wheels shall be staggered on the front and rear axles to provide complete coverage, have a system for uniformly moistening each wheel without an excess of water, and have close-fitting scrapers for each wheel. The tire pressures shall not vary by more than 5 psi between individual tires from the designated pressure.

H. COMPACTION

1. Immediately after the bituminous mixture has been spread and struck off and the surface irregularities adjusted, it shall be thoroughly and uniformly compacted by rolling. Rolling shall be continued while the mixture is in a workable condition until all roller marks are eliminated and, unless otherwise designated on the plans, until a minimum of 95% of the Marshall unit weight at optimum asphalt content as defined in the approved mix design has been obtained. Samples will be taken in accordance with AASHTO T 230, or density will be determined by the use of properly calibrated Nuclear Density Gauge.

2. The number, weight, and type of rollers furnished shall be sufficient to obtain the required compaction without undue displacement, cracking, or shoving. Pneumatic tires shall be inflated to obtain the contact area pressures designated by ENGINEER.

3. Unless otherwise directed, rolling shall begin at the sides and proceed longitudinally parallel to the road centerline, each trip overlapping one-half of the roller width. Roller shall move at a slow, uniform speed with the drive wheels or rolls nearest the paver except on steep grades.

4. When the pavement is placed by machines in echelon or abutted against a previously placed lane, the longitudinal joint shall be rolled first, followed by the regular rolling procedure. On superelevated curves, the rolling shall begin at the low side and progress to the high side by overlapping of longitudinal trips parallel to the centerline.

5. Any displacement occurring as a result of the reversing of the direction of a roller, or from other causes, shall be corrected at once by the use of rakes and addition of fresh mixture when required. Care should be exercised in rolling not to displace the line and grade of the edges of the bituminous mixture.

6. To prevent adhesion of the mixture to the rollers, the wheels shall be kept properly moistened with water or water mixed with very small quantities of detergent or other approved material. Excess liquid will not be permitted.

7. Along forms, curbs, headers, walls, and other places not accessible to the rollers, the mixture shall be thoroughly compacted with hot hand tampers, smoothing irons, or mechanical tampers. On depressed areas, a trench roller may be used, or cleated compression strips may be used under the roller to transmit compression to the depressed area.

8. Any mixture that becomes loose and broken, mixed with dirt, or is in any way defective shall be removed and replaced with fresh hot mixture, which shall be compacted to conform with the surrounding area. Any area showing an excess or deficiency of bituminous material shall be removed and replaced.

I. JOINTS

1. Placing of the bituminous paving shall be as continuous as possible. Rollers shall not pass over the unprotected end of a freshly laid mixture unless authorized by ENGINEER. Transverse joints shall be formed by cutting back on the previous run to expose the full depth of the course. When directed by ENGINEER, a brush of bituminous material shall be used on contact surfaces of transverse joints just before additional mixture is placed against the previously rolled material.

3.3 PROTECTION

A. During any delays or suspensions of work, as outlined in the Contract Documents, CONTRACTOR shall be responsible for maintaining the quality of all leveling courses until the placement of additional courses. Maintenance of leveling courses because of delays or suspension of work will be done at CONTRACTOR'S expense unless otherwise specified in the Contract Documents.

3.4 ACCEPTANCE

A. The surface will be tested by ENGINEER using a 10' straight edge at selected locations. The variation of the surface from the testing edge of the straightedge between any two contacts with the surface shall at no point exceed three-sixteenths inch. All humps or depressions exceeding the specified tolerance shall be corrected by removing defective work and replacing it with new material, or as directed.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. Plant mix bituminous pavement will be measured by the square yard of asphalt placed as measured in the field at the depth specified on the detail sheets in the plan set.

4.2 BASIS OF PAYMENT

A. Payment for Plant Mix Bituminous Pavement will be made at the contract unit price per square yard, which payment shall be full compensation for supply and installation of asphalt paving and tack coat as described herein.

END OF SECTION

SECTION 02528

COMBINED CURBS AND GUTTERS

PART 1 GENERAL

1.1 SUMMARY

A. Combined curbs and gutters shall consist of air-entrained Portland Cement Concrete constructed in accordance with these specifications. This work shall be in reasonably close conformity with the lines and grades, thicknesses, and typical cross sections shown on the plans or established by the ENGINEER.

PART 2 PRODUCTS

2.1 MATERIALS

A. PORTLAND CEMENT CONCRETE - Air-entrained Portland Cement Concrete shall conform to the requirements of Section 03304, Class 4000.

B. PRE-FORMED EXPANSION JOINT MATERIAL - Joint material shall comply with the requirements of AASHTO M-2l3, ASTM D-994, ASTM D-1751, or ASTM D-1752.

PART 3 EXECUTION

3.1 GENERAL

A. Curb and gutter shall be constructed at the locations shown on the plans and where directed by the ENGINEER and shall be in accordance with these specifications and plans.

3.2 SUBGRADE AND BASE COURSE PREPARATION

A. The subgrade shall be excavated or filled with suitable native material to 6” below the bottom of curb section. Dirt material or topsoil excavated behind the proposed concrete structure for forming or other purposes shall be retained for backfill after the concrete has sufficiently set.

B. All soft, yielding, and otherwise unsuitable earth material shall be removed and replaced with suitable material. Filled sections shall be compacted and extend a minimum of one foot (l') outside the form lines.

C. The subgrade shall be compacted to 95% of maximum dry density as determined by ASTM D698 Standard Proctor density.

D. A 6” compacted thickness of Aggregate Base Course shall be installed over the subgrade in accordance with Section 02231 and the plans.

3.3 CONCRETE PLACEMENT

A. The concrete shall be placed either by an approved slipform/extrusion machine, by the formed method, or by a combination of these methods.

B. The slipform/extrusion machine approved shall be so designed as to place, spread, consolidate, screed, and finish the concrete in one complete pass in such a manner that a minimum of hand finishing will be necessary to provide a dense and homogeneous concrete section.

1. The machine shall shape, vibrate, and/or extrude the concrete for the full width and depth of the concrete section being placed.

2. It shall be operated with as nearly a continuous forward movement as possible. All operations of mixing, delivery, and spreading concrete shall be so coordinated as to provide uniform progress, with stopping and starting of the machine held to a minimum.

C. The formed method shall consist of setting forms, placing concrete and finishing.

1. Form material shall be straight and free from warp, having sufficient strength to resist the pressure of the concrete without displacement and sufficient tightness to prevent the leakage of mortar. Flexible or rigid forms of proper curvature may be used for curves having a radius of 100 feet or less. Division plates shall be metal.

2. The front and back forms shall extend for the full depth of the concrete. All of the forms shall be braced and staked so that they remain in both horizontal and vertical alignment until their removal.

3. They shall be cleaned and coated with an approved form-release agent before concrete is placed against them.

4. The concrete shall be deposited into the forms without segregation and then it shall be tamped and spaded or mechanically vibrated for thorough consolidation.

5. Low roll or mountable curbs may be formed without the use of a face form by using a straightedge and template to form the curb face. When used, face forms shall be removed as soon as possible to permit finishing.

6. Front and back forms may be removed at such time as the concrete is sufficiently set that removal will not chip, spall or otherwise damage the concrete. When forms are removed before the expiration of the curing period, the edges of the concrete shall be protected with curing compound.

3.4 FINISHING

A. The surface of the concrete shall be finished true to the lines and grades shown on the plans.

B. Concrete shall be worked until the coarse aggregate is forced down into the body of the concrete and no coarse aggregate is exposed. The surface shall then be floated with a wooden float to a smooth and uniform surface.

C. When the concrete has hardened sufficiently the surface shall be given a broom finish. The broom shall be an approved type. The stokes shall be square across the concrete from edge to edge with adjacent strokes overlapped. Strokes shall be made without tearing the concrete. The broomed finish shall produce regular corrugations not over one-eighth inch (1/8") in depth.

D. Concrete that is adjacent to forms and formed joints shall be edged with a suitable edging tool to the dimensions shown on the plans.

3.5 JOINTING

A. CONTRACTION JOINTS - Transverse weakened-plane contraction joints shall be constructed at right angles to the curb line at intervals not exceeding 10 feet. Joint depth shall average at least l/4 of the cross section of the concrete.

1. Contraction joints shall be hand formed, or made by l/8-inch thick division plates in the formwork.

2. The joints may be hand formed either by (1) using a narrow or triangular jointing tool or a thin metal blade to impress a plane of weakness into the plastic concrete, or (2) inserting 1/8-inch thick steel strips into the plastic concrete temporarily. Steel strips shall be withdrawn before final finishing of the concrete.

3. Where division plates are used to make contraction joints, the plates shall be removed after the concrete has set and while the forms are still in place.

B. EXPANSION JOINTS - Expansion joints shall be constructed at right angles to the curb line at immovable structures and at points of curvature for short-radius curves.

1. Filler material for expansion joints shall be furnished in a single 3/4-inch thick piece for the full depth and width of the joint.

2. Expansion joints in a slipformed curb or curb and gutter shall be constructed with an appropriate hand tool by raking or sawing through partially set concrete for the full depth and width of the section. The cut shall be only wide enough to permit a snug fit for the joint filler. After the filler is placed, open areas adjacent to the filler shall be filled with concrete and then troweled and edged.

3. Alternately, an expansion joint may be installed by removing a short section of freshly extruded curb and gutter immediately, installing temporary holding forms, placing the expansion joint filler, and replacing and reconsolidating the concrete that was removed. Contaminated concrete shall be discarded.

C. Construction joints may be either butt or expansion type joints.

D. Combined curbs and gutters constructed adjacent to existing concrete shall have the same type of joints as in the existing concrete, with similar spacing; however, contraction joint spacing shall not exceed 10 feet.

3.6 PROTECTION

A. The CONTRACTOR shall always have materials available to protect the surface of the plastic concrete against rain. These materials shall consist of waterproof paper or plastic sheeting. For slipform construction, materials such as wood planks or forms to protect the edges shall also be required.

B. When concrete is being placed in cold weather and the temperature may be expected to drop below 35ºF., insulated blanket protection shall be provided to keep the concrete from freezing until it is at least 72 hours old. Fresh concrete subjected to temperatures below 35ºF shall be removed and replaced by the CONTRACTOR at his expense.

3.7 CURING

A. Curing shall be accomplished by use of a liquid membrane curing compound in accordance with ASTM C309. Curing compound shall be white pigmented.

3.8 BACKFILLING

A. After the concrete has set sufficiently, the spaces in front and back of curbs shall be backfilled with original material or as shown on the drawings to the required elevations.

B. The backfill material shall be thoroughly compacted to a density equal to that of adjacent materials.

3.9 TOLERANCES

A. The work shall be performed in a manner which results in a curb and gutter constructed to specified line and grade, uniform in appearance and structurally sound.

B. Curb and gutter found with unsightly bulges, ridges, low spots in the gutter or other defects shall be removed and replaced at the CONTRACTOR's expense if the ENGINEER considers them to be irreparable.

C. When checked with a ten foot (10') straightedge, grade shall not deviate more than 1/4 inch, and alignment shall not vary more than 1/2 inch.

D. Final elevation shall not depart from plan elevation by more than 1/2 inch.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. This item shall be measured along the flow line of the curb by the linear feet of combined curb and gutter in place.

4.2 BASIS OF PAYMENT

A. Payment for Concrete Curb and Gutter will be made at the contract unit price per lineal foot in place, which payment shall constitute full compensation for subgrade preparation, all concrete materials, finishing and curing of concrete, for all pre-molded mastic material for expansion joints, contraction joints, furnishing and placing of backfill behind the curb, and for all equipment, tools and labor and for the performance of all work and incidentals necessary to complete the item.

B. Note that supply and installation of Aggregate Base Course is paid under Section 02231.

END OF SECTION

SECTION 02665

WATER DISTRIBUTION AND TRANSMISSION SYSTEMS

PART 1 GENERAL

1.1 SUMMARY

A. This section consists of construction of bell and spigot, gasketed, Ductile Iron Water Mains, including fittings, water valves, and other appurtenances normally used for water supply and distribution systems, including furnishing and installing pipe, water valves, and fittings, construction of thrust blocking, water service connection, and other related work.

1.2 REFERENCES

A. AWWA C-110; (A21.10-87): Standard for Ductile-Iron and Gray-Iron Fittings, 3" through 48", for Water and Other Liquids.

B. AWWA C-153; (A21.53): Standard for Ductile Iron Compact Fittings 3" through 24" for Water Service.

C. AWWA C-509; Resilient-Seated Gate Valves for Water and Sewerage Systems.

D. AWWA C-550; Protective Interior Coatings for Valves and Hydrants.

1.3 QUALITY ASSURANCE

A. When required by ENGINEER, CONTRACTOR shall furnish certification by the manufacturer of the pipe to be furnished on this project, certifying that the pipe and fittings comply with the applicable specifications. REQUIRED CERTIFICATION SHALL ACCOMPANY EACH DELIVERY OF MATERIAL.

B. All pipe shall be clearly marked with type, class and/or thickness as applicable. Lettering shall be legible and permanent under normal conditions of handling and storage.

1.4 SUBMITTALS

A. Prior to ordering, provide product submittals on all materials and supplies included within this specification.

B. A water bypass/construction plan shall be submitted and approved prior to construction. Plan should indicate locations of temporary water and duration of shutdowns. Also include a flushing plan that meets the minimum flushing velocity of 2.5 ft/sec in the water mains.

PART 2 PRODUCTS

2.1 MATERIALS

A. PIPE AND MISCELLANEOUS APPURTENANCES

1. Pipe used in water main construction shall be in accordance with the following specifications:

2. DUCTILE IRON PIPE

a. Ductile iron pipe shall conform to the provisions of AWWA Specifications C-151 pressure class 350.

b. Pipe joints shall be "Push-On" joints conforming to AWWA Specifications C-111.

c. The interior of the pipe shall have a cement mortar lining conforming to the requirements of AWWA Specifications C-104. The outside surface of pipe designed for underground service shall receive a bituminous coating approximately 1 mil thick.

3. PIPE ENCASEMENT MATERIAL - CEMENT-TREATED FILL

a. Cement-treated fill used to encase water main at sewer main crossings or close horizontal obstructions shall be as described in Section 02225, Trench Backfill.

4. CASING PIPE

a. Pipe used to case waterline - sewer line crossings shall be (PVC) DR-26 water pipe or (PVC) DR-35 sewer pipe with a minimum inside diameter of 1.25 times outside diameter of carrier pipe.

b. Casing pipe shall be sealed at both ends with concrete to prevent the migration of water into the annular space.

B. FITTINGS AND COUPLINGS

1. Fittings. Fittings shall be ductile iron, 350 psi minimum pressure rating, conforming to AWWA C110 or C153. Rubber gasket joints shall conform to AWWA C111. All fittings shall have MJ or FLG ends as called for on the plans. All metal accessory items used in the assembly of the joints shall be fluorocarbon coated (Cor Blue) low alloy corrosion resistant high strength steel manufactured in full compliance with the most current edition of ANSI/AWWA C111/A21.11.

2. In situations where standard ductile iron long body sleeves will not properly mate to existing waterline at connections to like-sized or nearly like-sized mains, utilize Smith Blair Style 462 “Quantum” Ductile Iron Transition Couplings or equal, supplied with fusion bonded epoxy coating and stainless steel hardware. Determine the actual O.D. of the existing lines prior to ordering these couplings.

C. RESILIENT SEATED GATE VALVES

1. Resilient Seated Gate Valves shall be iron body, with non-rising stems with design, construction, and pressure rating conforming to AWWA C509, standard for Resilient Seated Gate Valves with modifications specified herein.

2. Waterway shall be smooth and shall have no depressions or cavities in seat area where foreign material can lodge and prevent closure or sealing.

3. Stem seals shall be double "O" ring seals designed so that the seal above the stem collar can be replaced with the valve under pressure in full open position.

4. Resilient Seated Gate Valves for underground installation shall have two-inch square wrench nut for key operation. All valves shall open counterclockwise unless indicated otherwise in the special provisions.

5. The Resilient Seated Gate Valves' interior parts and surfaces shall be coated in accordance with AWWA C550.

6. All valves shall incorporate an 8 mil factory applied fusion bonded exterior epoxy coating.

7. All valve metal accessory items for end connections shall be Grade 308 stainless steel. Bonnet bolts and trim bolts shall be stainless steel with bronze nuts.

8. All valves shall be FLGx MJ except as noted on the plans.

D. VALVE BOXES

1. Valve boxes shall be cast iron, 5 1/4" diameter adjustable valve boxes. Valve boxes shall be of the screw type and of sufficient length for the pipe bury as specified. The cast iron cover of the valve box shall have an arrow indicating the direction of opening and the word "Water" stamped thereon.

E. MECHANICAL THRUST RESTRAINT

1. In addition to thrust blocks, joint restraint is required on all mechanical joints where a thrust force develops (e.g. bends, reducers, tees (branch side), valves, fire hydrant lead lines, etc.). Joint restraint shall be provided in all pipe sizes up to 12-inch by a "Grip Ring" and "Special MJ gland" manufactured by Romac Industries with an allowable working pressure rating of 250 psi.

    a. Stainless steel all-threads manufactured from stainless steel rod having a minimum yield strength of 50,000 psi, sized and numerically called out on the drawings.

    b. All hardware shall be Grade 304 stainless steel.

F. WATER SERVICES – (all water services to be 1" unless noted otherwise on the drawings)

1. HDPE water service pipe ¾-inch to 3-inch diameter shall be PE 4710 conforming to the latest edition of AWWA C901 and NSF standard 61. PE4710 compound shall conform to ASTM D3350 minimum cell classification PE445574C-CC3. HDPE pipes shall be extruded by a PPI member with dependent listings in PPI TR-4 and shall meet the requirements of AWWA C901. The pressure class shall be 250 psi and the outside diameter of the pipe shall be based upon the IPS sizing system (SDR pipe).

2. Service saddles shall be Smith Blair 317, or equal, service constructed of ductile iron with an epoxy coated body, or approved equal. Saddle shall consist of 2 stainless steel bands with tapered cc outlet threads and stainless steel hardware.

3. Corporation stops of ¾" to 2" shall be Mueller H-15028 Ground Key Corporation Stop or approved equal. Minimum valve inlet and outlet connection size shall be the full diameter, as called out. The corporation stop shall conform in all regards to AWWA C-800.

4. Curb stops ¾" to 2" shall be shall be a Mueller Minneapolis pattern H-10287 or approved equal. Supply each valve with two Mueller H-15428 MIP by compression connectors or approved equal (CTS size adaptation may be required). The minimum size opening within the plug shall be the full diameter of the service line. The curb stop shall conform in all regards to AWWA C-800.

5. Ends of polyethylene tubing inserted in compression connections should be fitted with insert reinforcement.

6. Curb Box. Curb boxes shall consist of a 1½-inch galvanized steel pipe lower section and a 2-inch galvanized steel pipe telescoping upper section. Screw the 1½"-inch lower section onto the Minneapolis top threads of the curb stop using a galvanized steel coupling or bell reducer. Supply and install a Mueller cap stamped "Water) with a pentagon head plug on the top of the 2-inch upper section pipe. Do not install a shutoff rod inside the curb box.

7. Ends of polyethylene tubing inserted in compression connections should be fitted with insert reinforcement.

8. Connection adapters to tie new service lines to existing service lines in circumstances where a curb stop is not to be installed shall be Mueller H-15403 three-part unions, comp x comp (size adaptation may be required) or approved equal.

G. EQUIPMENT WARRANTY

1. Provide a minimum 1 year standard manufacturer's warranty for all equipment from the date of substantial completion, unless otherwise noted in this specification.

PART 3 EXECUTION

3.1 CONSTRUCTION

A. GENERAL

1. Pipe shall be installed in accordance with the manufacturer's recommendations for installing the type of pipe used. CONTRACTOR shall provide all tools and equipment including any special tools designed for installing each particular type of pipe used.

B. DEWATERING OF TRENCH

1. Where water is encountered in the trench, it shall be removed during pipe laying operations and the trench so maintained until the ends of the pipe are sealed and provisions are made to prevent floating of the pipe. See Section 02225.

C. RESPONSIBILITY FOR MATERIAL

1. CONTRACTOR shall be responsible for all material furnished by him and shall replace at his own expense all such material found defective in manufacture or damaged in handling after delivery by the manufacturer. This shall include the furnishing of all materials and labor required for the placement of installed material discovered

damaged or defective prior to the final acceptance of the work, or during the guarantee period.

2. CONTRACTOR shall be responsible for the safe and proper storage of material furnished by him or to him and accepted by him, and intended for the work, until it has been incorporated in the completed project. The interior of all pipe and other accessories shall be kept free from dirt and foreign matter at all times.

D. HANDLING OF PIPE

1. All pipe furnished by CONTRACTOR shall be delivered and distributed at the site by CONTRACTOR. Pipe, fittings, specials, valves and accessories shall be loaded and unloaded by lifting with hoists or skidding so as to avoid shock or damage. Under no circumstances shall such materials be dropped. Pipe handled on skidways shall not be skidded or rolled against pipe already on the ground.

2. In distributing the material at the site of the work, each piece shall be unloaded opposite or near the place where it is to be laid in the trench.

3. Pipe shall be so handled that the coating and lining will not be damaged. If, however, any part of the coating or lining is damaged, the repair shall be made by CONTRACTOR at his expense in a manner satisfactory to ENGINEER.

E. LAYING OF PIPE

1. Before installation, the pipe and pipe coating shall be inspected for defects. Any damage to pipe coatings shall be repaired AS RECOMMENDED BY THE PIPE MANUFACTURER before laying the pipe.

2. All pipe shall be laid and maintained to the required lines and grades with fittings and valves at the required locations.

3. Wherever obstructions <u>not shown on the plans nor annotated during construction utility locates</u> are encountered during the progress of the work and interfere to such an extent that an alteration in the plan is required, ENGINEER shall have the authority to change the plans and order a deviation from the line and grade or arrange with the OWNERs of the structures for the removal, relocation and reconstruction of the obstructions. If the change in plans results in a change in the amount of work by CONTRACTOR, such altered work shall be done on the basis of payment to CONTRACTOR for extra work or credit to the OWNER for less work.

4. Known existing underground facilities noted or referenced on the drawings and/or located by the utility OWNER in the field which have the potential of elevation conflict with the planned water line and require depth determination in advance of pipelaying in order to avoid abrupt waterline profile changes, shall be exposed in advance of pipelaying by Exploratory Excavation. Minor waterline profile changes, including either an increase or decrease in trench depth in order to avoid said utility is incidental to watermain installation and shall not be cause for a price adjustment for any item within this section.

5. The CONTRACTOR shall supply an accurate builders survey level, rod, tape and shall assist the ENGINEER's representative in profile alteration in advance of pipelaying such that adequate cover is maintained over the line and the installation is blended back into the planned alignment without the creation of high or low spots in the line.

6. Proper implements, tools and facilities satisfactory to ENGINEER shall be provided and used by CONTRACTOR for the safe and convenient prosecution of the work. All pipe, fittings and valves shall be carefully lowered into the trench piece by piece by means of a derrick, ropes or other suitable tools or equipment, in such a manner as to prevent damage to pipe materials and protective coatings and linings. Under no circumstances shall materials be dropped or dumped into the trench.

7. Every precaution shall be taken to prevent foreign material from entering the pipe while it is being placed in the line. During laying operations, no debris, tools, clothing or other materials shall be placed in the pipe. At times when pipe laying is not in progress, the open ends of the pipe shall be closed by a watertight plug or other means approved by ENGINEER.

8. Long radius curves, either horizontal or vertical, may be laid with standard pipe by deflections at the joints. If the pipe is shown curved on the plans and no special fittings are shown, CONTRACTOR can assume that the curves can be made by deflection of the joints with standard lengths of pipe. If shorter lengths are required, the plan will indicate maximum lengths that can be used.

9. Where field conditions require deflection or curves not anticipated by the plans, ENGINEER will determine the methods to be used. No additional payment will be made for laying pipe on curves as shown on the plans, nor for field changes involving standard lengths of pipe deflected at the joints. When fittings not shown on the plans are

required to meet field conditions, additional payment will be made for fittings.

10. Maximum deflections at pipe joints for various types of pipe shall not exceed the applicable material and joint specifications of AWWA nor shall they exceed the recommendations of the pipe manufacturer. When rubber gasket pipe is laid on a curve, the pipe shall be jointed in a straight alignment and then deflected to the curved alignment. Trenches shall be made wide on curves for this purpose.

11. Reaction or thrust blocking shall be applied at all tees, plugs, caps and at bends deflecting 11 1/4 degrees or more, or movement shall be prevented by attaching suitable metal rods or straps as approved by ENGINEER. Reaction blocking shall be concrete having a compressive strength of not less than 2,000 pounds per square inch at 28 days. Blocking shall be placed between solid ground and the fitting to be anchored; the area of bearing on the pipe and on the ground shall be as shown on the detail drawings. Thrust blocks shall be sized for a pipeline working pressure of 150 psi. The blocking shall be so placed that the pipe and fitting joints will be accessible for repair.

12. In certain locations where installation of concrete thrust blocking is not practical or desirable, the plans may require installation of mechanical thrust restraint in lieu of thrust blocking. In cases such as this the plans will describe the materials to be utilized.

13. The cutting of pipe for inserting valves, fittings or closure pieces shall be done in a neat and workmanlike manner without damage to the pipe or coating and so as to leave a smooth end at right angles to the axis of the pipe. The flame cutting of pipe by means of an oxyacetylene torch shall not be allowed.

14. All fittings and couplings shall be polywrapped after installation.

15. Installation of Cement-Treated Fill

    a. Cement treated fill utilized as encasement around water mains in areas of limited horizontal and/or vertical clearance from storm or sanitary sewers shall be installed as shown on the plan set details sheets. The required longitudinal limits of cement-treated fill along the water main is shown on the specific plan and profile sheets.

16. New pipe laying shall include abandonment/removal of existing water line as follows:

a. At points of connection or crossover between old and new waterlines, dead water lines shall be physically removed from the ground to at least ten feet (10') from the point of connection or crossover. In addition, dead waterlines visible in any trench excavation shall be physically removed. Remaining dead waterline ends shall be plugged with Sakcrete. Removed waterlines shall be disposed of at the Solid Waste Landfill at contractor's expense.

F. WATER SERVICES – 3/4" - 2" services tied directly off of new street mains.

1. It will be necessary to connect all existing individual water service lines and several new services to the new street mains upon completion of water main testing. The presumed extent of water service reconnection is shown on the drawings based on preliminary field locates, but is, however, subject to change during execution of the work. The CONTRACTOR shall provide all work and materials for complete service line connection for each existing service to include the following:

2. Town personnel will initially locate all individual service lines fed from street mains with a Metrotech pipe locator. The CONTRACTOR shall physically locate all services to ascertain the exact location and size by utilization of exploratory excavation.

3. Water services shall consist of trench excavation and backfill, a service saddle installed on the street main, corporation stop, mainline tap, copper service line, thaw wire where required, and new curb stop and box which shall serve as a connection between the new and old service.

G. GENERAL REQUIREMENTS FOR SERVICE LINE INSTALLATION

1. Service lines shall be installed in conformance with plan details.

2. Type A Trench Backfill shall be utilized within all service line excavations.

3. Individual service interruptions for the purposes of transferring services over from old to new mains shall be limited to 4 hours in length.

4. Service line installation shall include stripping and preservation of existing topsoil or any other surface material of asphalt limits encountered while installing new curb stops and connecting new service lines to existing; also included is replacement of said surface material to pre-existing contours upon project completion.

H. SEPARATION OF WATER MAINS AND SEWERS

1. PARALLEL INSTALLATION

a. NORMAL CONDITIONS - Water mains shall be laid at least TEN (10) feet horizontally from any sanitary sewer, storm sewer, or manhole, whenever possible. The distance shall be measured edge-to-edge.

b. UNUSUAL CONDITIONS - When local conditions prevent a horizontal separation of TEN (10) feet, a water main may be laid closer to a sanitary sewer, storm sewer, or manhole, provided that:

1) The bottom of the water MAIN is at least EIGHTEEN (18) inches above the top of the SANITARY OR STORM SEWER, OR

2) The trench backfill consists of cement-treated backfill in accordance with Section 02225. Cement-treated backfill must bear on undisturbed soil.

3) Where EIGHTEEN (18) INCHES vertical separation AS NOTED ABOVE cannot be obtained, the sewer shall be:

a) Constructed of materials and with joints that are equivalent to water main standards of construction and tested for water tightness by sewerline methods; or

b) The waterline or sewerline shall be placed in a separate casing pipe.

2. CROSSING

a. NORMAL CONDITIONS - Water mains crossing sanitary sewers, sanitary sewer service lines, or storm sewers shall be laid above to provide a vertical separation of at least eighteen (18) inches whenever possible. The distance shall be measured from the top of the sewer pipe to the bottom of the water pipe.

b. UNUSUAL CONDITIONS - When local conditions prevent a vertical separation of at least EIGHTEEN (18) inches AS NOTED ABOVE, the following construction shall be used:

1) The sanitary sewer or storm sewer shall be constructed of materials and with joints that are equivalent to water

main standards of construction and shall be tested for water tightness by sewer line methods; or

2) The sanitary sewer, storm sewer or water main shall be placed in a separate casing pipe.

3) The length of the sewer line constructed to water main standards or the casing pipe or encasement shall extend a minimum of nine (9) feet each side of the crossing.

4) Water mains passing under sewer lines shall in addition to the above requirements, be protected by providing adequate structural support for the sewer line. Soil structural support shall consist of cement-treated backfill in accordance with Section 02225. Cement-treated backfill must bear on undisturbed soil.

3.2 TEMPORARY WATER SERVICE

A. Under no circumstances shall water service to any user be disrupted for more than eight (8) hours in any 24-hour period. Service interruptions of less than eight hours are permissible provided that they are scheduled 24 hours in advance with the customer. Customer notification of outages by the Contractor shall consist of personal contacts or delivery of a contractor-supplied door hanger, specifying the date, time, and anticipated length of the service outage.

B. The plans may indicate certain areas where proposed waterline alignment is so close to existing waterline alignment that it is not possible to maintain service from the old line when the new line is being constructed. In cases such as this, it may not be practical to re-establish service from normal street mains after the eight-hour time limitation, and the Contractor shall provide temporary aboveground water mains on both sides of the street as required, according to the following criteria:

1. Aboveground main lines shall be 2-inch nominal size and of waterline material approved by AWWA. Main lines shall be provided on both sides of the street; service lines crossing the street will not be permitted.

2. Aboveground lines shall be tied to an active water main at least at one end of the block, and at both ends if two active waterlines exist. Temporary valves shall be installed at each connection point.

3. Aboveground main lines shall be disinfected on site by the continuous-feed method, flushed, and bacteria tested before initial

placement into service, and each time the temporary water service system is relocated for use in another area.

4. Individual 3/4" taps shall be provided for each residence off the 2-inch main and individual service lines run to each residence and tied to an exterior hose bib. If the hose bib is of the backflow prevention type, this feature shall be temporarily disabled and replaced in a workable fashion when normal service is restored.

5. The Contractor shall coordinate and schedule with each resident the change-over to and from temporary service including opening/closing of the meter valve as required.

6. Aboveground service lines shall be 3/4" nominal size and of waterline material approved by AWWA. Provide a shutoff valve at each tap location.

7. Durable ramps manufactured or pre-built of metal or lumber and anchored to the ground shall be used to protect temporary water main piping at street crossing locations. Gravel or dirt ramps will not be permitted.

8. Gravel or dirt ramps shall be provided to protect temporary main piping at driveways, however, daily maintenance shall be provided.

9. The Contractor shall be solely responsible for the integrity of the aboveground temporary main and service line system while it is in operation.

10. The Contractor shall provide to all residents for whom temporary water service is being provided, a telephone number(s) of a local contact(s) residing in Dubois, employed by the Contractor, who is "on call" 24 hours per day to respond to service interruptions. Response time to resident complaints shall not exceed 1 hour, day or night.

11. The Contractor shall continuously and diligently execute the replacement of street mains when temporary service is being provided, in order to minimize, to the extent possible, the time period when permanent water service is not available.

3.3 SETTING VALVES AND VALVE BOXES

A. All valves shall be set and jointed to the pipe in the manner specified for pipe laying and jointing. Valves shall be set with operating nut vertical. Valve boxes shall be centered and plumb over the operating nut and shall be set so that no shock or stress will be transmitted to the valve. Tops of valve boxes shall be set flush with the ground surface or street surfacing unless

otherwise directed by ENGINEER. All dirt and debris shall be removed from the valve box during installation. Install concrete valve box collars at all valve locations.

B. All valves shall be installed in accordance with AWWA C600. Valves shall be jointed to the pipe or fittings by use of stainless steel bolts and nuts. Valves shall be polywrapped prior to the installation of the thrustblock and anchor rods. A cast-in-place concrete thrustblock shall be installed beneath each valve and shall incorporate two 1/2-inch stainless steel anchor rods which diagonally cross over the valve body to counteract closing thrust.

3.4 VALVE THRUST BLOCKS

A. All valves to be installed which call for thrust blocks and anchor rods shall be installed in accordance with and as shown on the detail sheets.

3.5 PIPE JOINTING

A. RUBBER GASKET "PUSH-ON" JOINTS

1. Jointing of pipe and fittings with a rubber gasket "push-on" joint shall be as recommended by the manufacturer. The rubber gasket and gasket seat inside the bell shall be wiped clean with a cloth. A thin film of lubricant, furnished with the pipe, shall be applied to the inside surface of the gasket. The plain end of the adjoining pipe shall be wiped clean and inserted into the bell a sufficient distance to make contact with the gasket. The plain end shall then be forced "home" by the use of a crow bar, fork tool, or jack assembly.

B. MECHANICAL JOINTS

1. The inside of the bell and the outside of the spigot of the mechanical joint fittings shall be brushed thoroughly with a wire brush to remove all loose rust or other foreign material just prior to assembly. The cleaned surfaces shall be brushed with soapy water just prior to slipping the gasket over the spigot end and into the bell.

2. The spigot end of the pipe or fitting shall be accurately centered in the bell before jointing is begun. After the gasket is in place the gland shall be brought up toward the pipe flange evenly, maintaining approximately the same distance between the gland and the face of the flange at all points around the socket. Bolts shall be partially tightened alternately around the socket maintaining approximately equal tension until the final tension is reached.

3. The normal range of bolt torques to be applied to the bolts in the joints shall be as follows:

Bolt Size (inch)	Range of Torque (ft. lb.)
5/8	40 - 60
3/4	60 - 90
1	70 - 100
1-1/4	90 - 120

The above torque loads may be applied with torque measuring or indicating wrenches, or they may be applied using regular socket wrenches, and checked to torque wrenches.

4. If effective sealing is not attained at the maximum torque indicated above, the joint shall be disassembled and reassembled after thorough cleaning. Overstressing of bolts to compensate for poor installation practice will not be permitted.

C. CONNECTIONS TO EXISTING MAINS

1. All connections to water mains in use shall be made by the CONTRACTOR. CONTRACTOR shall furnish and install all materials as shown on the plans, and he shall provide exploratory excavation to expose existing pipe at proposed connection locations in order to determine existing pipe O.D. prior to ordering of connection couplings. He shall make all necessary excavations to assure gradual transition between the new and existing water main, he shall drain and dispose of residual water remaining in the existing main after isolation, he shall cut-out and properly dispose of and/or abandon portions of existing system components as required, and he shall perform all necessary backfilling.

2. In areas where the plans call for cutting into or removing existing asbestos cement water lines, trained personnel must be utilized to accomplish the work in accordance with applicable WDEQ and OSHA Standards and Requirements. A ten day notification must be submitted to WDEQ prior to the disturbance of asbestos cement lines and **all** personnel performing the work must have the required training. The local Solid Waste Site will accept asbestos cement pipe with the conditions that a permit be obtained (no charge) prior to transport and all other OSHA and WDEQ regulations are followed.

3. To the fullest extent permitted by Laws and Regulations, the Contractor shall indemnify and hold harmless the Owner and Engineer and the officers, directors, members, partners, employees, agents, consultants and subcontractors of each, from and against all claims, costs, losses, damages, fines (including but not limited to all fines from governmental organizations), charges of attorneys and other professional and all court or arbitration or other dispute

resolution costs arising out of or relating to the removal of existing asbestos cement water lines, but only to the extent caused by any negligent act or omission of the Contractor, any Subcontractor, any Supplier, any individual or any entity directly or indirectly employed by any of them to perform any of the Work or anyone for whose acts they may be liable.

4. Where the connection of new work to old requires interruption of service and notification of customers affected, the Town of Jackson Water Department and the ENGINEER and the CONTRACTOR shall mutually agree in advance upon a date and time for connections which will allow ample time to assemble labor and materials, and to allow the CONTRACTOR to notify all customers affected a minimum of 48 hours in advance of the outage. Planned outages for the purpose of all connections shall not exceed eight (8) hours in length.

5. Customer notification of outages by the CONTRACTOR shall consist of personal contacts or delivery of CONTRACTOR supplied door hangers specifying the date, time, and anticipated length of the service outage.

3.6 WATER SERVICE INSTALLATION

A. All water service connection shall be 1" in size unless noted on the drawings. Or if determined that existing service is a different size in the field. It will be necessary to connect all existing individual water service lines to the new mains upon completion of water main testing. The location of the visible curb boxes and curb stops discovered during the project design phase are shown on the drawings with a curb stop symbol. In cases where existing services exist which could not be found, an assumed location is noted on the plans. Contractor shall provide exploratory excavation to determine the location of the service. The Contractor shall provide all work and materials for complete service line connection for each existing service to include the following:

1. Contractor coordination with both the landowner and the Town of Jackson to determine the location of the existing water service line for which curb boxes are not indicated on the drawings. For parcels in which curb boxes cannot be found, exploratory excavation must be utilized. This coordination shall occur prior to water main installation.

2. Subsequent to water main testing and acceptance, the Contractor shall complete service line connection by providing trench excavation and backfill, stripping/restoration of surface features, making the waterline tap, furnishing and installing the service saddle or mainline fittings, corporation stop, curb stop and box and service line as

required to make all connections. Work shall be scheduled 24 hours in advance, coordinated with the landowner and/or resident with all required materials on hand prior to execution in order to minimize service outage length. Individual service outages shall not exceed four (4) hours in length for service connection activities.

3. Installation of water service lines shall be in accordance with the standard details shown on the plans. The specific location of each new service curb stop and box will be designated in the field. Insert stiffners shall be installed at all connection with poly tubing.

4. New service piping shall be installed such that a minimum horizontal clearance of 10 feet from any sewer, sewer lateral, or storm sewer is maintained.

5. All new service piping shall have a minimum depth of cover of seven feet.

6. Water service lines may be placed in narrow trenches of width adequate to achieve compaction of backfill and allowing for physical connection to the existing service line. Pertaining to compaction, trench backfill over service lines shall be Type A Trench Backfill, as defined in Section 02225 and as shown on the drawings.

7. Service line installation shall be completed without impact to fences, structures, landscaping, etc. on private property.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. WATER MAINS

1. Measurement of gasketed Ductile Iron water mains shall be made in lineal feet along the centerline of pipe of each size through all valves, fittings, casings, and appurtenances.

B. FITTINGS

1. Measurement of water main fittings will be by numerical count of the various types and sizes listed in the Bid Schedule.

C. WATER VALVES

1. Measurement of water valves shall be made by numerical count of the sizes and types of valves listed in the Bid Schedule.

D. PIPE ENCASEMENT MATERIAL FOR CROSSINGS (Cement-Treated Fill)

1. Measurement of pipe encasement material will be made under Section 02225, Trench Backfill.

E. WATER SERVICE LINES

1. No separate measurement will be made for contractor coordination with landowners for the purpose of locating exiting water services other than exploratory excavation.

2. Measurement of service tap, service saddle, corporation stop, curb stop and box, meter pit, and connection to the existing service line as an aggregate single item by service line size will be by numerical count as listed in the proposal.

3. Measurement of service line will be made in lineal feet from the main to the connection with the existing service line by size as listed in the proposal.

F. RAISING/LOWERING OF EXISTING VALVE BOXES

1. Measurement for raising or lowering of existing water valve boxes will be made as an aggregate single items by the numerical each completed in the field.

4.2 BASIS OF PAYMENT

A. WATER MAIN

Payment for water main will be made at the contract unit price bid per lineal foot of the various sizes called for, which price shall include payment for all subsidiary items as described in Sections 01570, 02110 and 02225, site access and egress, trench dewatering, Type 1 or Type 2 Trench Excavation including subsidiary items; furnishing and installing pipe, the cost of Type 1 pipe bedding material, the installation of all Type 1 Pipe Bedding material, installation of either native or imported materials for use as Type A or B Final Trench Backfill, completing connections to existing facilities, abandonment of old water lines and valves as required, disposal of all removed pipe, cleaning, hydrostatic testing and disinfection, providing any and all temporary water services, traffic control, surface restoration that is not gravel or asphalt, and all other work necessary or incidental for completion of the work.

B. FITTINGS

1. Payment for fittings will be made at the contract unit price bid for each, which price shall include furnishing and installing the items as required, including at connections to existing facilities, thrust restraint

including concrete installation and/or mechanical thrust restraint devices, and any other work necessary or incidental for completion of the item.

C. WATER VALVES

1. Payment for water valves will be made at the Contract Unit Price bid each, classified by size; which price shall include furnishing and installing the valves and valve boxes, including at connections to existing facilities, all additional excavation, backfill, and special compaction required for the installation, thrust restraint including concrete installation, installation of valve box collars, where required, and all other work necessary or incidental for completion of the item.

D. PIPE ENCASEMENT MATERIAL FOR CROSSINGS (Cement-treated Fill)

1. Payment of this item will be made under Section 02225, Trench Backfill.

E. WATER SERVICE CONNECTIONS

1. Payment for supply and installation of a service tap, service saddle, corporation stop, curb stop and box, and connection to the existing service line as an aggregate single item by service line size will be made at the Contract Unit Price bid per aggregate service assembly which price shall include supply and installation of all components within the aggregate.

2. Payment for service line will be made at the Contract Unit Price bid per foot by size, which price shall include trench excavation, installation of Type 1 bedding and Type A trench backfill, furnishing and installing service pipe, installation of insulation as called for on the plans, all surface restoration that is not gravel or asphalt, and all other work necessary or incidental for completion of the work. Note that all topsoil and seeding of service line installation is included in this price.

F. RAISE/LOWER WATER VALVE BOXES

1. Payment for raising/lowering of existing water valve boxes will be made at the Contract Unit Price bid each, which price shall include excavation to lower/raise the valve box, replacing with asphalt and all other work necessary or incidental for completion of the item.

END OF SECTION

SECTION 02670

HYDROSTATIC TESTING OF WATER MAINS

PART 1 GENERAL

1.1 SUMMARY

A. This section consists of leakage and pressure testing of water main and related appurtenances.

B. Note that if the Hydrostatic Testing work includes flushing and potential discharge to a surface water body, a temporary discharge permit from the Wyoming Department of Environmental Quality will be required. Refer to Section 02675 (Disinfection of Water Mains) regarding contractor responsibility for obtaining the temporary discharge permit. All flushing discharges to surface water shall meet the effluent limitations and monitoring requirements established by the DEQ.

C. The Contractor shall supply all required temporary apparatus, fittings, equipment, thrust restraint and miscellaneous materials not included within the permanent installation, but necessary for completion of this section.

PART 2 PRODUCTS – NOT USED

PART 3 EXECUTION

3.1 HYDROSTATIC TESTING OF WATER MAINS

A. PVC PIPE

1. PRESSURE TEST

a. General Requirements - The leakage and pressure tests may be performed simultaneously. All air shall be expelled from the line prior to the test. For simultaneous testing, the test pressure shall be 150 psi at the point of test, but not less than 125 psi at the highest elevation within the main to be tested. The specified test pressure shall be applied by means of a pump connected to the pipe. While the line is under pressure, the system and all exposed pipe, fittings, valves and hydrants shall be carefully examined for leakage. All defective elements shall be repaired or replaced and the test repeated until all visible leakage has been stopped and the allowable leakage requirements have been met.

2. LEAKAGE TEST

a. The duration of the leakage/pressure test shall be at least 2 hours at the pressure defined above. Leakage is defined as the quantity of water that must be supplied into the newly laid pipe, or any valved section thereof, to maintain pressure within 5 psi of the specified leakage test pressure after the pipe has been filled with water and the air in the pipeline has been expelled. No installation shall be accepted if the leakage is greater than determined by the following formula:

$$L = \frac{NDP^{1/2}}{7400}$$

Where:
L = allowable leakage, gph
N = number of joints in the length of pipeline tested
D = nominal diameter of the pipe, in
P = average test pressure during the leakage test, psig

or, if the differential line pressure during the 2-hour test varies by 5 psi or more.

3. All water main piping up to no more than 15 feet from the point of connection to an existing line shall be pressure and leakage tested. If the end of the piping to be tested does not include a valve or blowoff for air release or test section isolation, the Contractor shall supply temporary plugs, caps, blowoffs, valves, thrust blocking, etc., as necessary to effectuate the test.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT (This work will not be measured for payment)

4.2 BASIS OF PAYMENT

A. No separate payment will be made for items under this section. Full compensation shall be considered as included in the prices paid for waterline installation and no additional compensation will be allowed therefore.

END OF SECTION

SECTION 02675

DISINFECTION OF WATER MAINS

PART 1 GENERAL

1.1 SUMMARY

A. This section consists of essential procedures for disinfecting new and repaired water mains.

B. The CONTRACTOR shall supply all required temporary apparatus, fittings, equipment, thrust restraint, and miscellaneous materials not included within the permanent installation, but necessary for completion of this section.

PART 2 PRODUCTS – NOT USED

PART 3 EXECUTION

3.1 DISINFECTING WATER MAINS

A. BASIC PROCEDURE

The basic procedure comprises:

1. Preventing contaminating materials from entering the water mains during construction.

2. Disinfecting any residual contamination that may remain.

3. Flushing and disposal of heavily-chlorinated water.

4. Determining the bacteriologic quality by laboratory test after disinfection.

B. CONTRACTOR to Acquire State Permit for Temporary Discharge

1. The Fact Sheet, General Permit and Regulations pertaining to existing state requirements regarding temporary discharge of disinfection water from potable water lines are included in the Appendix of this Project Manual.

2. The CONTRACTOR, as the prospective permit holder and operator, shall file with the State of Wyoming, Department of Environmental Quality, Water Quality Division, a Notice of Intent (NOI) on Department forms along with supplemental material, requesting coverage under the general permit for temporary discharge due to hydrostatic testing and disinfection of potable water lines. The

CONTRACTOR shall be solely responsible for the temporary discharge. All discharges shall meet the effluent limitations and monitoring requirements established by the DEQ.

3. Upon completion of Hydrostatic Testing and Disinfection as required under this project the CONTRACTOR shall file with WY DEQ a termination notice certifying completion of this activity.

C. PREVENTIVE MEASURES DURING CONSTRUCTION

1. KEEPING PIPE CLEAN AND DRY

a. Precautions shall be taken to protect pipe interiors, fittings, and valves against contamination. Pipe delivered for construction shall be strung so as to minimize entrance of foreign material. When pipe laying is not in progress, as, for example, at the close of the day's work, all openings in the pipeline shall be closed by watertight plugs. Joints of all pipe in the trench shall be completed before work is stopped. If water accumulates in the trench, the plugs shall remain in place until the trench is dry.

Note: Delay in placement of delivered pipe invites contamination. The more closely the rate of delivery is correlated to the rate of pipe laying, the less the delay.

2. PACKING MATERIAL AND JOINTS

a. No contaminated material or any material capable of supporting prolific growth of micro-organisms shall be used for sealing joints. Packing material shall be handled in such a manner as to avoid contamination.

b. Yarning or packing material for cast iron pipe shall consist of molded or tubular rubber rings, ropes of asbestos or treated paper. Materials such as jute or hemp shall not be used.

c. The lubricant used in the installation of sealing gaskets shall be suitable for use in potable water. It shall be delivered to the job in enclosed containers and shall be kept clean.

D. TABLET METHOD OF CHLORINE APPLICATION

1. General Requirements. Unless otherwise specified, the tablet method shall be utilized for new main disinfection. Disinfection procedures shall be in conformance with AWWA C651. Note that the tablet method precludes preliminary flushing, consequently, extreme care

must be taken during pipe laying operations to insure that the pipe is kept clean and dry. If dirt should enter the pipe during laying operations, it shall be immediately removed and the interior of the pipe swabbed with a 1 percent hypochlorite disinfecting solution.

If during wet trench construction it is not possible to keep the pipe and fittings dry during installation, every effort shall be made to assure that any water that may enter the pipe-joint spaces contains an available-chlorine concentration of approximately 25 mg/l. This may be accomplished by adding calcium hypochlorite granules or tablets to each length of pipe before it is lowered into a wet trench, or by treating the trench water with hypochlorite tablets.

2. All water main piping up to no more than 15 feet from the point of connection to an existing line shall be disinfected by the Tablet Method. If the end of the piping to be disinfected does not include a valve for test section isolation, the CONTRACTOR shall supply temporary tapped plugs, caps, blowoffs, valves, thrust blocking, etc., as necessary to effectuate the disinfection process.

3. Tablet Installation. During pipe laying operations, 5 gram calcium hypochlorite tablets containing approximately 65 percent available chlorine by weight shall be placed in each section of pipe and also one such tablet shall be placed in each hydrant, hydrant branch, valve, and any other appurtenance. The number of 5 gram tablets required for each pipe section shall be $0.0012d^2L$, rounded to the next higher integer, where d is the inside pipe diameter in inches and L is the length of the pipe section in feet. The tablets shall be placed inside and at the top of the main and attached to the inside wall by a food grade adhesive. There shall be no adhesive on the tablet except on the broad side attached to the surface of the pipe. If the tablets are attached before the pipe section is placed in the trench, their position shall be marked on the section so it can be readily determined that the pipe is installed with the tablets at the top.

4. Filling and Contact. When installation has been completed, the main shall be filled with water at a rate such that the water within the main will flow at a velocity no greater than 1 ft/sec. Precautions shall be taken to insure that all air pockets are eliminated. This water shall remain in the pipe for at least 24 hours. If the water temperature is less than 41 degrees F, the water shall remain in the pipe for at least 48 hours. Operate all interior valves within the section to be disinfected several times throughout the contact period. Boundary valves shall be positioned so that the strong chlorine solution within the treated main will not flow into water mains in active service.

5. Flushing and Disposal of Heavily-Chlorinated Water. After the required retention period, flush the heavily-chlorinated water from the main at a minimum 2.5 feet per second until chlorine measurements show that the concentration of chlorine within the water leaving the main is no higher than that generally prevailing within the system or is acceptable for domestic use. All flushing discharges to surface water shall meet the effluent limitations and monitoring requirements established by the DEQ.

E. Bacteriologic Testing

1. General Requirements. Subsequent to 24 hours after flushing but prior to placement of the water main into service, water samples shall be taken from the new main, from each branch, and at the point where the water enters the new main, and tested for coliform organisms. Samples shall be collected in sterile bottles or approved envelopes treated with sodium thiosulfate as required by AWWA Publication Standard Methods of the Examination of Water and Wastewater. All test samples shall show the absence of coliform organisms. Sample bottles can be obtained from and the bacteriologic tests can be run by the Fremont County Health Department in Riverton. The CONTRACTOR shall be responsible for obtaining and transporting the sample and for the payment of all testing fees. No hose or fire hydrant shall be used in collection of samples. A suggested sampling tap consists of a service saddle and a standard corporation stop installed in the main with a copper tube gooseneck assembly. After samples have been collected, the gooseneck assembly may be removed and retained for future use.

2. Re-disinfection. If the initial disinfection fails to produce satisfactory bacteriological samples, the main shall be reflushed and resampled. If check samples show the presence of coliform organisms, then the main shall be rechlorinated by the continuous feed or slug method of chlorination until satisfactory results are obtained.

F. Disinfection Procedure While Cutting into Existing Mains

The procedures outlined in this section apply primarily when mains are wholly or partially dewatered.

1. Trench "Treatment"

a. When an old line is opened, either by accident or by design, the excavation will likely be wet and badly contaminated from nearby sewers. Liberal quantities of hypochlorite applied to open trench areas will lessen the danger from such pollution. Tablets have the advantage in such a situation because they

dissolve slowly and continue to release hypochlorite as water is pumped from the excavation.

2. Main Disinfection

a. Swabbing and Flushing - The following procedure is considered as a minimum that may be used.

b. Swabbing with Hypochlorite Solution - The interior of all new pipe and fittings used in making the connection or line replacement (particularly couplings and tapping sleeves) shall be swabbed with a five percent (5%) hypochlorite solution. Swabbing procedures shall be repeated until the pipe is thoroughly cleaned. The ends of the existing pipe shall also be cleaned and swabbed.

c. All cleaned pipe shall have the ends sealed until final pipe placement is initiated.

d. Flushing - Thorough flushing is the most practical means of removing contamination introduced during repairs. If valving and hydrant locations permit, flushing from both directions is recommended. Flushing shall be started after 24 hours of chlorine contact time in the water-filled line and continued until discolored water is eliminated.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT (This work will not be measured for payment).

4.2 BASIS OF PAYMENT

A. No separate payment will be made for items under this section. Full compensation shall be considered as included in the prices paid for waterline installation and no additional compensation will be allowed therefore.

END OF SECTION

SECTION 02700

SANITARY SEWER SYSTEMS

PART 1 GENERAL

1.1 SUMMARY

A. This section consists of construction of sanitary sewer mains, services, and other appurtenant structures, complete.

B. Installation of manhole components, including barrel sections, grade rings, frames and covers, and concrete collars is included herein.

1.2 REFERENCES

A. Where the reference is made to an ASTM, ANSI or AASHTO designation, it shall be the latest revision at the time of call for bids, except as noted on the Drawings.

1.3 QUALITY ASSURANCE

A. Sewer pipe and fittings furnished under this contract shall be as called out in these specifications. Wye or tee branches shall be of the same material and design as the sewer pipe used.

B. All pipe shall be clearly marked with type, class and/or, thickness as applicable. Lettering shall be legible and permanent under normal conditions of handling and storage.

C. Type of joint, class, thickness designation, castings, lining, marking, testing, etc., shall be as specified.

1.4 SUBMITTALS

A. Submit product data on all sizes of PVC gravity sewer piping, fittings, couplings and repair clamps.

B. Submit product data on all precast concrete manholes.

PART 2 PRODUCTS

2.1 MATERIALS

A. POLYVINYL CHLORIDE (PVC) PIPE

1. PVC Sewer Pipe shall be produced by a continuous extrusion process, employing a prime grade of non-plasticized polyvinyl chloride. The grade used shall be highly resistant to hydrogen sulfide, sulfuric acid, gasoline, oil, detergents and other chemicals commonly found in sewage and industrial wastes. The material shall conform to the requirements of ASTM D-1784, "Rigid Polyvinyl Chloride Compounds". The pipe shall have self-extinguishing flammability characteristics.

2. 15” and smaller PVC pipe and fittings shall conform to ASTM D-3034, "Standard Specification for Polyvinyl Chloride Sewer Pipe and Fittings". Pipe shall have a minimum Standard Dimension Ratio (SDR) of 35. Each length of pipe shall be marked with size, SDR, "Sewer Pipe" and Code Number.

3. Pipe Jointing

   a. Each length of pipe shall be provided with a bell designed so that a watertight joint will be obtained when jointing the bell and spigot with a rubber ring.

   b. The rubber gasket joint for PVC pipe and fittings shall consist of a rubber gasket, which is compressed between the outer surface of the spigot and the inner surface of a retaining groove in the bell. The joint shall be completely sealed by the gasket so that the assembly will remain watertight under all conditions of service, including movements resulting from expansion, contraction, settlement and deformation of the pipe. The rubber ring joint assembly shall be made in strict accordance with the manufacturer's recommendations.

4. Wye fittings shall be utilized for connecting service lines to sewer mains. Fittings shall be of the same material specification as the main sewer pipe.

B. SEWER FITTINGS

1. PVC sewer service pipe and fittings shall be ASTM 3034, SDR35 PVC.

2. Sewer service couplings shall be stainless steel shielded transition couplings with stainless steel bands.

3. Sewer main couplings for connection of new sewer manholes to existing sewer mains shall be stainless steel universal clamp coupling Model #131 JCM industries or equal.

C. PIPE ENCASEMENT MATERIAL - CEMENT-TREATED FILL

1. Cement-treated fill (flowable fill) used to encase sewer line when in close proximity to water mains shall be as described in Section 02225, Trench Backfill.

D. STANDARD MANHOLES

1. All manholes shall be constructed of a precast concrete base including channels and shelves, precast concrete barrel and eccentric cone sections, cast iron ring and cover and non-corrosive steps in accordance with the plan details. 48” manholes shall be installed with a top cone section. Larger manholes shall incorporate an extended barrel section and flat precast concrete lid. All precast concrete

components shall be manufactured to ASTM C-478 and shall be impervious to moisture migration through the concrete walls.

2. Note channels in the base of the manholes shall be constructed as indicated on the plans.

3. All manholes shall be designed to withstand AASHTO HS-20 loading.

4. Ring and Cover Castings

   a. Ring and cover shall be D&L A-1055, non-ventilated, with one 1-inch pick hole around the circumference and the word "SEWER" cast into the top.

5. Adjustment Rings

   a. Concrete adjusting rings or cast iron adapter risers may be used for adjusting the manhole top elevation to coincide with final rim elevations. The total height of adjusting rings used per manhole shall not exceed 12 inches. All rings shall be supplied with an inside diameter of no less than 24 inches.

6. Concrete Bases

   a. Concrete bases shall incorporate precast floors with integral channels and shelves. Base sections shall incorporate Kor-N-Seal rubber boots, or equal to achieve a watertight connection between the manhole and the pipe.

   b. Flow lines shall be formed into the inverts of all manholes and in the inverts of inlets when two or more pipes enter or leave the structure. Dimensions of flow lines shall be 1 pipe diameter in width and 1 pipe diameter in depth. Pipe diameter shall be considered by diameter of the largest pipe leaving the structure unless otherwise directed by ENGINEER. All flow lines shall uniformly slope from the invert of all inflow pipes to the invert of the outflow pipe. Flow lines shall be formed so that the flow will be carried from the inflow pipe directly to the outflow pipe. When inflow and outflow pipes are not parallel to each other, radial flow lines shall be formed. Radial flow lines shall be formed in a manner to allow clearance for the placement and removal of sewer cleaning and televising equipment.

7. Manhole Joint Sealer

   a. “Kent Seal” or approved equal. External joint wrap, shall be Conwrap CS-217, where called for on the plans.

PART 3 EXECUTION

3.1 PVC PIPE INSTALLATION

A. RESPONSIBILITY FOR MATERIAL

1. CONTRACTOR shall be responsible for all material furnished and shall replace at own expense all such material found defective in manufacture or damaged in handling after delivery by the manufacturer. This shall include furnishing all material and labor required for the replacement of installed material discovered defective prior to final acceptance of the work or during the guarantee period.

2. CONTRACTOR shall be responsible for the safe storage of material intended for the work until it has been incorporated in the completed project.

B. HANDLING OF PIPE

1. All pipe furnished by CONTRACTOR shall be delivered and distributed at the site by CONTRACTOR. Pipe, fittings and accessories shall be loaded and unloaded by lifting with hoists or skidding so as to avoid shock or damage. Under no circumstances shall materials be dropped. Pipe handled on skidways shall not be skidded or rolled against pipe already on the ground.

2. In distributing the material at the site of the work, each piece shall be unloaded opposite or near the place where it is to be laid in the trench. The interior of all pipe and other accessories shall be kept free from dirt and foreign matter at all times.

3. Pipe shall be handled so that no coating or lining will be damaged. If, however, any part of the coating or lining is damaged, CONTRACTOR shall make the repair at his expense in a manner satisfactory to ENGINEER.

C. LAYING PIPE

1. Under no circumstances shall sewer pipe be laid under water. Complete trench alignment dewatering operations to a free water elevation below the pipe prior to pipe installation.

2. All pipe shall be laid and maintained to the required lines and grades with fittings, tees and manholes at the required locations, including at temporary offset connections between old and new lines.

3. CONTRACTOR shall use good workmanship. All pipe shall be properly jointed home, using wood cushion and protective devices in accordance with manufacturer's recommendations.

4. Proper tools and equipment satisfactory to ENGINEER shall be used by CONTRACTOR for the safe and convenient prosecution of the work.

All pipe and fittings shall be carefully lowered into the trench in such a manner as to prevent damage to pipe materials and protective coatings and linings. Under no circumstances shall materials be dropped or dumped into the trench.

5. Every precaution shall be taken to prevent foreign material from entering the pipe while it is being installed. At times when pipe laying is not in progress, the open ends of pipe shall be closed by a plug or other means approved by ENGINEER. CONTRACTOR shall clean and remove all sand, gravel, concrete and cement grout that has entered the lines in the process of construction.

6. The bottom of the trench shall be shaped to fit the bottom quadrant of the pipe, with holes for couplings just large enough to permit their assembly.

7. Cement-treated fill utilized as encasement around sewer lines in areas of limited horizontal and/or vertical clearance from water mains shall be installed as shown on the plan set detail sheets.

8. When encounter in the proposed sewer trench, all existing sewer pipe shall be removed and disposed of at CONTRACTOR's expense. No pipe shall be placed in trench backfill.

9. Sewer services shall be installed at a minimum slope of 2%. CONTRACTOR shall consult with the ENGINEER if the slope criteria cannot be achieved.

D. JOINTS

1. The spigot and bell ends of the pipe and couplings shall be thoroughly cleaned before joint assembly. Jointing of the pipe shall be in strict accordance with the recommendations of the manufacturer of the pipe and fittings. Do not exceed manufacturer's recommendations pertaining to pipe deflection at joints. The correct position of the rubber gaskets and proper assembly of the pipe shall be checked by means of a feeler gauge prior to backfilling of the trench. On larger diameter pipe, which will provide room for workmen inside, all joints shall be visually inspected and gauged inside for proper position of the gasket and joint gap tolerances.

E. TOLERANCES

1. The sewers shall be installed within 1/4" for grade and shall not be off more than 2" for alignment. ENGINEER shall specify joint deflection tolerance where acceptable.

F. SEPARATION OF WATER MAINS AND SEWERS

1. PARALLEL INSTALLATION

a. NORMAL CONDITIONS - Sanitary sewer mains and manholes shall be laid at least ten (10) feet horizontally from any water main whenever possible. The distance shall be measured edge-to-edge.

b. UNUSUAL CONDITIONS - When local conditions prevent a horizontal separation of ten (10) feet as noted above, a sewer main may be laid closer to a water main, provided that:

1) The top of the sewer main is at least eighteen (18) inches below the bottom of the water main;

2) Where eighteen (18) inches vertical separation as noted above cannot be obtained, the sewer main shall be:

a) constructed of materials and with joints that are equivalent to water main standards of construction, and tested to assure water tightness prior to backfilling; or

b) placed in a separate casing pipe, or

c) the trench backfill around the sewer shall consist of cement-treated backfill in accordance with Section 02225. Cement-treated backfill must bear on undisturbed soil. See plan details.

2. CROSSING

a. NORMAL CONDITIONS - Sewers crossing water mains shall be laid below the water mains to provide a vertical separation of at least eighteen (18) inches, whenever possible. The distance shall be measured between the bottom of the water main and the top of the sewer.

b. UNUSUAL CONDITIONS - When local conditions prevent a vertical separation of at least eighteen (18) inches as noted above, the following construction shall be used:

1) The sewer or water main shall be placed in a separate casing pipe; or

2) the trench backfill around the pipes shall consist of cement-treated backfill in accordance with Section 02225. Cement-treated backfill must bear on undisturbed soil. See plan details.

3) Water mains passing under sewer lines shall in addition be protected by providing adequate structural support for the sewer line. Soil structural support shall consist of cement-treated backfill in accordance with Section

02225. Cement-treated backfill must bear on undisturbed soil.

G. CONNECTIONS TO EXISTING SEWER MAIN & MANHOLES

1. All permanent connections to sewer mains in use shall be made by the Contractor, and shall consist of new pipe stubs entering existing manholes.

2. Make all necessary excavations to assure gradual transition between the new and existing sewer main. Drain and dispose of residual sewage remaining in the existing main after isolation and cut-out and properly dispose of abandon portions of existing system components as required.

3. Contractor shall core drill existing manholes and shall furnish and install all materials to seal around the new pipe entry. Inlet leads shall extend 1 to 4 inches past the inside walls of the manhole.

4. Reconstruct manhole or inlet bottom to match the new connection. Inverts shall be formed as shown on Drawings and as herein specified unless otherwise directed by ENGINEER. Protect inverts from erosion until concrete has properly set and form them to provide for proper drainage. Inverts whose flow lines retain or restrict flow shall be removed and properly replaced by CONTRACTOR at no cost to OWNER.

5. No service disruptions will be allowed unless specifically stated otherwise on the plans.

3.2 STANDARD MANHOLE

A. Standard manholes shall be constructed to the general dimensions shown. Invert channels shall be smooth and semicircular in shape conforming to the inside of the adjacent sewer section. Changes in direction of flow shall be made with a smooth curve of as large radius as the size of the manhole will permit. Changes in size and grade of the channels shall be made gradually and evenly. The invert channels shall be formed directly in the concrete of the manhole base. The floor of the manhole outside the channel shall be smooth and shall slope toward the channel not less than one inch per foot, nor more than two inches per foot.

B. Field grout pipe annulus between boot connection and pipe wall as well as lifting holes.

C. All connections between wall sections shall be joined with "Kent Seal" manufactured by K.T. Snyder Company, or approved equal. Install in such a manner as to make the manhole watertight. Install according to manufacturer’s recommendations including cleaning and priming of the concrete surface.

D. Provide cementitious grout between all grade rings.

E. Asphalt collar around each manhole ring and cover as shown in the plan details.

F. New manholes connected to existing sewer mains shall incorporate a stub of new pipe connected to existing pipe with a rigid coupling. Concrete collar shall be installed around the connection as indicated on the drawings.

3.3 SERVICE LINE INSTALLATION

A. GENERAL

1. Service lines shall be construction in accordance with the plan set details.

2. Wye fittings shall be installed in the mainline sewer for connection of service lines.

3.4 PLUG AND ABANDON OF MANHOLES

A. Location of abandoned and removed manholes are noted on the plans. Removed manholes shall be disposed of at Contractors expense. Note that all ring and covers shall be delivered to the TOJ Public Works.

B. Sewer pipes entering structures to be abandoned shall be plugged and abandoned as specified.

C. The structure shall be removed to 4-feet below ground surface, filled with 1-inch max compacted crushed gravel and brought to finish grade. The material shall be compacted as specified in Section 02225 Trench Backfill.

3.5 PLUG AND ABANDONMENT OF PIPES

A. Cap abandoned pipes encountered with solvent weld or gasketed PVC fitting, or flow fill concrete.

B. For plugging of serviced, the CONTRACTOR should take the necessary precautions to ensure flowable fill does not enter the sewer main.

3.6 TESTING PVC SEWER MAINS

A. T.V. INSPECTION and JETTING- Required on all pipe installed on the project.

1. All sanitary sewer mains shall be jetted cleaned and inspected by the used of television camera before final acceptance. The costs incurred in making the initial inspection shall be paid by the CONTRACTOR.

2. CONTRACTOR shall bear all costs incurred in correcting any deficiencies found during television inspection including the cost of any additional television inspection that may be required by the OWNER to verify the correction of said deficiency.

3. CONTRACTOR shall be responsible for all costs incurred in any television inspection performed solely for the benefit of CONTRACTOR.

B. LEAKAGE TEST –(All of Sewer Main A and Manhole 4 to Manhole 5 on Sewer Main B)

1. All new sewer line will not be finally accepted until leakage tests have been made to assure ENGINEER that pipe laying and jointing are satisfactory. All service wyes coming off the main shall be plugged pressure tight prior to the leakage test.

a. Water Test

1) Where groundwater is a minimum of two (2) feet above the sewer line, tests shall be made by sealing off the section of lines between manholes and measuring the infiltration by collecting or pumping the discharge into barrels or other approved methods. Tests shall be continued over a period of at least four (4) hours for each section tested. Sufficient time shall be allowed to soak lines and manholes in advance of performing tests.

2) When groundwater is not above the pipe, testing shall be as follows:

a) On flat slopes where the depth over the centerline of the pipe in the lower manhole of the section being tested will be not more than ten feet (10'), the upper manhole shall be filled to a depth of two feet (2') over the top of the pipe and the lower manhole blocked. When the above conditions cannot be met, ENGINEER may order CONTRACTOR to test the line in sections between manholes. The leakage shall be measured by checking the drop in water level in the manhole over a period of four (4) hours.

b) The maximum allowable infiltration or exfiltration, including manholes, shall not exceed 50 gallons per day per mile of sewer, per inch of pipe diameter. This does not preclude the fact that obvious and concentrated leaks, such as open joints, pinched gaskets, cracked barrels or bells, etc., will not be allowed. CONTRACTOR shall make repairs on concentrated leaks, and as necessary to reduce infiltration or exfiltration leakage below the specified rate, and at his own expense.

b. Air Test (Alternate)

1) As an alternate method to water testing, CONTRACTOR may utilize low pressure air as a means of testing the

sewer mains. The test procedure utilized shall be ASTM Designation F1417 utilizing an allowable leakage rate of .0015 $ft^3/min/ft^2$ of internal pipe surface and the time-pressure drop method.

C. DEFLECTION TESTING –(All of Sewer Main A and Manhole 4 to Manhole 5 on Sewer Main B)

After the pipe has been laid and backfilled to subgrade, all flexible pipe systems shall be tested for deflection in the presence of ENGINEER. This test shall consist of pulling a mandrel (Go-No Go Device) through the pipe. The maximum deflection allowable shall not exceed 5% of the pipe's internal diameter for final inspection. CONTRACTOR shall conduct the test and shall furnish all necessary test equipment and labor. All pipe sections failing the test shall be removed and replaced at CONTRACTOR's expense.

D. MATERIALS AND EQUIPMENT FOR TESTING

Except as noted in Paragraph B, all labor, equipment and materials (including water) necessary for making the tests of sewer lines shall be furnished by CONTRACTOR.

E. All tests shall be made after trench backfill is completed to subgrade. CONTRACTOR shall be responsible for finding and repairing all breaks and leaks revealed by the tests.

3.7 BYPASS PUMPING

A. The CONTRACTOR shall provide all temporary main line bypass sewage pumping around new and existing sewer lengths and at new manhole insertions points, as necessary to install all components of the project. Note that temporary bypass pumping will be required doing the installation of the sewer main within the alley and in the easement between the residential structures as indicated on the plans.

B. The CONTRACTOR shall provide temporary service line(s) bypass sewage pumping as required if service disruption to any individual resident exceeds ten (10) hours in length. Planned service line outages shall be scheduled by the CONTRACTOR with affected resident 24 hours in advance.

C. Bypass pumping, when necessary, will be required on a continuous 24-hour basis unless both of the following conditions are met:

1. a reliable, temporary and watertight gravity connection(s) is made between new sewer and old sewer, which will adequately function throughout non-working hours, and if,

2. required sanitary sewer and manhole testing has been completed with acceptable results on all downstream segments from the temporary connection, or if introduction of sewage into a new downstream sewer prior to required testing, will not adversely affect the ability to complete “dry line” testing at a subsequent time.

D. Pumps when in use shall be manned day and night. Pumps, drivers, and/or power sources shall be in good working order and hydraulically capable of pumping required flows so that no sewer backup occurs. The CONTRACTOR shall be solely responsible for cleanup, repair, property damage costs, and all claims resulting from failure of the pump bypass system or any temporary gravity connection.

PART 4 METHOD OF MEASUREMENT AND BASIS PAYMENT

4.1 METHOD OF MEASUREMENT

A. PVC SEWER MAIN

1. Measurement of sewer mains shall be made in lineal feet along the centerline of pipe from center to center of manholes. Measurement is separately categorized between sewer main type and size at the location as indicated in the Bid Schedule.

B. PVC SEWER SERVICES

1. Measurement of sewer service connections shall be the price per each connection to the main including the gasketed wye. Measurement is separately categorized between sewer main locations as indicated in the Bid Schedule.

2. Measurement of sewer service pipe will be in horizontal lineal feet along the pipe from the inlet to the wye on the main sewer through all fittings to the connection with the existing service pipe at the ROW line. Measurement will be to the nearest foot. Measurement is separately categorized between size and location as indicated in the Bid Schedule.

C. STANDARD MANHOLES

1. Manholes will be individually measured in vertical feet, measured from the outlet invert elevation to the finish grade at the top of the ring and cover. Measurement is separately categorized between sewer main locations as indicated in the Bid Schedule.

D. RAISE/LOWER EXISTING MANHOLE RING AND COVERS

1. Measurement of raising of existing manhole ring and covers will be the numerical count of each ring and cover raised in the field.

4.2 BASIS OF PAYMENT

A. PVC SEWER MAIN

1. Payment for new PVC sewer main will be made at the contract unit price bid per lineal foot based on stationing, and pipe location which price shall include CONTRACTOR supplied potholing, trench excavation and backfill, furnishing and installing pipe; furnishing and placing Type 1 pipe bedding, bypass pumping, trench dewatering,

removing and disposing of existing sewer main where encountered in the trench, testing and all other work necessary or incidental for completion of the item.

B. PVC SEWER SERVICES

1. Payment for sewer service connections will be made at the contract unit price per each at the pipe size and location noted in the Bid Schedule; said payment being full compensation for trench excavation and backfill, supply and installation of the mainline wye, connection to existing, Type 1 pipe bedding, trench dewatering, and all other incidentals required.

2. Payment for sewer service pipe will be made at the contract unit price per lineal foot at the pipe size and location noted in the Bid Schedule; said payment being full compensation for trench excavation and backfill, installation of service line piping and required fittings, the coupling connection to the existing service line, trench dewatering, Type 1 pipe bedding, removing and disposing of existing sewer service pipe where encountered in the trench, testing and all other incidentals required to complete the installation.

C. STANDARD MANHOLES

1. Payment for manholes will be made at the contract unit price per vertical foot at the location indicated on the Bid Schedule; said payment being full compensation for trench excavation and backfill, supply and installation of manhole base, barrel and cone sections, connection to sewer mains including couplers, joint sealer, grade rings, cast iron ring and cover, concrete or asphalt collar, grout, testing, dewatering, abandonment or removal of existing manholes, and all other incidentals required to complete the item.

D. RAISE/LOWER EXISTING MANHOLE RING AND COVERS

1. Payment for raising existing manhole ring and covers will be made at the contract unit price bid for each: which price shall include labor and equipment associated with excavating the existing manhole ring and cover, removing or installing new cones or barrel sections, concrete or asphalt collar, sealing the castings against leakage, backfill, disposal of materials, and all incidentals to complete installation of said manhole components.END OF SECTION

SECTION 02776

CONCRETE FLATWORK AND CONCRETE PAVING

PART 1 GENERAL

1.1 SUMMARY

A. Concrete sidewalk, miscellaneous flatwork, bike paths, concrete driveway approaches, and valley gutters (all classified as Concrete Flatwork), shall consist of air-entrained Portland Cement Concrete constructed in accordance with these specifications. This work shall be in reasonably close conformity with the lines and grades, thicknesses, and typical cross sections shown on the plans or established by the ENGINEER.

PART 2 PRODUCTS

2.1 MATERIALS

A. PORTLAND CEMENT CONCRETE - Air-entrained Portland Cement Concrete shall conform to the requirements of Section 03304, PORTLAND CEMENT CONCRETE, Class 4000, with Type III cement (High early strength) for Concrete Paving and Type V cement for Concrete Flatwork. All concrete shall contain Fibermesh at the rate of 1.5 lbs/CYD.

B. PREFORMED EXPANSION JOINT MATERIAL - Joint material shall comply with the requirements of AASHTO M-213, ASTM D-994, ASTM D-1751, or ASTM D-1752.

C. TRUCATED DOMES – Truncated domes to be provided by the Town of Jackson. The Town will invoice the contractor $145 per dome as reimbursement.

PART 3 EXECUTION

3.1 GENERAL

A. All new and replacement concrete items shall be constructed at the locations shown on the plans and where directed by the ENGINEER, and shall be in accordance with these specifications and plans. Concrete flatwork may be placed by either formed or slip form methods.

3.2 SUBGRADE AND BASE COURSE PREPARATION

A. The subgrade shall be excavated or filled with suitable material to the required grades and lines. Dirt material or topsoil excavated behind the proposed concrete structure for forming or other purposes shall be retained for backfill after the concrete has sufficiently set.

B. All soft, yielding, and otherwise unsuitable material shall be removed and replaced with suitable material. Filled sections shall be compacted and extended a minimum of one foot (1') outside the form lines.

C. The subgrade shall be compacted to 95% of maximum dry density as determined by ASTM D698 Standard Proctor Density.

D. A compacted thickness of aggregate base shall be installed beneath all flatwork in accordance with Section 02231 and drawing details. Base preparation beneath concrete paving shall be as indicated on the drawings.

3.3 ERECTING FORMS AND REINFORCING STEEL

A. Forms, wood or steel, shall be staked securely in place, true to line and grade.

B. Sufficient support shall be given to the form to prevent movement in any direction, resulting from the weight of the concrete or the concrete placement.

C. Forms shall be clean and well oiled prior to setting in place.

D. When set, the top of the form shall not depart from grade more than one-quarter inch (1/4") when checked with a ten-foot (10') straightedge. The alignment shall not vary more than one-half inch (1/2") in ten feet (10').

E. Immediately prior to placing the concrete, forms shall be carefully inspected for proper grading, alignment and rigid construction. Adjustments and repairs as needed shall be completed before placing concrete.

F. Surface forms for concrete paving shall consist of straight-line sawcuts in the adjacent slabs.

3.4 PLACING AND FINISHING CONCRETE

A. The subgrade or base course shall be properly compacted and brought to specified grade before placing concrete.

B. The subgrade or base course shall be thoroughly dampened immediately prior to the placement of the concrete.

C. Concrete shall be spaded and tamped thoroughly into the forms to provide a dense, compacted concrete free of rock pockets. Slipform machines, if used, shall provide for consolidation by vibration.

D. The exposed surfaces shall be floated and finished to a surface appearance **matching adjacent remaining flatwork**. If a broomed finish is required, the following procedure shall be used:

1. The surface of concrete shall be finished true to the lines and grades shown on the plans.

2. Concrete shall be worked until the coarse aggregate is forced down into the body of the concrete and no coarse aggregate is exposed. The surface shall then be floated with a wooden float to a smooth and uniform surface.

3. When the concrete has hardened sufficiently, the surface shall be given a broom finish. The broom shall be of an approved type. The strokes shall be square across the concrete from edge to edge with

adjacent strokes overlapped. Strokes shall be made without tearing the concrete. The broomed finish shall produce regular corrugations not over one-eighth inch (1/8") in depth.

4. Concrete that is adjacent to forms and formed joints shall be edged with a suitable edging tool to the dimensions shown on the plans.

E. The rate of concrete placement shall not exceed the rate at which the various placing and finishing operations can be performed in accordance with these specifications.

3.5 STRIPPING FORMS

A. Forms may be removed at such time as the concrete is sufficiently set that removal will be without danger of chipping or spalling.

1. When forms are removed before the expiration of the curing period, the edges of the concrete shall be protected with curing compound.

2. All forms shall be cleaned, oiled and be examined for defects before they are used again.

3.6 PROTECTION

A. The CONTRACTOR shall always have materials available to protect the surface of the plastic concrete against rain. These materials shall consist of waterproof paper or plastic sheeting.

B. When concrete is being placed in cold weather and temperature may be expected to drop below 35ºF., insulated blanket protection shall be provided to keep the concrete from freezing until it is at least 72 hours old. Fresh concrete subjected to temperatures below 35ºF shall be removed and replaced by the Contractor at his expense.

C. The CONTRACTOR shall provide barricades sufficient to protect the new concrete from damage prior to authorized removal.

3.7 CURING

A. Curing shall be in accomplished by use of a liquid membrane curing compound in accordance with ASTM C309. Curing compound shall be white pigmented.

3.8 JOINTS

A. Scored contraction joints shall be installed at five-foot intervals along the concrete structure length for all flatwork.

B. Scored crack joints for concrete paving shall match those of the existing adjacent slabs.

C. Transverse expansion joints shall be placed at immovable objects and at maximum 30’ intervals.

3.9 BACKFILL

A. After the concrete has set sufficiently, the spaces front and back of concrete structures shall be backfilled with original material or as shown on the drawings to the required elevations.

B. The backfill material shall be thoroughly compacted to a density equal to that of adjacent materials.

3.10 TOLERANCES

A. The work shall be performed in a manner which results in the item being constructed true to line and grade, uniform in appearance and structurally sound.

B. Items found with unsightly bulges, ridges, low spots or other defects shall be removed and replaced at the CONTRACTOR's expense if the ENGINEER considers them to be irreparable.

C. When checked with a ten foot (10') straightedge, grade shall not deviate by more than one-quarter inch (1/4") and alignment shall not vary by more than one-half (1/2").

D. Final elevation shall not depart from plan elevation by more than 1/2 inch.

3.11 DETECTION PANELS

A. Contractor may remove the existing panels and reutilize if determined by the RPR to be in satisfactory condition.

B. Contractor shall install panels per manufacturer recommendations.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. Concrete sidewalk shall be measured by the square foot of sidewalk installed.

B. Thickened Edge Concrete sidewalk shall be measured by the square foot of sidewalk installed.

C. Concrete valley gutter shall be measured by the square foot of valley gutter installed.

D. Concrete driveway approach shall be measured by the square foot of driveway approach installed.

4.2 BASIS OF PAYMENT

A. Payment for Sidewalk and Thickened Edge Sidewalk will be made at the contract unit price bid per square foot; said price being full compensation for subgrade preparation, and supply and installation of concrete including all operations as shown on the plan details and described herein. Also included is the installation of the truncated domes as provided by the Town of Jackson,

which the Town will invoice the contractor $145/dome for reimbursement. Note that supply and installation of Imported Aggregate Base is paid under Section 02231.

B. Payment for Concrete Valley Gutter will be made at the contract unit price bid per square foot; said price being full compensation for subgrade preparation, and supply and installation of concrete including all operations as shown on the plan details and described herein. Note that supply and installation of Imported Aggregate Base is paid under Section 02231.

C. Payment for Concrete Driveway Approach will be made at the contract unit price bid per square foot; said price being full compensation for subgrade preparation, and supply and installation of concrete including all operations as shown on the plan details and described herein. Note that supply and installation of Imported Aggregate Base is paid under Section 02231

1.3 SUBMITTALS

A. The contractor shall provide to the Engineer a certificate stating the name of the manufacturer, product name, style number, chemical composition, and nominal of the product and other pertinent information to fully describe each geosynthetic proposed for use. The contractor shall supply the ENGINEER with manufacturers shipping, storage, handling, and installation procedures.

PART 2 PRODUCTS

2.1 MANUFACTURER

A. Solmax (TenCate Geosynthetics)

365 South Holland Dr.

Pendergrass, GA 30567

1-706-693-2226

2.2 MATERIALS

A. Geotextile:

1. The geotextile with orange identification yarns and super high-tenacity polypropylene yarns with a weave pattern to maximize strength, water flow, soil interaction and soil retention. The yarns shall be from high-tenacity long-chain synthetic polymers composed of at least 95 percent by weight of polyolefins. They shall form a stable network such that the filaments or yarns retain their dimensional stability relative to each other, including selvages. The geotextile is produced with a unique patented double layer weave pattern utilizing two different weft yarns in weft sets and a stuffer pick, as recited in U.S. Patent 8,598,054.

2. **MIRAFI®** *RS380i*. The **MIRAFI®** *RS380i* has the following Quality Control properties for material verification. The properties in Table 1 shall not be used as equivalent performance and performance verification for alternate materials must be provided per Section 2.2.1. All numeric values in Table 1 except AOS represent MARV in the specified direction. Values for AOS represent maximum measured opening size.

TABLE 1 – HIGH MODULUS WOVEN GEOTEXTILE FOR SUBGRADE STABILIZATION

Roadway Design and Performance Properties	Guidance Document / Test Method	Unit	Design / Calibration Value	
Base Course M_R Improvement Factor[1]	AASHTO R50-09	---	1.30

Notes:

[1] Value Determined from Results of Independent Testing Performed at Kansas State University in accordance with NCHRP Report 512 "Accelerated Pavement Testing: Data Guidelines" and AASHTO R50-09 Geosynthetic Reinforcement of the Aggregate Base Course of Flexible Pavement Structures." Multiplier for Unbound Granular Material; for SG M_R between 4.5 and 6.9 ksi (30.9 and 47.4 MPa).

[2] Value Determined from Results of Independent Testing Performed at GeoTesting Express (GeoComp) "A Laboratory Evaluation of the Performance of TenCate Mirafi® Geosynthetics in Roadway Stabilization Applications – Georgia Silt Subgrade," September 1, 2011. 9-kip {40 kN} Wheel Load, SG CBR = 1%, 12-inch (300-mm) Crushed Aggregate BC (CBR > 25%), 3-inch (75-mm) Rut Depth.

[3] Value Determined from Results of Independent Testing Performed at LTRC "Performance of Reinforced–Stabilized Unpaved Test Sections Built Over Native Soft Soil Under Full-Scale Moving Wheel Loads," TRR Volume 2511, 2015. Measured at 0.34-inch (8.64 mm) Rut Depth; Peak Pore Pressure 6-inches (150 mm) Below Geosynthetic.

[4] Value Determined from Results of Independent Testing Performed at GeoTesting Express (GeoComp) "A Laboratory Evaluation of the Performance of TenCate Mirafi® Geosynthetics in Roadway Stabilization Applications – Montana Clay Subgrade," September 1, 2011. 9-kip (40 kN) Wheel Load, SG CBR = 1.8%, 8-inch (200-mm) Rounded Aggregate BC (CBR > 25%), 3-inch (75-mm) Rut Depth.

[5] Interaction Coefficient value is for sand (SP) or gravel (GW) based on testing conducted by SGI Testing Services.

[7] Typical Value Determined from Specimen Results of Independent Testing Performed at TRI Environmental, Various Dates

PART 3 EXECUTION

3.1 INSTALLATION

A. Reinforcement Geogrid: Geogrid shall be utilized as foundation or roadway subgrade support in areas as called for on the Plans. Overlap 1 foot between placed grid minimum. Additional layers of geogrid may be placed within the structural fill prism as directed by the RPR.

B. Install per manufacturer's recommendations.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. Subgrade geosynthetic shall be separately measured by the square yard of material actually installed not including overlaps and seam allowances.

4.2 METHOD OF PAYMENT

A. Payment for Subgrade geosynthetic shall be made at the contract unit price bid per square yard area, area is computed as the total area of not including required overlap, said price being full compensation for all materials, labor, equipment and incidentals necessary to complete the work as described herein.

END OF SECTION

SECTION 02900

LANDSCAPING

PART 1 GENERAL

1.1 SUMMARY

A. This section includes the revegetation of all areas disturbed which are not paved or gravel surfaced that have been graded or disturbed during construction of the project.

B. Included in this section is the seeding and placement of sod, both bluegrass and native grass sod, where indicated on the drawings. Note that ALL locations disturbed during construction that do not have asphalt paving, concrete flatwork, or gravel surfacing as a final surface cover shall be seeded or sodded as indicated on the plans.

1.2 SUBMITTALS

A. Submit for approval material product data including any soil amendments proposed, fertilizer, mulch and seed mixture.

B. Submit maintenance information on the plant or seed materials to be provided.

1.3 DELIVERY, STORAGE AND HANDLING

A. Deliver fertilizer in unopened containers bearing the manufacturer's statement of analysis.

B. Deliver, store and handle other materials in accordance with manufacturer's instructions.

PART 2 PRODUCTS

2.1 MATERIALS

A. Topsoil

1. Topsoil shall consist of existing material free of rocks, stripped, and stockpiled as such under Section 02110.

B. Soil Amendments

1. Organic matter such as pine needles, leaf mold, or peat.

a. Shredded peat moss shall be commercial grade of either sphagnum moss, reed, or sedge peat, taken from fresh water site, free of lumps, roots and stones, with texture and pH range suitable for intended use.

b. Well-rotted and shredded manure.

c. Treble superphosphate.

C. Fertilizer

1. Fertilizer for trees shall be FS O-F-241, Type 1, Grade A with 50% of elements derived from organic sources, to the following proportions: Nitrogen 10%, phosphoric acid 20%, and soluble potash 20%.

2. Fertilizer for seeded areas shall be diammonium phosphate having an analysis of 18:40:0 (nitrogen-phosphorous-potassium), or approved alternate, applied at a rate of 200 pounds per acre.

D. Dryland Seed

1. All seed mix shall be in compliance with the Wyoming Seed Law and Federal Seed Law. Seed must be purchased through a dealer licensed with the Wyoming Department of Agriculture.

a. Seed mix for dryland restoration shall be as follows:

Common Name	Scientific Name	PLS Lbs/Acre
Secar Bluebunch Wheatgrass	Pseudoregneria spicata	4.0
Pryor Slender Wheatgrass	Elymus trachycaulus	3.0
VNS Blue Wildrye	Elmus glaucus	3.0
Sherman Big Bluegrass	Poa secunda	1.0
VNS Tufted Hairgrass	Deschampsia cespitosa	0.5
Lewis Blue Flax	Linium lewisii	1.0
CA Bluebells	Phacelia campanularia	1.0
Showy Goldeneye	Viguiera multiflora	.05
	TOTAL PURE LIVE SEED (PLS) PER ACRE	14.0

E. Mulch

1. Trees and shrubs: Well-aged fibrous or shredded bark, old sawdust, pine needles, or leaf mold.

2. Dryland seeding: Certified weed free small grain straw or native hay.

3. Pigmented wood cellulose fibers or paper pulp for hydraulic seeding. Mulch shall form a blotter-like ground cover with moisture absorption and percolation properties, and the ability to cover and hold the seed in contact with the topsoil, yet not inhibit the penetration of seedlings through it.

F. Sod

1. Vigorous, viable, strongly rooted sod, not dormant or less than two (2) years old, free of weeds and undesirable native grasses, insect infestations and fungus, and machine cut to a pad thickness of one inch (1") (25mm) ±¼". Sod shall be composed principally of Kentucky

Bluegrass (Poa pratensis), testing 99.9% pure or native grass as indicated on the plans, or as approved.

PART 3 EXECUTION

3.1 INSTALLATION

A. Topsoil: Spread topsoil as Final Surface Cover to a uniform minimum depth of 4" over all areas scheduled to receive seed or sod. Fertilize proposed seeded locations at rate specified herein. Fine grade areas to a firm even surface, free from lumps or stones. Installation of sod may be done immediately after fine grading, provided the bed is in good condition and not muddy or hard. If it is hard, scarify to a friable condition again.

B. Seeding: Broadcasting will not be allowed, only hydraulic seeding will be allowed.

1. Prior to seeding, areas that have become muddy or hard shall be scarified to a depth of four inches (4") (100 mm), and left in a friable condition. Fertilize at a rate of forty pounds (40 lbs.) (18.2 kilograms) of available nitrogen per acre.

2. Hydraulic methods: Use equipment designed for such work. Seed and water shall be uniformly applied to the areas scheduled to be seeded. Fertilizer, water and approximately 1 ton per acre (2.24 megagrams per hectare) of hydraulic mulch shall be homogeneously mixed and uniformly applied to seeded areas.

C. Sodding:

1. Lay sod parallel to the direction of the slope and in a manner permitting butt joints to alternate. Fit sod pieces tightly together so that no joint is visible and tamp sod firmly and evenly by hand.

2. Roll sod with a 150-pound (68.1 kilograms) roller to level and seal seams. After rolling, water sod until water soaks through into topsoil to a depth of not more than 3 inches (75mm).

3. Water, weed and replace sod, if required, until Substantial Completion. Erect and maintain temporary protection devices where deemed necessary.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. Measurement of Hydroseeding will be made on a square foot basis installed.

B. Measurement of Bluegrass Sod will be made on a square foot basis installed.

C. Measurement of Native Sod will be made on a square foot basis installed.

4.2 BASIS OF PAYMENT

A. Payment for Hydroseeding, Bluegrass Sod, and Native Sod will be made at the contract unit price per square foot of each installed; said price being full compensation for supply and install of each as described herein.

END OF SECTION

SECTION 03100

CONCRETE FORMWORK

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Formwork for cast-in place concrete, with shoring, bracing and anchorage.

B. Openings for other work.

C. Form accessories.

D. Form stripping.

1.2 RELATED SECTIONS

A. Section 02528 – Combined Curb and Gutter

B. Section 02776 – Concrete Flatwork.

C. Section 03200 - Concrete Reinforcement.

D. Section 03300 - Cast-In-Place Concrete.

E. Section 03304 - Portland Cement Concrete

F. Section 03370 – Concrete Curing

1.3 REFERENCES

A. ACI 301 – Specifications for Structural Concrete.

B. ACI 318 - Building Code Requirements for Reinforced Concrete.

C. ACI 347 – Guide to Formwork for Concrete.

D. ACI 350 - Environmental Engineering Concrete Structures.

1.4 DESIGN REQUIREMENTS

A. Design, engineering, and construction of the formwork is the responsibility of the contractor. Formwork engineering, construction, shoring, bracing, and removal shall conform to ACI 301 and ACI 347 code requirements. All components and members of the structure shall be cast to the correct dimensions, shape, alignment, elevation, and position as indicated on the drawings and without excessive deflection.

PART 2 PRODUCTS

2.1 FORM MATERIALS

A. Preformed Steel, Glass Fiber Fabric Reinforced Plastic, or Wood, at the discretion of the Contractor. Forms shall be matched, tight fitting, and stiffened to support weight of concrete without deflection detrimental to tolerances and appearance of finished surfaces.

2.2 FORMWORK ACCESSORIES

A. Form Ties: Form ties shall permit tightening of the forms and leave no metal or other material within 1 ½ inches of the surface. After forms removal, the void left from the form ties shall be cone shaped, at least 1 inch in diameter and 1 ½ inches deep, to allow filling and patching. When a portion of single rod ties are to remain, there should be a tightly fitted washer at the midpoint.

B. Form Release Agent: Form surfaces should be coated with an effective bond-breaking form coating. When applying in the field, the form release agent should be applied in a manner that prohibits contact with the steel reinforcement and adjacent concrete surfaces.

C. Corners: Chamfered wood strip, 3/4 x 3/4 inch size; maximum possible lengths.

D. Embedments: Anchor bolts, pipe sleeves, formed openings, reinforcement, water stops, and other anchorages shall be securely placed in the locations shown on the drawings, and of sufficient strength and character to maintain accurate placement while placing concrete.

E. Waterstops: 6” RCB TPV waterstops, manufactured by JP Specialties, Inc. are required at all construction joints. Joints shall be fully welded and “T” sections shall be used at wall intersections and “L” sections shall be used at all corners.

PART 3 EXECUTION

3.1 EXAMINATION

A. Prior to placing concrete, forms shall be inspected for cleanliness, alignment accuracy, and reinforcing steel clearances. Inspection ports should be provided if, in the opinion of the inspector, they are necessary to properly clean and inspect the interior of the formed element.

3.2 ERECTION - FORMWORK

A. Erect, shore and brace formwork to achieve design requirements, in accordance with ACI 301, 347, and 318.

B. Align joints and make watertight. Keep form joints to a minimum.

C. Obtain approval before framing openings which are not indicated on Drawings.

D. Provide chamfer strips on external corners of walls.

E. Coordinate this section with other sections of work which require attachment of components to formwork.

F. Formwork shall be placed with specified cover over reinforcement as indicated on the drawings.

3.3 APPLICATION - FORM RELEASE AGENT

A. Apply form release agent on formwork in accordance with manufacturer's recommendations.

B. Contact of form release agent on reinforcing steel, anchoring devices, embedded items, and adjacent concrete surfaces is not permitted.

3.4 INSERTS, EMBEDDED PARTS, AND OPENINGS

A. Provide formed openings where required for items to be embedded in passing through concrete work.

B. Locate and set in place items which will be cast directly into concrete.

C. Coordinate with work of other sections in forming and placing openings, sleeves, bolts, anchors, other inserts, and components of other Work.

D. Install accessories in accordance with manufacturer's instructions, straight, level, and plumb. Ensure items are not disturbed during concrete placement.

E. Install waterstops continuously without displacing reinforcement in accordance with drawings. Provide a minimum 1” clear between waterstops and reinforcing steel.

G. Close temporary openings with tight fitting panels, flush with inside face of forms, and neatly fitted so joints will not be apparent in exposed concrete surfaces.

3.5 FORM CLEANING

A. Clean forms as erection proceeds, to remove foreign matter within forms.

B. Clean formed cavities of debris prior to placing concrete.

C. Flush with water or use compressed air to remove remaining foreign matter. Ensure that water and debris drain to exterior through clean-out ports.

D. During cold weather, remove ice and snow from within forms. Do not use de-icing salts. Do not use water to clean out forms, unless formwork and concrete

construction proceed within heated enclosure. Use compressed air or other means to remove foreign matter.

3.6 FORMWORK TOLERANCES

A. Construct formwork to maintain tolerances required by ACI 301.

3.7 FORM REMOVAL

A. Removal of formwork shall be in accordance with ACI 347.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 There will be no separate measurement or payment for work specified herein, and all costs connected therewith shall be included other project work components.

END OF SECTION

SECTION 03200

CONCRETE REINFORCEMENT

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Reinforcing steel bars, and accessories for cast-in-place concrete.

1.2 RELATED SECTIONS

A. Section 03100 - Concrete Formwork.

1.3 REFERENCES

A. ACI 301 - Specification for Structural Concrete for Buildings.

B. ACI 318 - Building Code Requirements for Reinforced Concrete.

C. ACI SP-66 - American Concrete Institute - Detailing Manual.

D. ACI 117 – Standard Tolerances for Concrete Construction and Materials.

E. ASTM A 615/A 615M - Deformed and Plain Billet Steel Bars for Concrete Reinforcement.

F. CRSI - Concrete Reinforcing Steel Institute - Manual of Standard Practice.

G. CRSI - Placing Reinforcing Bars, 8th edition.

1.4 SUBMITTALS

A. Section 01340 - Submittals: Submit certified copy of mill test report for reinforcing bars.

B. Section 01340 - Shop Drawings: Submit Shop Drawings indicating bar sizes, spacings, locations, and quantities of reinforcing steel, bending and cutting schedules, and supporting and spacing devices.

1.5 QUALITY ASSURANCE

A. Perform Work in accordance with CRSI Manual of Standard Practice.

B. Reinforcing steel shall be stored off the ground and protected from oil, dirt, and other deleterious materials.

C. Reinforcement placement shall be inspected and approved by the Engineer prior to each concrete pour.

1.6 COORDINATION

A. Coordinate with placement of formwork, formed openings and other work.

PART 2 PRODUCTS

2.1 REINFORCEMENT

A. Reinforcing Steel: ASTM A 615, 60 ksi yield strength, deformed bars, uncoated.

2.2 ACCESSORIES

A. Tie Wire: 16.5 gauge or heavier black annealed.

B. Chairs, Bolsters, Bar Supports, Spacers: Sized and shaped for strength and support of reinforcement during concrete placement conditions. Bar supports shall be made from steel wire, plastic, or precast concrete.

2.3 FABRICATION

A. Fabricate concrete reinforcing accurately to the dimensions shown in the drawings and in accordance with CRSI Manual of Standard Practice or the ACI Detailing Manual.

B. Reinforcing bars shall be bent cold using appropriate bending tools, and should not be bent in a manner that will injure the material.

C. Welding reinforcing bars as an aid to fabrication or placement is not permitted.

D. Locate reinforcing splices not indicated on drawings, at point of minimum stress. Review location of splices with Engineer.

PART 3 EXECUTION

3.1 PLACEMENT

A. Reinforcing steel placement shall conform to CRSI - Placing Reinforcing Bars.

B. Concrete cover, splices, and spacing of reinforcing shall conform to ACI 318 unless noted otherwise on the drawings. Placement tolerances shall be within those provided in ACI 117.

C. Reinforcing bars shall be securely tied to prevent displacement. All dowels, anchorages, waterstops, formwork for openings, and other embedments shall be secured in place before depositing concrete unless approved by the engineer. Do not deviate from required position.

D. Accommodate placement of formed openings. When necessary to move or alter reinforcement at openings, conduits, or other embedded items, acceptance by the Engineer is required.

E. Splices shall be places as indicated on the drawings unless otherwise permitted.

F. Reinforcement with kinks or improper bends shall not be used. Reinforcement shall not be bent or straightened in a manner that will injure the material. Reinforcing bars partially embedded in hardened concrete shall not be field bent except for realignment up to a 30 degree bend.

3.2 FIELD QUALITY CONTROL

A. Field inspection shall be performed and approval is required by the engineer prior to placing concrete for each pour.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 No separate measurement or payment will be made for items under this section. Full compensation shall be considered as included in the prices paid for the various contract items and no additional compensation will be allowed therefore.

END OF SECTION

SECTION 03300

CAST-IN-PLACE CONCRETE

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Cast-in-place concrete footings, floors, shear walls, foundation walls, wet wells, and loading docks.

B. Floors and slabs on grade.

C. Control, expansion and contraction joint devices associated with concrete work including joint sealants, curbs, retaining walls and valley gutters.

D. Equipment pads, thrust blocks and manhole bases.

1.2 PRODUCTS FURNISHED BUT NOT INSTALLED UNDER THIS SECTION

A. Section 03304 - Concrete Formwork: Placement of joint device, joint device anchors, dowel bars.

1.3 RELATED SECTIONS

A. Section 03100 - Concrete Formwork: Formwork and accessories.

B. Section 03200 - Concrete Reinforcement.

C. Section 03370 - Concrete Curing.

1.4 REFERENCES

A. ACI 211.1 - Selecting Proportions for Normal, Heavyweight, and Mass Concrete.

B. ACI 301 - Structural Concrete for Buildings.

C. ACI 302 - Guide for Concrete Floor and Slab Construction.

D. ACI 304 - Recommended Practice for Measuring, Mixing, Transporting and Placing Concrete.

E. ACI 305R - Hot Weather Concreting.

F. ACI 306R - Cold Weather Concreting.

G. ACI 308 - Standard Practice for Curing Concrete.

H. ACI 318 - Building Code Requirements for Reinforced Concrete.

I. ASTM C33 - Concrete Aggregates.

J. ASTM C94 - Ready-Mixed Concrete.

K. ASTM C150 - Portland Cement.

L. ASTM C260 - Air Entraining Admixtures for Concrete.

M. ASTM C494 - Chemical Admixtures for Concrete.

N. ASTM C948 - Test Method for Dry and Wet Bulk Density, Water Absorption and Apparent Porosity of Thin Sections of Glass-Fiber-Reinforced Concrete.

O. ASTM D994 - Preformed Expansion Joint Filler for Concrete (Bituminous Type).

P. ASTM D1190 - Concrete Joint Sealer, Hot-Poured Elastic Type.

Q. ASTM D1751 - Preformed Expansion Joint Fillers for Concrete Paving and Structural Construction (Non-extruding and Resilient Bituminous Types).

R. ASTM D1752 - Preformed Sponge Rubber and Cork Expansion Joint Fillers for Concrete Paving and Structural Construction.

S. ACI 544 - State of the Art Report of Fiber Reinforced Concrete.

T. ACI 544.2R - Measurement of Properties of Fiber Reinforced Concrete.

1.5 SUBMITTALS FOR REVIEW

A. Section 01340 - Submittals: Procedures for submittals.

B. Product Data: Provide data on joint devices, attachment accessories, admixtures and mix design.

C. Manufacturer's Installation Instructions: Indicate installation procedures and interface required with adjacent Work.

1.6 PROJECT RECORD DOCUMENTS

A. Submit under provisions of Section 01700.

B. Accurately record actual locations of embedded utilities and components which are concealed from view.

1.7 QUALITY ASSURANCE

A. Perform Work in accordance with ACI 301.

B. Maintain one copy of document on site.

C. Acquire cement and aggregate from same source for all work.

D. Conform to ACI 305R when concreting during hot weather.

E. Conform to ACI 306R when concreting during cold weather.

PART 2 PRODUCTS

2.1 CONCRETE MATERIALS

A. Cement: ASTM C150, Type IIA - Air Entraining.

B. Fine and Coarse Aggregates: ASTM C33.

C. Water: Clean and not detrimental to concrete.

D. Glass Fiber Reinforcement: ASTM C948, where called for in floor slabs.

2.2 ADMIXTURES

A. Air Entrainment: ASTM C260.

B. Chemical: ASTM C494 Type A - Water Reducing, may be utilized only after consultation with the Engineer.

C. Fibrillated polypropylene Fibers: 1.5 lbs/cy.

2.3 ACCESSORIES

A. Bonding Agent: When specifically allowed by the Engineer, shall be Polymer resin emulsion.

B. Vapor Retarder: 6 mil thick fabric reinforced plastic film, type recommended for below grade application.

C. Non-Shrink Grout: Premixed compound consisting of non-metallic aggregate, cement, water reducing and plasticizing agents; capable of developing minimum compressive strength of 2,400 psi in 48 hours and 7,000 psi in 28 days.

2.4 JOINT DEVICES AND FILLER MATERIALS

A. Joint Filler Type A: ASTM D1751; Asphalt impregnated fiberboard or felt, 1/2 thick.

B. Joint Filler Type B: ASTM D1752; Closed cell molded vinyl foam, resiliency recovery of 95 percent if not compressed more than 50 percent of original thickness.

C. Construction Joint Devices: Integral galvanized steel or extruded plastic; formed to tongue and groove profile, with removable top strip exposing sealant trough, knockout holes spaced at 6 inches, ribbed steel spikes with tongue to fit top screed edge.

D. Expansion and Contraction Joint Devices: ASTM B221; resilient elastomeric vinyl filler strip with a Shore A hardness of 35 to permit plus or minus 25 percent joint movement with full recovery; vinyl cover plate, of longest manufactured length at each location, recessed mounted; color as selected.

2.5 CONCRETE MIX

A. Mix and deliver concrete in accordance with ASTM C94, Alternative No. 2. Alternative No. 2 requires the concrete supplier to provide concrete to specified performance criteria.

B. Select proportions for normal weight concrete in accordance with ACI 301 Method 1. Method 1 requires the concrete supplier to provide mix design and strength by trial batch.

C. Provide concrete to the following criteria:

CONCRETE MIX PROPERTIES			
CONCRETE PROPERTIES	Class 4000	Class 3000	Class 2000
Specified Compressive Strength f_c' at 28 days, min., psi	4000	3000	2000
Compressive Strength at 7 days, psi, min.	2680	2010	1430
Cement content (94 lb. sacks of cement per cubic yard of concrete), min.	6.0	5.5	4.5
Entrained air content, (% by column)	6±1	6±1 ±1.5	4.5
Slump Range, in.	1-4	1-4	2-5
Max. Water Cement Ratio	0.49	0.53	0.58

D. Use accelerating admixtures in cold weather only when approved by Architect/Engineer. Use of admixtures will not relax cold weather placement requirements.

E. Calcium chloride cannot be used.

F. Use set retarding admixtures during hot weather only when approved by Architect/Engineer.

G. Add air entraining agent to normal weight concrete mix for work exposed to exterior.

H. Add polypropylene fibrillated fibers to concrete at 1.5 lbs/cy where called for.

PART 3 EXECUTION

3.1 EXAMINATION

A. Verify site conditions under provisions of Section 01039.

B. Verify requirements for concrete cover over reinforcement.

C. Verify that anchors, seats, plates, reinforcement and other items to be cast into concrete are accurately placed, positioned securely, and will not cause hardship in placing concrete.

3.2 PREPARATION

A. Prepare previously placed concrete by cleaning with steel brush and applying bonding agent in accordance with manufacturer's instructions.

B. In locations where new concrete is dowelled to existing work, drill holes in existing concrete, insert steel dowels and pack solid with non-shrink grout.

C. Coordinate the placement of joint devices with erection of concrete formwork and placement of form accessories.

3.3 PLACING CONCRETE

A. Place concrete in accordance with ACI 304.

B. Notify Engineer minimum 24 hours prior to commencement of operations.

C. Ensure reinforcement, inserts, embedded parts, formed expansion and contraction joints, and mechanical or electrical embeds are not disturbed during concrete placement.

D. Install vapor retarder under interior slabs on grade. Lap joints minimum 6 inches and seal watertight by taping edges and ends.

E. Repair vapor retarder damaged during placement of concrete reinforcing. Repair with vapor retarder material; lap over damaged areas minimum 6 inches and seal watertight.

F. Separate slabs on grade from vertical surfaces with 1/2 inch thick joint filler.

G. Place joint filler in floor slab pattern placement sequence. Set top to required elevations. Secure to resist movement by wet concrete.

H. Extend joint filler from bottom of slab to within 1/4 inch of finished slab surface. Conform to Section 07900 for finish joint sealer requirements.

I. Install joint devices in accordance with manufacturer's instructions.

J. Install construction joint devices in coordination with floor slab pattern placement sequence. Set top to required elevations. Secure to resist movement by wet concrete.

K. Install joint device anchors. Maintain correct position to allow joint cover to be flush with floor and wall finish.

L. Install joint covers in longest practical length, when adjacent construction activity is complete.

M. Apply sealants in joint devices in accordance with Section 07900.

N. Maintain records of concrete placement. Record date, location, quantity, air temperature, and test samples taken.

O. Place concrete continuously between predetermined expansion, control, and construction joints.

P. Do not interrupt successive placement; do not permit cold joints to occur.

Q. Place floor slabs in checkerboard pattern indicated.

R. Saw cut joints within 24 hours after placing. Use 3/16 inch thick blade, cut to 1/4 depth of slab thickness, unless noted otherwise on the drawings.

S. Screed floors and slabs on grade level, maintaining surface flatness of maximum 1/4 inch in 10 ft.

3.4 SEPARATE FLOOR TOPPINGS

A. Prior to placing floor topping, remove deleterious material. Broom and vacuum clean.

B. Place required dividers, edge strips, reinforcing and other items to be cast in.

C. Apply bonding agent to substrate in accordance with manufacturer's instructions.

D. Place concrete floor toppings to required lines and levels. Place topping in checkerboard panels, dimension not to exceed 20 ft.

E. Screed toppings level, maintaining surface flatness of maximum 1/8 inch in 10 feet.

3.5 CONCRETE FINISHING

A. Provide formed concrete surfaces to be left exposed, including concrete walls, columns and beams with smooth rubbed finish, using sand and cement grout.

B. Finish concrete floor surfaces shall vary no more than 1/4-inch per 10 feet.

C. Steel trowel surfaces which will receive resilient flooring.

D. Steel float surfaces which are scheduled to be exposed or painted; final texture shall be non-slip broom finish.

E. In areas with floor drains, maintain floor elevation at walls; pitch surfaces uniformly to drains as indicated on drawings.

3.6 CURING AND PROTECTION

A. Immediately after placement, protect concrete from premature drying, excessively hot or cold temperatures, and mechanical injury.

B. Maintain concrete with minimal moisture loss at relatively constant temperature for period necessary for hydration of cement and hardening of concrete.

C. Cure concrete floor surfaces to requirements of Section 03370.

3.7 FIELD QUALITY CONTROL

A. The Engineer's Resident Project Representative will provide: Field inspection and testing.

B. Provide free access to Work and cooperate with appointed firm.

C. Submit proposed mix design of each class of concrete to testing firm for review prior to commencement of Work.

D. Tests of cement and aggregates may be performed to ensure conformance with specified requirements.

E. Three concrete test cylinders will be taken for every 100 or less cu yds of concrete placed.

F. One additional test cylinder will be taken during cold weather concreting, cured on job site under same conditions as concrete it represents.

G. One slump test will be taken for each set of test cylinders taken.

3.8 PATCHING

A. Allow Engineer to inspect concrete surfaces immediately upon removal of forms.

B. Honeycomb or embedded debris in concrete is not acceptable. Notify Engineer upon discovery.

C. Patch imperfections as directed and in accordance with ACI 301.

3.9 DEFECTIVE CONCRETE

A. Defective Concrete: Concrete not conforming to required lines, details, dimensions, tolerances or specified requirements.

B. Repair or replacement of defective concrete will be determined by the Engineer.

C. Do not patch, fill, touch-up, repair, or replace exposed concrete except upon express direction of Engineer for each individual area.

3.10 SCHEDULE - CONCRETE TYPES

A. Class 3,000 A Concrete: All finish concrete as indicated including curb and thrust blocks: 3,000 psi 28-day concrete.

B. Class 4,000 B Concrete: All concrete including structural foundation and walls, deck topping, equipment pads, floors and sidewalks: 4,000 psi 28 day concrete.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 This work is subsidiary and part of the various types of concrete work and will be paid for under those items. No separate measurement or payment will be made under this section.

END OF SECTION

SECTION 03304

PORTLAND CEMENT CONCRETE

PART 1 GENERAL

1.1 SUMMARY

A. Portland cement concrete material requirements for all project-wide concrete work.

1.2 SUBMITTALS

A. Mix Design: Submit each proposed mix design 14 days prior to use in the Work. Indicate whether mixes have been designed for pumping. Include in the report the following information.

1. Water-cement ratio.
2. Proportion of materials in the mix.
3. Source and type of cement.
4. Analysis of water to be used unless potable.
5. Type and name of admixtures applied. Indicate when accelerating or retarding admixtures are to be used and the resulting change in placement times.
6. Slump, air content, and temperature of samples.
7. Unit weight of fresh and dry light weight concrete.

B. Concrete Quality Charts. Comply with ACI 214 and ACI 301, and submit the following.

1. Specified strength (f_c').
2. Required average strength (f_{cr}).
3. Compressive strength versus date of sample.

C. Optional design mix:

1. At the CONTRACTOR's option, he may elect to provide a concrete mix that has been previously designed, tested, and used and which provides the quality required by these Specifications.

2. If this CONTRACTOR exercises this option, he shall submit to the ENGINEER for his approval all pertinent data, including test results to substantiate the design mix requested to be furnished.

D. Aggregate Test Report: Submit for each aggregate source.

1. Date of test analysis.

2. Sieve analysis.

3. Organic impurities.

4. Sodium sulfate soundness test.

5. Reactivity of aggregate.

6. Complete identification of aggregate source of supply.

1.3 QUALITY ASSURANCE

A. Do not change material sources, type of cement, air-entraining agent, water reducing agent, other admixtures, or aggregate without ENGINEER's approval.

B. In proportioning materials for mixing, use scales certified by the State of Wyoming. No not use volume measurement except for water and liquid admixtures.

C. Do not change the quantity of cement per cubic yard from approved mix design without written approval of ENGINEER.

D. Use of admixture will not relax hot or cold weather placement requirements.

E. Ready-mixed concrete to be in accordance with Alternate No. 3 of ASTM C 94 and requirements in this Section.

F. Control Testing of Concrete: In Accordance with Section 03305.

1.4 REFERENCES

A. AASHTO 26: Standard Practice for Selecting Proportions for Normal, Heavyweight, and Mass Concrete.

B. ACI 211.1: Standard Practice for Selecting Proportions for Normal, Heavyweight, and Mass Concrete.

C. ACI 211.2: Standard Practice for Selecting Proportions for Structural Lightweight Concrete.

D. ACI 211.3: Standard Practice for Selecting Proportions for Non-Slump Concrete.

E. ACI 214: Recommended Practice for Evaluation of Strength Test Results of Concrete. F.ACI 301: Specifications for Structural Concrete for Buildings.

F. ASTM C 33: Standard Specification for Concrete Aggregates.

G. ASTM C 88: Standard Test Method for Soundness of Aggregates by Use of Sodium Sulfate or Magnesium Sulfate.

H. ASTM C 94: Standard Specification for Ready-Mix Concrete.

I. ASTM C 150: Standard Specification for Portland Cement.

J. ASTM C 260: Standard Specification for Air-Entraining Admixtures for Concrete.

K. ASTM C 289: Standard Test Method for Potential Reactivity of Aggregates (Chemical Method).

L. ASTM C 494: Standard Specification for Chemical Admixtures for Concrete.

M. ASTM C 618: Standard Specification for Fly Ash and Raw or Calcined Natural Pozzolan for use as a Mineral Admixture in Portland Cement Concrete.

1.5 DEFINITIONS

A. Average Strength (f_{cr}): The required average strength for 30 consecutive strength tests which statistically assures no more than the permissible proportions of tests will fall below Specified Strength.

B. Specified Strength (f_c'): The indicated strength.

1.6 PRODUCT STORAGE AND HANDLING

A. Store bagged and bulk cement in weatherproof enclosures to exclude moisture and contaminants.

B. Stockpile aggregate to avoid segregation and prevent contamination.

C. Avoid contamination, evaporation, or damage to admixtures. Protect liquid admixtures from freezing.

PART 2 PRODUCTS

2.1 CEMENT

A. ASTM C 150, Type V, except that cement utilized within water line thrust blocks requiring a quick set or within concrete paving as described in Section 02776 shall be Type III, High Early Strength.

B. Do not use air entraining cement.

2.2 WATER

A. Clean, potable and free from injurious amounts of foreign matter.

B. Comply with AASHTO 26.

2.3 AGGREGATES - GENERAL

A. Gravel, crushed slag, crushed stone, or other inert materials, composed of hard, strong, durable particles free of injurious coatings.

B. The materials passing the No. 200 sieve shall not exceed 1.75 percent by weight in the combined coarse and fine aggregate.

2.4 COARSE AGGREGATE

A. Sieve Analysis: Graded in accordance with ASTM C 33, as indicated in Table No. 03304-2.04, Grade 57.

B. Gradation limits of Table No. 03304, Subsection 2.04 may be changed if, in the judgment of the ENGINEER, workability and methods of consolidation are such that concrete can be placed without honeycomb or voids, and the maximum aggregate size does not exceed the following requirements:

1. 1/5 of narrowest dimension between forms.
2. 1/3 of depth of slabs.
3. 3/4 of minimum clear spacing between reinforcing bars.

C. Deleterious Substances: Maximum percentage by weight.

4. Soft Fragments:	2.0 percent
5. Coal and Lignite:	0.3 percent
6. Clay Lumps:	0.3 percent
7. Other Deleterious Substances:	2.0 percent

TABLE No. 03304-2.04

MASTER GRADING BAND LIMITS FOR COARSE AGGREGATE

No. 4	95	100
No. 16	45	80
No. 50	10	30
No. 100	2	10
No. 200	0	4

B. Deleterious Substances: Maximum percentage by weight.

1. Coal and Lignite: 0.3 percent
2. Clay Lumps: 0.5 percent
3. Other Deleterious Substances: 2.0 percent

2.6 SOUNDNESS AND REACTIVITY OF AGGREGATE

A. Determine coarse and fine aggregate soundness in accordance with ASTM C 88.

1. For Coarse Aggregate: Weight loss; not exceeding 12 percent by weight when subjected to 5 cycles of sodium sulfate or 18 percent by weight when subjected to 5 cycles of magnesium sulfate.

2. For Fine Aggregate: Weight loss; not exceeding 10 percent by weight when subjected to 5 cycles of sodium sulfate or 15 percent by weight when subjected to 5 cycles of magnesium sulfate.

B. Determine alkali-silica reactivity in accordance with ASTM C 289. Do not use aggregates determined either potentially or actually deleterious unless service records have shown the aggregates to be innocuous and ENGINEER approves.

2.7 ADMIXTURES

A. Air Entrainment: ASTM C 260.

B. Calcium Chloride: None allowed.

C. Fiber mesh is required in all concrete except for below-ground structures. Admixture shall conform to ASTM C-1116 Type III 4.1.3 with 100% homopolymer polypropylene fibrillated fibers at 1.5 pounds per cubic yard.

2.8 ACI MIX DESIGN

A. The amount by which the average strength (f_{cr}) of a concrete mix exceeds the specified compressive strength (f_c') shall be based upon no more than 1 in 100 random individual strength tests falling more than 500 psi below the specific strength.

B. Proportion the materials in accordance with ACI 211.1, 211.2, or 211.3 as applicable to produce concrete having the properties or limitations of Table No. 03304-2.08, Class 4000 unless otherwise designated.

2.9 HAND MIXING

A. Do not hand mix batches exceeding 0.5 cubic yards.

B. Hand mix only on watertight platform. Mix cement and aggregate prior to adding water.

C. Ensure all stones are thoroughly covered with mortar and mixture is of uniform color and consistency.

2.10 HEATING, WATER, AND AGGREGATE

A. Do not allow products of fuel combustion to contact the aggregate.

B. Heat mixing water to 150ºF. maximum. Heat aggregates uniformly.

C. Do not mix cement with water and aggregate at a mix temperature greater than 100ºF.

TABLE No. 03304-2.08

CONCRETE MIX PROPERTIES						
CONCRETE PROPERTIES	CLASS 7000	CLASS 6000	CLASS 4500	CLASS 4000	CLASS 3000	CLASS 2000
Specified Compressive Strength f_c' at 28 days, min., psi	7000	6000	4500	4000	3000	2000
Compressive Strength at 7 days, psi, min. (a)	4690	4020	3015	2680	2010	1430
Cement content (94 lb. sacks of cement per cubic yard of concrete), min.(b)	(c)	(c)	7	6.0	5.5	4.5
Entrained air content, (% by column)	(d)	(d)	5.5 ±1.5	4-7	6 ±1.5	4.5
Slump Range, in. (e)	2-4	2-4	2-4	2-3 1/2	2-4	2-5

1. Used for monitoring purposes only. Not applicable to High Early Strength cement.

2. Includes pozzolan replacements.

3. Cement content shall be appropriate to produce a mixture meeting the requirements for water/cement ratio and workability for the specific job conditions.

4. Air content shall be appropriate to the exposure conditions.

5. Not more than 8 inches after adding high range water reducing admixture (super-plasticizer) at site.

PART 3 EXECUTION - NOT USED

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. This work will not be measured for payment.

4.2 BASIS OF PAYMENT

A. No separate payment will be made for items under this section. Compensation for concrete supply shall be considered as included in the prices to be paid for each respective item of work included in the bid schedule where concrete work is required.

END OF SECTION

SECTION 03370

CONCRETE CURING

PART 1 GENERAL

1.1 SECTION INCLUDES

A. Initial and final curing of horizontal and vertical concrete surfaces.

1.2 RELATED SECTIONS

A. Section 03304 – Portland Cement Concrete.

1.3 REFERENCES

A. ACI 301 - Structural Concrete for Buildings.

B. ACI 302 - Recommended Practice for Concrete Floor and Slab Construction.

C. ACI 308 - Standard Practice for Curing Concrete.

D. ASTM C 171 - Sheet Materials for Curing Concrete.

E. ASTM C309 - Liquid Membrane-Forming Compounds for Curing Concrete.

F. ASTM D2103 - Polyethylene Film and Sheeting.

1.4 SUBMITTALS

A. Submit under provisions of Section 01340.

B. Product Data: Provide data on curing compounds, film, compatibilities, and limitations.

C. Procedure: Provide summary of curing procedures to be utilized.

1.5 QUALITY ASSURANCE

A. Perform Work in accordance with ACI 301 and ACI 302.

B. Maintain one copy of each document on site.

1.6 DELIVERY, STORAGE, AND HANDLING

A. Deliver, store, protect, and handle curing materials according to manufacturer’s recommendations and in manufacturer's packaging including application instructions.

PART 2 PRODUCTS

2.1 MATERIALS

A. Membrane Curing Compound Type A: ASTM C309 Type 1 Class A chlorinated rubber type, clear or colored as indicated in subsection 3.2 and 3.3.

B. Water: Potable, not detrimental to concrete.

PART 3 EXECUTION

3.1 EXECUTION

A. Concrete shall be maintained above 50 degrees F and in a moist condition for at least the first 7 days after placement.

3.2 EXECUTION - HORIZONTAL SURFACES

A. Concrete curing shall be performed in accordance with ACI 308 unless modified by the construction documents.

B. Maintain 100 percent coverage of water over floor slab areas, continuously for 7 days or the time necessary to achieve 70 percent of the design compressive strength, whichever is less.

C. Membrane Curing Compound: Apply curing compound in accordance with manufacturer's instructions in two coats with second coat applied at right angles to first. Curing compound shall not be used on surfaces where additional concrete will be poured unless it is demonstrated that it will not jeopardize bonding.

3.3 EXECUTION - VERTICAL SURFACES

A. Concrete curing shall be performed in accordance with ACI 308 unless modified by the construction documents.

B. Keep absorbent wooden forms wet until removal.

C. After form removal cure concrete by one of the following methods :

1. Ponding, continuous fogging, or continuous sprinkling

2. Application of fabric or mats kept continuously wet

3. Continuous application of steam

4. Application of sheet materials conforming to ASTM C171

5. Application of curing compound conforming to ASTM C309 or C1315

6. Spraying water over surfaces and draping with 4 mil thick polyethylene film, maintain wet for 7 days.

7. Application of other accepted moisture-retaining method

3.4 PROTECTION OF FINISHED WORK

A. Protect finished work from cosmetic and structural damage.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 No separate payment will be made for items under this section. Compensation for concrete supply shall be considered as included in the prices to be paid for each respective item of work included in the bid schedule where concrete work is required.

END OF SECTION

SECTION 16000

SOLAR POWER STREET LIGHTS

PART 1 GENERAL

1.1 SUMMARY

A. This section includes the supply and install of solar power street lights, including fixtures and concrete bases.

1.2 SUBMITTALS

A. Submit for approval material products for approval.

1.3 DELIVERY, STORAGE AND HANDLING

A. Deliver, store and handle other materials in accordance with manufacturer's instructions.

PART 2 PRODUCTS

2.1 MATERIALS

A. Solar Powered Street Lights

1. Lights and poles shall be ClearWorld RS260 Retroflex System
2. Solar array shall be 260W with adjustable aluminum array.
3. Lighting to be 40W with type 3 3000K LED light fixture
4. Battery to be 24V-60 AH lithium ion 1.44 KWH
5. Provided with smart MPPT solar charge controller/regulator
6. Capable of Bluetooth monitoring. +

B. Concrete to meet the requirements of Division 3 specifications.

PART 3 EXECUTION

3.1 INSTALLATION

A. Install concrete bases per the project drawings.

B. Install lights and poles per manufacturers recommendations.

PART 4 METHOD OF MEASUREMENT AND BASIS OF PAYMENT

4.1 METHOD OF MEASUREMENT

A. Solar Lights will be measured by the each light installed.

4.2 BASIS OF PAYMENT

A. Payment for Solar Lights will be made at the contract unit price per each; said price being full compensation for excavation and backfill, supply and installation of all light and poles, concrete bases, and all other incidentals complete.

SCALES: (22x34)
1"=20' HOR.
1"=5' VER.

NOTES:

1. ALL WATER LINE AND WATER SERVICES SHALL BE TRENCHED PER DETAIL W-100/6.
2. DUE TO OTHER UTILITY CONFLICTS, THE LOCATION OF THE PROPOSED WATER LINE IS IN THE SAME TRENCH OR CLOSE TO THE EXISTING 4"ø WATER LINE. IN THIS SECTION THERE IS ONE (1) EXISTING WATER SERVICE THAT WILL REQUIRE TEMPORARY WATER SERVICE UNTIL THE WATER LINE AND NEW SERVICE ARE CONSTRUCTED. THE EXISTING SOUTHERN VALVE AT THE KARNS STREET CONNECTION SHALL BE CLOSED ALLOWING FOR ABANDONMENT OF THE EXISTING WATER LINE.
3. DUE TO OTHER UTILITY CONFLICTS, THE LOCATION OF THE PROPOSED WATER LINE IS IN THE SAME TRENCH OR CLOSE TO THE EXISTING 4"ø WATER LINE. THERE ARE FIVE (5) EXISTING WATER SERVICES THAT WILL REQUIRE TEMPORARY WATER SERVICE UNTIL THE WATER LINE AND NEW SERVICE ARE CONSTRUCTED. THE EXISTING NORTHERN VALVE AT THE KARNS STREET CONNECTION SHALL BE CLOSED ALLOWING FOR ABANDONMENT OF THE EXISTING WATER LINE.
4. ALL WATER SERVICES SHALL BE INSTALLED PER DETAIL W-102/6. TRENCH REPAIR WIDTH INCLUDING ASPHALT, CONCRETE, GRAVEL, AND LANDSCAPING SHALL NOT EXCEED 13'. ANY REPAIR GREATER THAN 13' WIDE SHALL BE CONTRACTOR RESPONSIBILITY.
5. ALIGNMENT OF THE EXISTING PIPE IS BASED ON LOCATED WATER VALVES AND TOWN OF JACKSON GIS. THE EXACT ALIGNMENT MUST BE DETERMINED IN THE FIELD PRIOR TO PERFORMING THE CONNECTION. CONTRACTOR SHALL UTILIZE EXPLORATORY EXCAVATION TO DETERMINE THE EXACT PIPE TYPE, SIZE, DEPTH, AND LOCATION PRIOR TO CONSTRUCTION OF THE WATER MAIN.
6. NOTE THAT LOCATIONS WHERE A WATER SERVICE IS INDICATED WITHOUT A CURB STOP SYMBOL ($^{o}_{CS}$) THE LOCATION IS ASSUMED. EXPLORATORY EXCAVATION WILL BE REQUIRED TO DETERMINE THE ACTUAL LOCATION IN THE FIELD.
7. ALL FIBER, GAS, AND POWER LOCATIONS ARE APPROXIMATE AND NEED TO BE VERIFIED IN THE FIELD.
8. EXACT LOCATION OF THE WATER SERVICE IS UNKNOWN. CONTRACTOR SHALL UTILIZE EXPLORATORY EXCAVATION TO DETERMINE THE EXACT LOCATION AND PIPE SIZE PRIOR TO CONSTRUCTION.
9. CONTRACTOR SHALL VERIFY EXACT PIPE TYPE, SIZE, DEPTH, AND LOCATION PRIOR TO CONSTRUCTION.
10. SEE SPECIFICATION 01570 FOR TRAFFIC AND ACCESS REQUIREMENTS WHEN INSTALLING THE WATER LINE.
11. IF EXISTING PIPE TO THE SOUTH IS FOUND TO BE FURTHER WEST THAN INDICATED, THIS CONNECTION MAY BE MODIFIED IF ADEQUATE SEPARATION BETWEEN SEWER EXISTS.
12. DEFLECT THE WATER LINE AT A MAXIMUM 2° BETWEEN THE BEND AT 0+44.50 AND THE CONNECTION TO THE EXISTING VALVE CLUSTER TO MAINTAIN ALIGNMENT.
13. CONTRACTOR TO VERIFY THAT THE EXISTING MAIN AND VALVES TO REMAIN HAVE A MINIMUM OF 6' OF COVER. IF NOT, THE EXISTING PIPE TO REMAIN MUST BE INSULATED.
14. CONTRACTOR TO VERIFY EXISTING VALVE CLUSTER LOCATION IS NOT WITHIN THE VALLEY GUTTER FLOW LINE. IF IT IS, VALLEY GUTTER FLOW LINE SHALL BE ADJUSTED TO AVOID VALVE CLUSTER.

CONTRACTOR NOTE:

CAUTION: UNDERGROUND UTILITY LOCATIONS ARE NOT GUARANTEED, NOR IS THERE ANY GUARANTEE THAT ALL EXISTING UTILITIES (WHETHER FUNCTIONAL OR ABANDONED) WITHIN THE PROJECT AREA ARE SHOWN ON THESE DRAWINGS. THE CONTRACTOR SHALL DETERMINE THE EXACT LOCATION OF ALL UNDERGROUND UTILITIES BEFORE STARTING WORK. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL DAMAGE RESULTING FROM CONTRACTORS WORK.

TOWN OF JACKSON, WYOMING

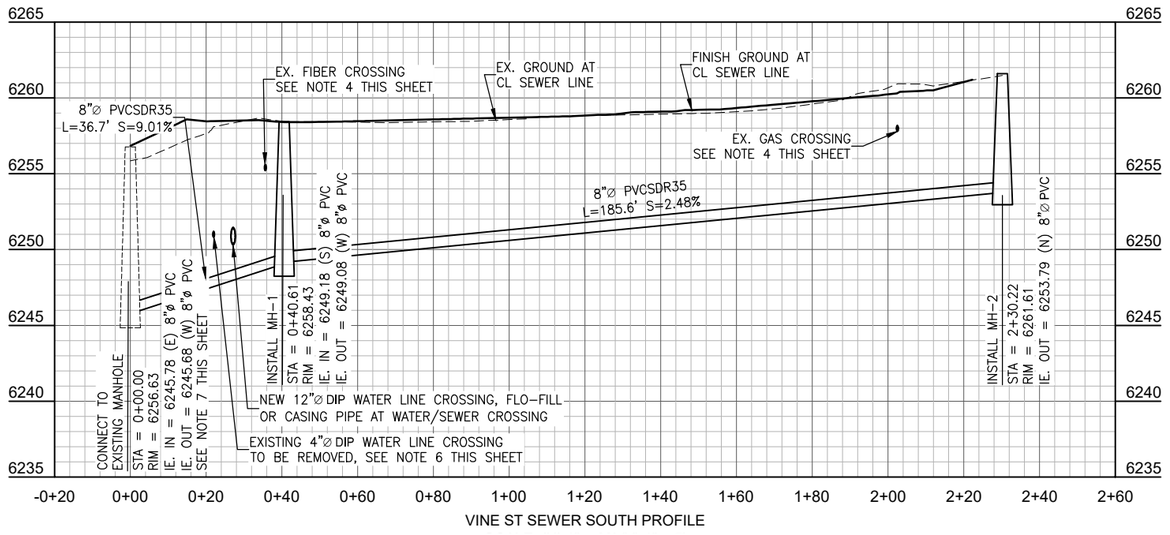
DRAWING NO: 7

JOB NO: 21-411-04

S:\Proj\2021\411-04 (Vine Street Improvements 2026 Construction - Civil\4 Drawings\Civil\VINEST-DETAILS.dwg (WATER CONNECTION DETAILS) - Nov 19 2025 09:56:02 am PLOTTED BY: kong DWG FORMAT: ISO



0 20' 40'

SCALES: (22x34)
1"=20' HOR.
1"=5' VER.

NOTES:
1. ALL SEWER MAIN AND SEWER SERVICES SHALL BE TRENCHED PER DETAIL SS-100/10.
2. ALL SEWER SERVICES SHALL TIE ONTO EXISTING SEWER SERVICE AT PROPERTY BOUNDARY PER DETAIL SS-111/11. TRENCH REPAIR WIDTH INCLUDING ASPHALT, CONCRETE, GRAVEL, AND LANDSCAPING SHALL NOT EXCEED 13'. ANY REPAIR GREATER THAN 13' WIDE SHALL BE CONTRACTOR RESPONSIBILITY.
3. SEE SPECIFICATION 01570 FOR TRAFFIC AND ACCESS REQUIREMENTS WHEN INSTALLING SEWER MAIN A.
4. ALL FIBER, GAS, AND POWER LOCATIONS ARE APPROXIMATE AND NEED TO BE VERIFIED IN THE FIELD.
5. EXISTING WATER LINE ELEVATIONS ARE APPROXIMATE AND DEPTH SHOULD BE DETERMINED PRIOR TO INSTALLATION OF THE SEWER LINE.
6. CONTRACTOR SHALL UTILIZE EXPLORATORY EXCAVATION TO DETERMINE THE EXACT LOCATION, SIZE, PIPE TYPE, AND ELEVATION PRIOR TO ORDERING ANY MANHOLES AND BEGINNING CONSTRUCTION.
7. CORE EXISTING MANHOLE AND INSTALL NEW SEWER MAIN. REMOVE EXISTING GRADE RINGS, ADD A 2' BARREL, AND ADJUST MANHOLE RING AND COVER WITH GRADE RINGS AS REQUIRED TO ADJUST TO FINISH GRADE.
8. SEE SPECIFICATION 02700 SANITARY SEWER SYSTEM FOR TESTING REQUIREMENTS.

CONTRACTOR NOTE:

CAUTION: UNDERGROUND UTILITY LOCATIONS ARE NOT GUARANTEED, NOR IS THERE ANY GUARANTEE THAT ALL EXISTING UTILITIES (WHETHER FUNCTIONAL OR ABANDONED) WITHIN THE PROJECT AREA ARE SHOWN ON THESE DRAWINGS. THE CONTRACTOR SHALL DETERMINE THE EXACT LOCATION OF ALL UNDERGROUND UTILITIES BEFORE STARTING WORK. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL DAMAGE RESULTING FROM CONTRACTORS WORK.

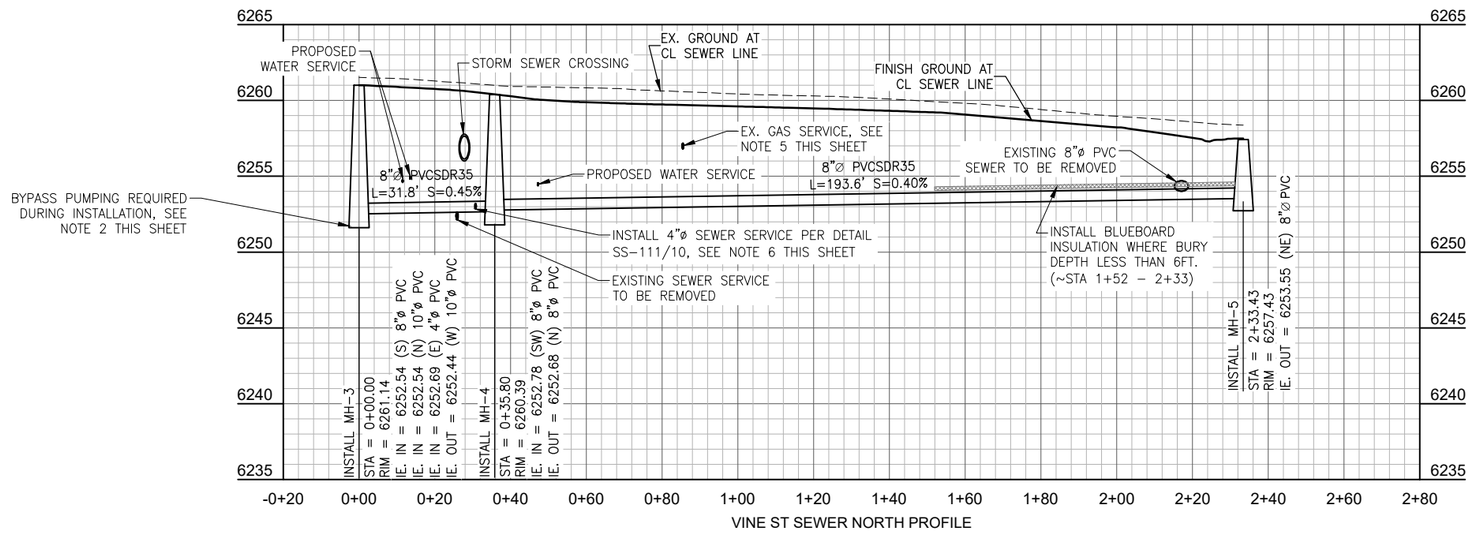
0 20' 40'



SCALES: (22x34)
1"=20' HOR.
1"=5' VER.

NOTES:

1. ALL SEWER MAIN AND SEWER SERVICES SHALL BE TRENCHED PER DETAIL SS-100/10.
2. CONTRACTOR IS RESPONSIBLE FOR PUMPING SEWAGE AROUND THE SECTION OF SEWER MAIN BEING REPLACED. CONTRACTOR SHALL PROVIDE 24 HOUR NOTICE TO ANY RESIDENT THAT WILL BE OUT OF SERVICE DURING THE INSTALLATION. SEE SPECIFICATION 02700 FOR BYPASS PUMPING REQUIREMENTS.
3. REMOVAL OF ALL EXISTING SEWER MAIN AND MANHOLES SHALL BE DISPOSED OF PROPERLY. CONTRACTOR SHALL RECYCLE MATERIALS APPLICABLE AND DELIVER ANY MANHOLE LIDS AND RINGS AS REQUESTED BY TOJ TO PUBLIC WORKS DEPARTMENT. NO OLD PIPE CAN BE USED IN BACKFILL MATERIAL.
4. SEE SPECIFICATION 01570 FOR TRAFFIC AND ACCESS REQUIREMENTS WHEN INSTALLING SEWER MAIN B.
5. ALL FIBER, GAS, AND POWER LOCATIONS ARE APPROXIMATE AND NEED TO BE VERIFIED IN THE FIELD.
6. CONTRACTOR SHALL UTILIZE EXPLORATORY EXCAVATION ON THE EXISTING ASSUMED SEWER SERVICE TO DETERMINE DEPTH, SIZE, AND PIPE ANGLE OUT OF EXISTING CLEANOUT MANHOLE. UTILIZE FITTINGS AS NECESSARY TO CONNECT PROPOSED 4"ø SERVICE TO PROPOSED SEWER MAIN.
7. CONTRACTOR SHALL UTILIZE EXPLORATORY EXCAVATION TO DETERMINE THE EXACT LOCATION, SIZE, PIPE TYPE, AND ELEVATION PRIOR TO ORDERING ANY MANHOLES AND BEGINNING CONSTRUCTION.
8. SEE SPECIFICATION 02700 SANITARY SEWER SYSTEM FOR TESTING REQUIREMENTS.
9. EXISTING MAIN SHALL BE ABANDONED JUST OUTSIDE THE EXISTING MANHOLE BY CUTTING AND CAPPING. THEN INFILL THE CORE INSIDE THE MANHOLE WITH GROUT OR CONCRETE.

CONTRACTOR NOTE:

CAUTION: UNDERGROUND UTILITY LOCATIONS ARE NOT GUARANTEED, NOR IS THERE ANY GUARANTEE THAT ALL EXISTING UTILITIES (WHETHER FUNCTIONAL OR ABANDONED) WITHIN THE PROJECT AREA ARE SHOWN ON THESE DRAWINGS. THE CONTRACTOR SHALL DETERMINE THE EXACT LOCATION OF ALL UNDERGROUND UTILITIES BEFORE STARTING WORK. THE CONTRACTOR SHALL BE RESPONSIBLE FOR ALL DAMAGE RESULTING FROM CONTRACTORS WORK.

STAFF REPORT

Meeting Date:	January 20, 2026	**Meeting Title:**	Regular
Submitting Department:	Public Works	**Presenter:**	Brian Lenz
Agenda Item:	Award Vine Street Improvements Project (Bid 26-10)	**Public Comment:**	Yes

Purpose & Policy Considerations.
The purpose of this item is to 1) award Bid 26-10 (Bid) to Ridgeline Excavation, LLC (Contractor), 2) for the Council to review and approve a contract with the Contractor, in the amount of $1,552,455 for the Vine Street Complete Street Improvements Project (Project), and 3) approve the overall project budget, in the amount of $1,926,855 and associated budget amendments.

Recommendations.
Staff recommend awarding the Bid to the Contractor, approving the associated contract, and approving the overall project budget and associated budget amendments.

Background.
The proposed Project generally consists of the reconstruction of Vine Street in its entirety from Snow King Avenue to Kelly Avenue, about 800 feet, including water main and sanitary sewer upgrades, new sidewalks, and a new roadway.

Vine Street was added to the Capital Improvements Plan in 2017 when the road required significant repairs to keep it in service for START buses. Additionally, the waterline in this corridor has been identified for replacement/upsizing and the corridor has been identified as in need of pedestrian improvements to accommodate existing pedestrian traffic and future traffic that will come from proposed Snow King Resort housing along the east side of the road.

The Project was originally presented to Council at the March 21, 2022, workshop. At that meeting the Council reviewed various alternatives for the corridor and directed staff to proceed with Alternative 3. Alternative 3 provides for bus/truck travel lanes, a combination of attached and detached sidewalks on both sides of the street, without on-street parking. See Figure or the attached full-size PDF for more detail.

While the design includes a sidewalk on the east side of the road, only the northernmost section will be constructed as part of this project. The remaining section to the south will be constructed when the Snow King Resort Housing is built in the future. The sidewalk is continuous along the west side of Vine Street.

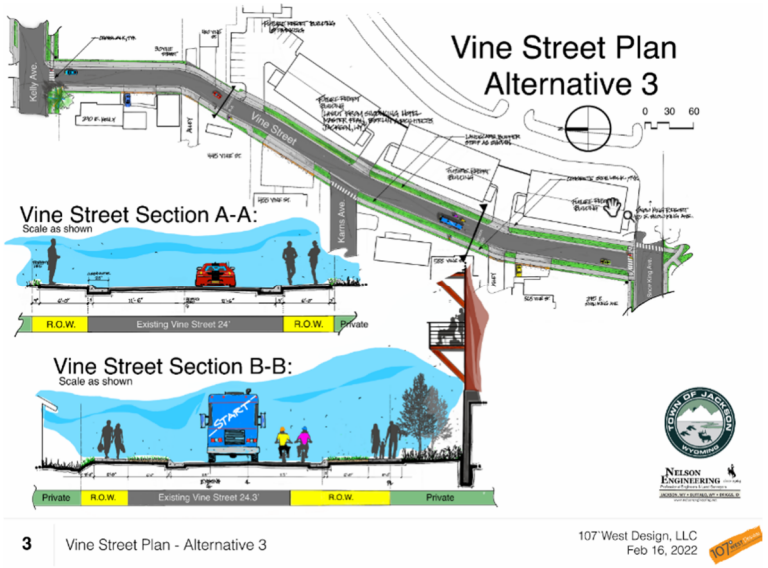

Figure 1 March 21, 2022 Workshop approved Alternative 3

Analysis & Key Policy Questions.
The Project was advertised for bid in the Jackson Hole News & Guide on November 19th and November 26th, as well as posted on the Town's website, and QuestCDN (an online bidding site). A mandatory pre-bid meeting was held on December 10th, that was attended by five general contractors, thus making them eligible to bid on the project. On December 18, 2025, the Town publicly opened the bid for construction of the project. Five bids were received as follows:

CONTRACTOR	BID AMOUNT
***Ridgeline Excavation**	**$1,552,455.00**
**Knife River	*[$1,597,869.00]* $1,521,780.00
**Suncore	*[$1,986,857.25]* $1,892,245.00
Westwood Curtis	$1,990,990.00
Evans Construction	$2,530.240.00

*Low bid with Wyoming Resident Contractor Preference of 5%

**Non-resident (Out of State) Contractor. Price shown in *[$...]* is the bid price plus 5% for determination of lowest bid per Wyoming statute 16-6-102; *"…the contract shall be let to the responsible certified resident making the lowest bid if the certified resident's bid is not more than five percent (5%) higher than that of the lowest responsible nonresident bidder."*

Staff has worked with this contractor on previous projects, they regularly perform this type of work for municipalities.

Due to the cost of the bid being higher than estimated during budgeting, the funding estimated in the FY26 Budget for the Project is not adequate to fund the Project. Staff have documented costs for the project and proposed funding in the Fiscal Impact portion of the Staff Report below.

Staff recommend appropriating funding as outlined in the Fiscal Impact section and awarding the contract as bid. Staff will collaborate with the contractor to find savings where possible.

- **KEY QUESTION**: Does the Council agree with staff's recommendation to award the Project and appropriate the overall project budget?

Possible Alternatives.

Possible alternatives for this item include:

1) The Council could reject the bid and rebid the project at a later date, which would delay the start and in turn completion of the project. Additionally, there are no guarantees that a future bid would be less expensive and possibly could be more expensive.
2) Other

Comprehensive Plan & Priority Alignment.

This project supports the Comprehensive Plan and helps to fulfill the goal of providing and maintaining municipal services necessary to support the residential, business, environmental, and historical interests that define our community. Our services enhance the quality of life for those who live here and enhance the experience for our guests.

Fiscal Impact.
The fiscal impact of this project is broken down into the following three components:

1. Appropriated FY26 Funding as Amended
The FY26 Budget as amended to date appropriates funding as summarized below:

FY26 BUDGET FOR VINE STREET IMPROVEMENTS		
General Fund: Vine St 770 LF_401-3100-59331-117	$	544,000.00
Water Fund: Vine Street_502-3392-59333-141	$	575,000.00
Sewer Fund: Vine Street_503-3392-59333-154	$	500,000.00
TOTAL FY26 BUDGET	**$**	**1,619,000.00**

The funding sources are summarized below:

- General Fund: This is funding Council appropriated in the FY26 budget for the completion of the Project.
- Water Fund: This is funding Council appropriated in the FY26 budget for the completion of the Project.
- Sewer Fund: This is funding Council appropriated in the FY26 budget for the completion of the Project.

2. Total Project Costs
The total project cost includes (1) the overall cost to construct the Project included in the bid amount and (2) all additional costs to complete the Project, outside the bid amount, i.e., these costs are not included in the Contractor's bid and are with different contractors, consultants, or utilities. The total project cost is the total fiscal responsibility of the Town for the Project, as summarized below:

PROJECT COSTS		
Bid for Project Construction		
Ridgeline Construction, Inc. Bid	$	1,552,455.00
Outside of the Bid Costs		
Project Design, Bidding, Contracts	$	25,000.00
Easement Costs	$	8,000.00
Construction Administration and Inspection	$	175,000.00
Construction Survey and Testing	$	30,000.00
Construction Staging	$	22,400.00
Owner Contingency	$	100,000.00
TOTAL PROJECT COSTS	**$**	**1,912,855.00**

- Construction Administration and Inspection: This cost is for work completed by Nelson Engineering, our engineering consultant, to administer and inspect the construction of the Project for the Town. Administration and Inspection includes items like, contract documents, field inspections, weekly meetings with contractor, submittal review, operations checks, etc. These costs assume a full time inspector on the project, if construction is going well and the inspector does not need to be on the job full time, these costs will be less.
- Owner Contingency: These are unallocated funds held in reserve for unforeseen costs, e.g. unexpected piping configurations, utility conflicts, contrary soil conditions, additional design work or conflict resolution. These funds are controlled by the Town and can be used for additional consulting or construction costs. Holding a contingency allows

staff to manage unforeseen changes in the project at the pace of construction and without unnecessarily increasing contract costs, e.g. bonding, or having to request additional budget.

3. Recommended Amended FY26 Budget to Cover Total Project Costs

Due to the shortfall in budgeted funds relative to Total Project Costs, staff recommend the following amendments from the noted sources to the FY26 budget:

PROPOSED AMENDED FUNDING		
FY26 BUDGET FOR VINE STREET IMPROVEMENTS		
General Fund: Vine St 770 LF_401-3100-59331-117	$	544,000.00
Water Fund: Vine Street_502-3392-59333-141	$	575,000.00
Sewer Fund: Vine Street_503-3392-59333-154	$	500,000.00
TOTAL FY26 BUDGET	**$**	**1,619,000.00**
FY26 BUDGET AMENDMENTS		
Transfer from Broadway ADA_401-3100-59331-125	$	240,000.00
Use of Water Fund Balance	$	102,000.00
Total Amendments	**$**	**342,000.00**
TOTAL PROJECT FUNDING	**$ 1,961,000.00**	

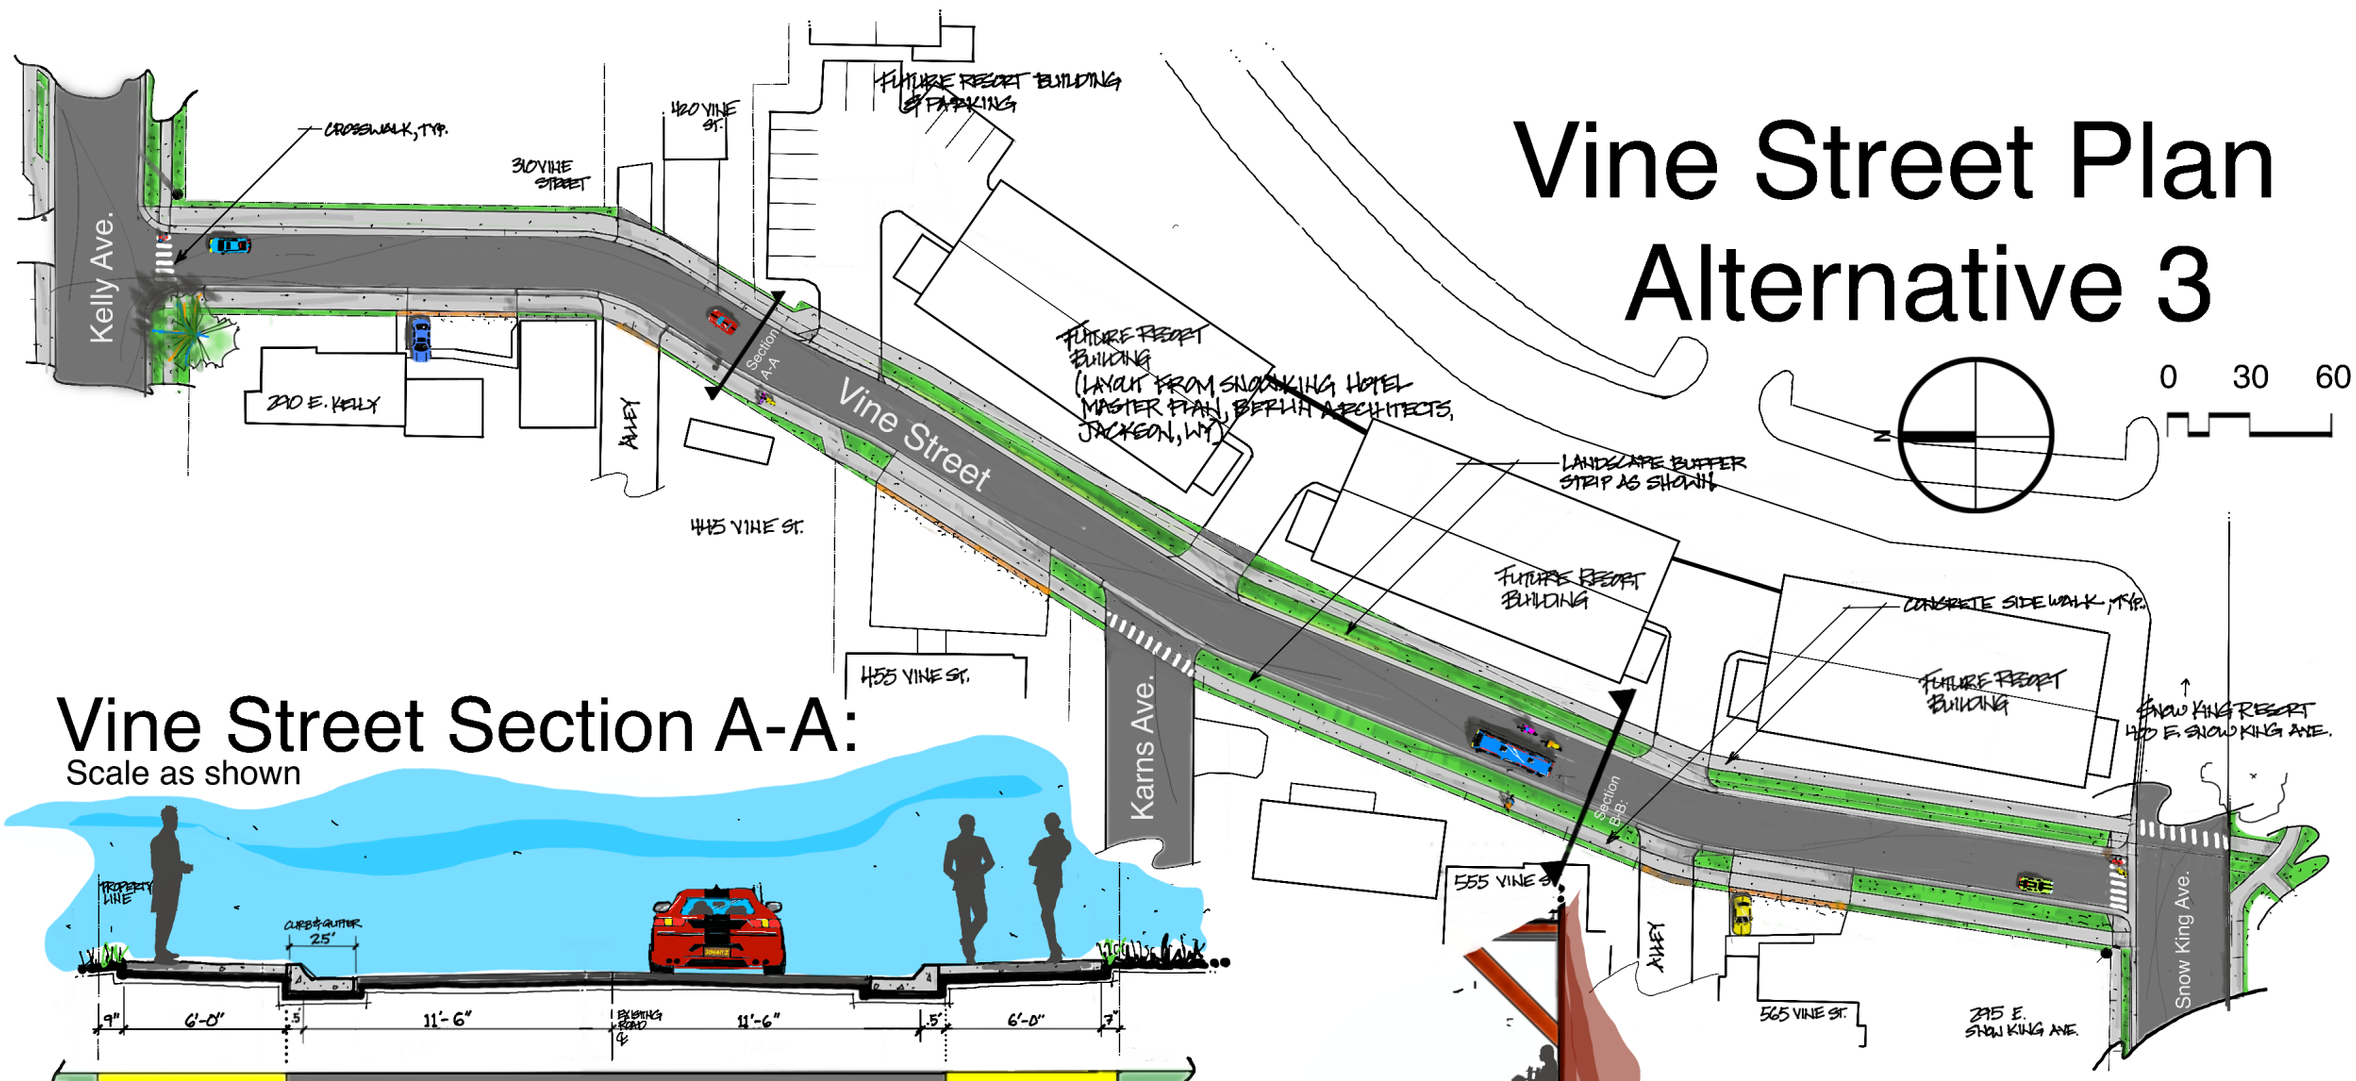
- Transfer from Broadway ADA: This is funding that Council appropriated in the FY26 budget for the construction of ADA sidewalks along West Broadway from Cache to Millward as part of the WYDOT slab replacement contract. To date WYDOT has not awarded the bid for this construction. Based on coordination with WYDOT, staff does not expect this work to occur until FY27. Staff will re-request funds for the WYDOT project in FY27.
- Use of Water Fund Balance: This portion of the Project funding would utilize funds from the water reserves, which for FY26 total $850,000. Staff acknowledge that this will reduce reserves below the target amount and recommends reducing the reserves.

Staff Impact.

Approximately 60 hours of staff time coordinating with engineers and contractors. Approximately 12 hours of staff time for drafting the staff report. The Legal Department will have approximately 2-4 hours of contract review.

During construction, some coordination between the Contractor and Engineering staff will be necessary. It is estimated that 10 to 20 hours/week of Public Works staff time will be required.

Attachments or Links.



1. March 21, 2022 Workshop approved Alternative 3
2. Bid 26-10 - Ridgeline Excavation, Inc. Bid.
3. Vine Street Improvements Construction Contract (separate PDF)

Suggested Motion.

I move to:

1. Direct staff to award Bid 26-10 to Ridgeline Excavation, Inc., for the Vine Street Complete Street Improvements Project in the amount of $1,552,455.00.
2. Approve the 26-10 Construction Contract with Ridgeline Excavation, Inc., for the Vine Street Complete Street Improvements Project, subject to minor changes by staff.
3. Approve the Total Project Cost for the Vine Street Complete Street Improvements Project in the amount of $1,961,000, including amendments to the FY26 budget as indicated in this staff report with the next budget resolution.

BID FORM FOR CONSTRUCTION CONTRACT

The terms used in this Bid with initial capital letters have the meanings stated in the Instructions to Bidders, the General Conditions, and the Supplementary Conditions.

ARTICLE 1—OWNER AND BIDDER

1.01 This Bid is submitted to:

Town of Jackson
P.O. Box 1687
150 East Pearl Avenue
Jackson, Wyoming 83001
townclerk@jacksonwy.gov
Bid No. 26-10

1.02 The undersigned Bidder proposes and agrees, if this Bid is accepted, to enter into an Agreement with Owner in the form included in the Bidding Documents to perform all Work as specified or indicated in the Bidding Documents for the prices and within the times indicated in this Bid and in accordance with the other terms and conditions of the Bidding Documents.

ARTICLE 2—ATTACHMENTS TO THIS BID

2.01 The following documents are submitted with and made a condition of this Bid:

A. Required Bid security;

B. Wyoming certification of residency, if claiming status as an in-state contractor.

C. A company-wide hourly rate sheet for equipment and labor, including operators and supervisory personnel for use under Section 02005, Force Account Work, in the Technical Specifications.

D. Bidder Qualification Statement;

E. List of Proposed Subcontractors;

F. List of Proposed Suppliers;

G. Evidence of authority to do business in the state of the Project; or a written covenant to obtain such authority within the time for acceptance of Bids;

H. Contractor's license number as evidence of Bidder's State Contractor's License or a covenant by Bidder to obtain said license within the time for acceptance of Bids; and

ARTICLE 3—BASIS OF BID—LUMP SUM BID AND UNIT PRICES

3.01 *Unit Price Bids*

A. Bidder will complete the Work in accordance with the Contract Documents for the following indicated unit prices for the base bid:

TOTAL BID SCHEDULE 3						
TOTAL BID FOR ALL BID SCHEDULES						

ONE MILLION FIVE HUNDRED FIFTY TWO THOUSAND FOUR HUNDRED FIFTY FIVE dollars (use words) $ 1,552,455.00

Bidder acknowledges that:

1. each Bid Unit Price includes an amount considered by Bidder to be adequate to cover Contractor's overhead and profit for each separately identified item, and
2. estimated quantities are not guaranteed, and are solely for the purpose of comparison of Bids, and final payment for all Unit Price Work will be based on actual quantities, determined as provided in the Contract Documents.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

ARTICLE 4—TIME OF COMPLETION

4.01 Bidder agrees that the Work will be substantially complete and will be completed and ready for final payment in accordance with Paragraph 15.06 of the General Conditions on or before the dates or within the number of calendar days indicated in the Agreement.

4.02 Bidder accepts the provisions of the Agreement as to liquidated damages.

ARTICLE 5—BIDDER'S ACKNOWLEDGEMENTS: ACCEPTANCE PERIOD, INSTRUCTIONS, AND RECEIPT OF ADDENDA

5.01 *Bid Acceptance Period*

A. This Bid will remain subject to acceptance for 60 days after the Bid opening, or for such longer period of time that Bidder may agree to in writing upon request of Owner.

5.02 *Instructions to Bidders*

A. Bidder accepts all of the terms and conditions of the Instructions to Bidders, including without limitation those dealing with the disposition of Bid security.

5.03 *Receipt of Addenda*

A. Bidder hereby acknowledges receipt of the following Addenda

Addendum Number	Addendum Date
#1	12/15/25

ARTICLE 6—BIDDER'S REPRESENTATIONS AND CERTIFICATIONS

6.01 *Bidder's Representations*

A. In submitting this Bid, Bidder represents the following:

1. Bidder has examined and carefully studied the Bidding Documents, including Addenda.
2. Bidder has visited the Site, conducted a thorough visual examination of the Site and adjacent areas, and become familiar with the general, local, and Site conditions that may affect cost, progress, and performance of the Work.
3. Bidder is familiar with all Laws and Regulations that may affect cost, progress, and performance of the Work.
4. Bidder has carefully studied the reports of explorations and tests of subsurface conditions at or adjacent to the Site and the drawings of physical conditions relating to existing surface or subsurface structures at the Site that have been identified in the Supplementary Conditions, with respect to the Technical Data in such reports and drawings.
5. Bidder has carefully studied the reports and drawings relating to Hazardous Environmental Conditions, if any, at or adjacent to the Site that have been identified in the Supplementary Conditions, with respect to Technical Data in such reports and drawings.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

6. Bidder has considered the information known to Bidder itself; information commonly known to contractors doing business in the locality of the Site; information and observations obtained from visits to the Site; the Bidding Documents; and the Technical Data identified in the Supplementary Conditions or by definition, with respect to the effect of such information, observations, and Technical Data on (a) the cost, progress, and performance of the Work; (b) the means, methods, techniques, sequences, and procedures of construction to be employed by Bidder, if selected as Contractor; and (c) Bidder's (Contractor's) safety precautions and programs.

7. Based on the information and observations referred to in the preceding paragraph, Bidder agrees that no further examinations, investigations, explorations, tests, studies, or data are necessary for the performance of the Work at the Contract Price, within the Contract Times, and in accordance with the other terms and conditions of the Contract.

8. Bidder is aware of the general nature of work to be performed by Owner and others at the Site that relates to the Work as indicated in the Bidding Documents.

9. Bidder has given Engineer written notice of all conflicts, errors, ambiguities, or discrepancies that Bidder has discovered in the Bidding Documents, and of discrepancies between Site conditions and the Contract Documents, and the written resolution thereof by Engineer is acceptable to Contractor.

10. The Bidding Documents are generally sufficient to indicate and convey understanding of all terms and conditions for performance and furnishing of the Work.

11. The submission of this Bid constitutes an incontrovertible representation by Bidder that without exception the Bid and all prices in the Bid are premised upon performing and furnishing the Work required by the Bidding Documents.

6.02 *Bidder's Certifications*

A. The Bidder certifies the following:

1. This Bid is genuine and not made in the interest of or on behalf of any undisclosed individual or entity and is not submitted in conformity with any collusive agreement or rules of any group, association, organization, or corporation.

2. Bidder has not directly or indirectly induced or solicited any other Bidder to submit a false or sham Bid.

3. Bidder has not solicited or induced any individual or entity to refrain from bidding.

4. Bidder has not engaged in corrupt, fraudulent, collusive, or coercive practices in competing for the Contract. For the purposes of this Paragraph 8.02.A:

a. Corrupt practice means the offering, giving, receiving, or soliciting of anything of value likely to influence the action of a public official in the bidding process.

b. Fraudulent practice means an intentional misrepresentation of facts made (a) to influence the bidding process to the detriment of Owner, (b) to establish bid prices at artificial non-competitive levels, or (c) to deprive Owner of the benefits of free and open competition.

Copyright© 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

c. Collusive practice means a scheme or arrangement between two or more Bidders, with or without the knowledge of Owner, a purpose of which is to establish bid prices at artificial, non-competitive levels.

d. Coercive practice means harming or threatening to harm, directly or indirectly, persons or their property to influence their participation in the bidding process or affect the execution of the Contract.

BIDDER hereby submits this Bid as set forth above:

Bidder:

Ridgeline Excavation Inc.
(typed or printed name of organization)

By: _____
(individual's signature)

Name: Kirk Hogan
(typed or printed)

Title: Owner/President
(typed or printed)

Date: 12/17/2025
(typed or printed)

If Bidder is a corporation, a partnership, or a joint venture, attach evidence of authority to sign.

Attest: Dayton Siewert _____
(individual's signature)

Name: Dayton Siewert
(typed or printed)

Title: Project Manager/Estimator
(typed or printed)

Date: 12/17/2025
(typed or printed)

Address for giving notices:
3520 S. Cornterstone Road, Jackson, WY 83001

Bidder's Contact:

Name: Kirk Hogan
(typed or printed)

Title: Owner/President
(typed or printed)

Phone: (307) 699-9393

Email: Kirk@ridgelineexcavation.com

Address:
3520 S. Cornterstone Road, Jackson, WY 83001

Bidder's Contractor License No.: (if applicable) 4237 / 1708

BIDDER QUALIFICATION STATEMENT

1. Bidder's organization has been in existence as a business under its present name and ownership for 5 years since 07/01/2020

2. Bidder's organization has had experience in work comparable to that required under this contract for 5 years.

3. The Bidder has performed similar work on the following projects:

	Year	Contract Amount	Type of Work
a.	2022	3.7 Million	Powdercrest Trail-Site Grading, Utility Install, Pavement
b.	2023	12.1 Million	Settlement Trail-Site Grading, Utility Install, Pavement
c.	2023	2.4 Million	WY Fish & Game-Site Grading, Utilities, Pavement, Construction of Employee Housir
d.	2024	500 Thousand	TC Search & Rescue - Utilities, Storm Infrastructure, Pavement, and Retaining Walls

4. Bidder refers to the following for references on the aforementioned project:

	Name	Title	Phone Number
a.	Jon Olson	VP of Development	(406) 539-7311
b.	Jon Olson	VP of Development	(406) 539-7311
c.	Loren Woodin	Chief Engineer	(307) 777-4582

5. Bank Reference

PAT SCHILLING LITTLEHORN STATE BANK 307-210-7754

6. Surety Reference

See attached Bid Bond

7. Following is a list of equipment definitely available for use on the project: (Give quantity and description)

EJCDC® C-430, Bid Bond (Penal Sum Form).
Copyright® 2018 National Society of Professional Engineers, American Council of Engineering Companies, and American Society of Civil Engineers. All rights reserved.

1. Bidder and Surety, jointly and severally, bind themselves, their heirs, executors, administrators, successors, and assigns to pay to Owner upon default of Bidder the penal sum set forth on the face of this Bond. Payment of the penal sum is the extent of Bidder's and Surety's liability. Recovery of such penal sum under the terms of this Bond will be Owner's sole and exclusive remedy upon default of Bidder.
2. Default of Bidder occurs upon the failure of Bidder to deliver within the time required by the Bidding Documents (or any extension thereof agreed to in writing by Owner) the executed Agreement required by the Bidding Documents and any performance and payment bonds required by the Bidding Documents.
3. This obligation will be null and void if:
   3.1. Owner accepts Bidder's Bid and Bidder delivers within the time required by the Bidding Documents (or any extension thereof agreed to in writing by Owner) the executed Agreement required by the Bidding Documents and any performance and payment bonds required by the Bidding Documents, or
   3.2. All Bids are rejected by Owner, or
   3.3. Owner fails to issue a Notice of Award to Bidder within the time specified in the Bidding Documents (or any extension thereof agreed to in writing by Bidder and, if applicable, consented to by Surety when required by Paragraph 5 hereof).
4. Payment under this Bond will be due and payable upon default of Bidder and within 30 calendar days after receipt by Bidder and Surety of written notice of default from Owner, which notice will be given with reasonable promptness, identifying this Bond and the Project and including a statement of the amount due.
5. Surety waives notice of any and all defenses based on or arising out of any time extension to issue Notice of Award agreed to in writing by Owner and Bidder, provided that the total time for issuing Notice of Award including extensions does not in the aggregate exceed 120 days from the Bid due date without Surety's written consent.
6. No suit or action will be commenced under this Bond prior to 30 calendar days after the notice of default required in Paragraph 4 above is received by Bidder and Surety, and in no case later than one year after the Bid due date.
7. Any suit or action under this Bond will be commenced only in a court of competent jurisdiction located in the state in which the Project is located.
8. Notices required hereunder must be in writing and sent to Bidder and Surety at their respective addresses shown on the face of this Bond. Such notices may be sent by personal delivery, commercial courier, or by United States Postal Service registered or certified mail, return receipt requested, postage pre-paid, and will be deemed to be effective upon receipt by the party concerned.
9. Surety shall cause to be attached to this Bond a current and effective Power of Attorney evidencing the authority of the officer, agent, or representative who executed this Bond on behalf of Surety to execute, seal, and deliver such Bond and bind the Surety thereby.
10. This Bond is intended to conform to all applicable statutory requirements. Any applicable requirement of any applicable statute that has been omitted from this Bond will be deemed to be included herein as if set forth at length. If any provision of this Bond conflicts with any applicable statute, then the provision of said statute governs and the remainder of this Bond that is not in conflict therewith continues in full force and effect.
11. The term "Bid" as used herein includes a Bid, offer, or proposal as applicable.

MERCHANTS BONDING COMPANY™

POWER OF ATTORNEY

Know All Persons By These Presents, that MERCHANTS BONDING COMPANY (MUTUAL) and MERCHANTS NATIONAL BONDING, INC., both being corporations of the State of Iowa, and MERCHANTS NATIONAL INDEMNITY COMPANY , an assumed name of Merchants National Bonding, Inc., (herein collectively called the "Companies") do hereby make, constitute and appoint, individually, **Brandi Davis**

Surety Bond #: Bid Bond
Principal: Ridgeline Excavation, Inc.
Obligee: Town of Jackson, Wyoming

their true and lawful Attorney(s)-in-Fact, to sign its name as surety(ies) and to execute, seal and acknowledge any and all bonds, undertakings, contracts and other written instruments in the nature thereof, on behalf of the Companies in their business of guaranteeing the fidelity of persons, guaranteeing the performance of contracts and executing or guaranteeing bonds and undertakings required or permitted in any actions or proceedings allowed by law.

This Power-of-Attorney is granted and is signed and sealed by facsimile under and by authority of the By-Laws adopted by the Board of Directors of the Companies.

"The President, Secretary, Treasurer, or any Assistant Treasurer or any Assistant Secretary or any Vice President shall have power and authority to appoint Attorneys-in-Fact, and to authorize them to execute on behalf of the Company, and attach the seal of the Company thereto, bonds and undertakings, recognizances, contracts of indemnity and other writings obligatory in the nature thereof."

"The signature of any authorized officer and the seal of the Company may be affixed by facsimile or electronic transmission to any Power of Attorney or Certification thereof authorizing the execution and delivery of any bond, undertaking, recognizance, or other suretyship o obligations of the Company, and such signature and seal when so used shall have the same force and effect as though manually fixed."

In connection with obligations in favor of the Florida Department of Transportation only, it is agreed that the power and authority hereby given to the Attorney-in-Fact includes any and all consents for the release of retained percentages and/or final estimates on engineering and construction contracts required by the State of Florida Department of Transportation. It is fully understood that consenting to the State of Florida Department of Transportation making payment of the final estimate to the Contractor and/or its assignee, shall not relieve this surety company of any of its obligations under its bond.

In connection with obligations in favor of the Kentucky Department of Highways only, it is agreed that the power and authority hereby given to the Attorney-in-Fact cannot be modified or revoked unless prior written personal notice of such intent has been given to the Commissioner - Department of Highways of the Commonwealth of Kentucky at least thirty (30) days prior to the modification or revocation.

In Witness Whereof, the Companies have caused this instrument to be signed and sealed this 17th day of December , 2025 .

STAFF REPORT

Meeting Date:	January 20, 2026	**Meeting Title:**	Regular – Consent
Submitting Department:	Public Works	**Presenter:**	Johnny Ziem
Agenda Item:	Budget Amendment for the Procurement of a New Electric Truck	**Public Comment:**	Yes

Purpose & Policy Considerations.
The purpose of this item is for the Council to consider a budget amendment for the procurement of a new electric truck.

Requested Action.
Staff request the Council to consider a budget amendment for the procurement of a new electric truck.

Recommendations.
Staff recommend approving a budget amendment to the FY26 budget for the procurement of a new electric truck.

Background.
At the October 20, 2025, Regular Council meeting, the Council awarded Bid #26-03 for the procurement of an electric truck to Fremont Motors of Lander, Wyoming. Staff received one bid for the procurement of a 2026 electric truck. In early December of 2025, staff were notified that Ford would be pausing production of the 2026 F-150 Ford Lightening trucks. Therefore, the awarded vendor will not be able to procure a new 2026 Ford Lightening truck to fulfill Bid #26-03.

Analysis & Key Policy Questions.
Upon hearing the news from our vendor that we were unable to get a 2026 Ford Lightening truck, staff worked with the vendor to search for a new 2025 Ford Lightening truck that met our specifications. Our vendor was successful in finding a new 2025 Ford Lightning truck that exceeded our specifications.

Possible Alternatives.
Possible alternatives for this item include:

1. Not amending the FY26 Budget to cover the additional cost for the new Ford Lightening
2. Other

Comprehensive Plan & Priority Alignment.

- Chapter 2: Climate Sustainability
  - Principle 2.3 – Reduce greenhouse gas emissions through transportation
- Chapter 8: Quality Community Service Provision
  - Principle 8.1 – Maintain current, coordinated service delivery

Fiscal Impact.
In October of 2025, the Council awarded Bid #26-03 in the amount of $59,349 for a new 2026 Ford Lightening Truck. Due to Ford pausing production of 2026 Ford Lightening's, our vendor was able to secure a new 2025 Ford Lightening truck in the amount of $64,900.

For the FY26 Budget, we show a budget of $62,500 for the purchase of a new electric truck. Staff are requesting that the Council approve a budget amendment of $2,400 to cover the additional cost to procure a 2025 Ford Lightening truck.

Staff Impact.
Staff impact for this item was minimal.

Attachments or Links.
None at this time.

Suggested Motion.

I move to approve a fiscal year 2026 budget amendment in the amount of $2,400 to cover the additional cost to procure a new 2025 Ford Lightening truck.

STAFF REPORT

Meeting Date:	January 20, 2026	**Meeting Title:**	Town Council – Regular
Submitting Department:	Administration	**Presenter:**	Tyler Sinclair
Agenda Item:	90 Virginian Lane – Town Funding Approach	**Public Comment:**	Yes

Purpose & Policy Considerations.
The purpose of this item is for the Town Council to consider how to divide the $10m committed in principle for the 90 Virginian Lane project between the Town and County and where the Town portion of this funding should come from.

Recommendations.
Staff recommend the Town Council consider dividing the $10m for the 90 Virginian Lane project 50%/50% between the Town and County and that the Town use Restricted and Assigned Housing Funds as proposed below.

Background.
In 2023, the Housing Authority purchased the land at 90 Virginian Lane for $28 million. This purchase was funded utilizing $18 million in tax-exempt bond financing (to be paid by with 2022 SPET funds) + $2.59 million 2019 SPET funding + $5.5 million County housing mitigation funding + $2 million Town housing funding (blend of mitigation fees and housing supply funds).

In December 2024, the County Commission and Town Council directed and authorized the Housing Authority to execute the 2025 Season Ground Lease for RV Park Operations with the Virginian RV Park LLC. The Ground Lease fee of $500,000 was paid to the Housing Authority and these funds have been placed in the Housing Authority's Housing Supply Fund.

In May 2025, the County Commission and Town Council directed and authorized the Housing Authority to enter into a cost-sharing agreement with Pennrose for schematic design not to exceed $250,000. The schematic design costs are being paid for from the Housing Authority's Housing Supply Fund.

At the October 20, 2025, Town Council meeting, staff presented an overview of this item, following by Council questions and discussion. There was no action taken at that time, please see the video link to this meeting to review the discussion.

Analysis & Key Questions.
As part of the project the Town and County have agreed in principle to provide $10 million to further fund the project. This amount is in addition to the Town and County's contributions to purchase the land, which are listed above.

The first item to consider in this report is how the Town and County should divide the $10 million in additional funding for the project. Town staff are recommending that the Town and County split the $10m, 50%/50% or $5.0m each. Staff find that this equal split of the committed funding reflects the equal partnership approach that has been at the forefront of the Town and County discussion of the project to date.

Alternatives to the recommended 50%/50% split include: 1) by population (46%/54%) 2) by the current Town/County split in the Joint Funding MOU (43%/57%) or 3) by taking into consideration contributions already made by the Town and County.

	Recommendation 50/50	Alternative 1 46%/54%	Alternative 2 43%/57%	Alternative 3*
Town Contribution	$5m	$4.6m	$4.3m	$6.75m
County Contribution	$5m	$5.4m	$5.7m	$3.25m
Total	$10m	$10m	$10m	$10m

* Option 3:
- $5.5m County Housing Mitigation – Developer Paid (previously contributed)
- $2.0m Town Assigned Housing - General Fund (previously contributed)
- $10m (Town & County Committed)
- **$ 17.5m Total**
- 8.75m split 50/50
- **County $3.25m**
- **Town $6.75m**

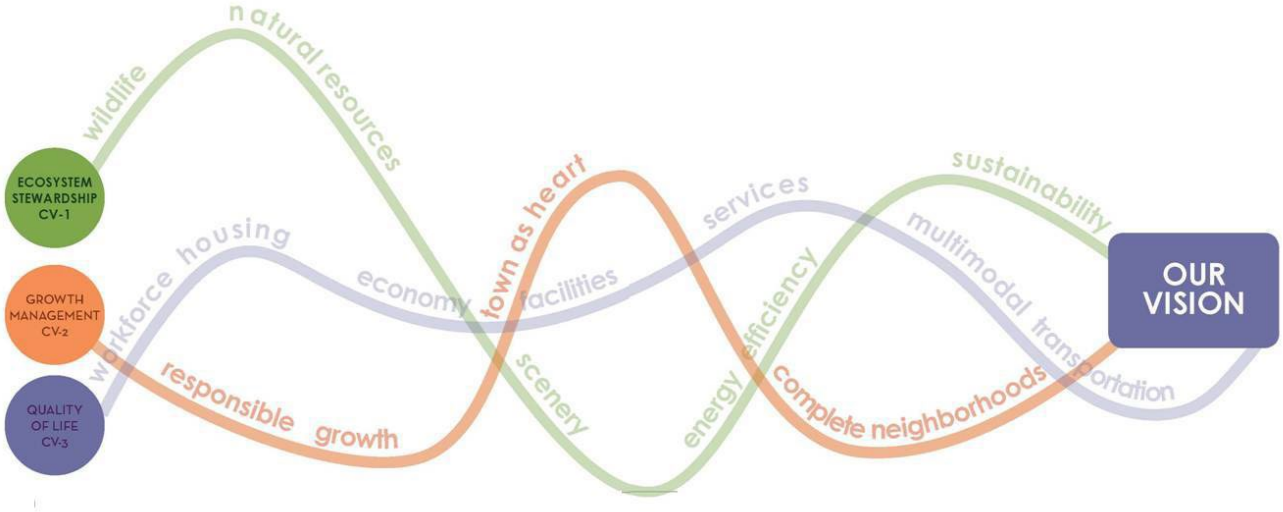
Key Question 1: Does the Council agree that the Town and County split the $10m additional funding for the project, 50%/50% or $5.0m each?

The second item for the Town to discuss is where the $5.0m (or alternative amount) Town portion for this project will be funded from (which Town account). Staff note that for this funding the Town will receive the creation of a minimum of 200 affordable/workforce housing units; the Town will not receive any first rights of purchase or lease. The identification of sources for this funding is a preliminary step in the overall project financing discussion that will take place at a Joint Meeting in February. The purpose of this item is for the Town to begin to identify the source(s) for this funding from the Town to inform the discussion at the Joint Meeting. It is anticipated that Teton County will consider a similar item prior to the Joint Meeting. As stated above this is a preliminary step with final consideration of this request occurring when the Town and County consider approval of the Development Agreement and Financing Agreement for the project.

As of January 1, 2026, the Town has the following funding available in its Housing accounts:

- **$3,626,481 Assigned** – These funds have been assigned for use in providing affordable community housing but may be transferred back to the General Fund or to another fund
- **$1,710,597 Restricted** – These funds must be used to provide affordable community housing
- **$5,337,078 Total Funds**

Staff recommend that Council authorize the use of $1,710,597 (plus any additional funds received not to exceed $5M) in Restricted Funds and up to $3,289,403 in Assigned Housing Funds to meet the $5.0m contribution in principle for 90 Virginian Lane. Other alternative funds for Council consideration could include the General Fund, Town Employee Housing Fund, and others.



Key Question 2: Does the Council agree to use $1,710,597 (plus any additional funds received) in Restricted Housing funds and up to $3,626,481 in Assigned Housing Funds to meet the $5.0m contribution in principle for 90 Virginian Lane?

Possible Alternatives.
Alternatives for question 1 have been provided above.

Alternatives for question 2 are as follows:
1) Adjust the percentage of funding from Restricted and Assigned Housing Funds to meet the $5.0m contribution in principle for 90 Virginian Lane
2) Identify other sources of funding
3) Other

Comprehensive Plan & Priority Alignment.

The Jackson/Teton County Comprehensive Plan is predicated on three equally important Common Values for us to live within our shared community Vision: Ecosystem Stewardship, Growth Management, and Quality of Life. Just as the strength of a rope depends on the integrity of each intertwining thread, the strength of our community character is derived from a commitment to all three Common Values, each in support of and reliant upon the others.

Common Value: Quality of Life
The Comprehensive Plan sets a minimum goal of achieving a 65% resident workforce. Building on this goal, the Workforce Housing Action Plan set forth strategies for increasing our resident workforce that include location for growth, a focus on public-private partnerships, and updating land development regulations to incentivize affordable workforce housing development by the private sector.

The future neighborhood at 90 Virginian Lane is an example of a public-private partnership, leveraging private sector expertise, while mitigating public risk; and utilizes LDR incentives for affordable workforce housing development.

Common Value: Ecosystem Stewardship
The Comprehensive Plan also sets a goal to direct at least 60% of all new residential development into Complete Neighborhoods to preserve habitat, scenery, and open space and provide workforce housing opportunities. Since Housing Action Plan implementation and including changes to the Land Development Regulations that incentivize affordable workforce housing production in the Town of Jackson, the percentage of new development built in Complete Neighborhoods has exceeded the 60% minimum threshold. By placing development in the center of Town, the 90 Virginian Lane development accomplishes our goal of concentrating new development in Complete Neighborhoods.

The Comprehensive Plan sets a goal to emit less greenhouse gases ("GHG") than we did in 2012. Surface travel accounts for most of the GHG Emissions created locally. **By placing households close to their jobs, local convenience, recreational amenities, and providing them with opportunities to use alternative modes of transportation like the bus or biking, the 90 Virginian Lane development will positively impact GHG Emissions.**

Common Value: Growth Management
The Comprehensive Plan sets a cap on new residential units that can be built. We currently have about 550 pooled residential bonus units remaining to be assigned to future developments. **The 90 Virginian Lane Neighborhood accomplishes our Comprehensive Plan goals related to growth management by effectively using the remaining pooled units for 100% permanently deed restricted affordable workforce housing in a high-density residential zone located in a Transitional Subarea** (as opposed to using the units for unrestricted, free market homes located outside a Complete Neighborhood).

Fiscal Impact.
Please see discussion of Fiscal Impact in the Analysis section above.

Staff Impact.
Town staff have spent approximately 10 hours working on this item.

Attachments or Links.
None

Suggested Motions.

Item 1
I move to direct staff to draft a letter to Teton County proposing to divide the $10m committed for the 90 Virginian Lane project 50%/50% between the Town and County.

Item 2
I move to authorize the Town to use Restricted and Assigned Housing Funds as proposed in this report to fund the Town's portion of the $10m committed to the 90 Virginian Lane development.

STAFF REPORT

Meeting Date:	January 20, 2026	**Meeting Title:**	Town Council Meeting
Submitting Department:	Administration	**Presenter:**	Tanya Anderson
Agenda Item:	Request for Proposals for Sustainability Plan Progress Dashboard	**Public Comment:**	Yes

Purpose & Policy Considerations.
The purpose of this item is for the Council to consider a Request for Proposals (RFP) for a consultant to create a digital tracking dashboard that monitors progress towards the goals and strategies within the Town Sustainability Plan.

Requested Action.
The requested action is for the Council to consider approval to release an RFP for a progress dashboard that monitors progress towards the goals and strategies within the Town Sustainability Plan.

Recommendations.
Staff recommends approving release of the RFP.

Background.
The Town Sustainability Plan was unanimously approved by Town Council on July 1, 2024. The final chapter of the plan was dedicated to accountability. The point of a plan is to implement it, and without accountability to ourselves and the public, a plan can turn into a binder of aspirations on a shelf. Staff began implementing strategies within the accountability section almost immediately in the form of regular communications with the public and with staff regarding elements of the Sustainability Plan. It continued with an annual update that was presented to Council in July of 2025. Staff has also worked with consultants hired to conduct a Greenhouse Gas Inventory, which is almost completed. One accountability strategy remains: Create a publicly accessible dashboard for tracking progress towards goals.

Analysis & Key Policy Questions.
Sustainability Plans are not created to sit on shelves; they are created to be implemented. Incorporating accountability and transparency into Sustainability Plans encourages implementation. Many communities create dashboards on their websites that display progress made towards goals and strategies within their Sustainability Plans. These can be updated in real time, as soon as strategies are completed.

In the absence of a publicly available dashboard, the public must reach out to staff directly to inquire about progress or wait until an annual report is created. While annual reports are useful, they often lag significantly behind progress and do not accurately represent the continuous work that the Town is doing.

If a progress dashboard is created, staff will continue to report to the Council annually on progress made. However, staff will no longer create a document to report that progress and will utilize the dashboard instead. The dashboard will be easily accessible to staff, Council, and the public.

Possible Alternatives.
1. The Council could direct staff to cease work on this strategy and to post an annual report instead.
2. The Council could direct staff to delay work on this strategy until another fiscal year.
3. Combination of 1 and 2
4. Other

Comprehensive Plan & Priority Alignment.

Town of Jackson Sustainability Plan

- Goal: Share Sustainability Plan Progress transparently with the community.
- Target: Create Sustainability Plan Progress Report that is publicly available by 2026.
- Strategy: Create a publicly accessible dashboard for tracking progress towards goals.

To hold us accountable to the goals and targets within the Sustainability Plan, the Town can create a platform for showing progress towards goals. While targets related to emissions reduction need only be reported annually, progress towards strategies can be updated on an ongoing basis.

Fiscal Impact.

This project is estimated to cost $25,000 to develop and $10,000 annually to maintain and/or dedication of staff time to maintain the site internally. $25,000 was budgeted for this project in FY26.

Staff Impact.

It took the Ecosystem Stewardship Administrator 2 hours to draft the RFP and this staff report. It will take an estimated 10 hours to review proposals and finalize a contract. It will take an estimated 20 hours to manage the contract in the first year, and 10 hours each subsequent year. Legal Department work on this project includes reviewing the RFP and negotiating the contract and is estimated to be approximately 10 hours.

Attachments or Links.

RFP for Sustainability Plan Tracking.

Suggested Motion.

I move to release the attached RFP for a digital tracking system that monitors progress towards the goals and strategies within the Town Sustainability Plan.

Request for Proposals

Progress dashboard for Town Sustainability Plan

Issued: January 21, 2026

Jackson, Wyoming

Requested By:	Town of Jackson
Due Date:	10:00 AM MST March 2, 2026
Bid Opening:	10:30 AM MST March 2, 2026
Proposal Submission:	via e-mail: clerk@jacksonwy.gov
Deadline for Questions:	5:00 PM MST January 29, 2026
Questions answered by:	5:00 PM MST February 6, 2026
Contact and Questions:	Tanya Anderson, Ecosystem Stewardship Administrator tanderson@jacksonwy.gov

1. SUMMARY

The Town of Jackson seeks proposals from qualified and experienced persons or firms to submit a proposal for a Progress Dashboard, to be displayed on the Town of Jackson's website to publicly display progress towards the goals and strategies set forth in the Town's Sustainability Plan. Proposals should include 1) a plan for creating a publicly available dashboard, 2) a plan for making updates to the dashboard, and 3) a technical support plan. A fee proposal should be submitted as a separate PDF and should include 1) itemized costs to create the dashboard, 2) payment structure, and 3) any estimated technical support costs through June 30, 2026.

2. BACKGROUND

The Town of Jackson is a community in Northwest Wyoming with just over 10,000 residents. It is the sole municipality within Teton County, Wyoming, whose population, including the Town of Jackson, is just over 23,000 residents. The Jackson Town Council accepted a new Sustainability Plan on July 1, 2024. As the Town works to meet both the municipal and community-wide goals and targets set within the Sustainability Plan, it seeks to contract a business or organization to create a publicly accessible dashboard to display progress towards the goals and strategies outlined in the Sustainability Plan.

3. SCOPE OF WORK

The Town of Jackson seeks a firm to create a publicly available dashboard that displays progress towards goals and strategies in the Town Sustainability Plan on the Town's website that can be updated regularly. The

dashboard should include a way to display progress towards completion of strategies. When appropriate, it should also include ways to measure the percentage of work completed towards specific targets. For example, the number of lights converted to dark-sky compliant lighting should be recorded as a percentage or number, not simply “in progress” and “completed.”

At a minimum, proposals should include the following:

a) A proposal for the creation of a dashboard, including a detailed timeline and an outline of tasks required by Town staff to support the project.
b) A plan for updating the dashboard. Will Town of Jackson staff be able to update the dashboard? Will the dashboard require an ongoing contract with a vendor for updates? What is the process for making updates? Is there a training plan? The Town will prioritize proposals that include training staff to be able to update the dashboard without off-site assistance.
c) A description of how the dashboard will integrate with the Town of Jackson’s CivicPlus-based website. Simple embedded iframe or script? REST APIs/JSON-based app or service for CivicPlus’ own integration APIs or HTML widgets? Respondents shall describe their solution.
d) Descriptions of the proposed dashboard’s accessibility features, including how the solution supports use with common assistive technologies. Respondents are encouraged to provide any supporting accessibility documentation.
e) A plan for technical support that extends through June 30, 2031. The Town will prioritize proposals with a low annual cost to maintain the dashboard.

A separate Fee Proposal should include the following:

a) A detailed budget for the creation of the dashboard.
b) Additional budgets for any technical support needed through June 30, 2031.

4. QUALIFICATIONS

The Respondent must have the experience and knowledge necessary to supply the work and perform services specified in this RFP, and the time and capacity to complete the project within the mutually agreed timeline set within the final contract. If the dashboard creation requires travel, any transportation and accommodation costs must be included within the proposal.

5. SUBMITTAL REQUIREMENTS

Responses must be submitted through the Town Clerk, Riley Hovorka, at clerk@jacksonwy.gov and must be compiled into two (2) .pdf documents named 1) “Progress Dashboard Proposal – [company name]”- Proposals, and 2) ”Progress Dashboard Proposal – [company name] – Fee Proposal” before the date identified in Section 6. Physical (paper) copies of proposals are not allowed.

At a minimum, responses should include the following information in the first PDF:

a) **Cover Letter** - A transmittal cover letter on the Respondent’s organization’s letterhead, and shall clearly identify the name, title, telephone number, and email address of the person who will serve as the Respondent’s representative for all matters relating to the RFP.

b) **Table of Contents**

c) **Project Approach –** Describe your understanding of the objectives, purpose, and scope of this project and your approach to completing the project successfully, highlighting any outstanding features, qualifications, and relevant experience.

d) **Project Schedule** – Provide a project schedule and describe current job commitments and how your company can complete the work during the specified timeframe.

e) **Relevant experience or qualifications** – Identify lead and support personnel and include up to three (3) resumes of such with listings of relevant experience and areas of expertise. Identify major projects completed within the last three years. Provide examples of previous projects of a similar nature.

f) **References** – (Up to 3) Include the reference's name, title, organization, email, phone number, address, and a brief description of their relationship to the Respondent.

g) **Conflict of Interest** – List any potential conflicts of interest.

Responses should include the following information in the second PDF:

h) **Cost** - Provide a detailed, itemized budget. The budget shall be placed in a file separate from the original proposal and should include proposed staff hourly rates, plus overhead, travel and additional project costs to be charged for charge order items. Include estimates of hours needed to complete the project and an estimated distribution of those hours over the course of the project. A total price shall be plainly visible.

Responses must be in the same sequence and format as listed in Section 3.

6. EVALUATION CRITERIA

The Selection Panel will refer to the criteria listed below while evaluating proposals. Each Proposal will receive a score of 1 through 10 for each evaluation criterion. 10 – Excellent; 7.5 – Good; 5.0 – Satisfactory; 2.5 – Marginal; 0 – Unsatisfactory. The *rating* for each of the evaluation criteria will be multiplied by the *weight* to calculate the *score* for that criterion. Scores for criteria 1 through 6 will be added together to determine the *subtotal*. Respondents shall submit two PDFs, one for the Proposal and one for the Fee Proposal. Proposals will be opened, evaluated, and weighted first. When this is completed, Fee Proposals will be opened and evaluated. The Proposal Subtotal score and Fee Proposal score will be added together to determine the total score. The maximum score for any proposal is 420.

	EVALUATION CRITERIA	**RATING**		**WEIGHT**		**SCORE**
1	**Project approach:** Alignment with and understanding of project goals			10		
2	**Experience and qualifications:** Quality of previous relevant projects; experience and qualifications of key staff			8		

3	**Project management:** Project management approach, including timelines and milestones.			6		
4	**References:** Relevance of references provided; quality of past client feedback			4		
5	**Sustainability:** Does the Respondent demonstrate commitment to sustainability through organizational practices? Does the proposal include reasonable actions to reduce environmental impact in the scope of work?			2		
6	**Overall Quality of the Proposal:** Does the Respondent follow directions in the RFP? What is the overall quality of the proposal?			2		
				Subtotal		
7	**Proposed Fee Proposal:** Is the cost reasonable for the scope of work proposed? Are the ongoing fees for maintenance of the dashboard low?			10		
				TOTAL		

7. TIMELINE

The RFP will proceed on the following schedule:

RFP Released: January 21, 2026

Deadline for Questions: 5:00 PM MST January 29, 2026

Responses to Questions will be posted by: 5:00 PM MST February 6, 2026

Responses Due: 10:00 AM MST March 2, 2026

Proposal Opening: 10:30 AM MST March 2, 2025, Town Hall Council Chambers

Review Process: March 2, 2026 – April 17, 2026

Select bid- pending Town Council Approval: May 4, 2026

Questions may be directed to the RFP contact, Tanya Anderson, via email at tanderson@jacksonwy.gov by 5:00 PM MST on January 29, 2026.

8. TERMS AND CONDITIONS

- Any and all documents submitted to the Town of Jackson may be deemed public records subject to examination and inspection by third parties. Any material submitted that is to be considered confidential must be clearly marked as such.
- All costs incurred in the preparation and presentation of a submitted response, in any way whatsoever, shall be wholly absorbed by the responding party(ies).
- The Town of Jackson may contact Respondents with clarifying questions. Respondents may be asked to provide supplemental information.
- Submission of an RFP response is not a guarantee of a future contract award.
- Town reserves the right to reject any and all proposals, waive any and all formalities, disregard all nonconforming, non-responsive or conditional proposals, and terminate, modify, or suspend the RFP process.
- This RFP does not commit the Town to award a contract.
- Negotiations with respondents may include, but not be limited to, scope of work, contract schedule, contract terms and conditions, technical specifications, and price.
- As part of its evaluation process, the Town may request clarifications and additional information, conduct customer reference checks, require a subset of finalists to make a presentation to the Town's selection committee, hold multiple rounds of reviews with a limited group of respondents, and take any other action necessary to perform a thorough and objective evaluation of each proposal.
- Once the process is complete, the Town of Jackson retains ownership over the product. The firm may use the final product in their reference portfolio. All other uses are subject to Town of Jackson approval.

STAFF REPORT

Meeting Date:	January 20, 2026	**Meeting Title:**	Town Council – Regular Meeting
Submitting Department:	Joint Affordable Housing	**Presenter:**	Kristi Malone
Agenda Item:	Application to the Wyoming Office of State Lands and Investments' Unmet Housing Grant Program	**Public Comment:**	Yes

Purpose & Policy Considerations.
The purpose of this item is Town Council consideration of a Resolution authorizing submission of an Unmet Housing Grant application to the State Loan and Investment Board on behalf of the Town Council of the Town of Jackson, Wyoming for the purpose of land acquisition for the S4 Flats affordable workforce housing development.

Recommendations.
Staff recommends approval of the Resolution.

Background.
The Wyoming State Legislature appropriated $5 million for this program to provide grants to Wyoming cities, towns, counties, and tribal governments. The funds are intended to finance projects that directly support the development of housing to address unmet housing needs across the state, including land acquisition, and infrastructure such as water, sewer, and utilities.

Grant applications are submitted to and administered by the Wyoming Office of State Lands and Investments (OSLI). Grants are decided upon and awarded by the State Loan and Investment Board (SLIB).

The Town of Jackson seeks $1,200,000 in Wyoming Office of State Lands and Investments Unmet Housing Needs grant funding to reimburse land acquisition costs for the S4 Flats housing development. Located at 910 Smith Lane and 915 Simon Lane in the Town of Jackson, S4 Flats will deliver 13 affordable workforce condominium homes using modular construction at a total projected cost of approximately $9,971,855. The development site is comprised of two adjacent lots, one of which was owned by the Town and the other purchased by the Town for $1,200,000 in 2022.

At their January 5, 2026 Regular Meeting, the Town Council, through approval of the Town Manger's Report, directed staff to prepare grant applications for S4 Flats and 90 Virginian Lane for consideration at this January 20, 2026 Regular Meeting. Since then, staff discovered that several other counties and municipalities are applying for this grant.

Key Question: Does Town Council still want to pursue both applications – one for S4 Flats and one for 90 Virginian Lane?
Considering several other communities plan to submit applications to this grant program, staff believe that submitting multiple applications from Town of Jackson may not be a competitive approach. Should Council elect to submit for both projects, an optional addendum to the recommended motion is included in this staff report and a grant application for 90 Virginian Lane will be brought to Council for consideration at a special meeting. Applications are being accepted now through January 30, 2026, at 5:00 P.M.

Analysis.
The current Ground Lease for S4 Flats requires the construction of 12 affordable workforce condos. Staff have prepared an amendment to the Ground Lease that would require construction of 13 affordable workforce condos. This amendment will be presented to Council on February 2, 2026. If Council does not approve amending the Ground Lease to increase the number of homes constructed, this grant request will be withdrawn because it is for 13 condo units.

Assuming Council approves the amended Ground Lease, of the projected $9,971,855 total project cost, the Town of Jackson has invested $1,200,000 to purchase one of the two lots on which the development will be located, a land value of $1,400,000 for the other lot (which was already under Town ownership), and $300,632 toward planning and designing the project. This investment of approximately 30% of total project cost (or $223,126/unit) from the Town of Jackson would be brought down to approximately 17% (or $130,818/unit) if the $1.2m grant is awarded.

In addition to the community benefit achieved by adding 13 permanently deed restricted affordable and workforce homes to the local housing supply, the Town of Jackson has secured eight employee rights of first purchase in the development, and the remaining five units will serve Workforce eligible households (must earn a minimum of 75% of their income from a qualified Local Business). By providing opportunities for affordable ownership units to Town employees and local workers, S4 Flats will ease cost burdens on low- and moderate-income earners and help retain workers locally to fill essential local government and business jobs.

Key Question: Does Council support the submission of the application and all applicable requirements?
If awarded, grant funds will be used to reimburse the Town of Jackson for property acquisition ($1.2 million spent to purchase 910 Smith Lane). Town Council may choose to reinvest a portion of the $1.2 million in grant funds into S4 Flats to further increase affordability or Council may choose to utilize the funds on another affordable workforce housing development. How to redeploy grant funds is not a decision that is required to submit the application.

Comprehensive Plan & Priority Alignment.
This item is in alignment with Section 5 of the Comprehensive Plan by providing workforce housing (Principle 5.1), strategically locating a variety of housing types (Principle 5.2), reducing the shortage of housing affordable to the workforce (Principle 5.3), and using a balanced set of tools to meet our housing goal (Principle 5.4).

Fiscal Impact.
Receipt of grant funding reimburses the Town of Jackson for the $1.2m spent on the purchase of one of the two lots on which this development will be located. This allows for additional funding to be invested in S4 Flats to achieve greater affordability of homes, or to be deployed elsewhere in town to support housing development or preservation.

Staff Impact.
Housing Staff spent approximately 30 hours on this item.

Attachments or Links.

- Grant Application

Suggested Motion.
Item 1: S4 Flats
I move to approve the Resolution Authorizing Submission of an Unmet Housing Grant Application to the State Loan and Investment Board on Behalf of the Town Council of the Town of Jackson, Wyoming for the Purpose of Land Acquisition for the S4 Flats Affordable Workforce Housing Development.

Item 2: 90 Virginian Lane (Optional)

I move to direct staff to schedule a Special Town Council Meeting prior to January 30, 2026 to consider an Unmet Housing Grant application to reimburse land acquisition at 90 Virginian Lane.

RESOLUTION 26-01

A RESOLUTION AUTHORIZING SUBMISSION OF AN UNMET HOUSING GRANT APPLICATION TO THE STATE LOAN AND INVESTMENT BOARD ON BEHALF OF THE TOWN COUNCIL OF THE TOWN OF JACKSON, WYOMING FOR THE PURPOSE OF LAND ACQUISITION FOR THE S4 FLATS AFFORDABLE WORKFORCE HOUSING DEVELOPMENT

W I T N E S S E T H

WHEREAS, the Town Council of the Town of Jackson, Wyoming desires to participate in the UNMET HOUSING GRANT program to assist in financing this request; and

WHEREAS, the Town Council of the Town of Jackson, Wyoming recognizes the need for the request; and

WHEREAS, the Unmet Housing Grant program requires that certain criteria be met, as described in the application instructions governing the program, and to the best of our knowledge this application meets those criteria; and

WHEREAS, if any of the disbursed grant funds are later deemed to not comply with the Office of State Lands and Investments (OSLI) criteria, Wyoming Statutes overseeing the use of State of Wyoming funds, and Article 16, § 6 of the Wyoming Constitution, the grant applicant agrees to repay the ineligible grant funds within 15 days of such finding to the OSLI.

NOW, THEREFORE, BE IT RESOLVED BY THE TOWN COUNCIL OF THE TOWN OF JACKSON, Wyoming that a grant application in the amount of $1,200,000 be submitted to the State Loan and Investment Board for consideration to assist in funding the S4 Flats Affordable Workforce Housing Development.

BE IT FURTHER RESOLVED, that April Norton (Jackson/Teton County Affordable Housing Director) and Kristi Malone (Jackson/Teton County Housing Supply Specialist) are hereby designated as the authorized representatives of the Town of Jackson to act on behalf of the Town Council on all matters relating to this grant application.

PASSED, APPROVED AND ADOPTED THIS _____ day of _____, 2026.

TOWN OF JACKSON

PROJECT OVERVIEW

Applicant: Town of Jackson, Wyoming
Entity Type: City
Name of Project: S4 Flats Affordable Workforce Housing Development

Brief Project Summary
Provide a concise description of the proposed project, including the specific project improvements to be funded, the unmet housing needs being addressed, and how the project aligns with the intent to support housing development through investment. (Limit to 100 words or less)
Jackson seeks $1,200,000 to cover land acquisition costs for the S4 Flats housing development. Located in Midtown Jackson, S4 Flats will deliver 13 permanently deed-restricted Affordable and Workforce ownership and rental homes at a total estimated development cost of $9,971,855. Using modular construction in a transitional area and investing in multimodal traffic improvements that benefit the neighborhood, Town reduced construction costs, expedited the project timeline, and maximized the number of units while balancing Town's community character and guaranteeing homes for valued local workers. This shovel-ready project addresses Jackson's extreme affordable housing shortage which weakens the economy and quality of life.

Project Location
Provide physical address or description of area – include county
910 Smith Lane and 915 Simon Lane, Jackson, WY 83001 – Teton County

Type of Project
- Land Acquisition
- Multi-family structure

List all other funding sources for the project in the table below including the status and amount expended.

Other Funding Source Description	Amount	Pending/Approved	Amount Expended
915 Simon Lane Land Value (owned by Town of Jackson, valued at $1.4m by 2022 appraisal)	$1,400,000	Approved	$1,400,000
Town Funds	$300,632	Approved	$300,632
Developer Equity + Construction Loan	$7,071,223	Approved	$330,368
Total Other Funding	$8,771,855		$2,031,000

Amount of Funding Requested: $1,200,000

Estimated Total Project Cost: $9,971,855

Balance of Project Incomplete: $7,940,855

I certify that I am authorized to sign this application on behalf of our governing body, and the applicant will comply with all appropriate requirements, if approved. To the best of my knowledge and belief, the information in this application is true and correct. I understand the State may review any relevant documents or instruments relating to the analysis of this application. I further certify by signing and

submitting this application that all program eligibility criteria have been reviewed and this application reflects the criteria. I understand that if grant funds spent are later found to be ineligible based on Wyoming Statutes overseeing the use of State of Wyoming funds, or use of the funds violates Article 16, § 6, the applicant will be requested to pay back the ineligible funds within 15 days to the Office of State Lands and Investments.

Signature of Authorized Individual and Date: _____

Name and Title: _____

STATEMENT OF UNMET HOUSING NEED

Describe the current housing challenges within the jurisdiction, including data or evidence of unmet housing demand. Include information such as:

- **Population growth or workforce housing shortages**
- **Lack of available housing units/homes**
- **Barriers to housing development due to inadequate infrastructure**
- **Community impacts of housing shortages**
- **Explain how the proposed project improvements will meet unmet housing needs.**

Jackson and Teton County face an extreme shortage of affordable housing units that negatively impacts the economy, the provision of essential services, and quality of life for community members. By delivering 13 transit-connected and deed-restricted Affordable and Workforce homes, S4 Flats addresses the need to increase the supply of housing units specifically targeting the local workforce and low- to moderate-income earners.

Drivers of the Housing Shortage: Due to land constraints, high building costs, a historic preference for low-density development, and the proliferation of vacation homes and short-term rentals, Jackson and Teton County have a severe shortage of housing units that are affordable for low- and moderate-income earners which significantly impacts the resilience of the local workforce. Over 97% of the land in Teton County is federally or state owned or managed, and the mountainous landscape further constrains development, leading to sky-high prices for the small pieces of land that are available to be developed. An emphasis on hotels in the Town's commercial core and historic preference for low-density building of single-family residential development in peripheral zones exacerbate the shortage, and the community's remoteness, short construction seasons, and contractor shortage make construction extremely expensive. Endless competition from wealthy homebuyers, both for land and for contractor capacity, further constrains any market development of affordable housing units. All together, these factors have fueled a growing housing affordability and availability crisis that continues to fracture neighborhoods and sew instability for many working locals.

Data on the Housing Shortage: Jackson's housing challenges are primarily an issue of affordability, as low- and moderate-income earners cannot afford market-rate units, and the supply of non-market rate affordable units has not kept up with demand. Housing in Teton County costs $226 for every $100 the average Wyoming resident pays, according to the latest figures from the Economic Analysis Division of the Wyoming Department of Administration and Information. In the second quarter of 2022, a two-bedroom unfurnished apartment in Teton County cost an average of $2,782 a month. With rental vacancy rates below 1%, there is not enough supply for new residents to find homes nor for existing residents to move into more suitable ones. And in 2024, the average market single-family home sale price in Teton County reached a record of $7,000,000, completely out of reach for the vast majority of workers. In 2025, only two of the 186 single-family homes sales on the market were under $1 million. For condos in Teton County, in 2025 only 22% of sales were under $1 million and, of the 68 condos currently on the market, none are listed for less than $650,000.

To address the need for housing units accessible to the local workforce, more "Affordable" and "Workforce" housing units need to be built near employment centers in Jackson. According to the 2022 Teton Region Housing Needs Assessment (HNA), the Town of Jackson needs 2,000 new Affordable and Workforce homes priced below market value to address the following components of demand through 2027:

- Increase the rental supply to a functional level (i.e., 5% vacancy rate) and house people who are living in their car, hotels, couch surfing, etc.
- Keep up with job growth, which includes filling the 15% to 19% of unfilled jobs.
- Replace employees as they retire (between 10% to 15% in the region over the next five years).
- House 65% of the workforce within Teton County, Wyoming.

The Jackson/Teton County Housing Authority (JTCHA) defines "Affordable" housing as homes permanently deed-restricted to serve households from 0% to 160% of the Median Family Income (in <50%, 50-80%, 80-120%, and 120-160% Median Family Income (MFI) ranges), and that pay a monthly rent or mortgage amount that does not to exceed 30% of total household income. "Workforce" homes are also permanently deed-restricted, but with local workforce occupancy standards rather than defined income and cost limits, thereby creating a sub-market of homes protected from the global demand of vacation homeowners and remote workers that escalate market prices. Workforce homes may serve any income range, including households earning more than 160% of the Median Family Income who still cannot afford a market rate home due to Teton County's extreme housing prices. But many Workforce homes also serve households earning less than 160% MFI, especially owner-occupied Workforce homes over time as they are capped at a CPI/3% maximum annual appreciation rate. To qualify for Workforce units, households need to earn a minimum of 75% of their income from a qualified Local Business.

Effects of the Housing Shortage: The shortage of affordable housing units near employment centers in the Town of Jackson makes it very difficult for the low- and moderate-income earners who fill local jobs to find and keep housing, causing low workforce availability, burdensome commutes, and high costs of living that negatively impact economic vitality, the provision of essential services, and quality of life.

Local employers, including the Town of Jackson, Teton County, schools, public safety agencies, the national parks, non-profit organizations, and hospitality businesses, are struggling to attract and retain workers due to the unattainable cost of housing in the area. The 2022 Teton Region Housing Needs Assessment (HNA) included an employer survey that found that up to 19% of job openings are unfilled, and that the lack of housing was the prime reason for the worker shortage according to 80% of respondents. Even among positions that are filled, employers reported issues with employee burnout, reliability, and turnover resulting in a decreased ability to provide quality customer service, inability to grow businesses, and needing to reduce hours or periodically shut doors. About one-third of employers in the Teton Region (Teton County, Wyoming, Teton County, Idaho, and Northern Lincoln County, Wyoming, which is defined by census tracts 9782 and 9784) that responded to the survey are providing some form of housing assistance to employees, highlighting how critical affordable housing is to maintain an adequate workforce and the additional financial burden that the shortage places on local businesses.

These low- and moderate-income earners who fill essential jobs and drive the growth of the local economy are increasingly being priced out of the community, facing long commutes from more affordable housing centers on the other side of Teton Pass in Idaho or further south into Lincoln County. Because employment opportunities are concentrated in the Town of Jackson, workers must make the long and expensive commute from these bedroom communities into Jackson. The HNA found that it costs an average of $500 per month to commute from Teton County, Idaho, and $850 to commute from N. Lincoln County to Teton County, Wyoming, further burdening these workers. Due to the housing shortage and toll of long commutes, workers are increasingly leaving the region all together and further reducing the supply of workers needed to fill local jobs.

In addition to the negative impacts on private businesses, the affordable housing shortage threatens the provision of essential community services by pricing out workers. Currently, 58% of Teton County Sheriff staff, 37% of Town Police Department staff, 66% of Lower Valley Energy staff, 22% of Town plow drivers, 34% of hospital staff, and 29% of Fire/EMS staff are commuters. Without housing options that are affordable to the full spectrum of the local workforce, basic services like public safety, utilities, education, healthcare, and road maintenance are at risk of being reduced or eliminated.

Meeting Unmet Housing Needs: By delivering 13 transit-connected and deed-restricted Affordable and Workforce homes with both ownership and rental opportunities, S4 Flats addresses the need to increase the housing supply specifically for local workforce and low- to moderate-income earners. On two parcels previously occupied by single-family homes, Jackson and its private developer partner will add 13 units in a single 3-story structure The Town of Jackson has secured eight employee rights of first purchase in the development, and the remaining five units will serve Workforce eligible households (must earn a minimum of 75% of their income from a qualified Local Business). By providing affordable ownership units to Town employees and local workers, S4 Flats will ease cost burdens on

low- and moderate-income earners and help retain workers locally to fill essential local government and business jobs. Multimodal improvements including dedicated bike lanes and bus transit connections will provide affordable and efficient connectivity between S4 Flats and employment centers in the Town of Jackson and throughout Teton County to ensure workers can fill local jobs.

ESTIMATED BUDGET

Applicant: Town of Jackson, Wyoming

Project Name: S4 Flats Affordable Workforce Housing Development

1. **All funding sources and all project related expenses must be included in the table below.**
   Funding Information Completed By: Town of Jackson and Figure 9 Construction

		Funding Source:	Funding Source:	Funding Source:	
		Town of Jackson	***Developer***	***Unmet Housing Needs Grant***	**Total**
Activity Costs:	**Description**			910 Smith Lane Land Acquisition	
Administration	**Project Admin + Developer Fee**	**staff time**	**$250,000**	**$0**	**$250,000**
Legal	**including development exactions and HOA structuring and documents**	**staff time**	**$43,575**	**$0**	**$43,575**
Land or Building Acquisition	**Appraised value of 915 Simon Lane + Purchase price of 910 Smith Lane**	**$1,400,000**	**$0**	**$1,200,000**	**$2,600,000**
Engineering					
Basic	**Project Design and Engineering**	**$300,632**	**$330,368**	**$0**	**$631,000**
Resident Project Rep. Services	**Owner as representative**	**staff time**	**$0**	**$0**	**$0**
Additional Services	**Financing cost, project insurance, sale commissions, transaction costs, property taxes, utilities**	**$0**	**$675,810**	**$0**	**$675,810**
Construction	**See attached WY licensed contractor estimate**	**$0**	**$5,454,413**	**$0**	**$5,454,413**
Contingency	**Covers all project elements**	**$0**	**$317,057**	**$0**	**$317,057**
Total Project Costs		**$1,700,632**	**$7,071,223**	**$1,200,000**	**$9,971,855**

Funding Source Percentage By Project Costs		**17%**	**71%**	**12%**	**100%**

Estimated Total Project Cost: $9,971,855

Estimated Grant Draw Down Schedule

Time Frame	Amount
Upon grant award and execution	$1,200,000
Total Draws	**$1,200,000**

If you were to be awarded less than the grant amount requested, what amount would still allow the project to be completed? List what, if anything, can be reasonably accomplished with lower award amounts.
The Town of Jackson would accept any amount of grant funding up to the requested amount of $1,200,000.

How will project over runs or unexpected expenses be covered?
The budget for this project includes a $317,056 contingency for unexpected expenses throughout the course of the project. An additional $200,000 contingency is allocated at the contractor-level for any cost of construction overruns. Cumulatively, total contingency accounts for approximately 7% of the total project cost minus the cost of land. As a public-private partnership in which a private developer is contracted to complete a specified scope of work, any additional project overruns are the responsibility of the developer. Failure of the developer to deliver the project and/or deliver at the agreed-upon price can be redressed via the Ground Lease Agreement between the Town and the developer.

Submit a copy of the last three (3) years of financial statements; preferably prepared by an independent auditor/CPA. If the current year is not available, please explain why. Attached.

Submit one copy of the approved current annual budget. Current annual budget and year: Attached.

Provide the following information for the past three (3) Fiscal Years:

Total Investments:

Year	Amount
2023	$59,345,179
2024	$28,919,473
2025	$46,191,498

Total Cash Balances

Year	Amount
2023	$12,640,541
2024	$42,516,668
2025	$26,300,000

Provide the prior three (3) years net income for the enterprise account for which you are requesting funding. If you are requesting funding for a project that includes a water and sewer component provide the information for both enterprise accounts.

Water Enterprise Account Net Income

Year	Amount
2023	$536,869
2024	$836,369
2025	$2,108,053

Sewer Enterprise Account Net Income

Year	Amount
2023	($92,663)
2024	$1,213,897
2025	($317,678)

Provide the following information related to the reserve enterprise and general accounts for which you are requesting funding for the past three (3) Fiscal Years

General Fund Reserve

Year	Amount
2023	$14,672,953
2024	$16,517,807
2025	$15,860,893

PROJECT DESCRIPTION, SCOPE, AND READINESS

1. **Provide estimated project schedule**

	Date (mm/dd/yy)	Estimate or Actual
Design	Complete	Actual
All permits, easements, Right of Ways (approved/finalized/signed)	Demo Permit: 05/31/2026 Basic Use Permit: 05/31/2026 Building Permit: 05/31/2026 Condo Plat: 08/31/2027	Estimate
Bid Process	n/a	n/a
Start Project/Construction	6/15/2026	Estimate
Substantial Completion	8/01/2027	Estimate
Initiation of Operations	10/01/2027	Estimate
End of Project/Construction	10/01/2027	Estimate

2. **Project Narrative. Provide detailed description of your project. This description should be detailed enough the reader would have a good understanding of what work your project will require and what it will be when it is complete. Include information on the project to be constructed or improved. Submit maps, site plans, or engineering drawings if available. (May be sent in a separate document - name the document "Project Narrative")**

If available, please include the following:

- **Engineers Feasibility Study:** Geotech report from Jorgensen Engineering
- **Estimated Project Schedule:** see table above
- **Detailed cost estimate from a Wyoming licensed Professional Engineer:** Figure 9 Construction Contractor Schedule of Values

Additional Information if available:

- **Type and size of infrastructure (e.g., linear feet of water line, sewer capacity increase, utility extensions)**
- **Project design or engineering - if an engineer was not used to design the project, please include information on how the budget was developed**
- **Project cost breakdown**
- **Permitting or environmental review requirements including status**
- **Coordination with other agencies or partners with status**

The S4 Flats development is a partnership between the Town of Jackson and private developer Figure 9 Construction which will consist of a three-story multi-family structure with 13 deed-restricted dwelling units located in Midtown Jackson. Six of the condos will be two-bedrooms and 7 will be one-bedroom homes. A mix of owner-occupied and business-owned rented to employees will be provided to meet varying needs of the community. The project will include covered parking spaces on the first level, with the residential units on the two floors above. The residential units will be constructed using modular construction methods, with the foundation and first floor parking level constructed onsite and the residential second and third floors fabricated off-site, minimizing disruption to the neighborhood during construction and accelerating the project timeline. The architecture reflects a simple and elegant modern form to provide a frontage that compliments the neighborhood's character, with plenty of storage

on-site, bicycle parking, and an inviting streetscape. By utilizing the side and rear of the property for access and parking, the project maintains a consistent and uniform public-facing façade.

Acquisition of the two lots (910 Smith Lane and 915 Simon Lane) for the development was completed by the Town of Jackson. The Town of Jackson is providing the land and an additional $300,632 in funding for the development. 915 Simon Lane was owned by the Town of Jackson and appraised for $1,400,000. 910 Smith Lane appraised for $1,600,000; the Town purchased the lot for $1,200,000.

The development team has completed the pre-application conference, received Design Review Committee approval on the design concept, and completed asbestos mitigation in preparation for demo of existing structures. The only remaining permits to be obtained for construction of this project are a Basic Use Permit to change use of the site from detached single-family dwellings to attached single-family dwellings, a Demo Permit to remove the existing structures, and a Building Permit for the new building. Once constructed, a Condominium Plat will be filed to allow separate ownership of individual units. As the project site is not within the Natural Resources Overlay, no environmental review is required.

3. **PROJECT READINESS: Provide evidence of project readiness, including:**

- **Completed planning or design work**
- **Secured permits or approvals**
- **Identified contractors or partners**
- **Timeline demonstrating ability to obligate and expend funds efficiently**

Acquisition of the two parcels has been completed. Design and engineering has been completed and full construction documents are ready. The development team Figure 9 has completed the pre-application conference, received Design Review Committee approval on the design concept, and completed asbestos mitigation in preparation for demo of existing structures. The only remaining permits to be obtained for construction of this project are a Basic Use Permit to change use of the site from detached single-family dwellings to attached single-family dwellings, a Demo Permit to remove the existing structures, and a Building Permit for the new building. Site and ROW work is included in the Building Permit. Once constructed, a Condominium Plat will be filed to allow separate ownership of individual units. As the project site is not within the Natural Resources Overlay, no environmental review is required.

With a $1,200,000 grant from the Unmet Housing Needs grant program, the development will be fully funded. The Town has committed $1,400,000 for the Simon Lane parcel, $1,200,000 for the Smith Lane parcel (subject of the grant request), plus an additional $300,632 in funds for the development. The developer has committed $7,071,223 in equity and a construction loan for the development. The development partner, Figure 9 will also act as general contractor for construction of the homes.

The full development is shovel-ready, with ground-breaking set for June of 2026, substantial completion in August 2027, and project completion by September 2027, with occupancy starting soon after in the Fall of 2027.

ADDITIONAL PROJECT INFORMATION

How many individuals will be served by the proposed project?
Based on the sizes of the condos (assuming 1 person/bedroom), at least 19 people will be served by the proposed development at its completion. Over time, as residents cycle through and families grow, many more will be served across the lifetime of these homes. Also, the quality of life, economic, and character value of local households finding the stability to work, spend, volunteer, and recreate locally is felt community-wide and cannot be overstated.

What is the population of the community the project resides in?
10,680 (2020 census)

Does the proposed project eliminate noncompliance with regulations pertaining to the proposed project?
There are no existing noncompliance issues on the site, and the proposed project complies with all applicable zoning and development regulations. An existing detached single-family home on site that is not habitable due to significant asbestos mitigation will be eliminated as part of the proposed project.

Is there a formal maintenance policy and/or assets management/capital improvement plan for the asset for which funding is being requested?
Once complete, these condos will be sold to qualifying Affordable and Workforce households or businesses to rent to qualifying Affordable and Workforce households that will comprise membership of a Homeowners Association. All maintenance and management of the capital improvement is the responsibility of individual condo owners or the HOA. To help the future homeowners, part of the development process will include legal condominiumization, drafting of formal CC&Rs, and creating a baseline HOA maintenance and repair budget coupled with fee assessment schedules and estimates.

Will the requested funding be used for a partnership project with other entities?
Yes, the project is a partnership between the Town of Jackson and private developer Figure 9 Construction.

Will the applying entity own the asset for which the funding is being requested? No

If not, what is your ability to use the asset for a substantial portion of the useful life of the capital improvement?
The site is currently owned by the Town of Jackson. Once constructed, each condo unit will be owned by a qualifying Affordable or Workforce household, and the land, by Wyoming state law, will be conveyed to the Homeowners Association as collectively represented by the condo owners. The deed restrictions requiring all condo buyers in perpetuity to qualify as Workforce or Affordable households will be in place encumbering the title of each unit for the useful life of the capital improvement.

If the project will not be owned by the applicant, describe how the project creates a substantial public benefit.
Access to independent home ownership or rental at a price that is affordable to local working households is a substantial public benefit. Deed restriction that guarantees these homes will go to qualifying households secures this public benefit for the lifetime of the capital improvement.

Does the proposed project include the purchase of a building or land? Yes

> **If yes, has a market analysis been completed and submitted with this application?** Prior to initiation of planning and design for this project, appraisals of both lots comprising the project site were formally appraised. These 2022 appraisals are attached to this application. As part of the development agreement, the Town of Jackson negotiated a bargain sale of 910 Smith Lane for a below-market value of $1,200,000. This saved $400,000 from the price at which the site was appraised.

If yes, must provide a copy of the appraisal used to value the asset. Methodology and appraised value must be reviewed and agreed to by OSLI staff. 2022 Appraisals attached.

If no, please provide the date this will be completed

PROJECT OUTCOMES AND BENEFITS

Describe the expected outcomes of the project, including:

- **Number of housing units supported or enabled**
- **Population or workforce segments served**
- **Long-term community and economic benefits**
- **Sustainability or resilience improvements**
- **Explain how success will be measured and reported to the Office of State Lands and Investments**

S4 Flats will deliver 13 units of deed-restricted Affordable and Workforce ownership and rental units. The Town of Jackson has secured eight employee rights of first purchase in the development, and the remaining five units will serve Workforce eligible households (must earn a minimum of 75% of their income from a qualified Local Business). By providing affordable ownership units to Town employees and local workers, S4 Flats will ease cost burdens on low- and moderate-income earners and help retain workers locally to fill essential local government and business jobs.

S4 Flats will also model how innovative construction methods and integration with multimodal infrastructure can provide further long-term affordability and congestion-mitigation benefits to the community. S4 Flats will employ modular construction, with off-site fabrication of the housing units occurring while foundation work is completed at the project site. This method will reduce construction costs, eliminate waste, and speed up completion. The project team hopes that the successful S4 Flats project will serve as a model for future medium-density modular construction projects delivering more Affordable and Workforce housing units. By housing workers near their jobs and incorporating easy connections to bicycle infrastructure and bus transit, the project will also help to mitigate traffic congestion to further benefit the community. Jackson struggles with vehicle congestion due to significant commuter and visitor traffic overwhelming the road network. By eliminating the need for workers to commute into town and providing alternatives to personal vehicle use, S4 Flats will help to reduce traffic congestion and model how future developments can also boost the efficiency of the transportation network while delivering critically-needed housing units to the Town of Jackson.

The development includes sustainability and resilience benefits. Native and drought-resistant plants are incorporated in the landscaping plan to reduce water use and be more resilient to weather. Electric vehicle charging options will be provided on site. Modular construction reduces construction waste compared to traditional building. Infill and redevelopment are sustainable land use option that preserve rural landscapes, wildlife habitats and natural resources elsewhere in the valley.

The Jackson/Teton County Affordable Housing Department, which manages compliance with deed-restricted housing units, will report on project milestones, successes, and ongoing compliance with the income and local workforce requirements of unit ownership to the Office of State Lands and Investments. Housing Department staff have extensive experience successfully delivering housing projects in partnership with private developer partners, completing reporting on grant-funded housing developments, and ensuring compliance with income/local worker housing restrictions, and will leverage that experience to provide regular reports to OSLI on project progress and ongoing compliance with grant terms. Measures of success will include adherence to the projected construction timeline, total expenditures compared to cost estimates, and demonstration of long-term compliance with the Affordable and Workforce housing requirements. A metric of success that cannot be measured but will inevitably result from this development is the stability, pride, and community for thirteen households that find a place to call home.

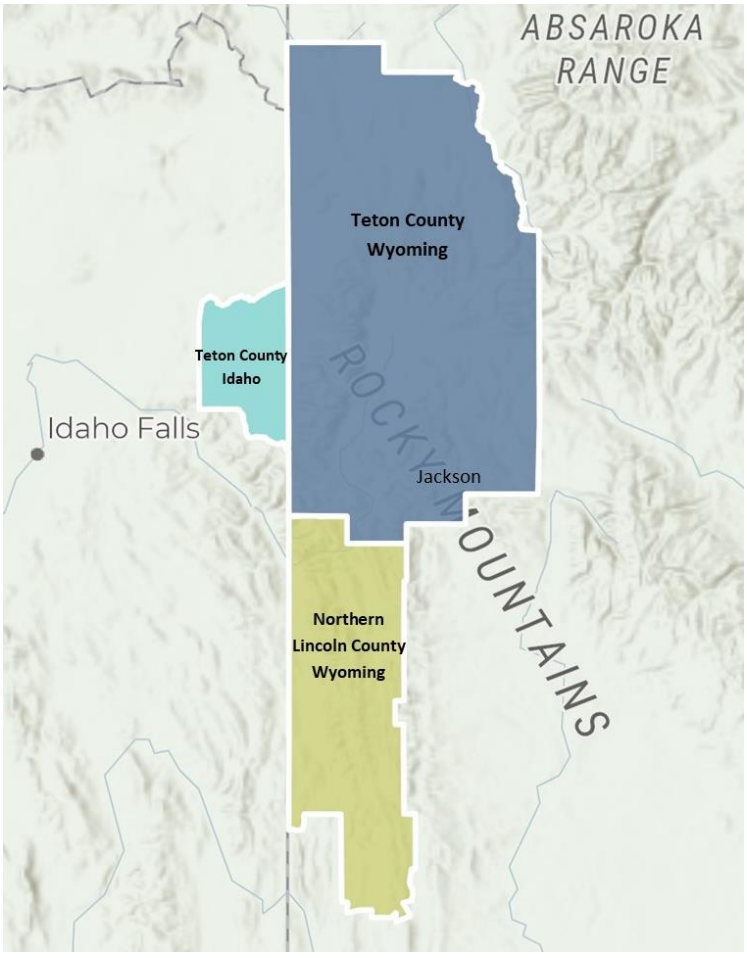
Introduction

Purpose and Scope of the Study



Purpose

The Teton Region Housing Needs Assessment was sponsored by Teton County, Wyoming, Teton County, Idaho, and its jurisdictions. The purpose is to evaluate the housing needs of residents and employees making their living in the Teton Region and understand not only specific housing needs for each county in the study area, but also their regional connection related to jobs, housing, and community. The study also summarizes the extensive work already occurring in the region with regard to resident and employee housing needs and programs and provides recommendations for each county and the region to help further progress.

It is our hope that this information will not only help inform and guide future housing policies and programs, but also help to educate the communities and the region on how having diverse and secure housing opportunities that local residents and employees can afford supports the health, sustainability, and vibrancy of the Teton Region.

Study Area

This study covers a bi-state, tri-county, multi-jurisdictional region, defined as Teton County, Wyoming, Teton County, Idaho, and Northern Lincoln County, Wyoming (N. Lincoln County), which is defined by census tracts 9782 and 9784. Throughout this report, the term "Teton Region" is used to indicate this area.

Organization of the Report

This report begins with a regional overview that presents key trends and illustrates the regional connections in the Teton Region among jobs, economy, and housing. This section is followed by separate, detailed housing needs studies for each county in the Teton Region, which includes:

- Chapter 1 – Report Snapshot and Recommendations
- Chapter 2 – Community Demographics
- Chapter 3 – Jobs, Seasonality and Commuting
- Chapter 4 – Housing Inventory
- Chapter 5 – Housing Market
- Chapter 6 – Housing Program Accomplishments and Challenges*
- Chapter 7 – Housing Resources, Opportunities and Constraints*
- Chapter 8 – Housing Units Needed

*NOTE: Chapter 6 and Chapter 7 are included for Teton County, Wyoming, and Teton County, Idaho, only.

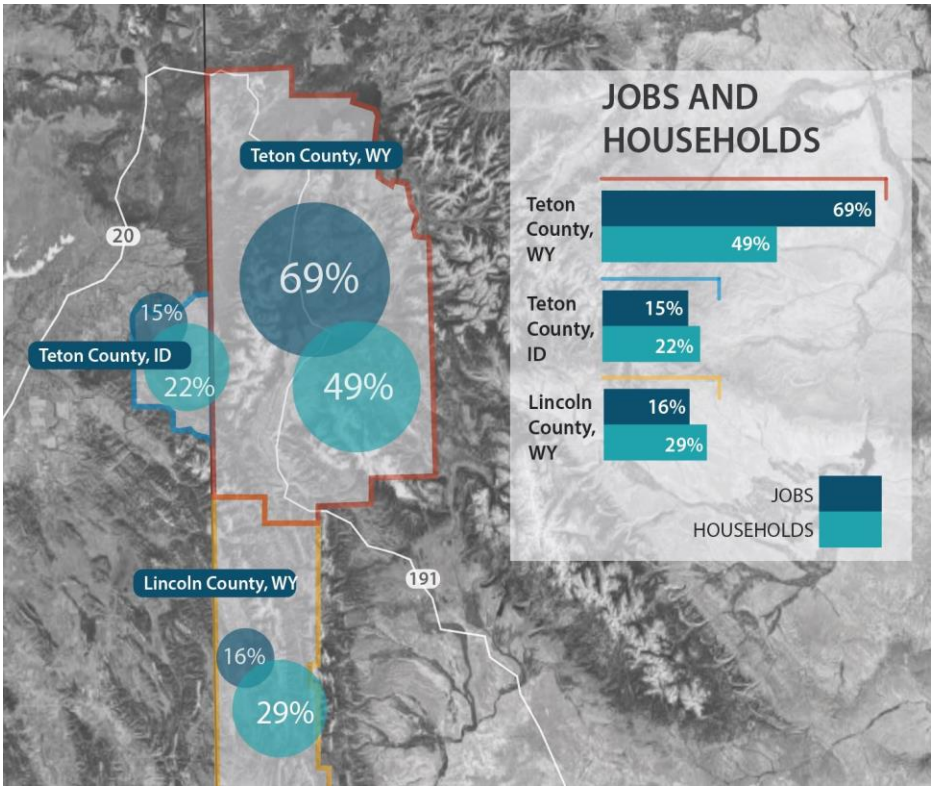
Appendices include:

A. The study methodology, secondary and local data sources, definitions, acknowledgements;
B. Teton County/Jackson housing tools matrix;
C. Teton County, Idaho, housing tools matrix;
D. Survey instruments (employer, employee/household English and Spanish versions);
E. 2021 Employee/Household Survey data and open ended comments.

Regional Overview

This section of the report summarizes the regional connections among the three counties comprising the Teton Region study area. In doing so, it also acts as an executive summary that pulls together the three county reports.

This section illustrates the job and housing relationships in the Region and commuting patterns. It also discusses how the interactions and current housing costs and supply in the Region affect community residents and businesses. By understanding the regional nature of the housing and job markets, as well as local effects, it is hoped that this information can help each county better target housing programs and policies to address their core county needs, while also maintaining an awareness of how actions undertaken in one county affect the others in the Region.



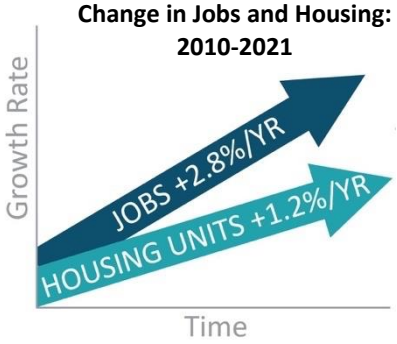
This section concludes with a basic recommendation to continue regional discussions and coordinate each county's experience, knowledge, and capacity, where beneficial, to provide more housing opportunities for local residents and employees that support the vibrancy and economy of the Region and communities.

This section borrows upon detail that is presented in the individual county reports and the Appendices. Instead of repeating the technical information and data here, references are provided to the county report chapters that can be reviewed if more information is desired.

Jobs and Housing Imbalance

Where Jobs and Households are Located

Jobs and households are not evenly distributed within the Teton Region. Teton County, Wyoming, has the highest share of jobs in the region, but has proportionally fewer households. Teton County, Idaho, and N. Lincoln County are the opposite. Irrespective of home prices, this imbalance in supply means that employees in Teton County, Wyoming, have to search for housing outside of the county. The county, therefore, has to rely on in-commuters to help fill jobs.



Source: 2020 Census, consultant team

Jobs and Housing Growth

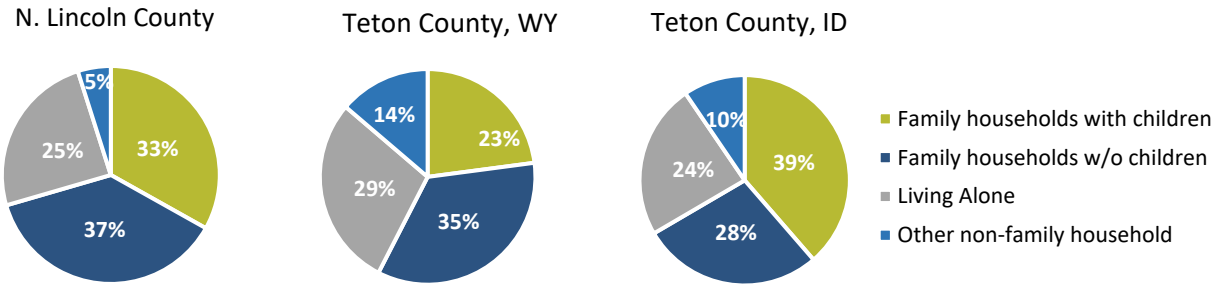
The imbalance is reinforced when you see that the growth in housing units has not been keeping up with job growth – creating more of a housing shortage.

Change in Jobs and Housing: 2010-2021

- Since 2010, jobs have been growing at more than twice the rate of housing units in the Teton Region. This is true for each county in the Region.
- Job and housing growth was actually slowest in Teton County, Wyoming. And, while housing grew at less than one-half the pace of jobs, housing development in the other counties in the region occurred at one-third the rate.
- Since 2015, the rate of housing unit development in Teton county, Wyoming, has been only marginally slower than job growth (1.3% and 1.7% per year, respectively) and ***a very commendable 41% of that growth (411 of 996 units) were units with employment-, income-, and/or price-limits, ensuring local occupancy.***

Average Yearly Growth in Jobs and Housing Units by County: Teton Region, 2010 to 2021

	Average Yearly % Change			
	2010 to 2021		2015 to 2021	
	Jobs	Housing	Jobs	Housing
Teton County, Wyoming	2.3%	1.1%	1.7%	1.3%
Teton County, Idaho	4.3%	1.4%	5.0%	2.1%
N. Lincoln County, Wyoming	3.7%	1.2%	3.9%	1.9%



Source: QCEW, BEA, County Assessor data, consultant team

Effect on Demographics

The housing imbalance plays out by affecting the demographics in a community. Families in particular have a hard time finding housing and growing a family in the tight and high cost housing market in Teton County, Wyoming. Many seek homes in neighboring counties in the region. The high percentage of households that are families with children in Teton County, Idaho (39%), and N. Lincoln County, Wyoming (33%), compared to Teton County, Wyoming (23%), show this pattern.

Roommate situations are also more common in Teton County, Wyoming, as people combine households to afford homes. This pattern has increased since the COVID pandemic in response to drastically rising home prices and rents throughout the Teton Region.[1]

Household Types Compared: Teton Region, 2019

Source: 2019 5-year ACS

Providing homes that local residents and employees can afford, however, can impact the mix of households in the community. Evaluating employees that are residing in the substantial inventory of units with employment-, income-, and/or price-limits in Teton County, Wyoming, shows that the percentage of units occupied by families is higher than that for market rate homes. Communities can effect change and retain local vibrancy if resources are allocating to doing so.[2]

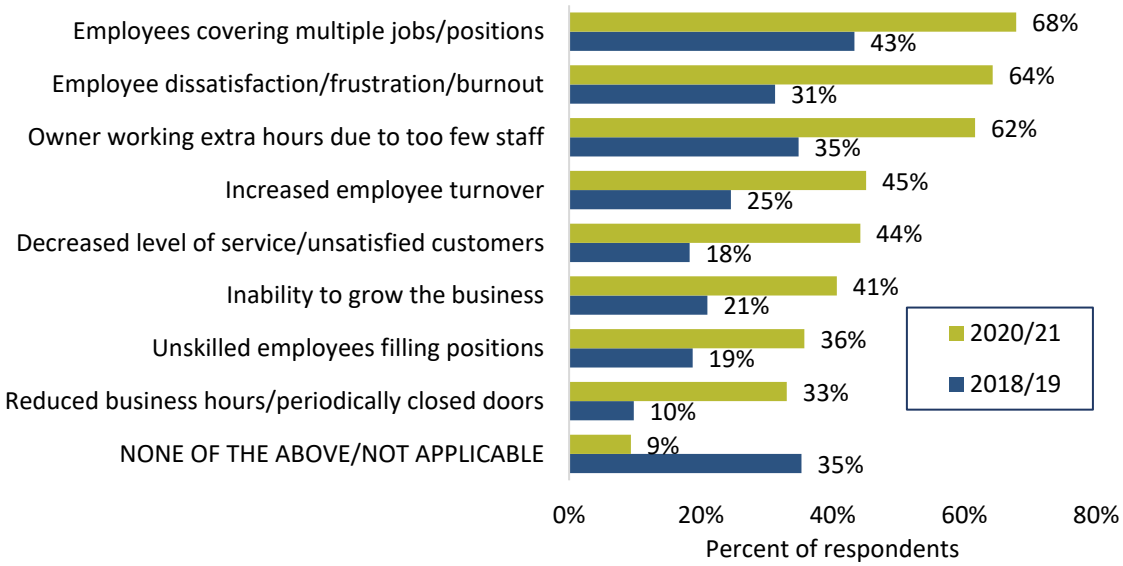
TOTAL	100%	100%	100%	100%

Source: 2021 Employee/Household Survey

Effect on Businesses

Jobs, employees, housing, and businesses are tied together. Businesses cannot function if employees cannot find homes.



When employers were asked in the 2021 employer survey about issues they experienced when finding or keeping qualified employees, the lack of housing was the number one issue (80% of respondents).

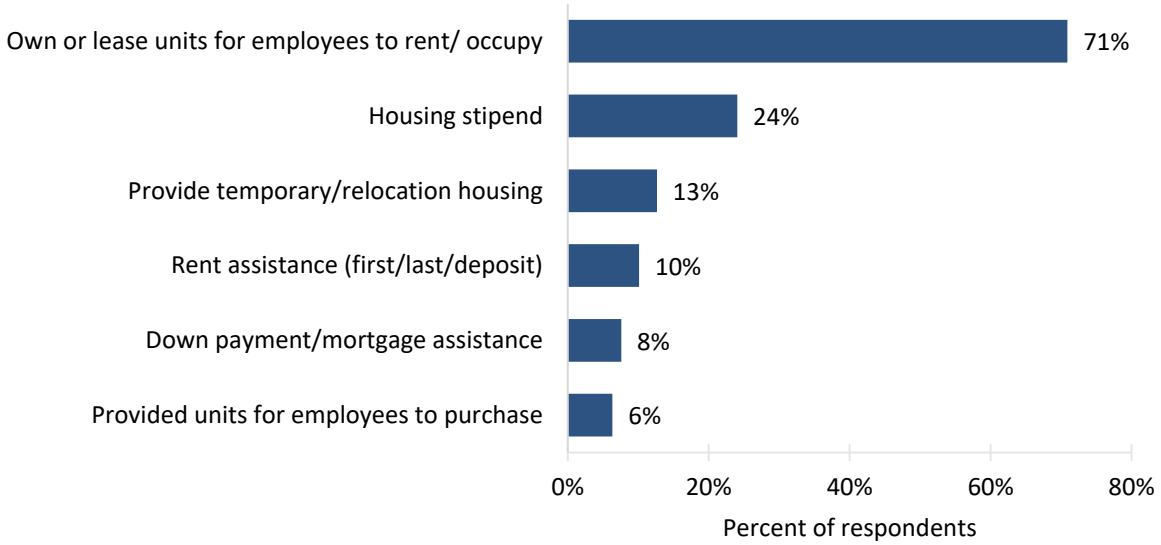
The effect this has on Teton Region employers is significant. Currently between 15% to 19% of jobs are unfilled.[3] While the labor shortage is a national trend, having an available and affordable supply of homes for employees to occupy is a competitive advantage in tight labor markets.

> *"I no longer want to own my business due to the employment challenges compounded by the housing crisis."*
>
> *-2021 Employer survey comment*

Problems experienced due to understaffing are not new to Teton Region businesses, but they have accelerated since the pandemic. As shown below, ***about 65% of businesses (or two-in-three) experienced problems in 2018/19 compared to 91% in 2020/21.*** Employees being overworked and experiencing burnout topped the list, followed by a decreased ability to provide quality customer service, inability to grow businesses, and needing to reduce hours or periodically shut doors. This impacts not only business revenue and their ability to operate, but also the health and quality of life for employees and residents, available services, and the experience of visitors.[4]

Has your business experienced any of the following problems related to being understaffed?

Source: 2021 Employer survey



[3] See Teton County, Wyoming, and Teton County, Idaho, reports: Chapter 3 – Jobs, Seasonality, and Commuting
[4] See Teton County, Wyoming, and Teton County, Idaho, reports: Chapter 3 – Jobs, Seasonality, and Commuting for more details on employer impacts.

Employer housing programs are helping over 1,100 seasonal and year round employees access and afford housing. Opportunities for improved coordination, education, and collaboration exist.

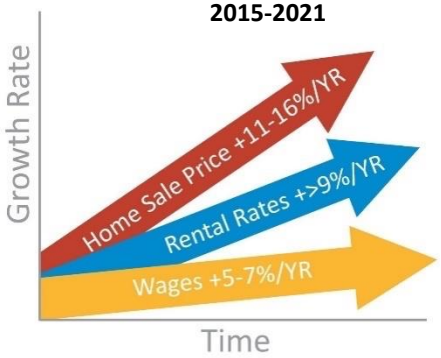
> *Without employee housing we wouldn't be able to operate our business.*
>
> *-2021 Employer Survey Comment*

About one-third of employers in the Teton Region (35%) that responded to the survey are providing some form of housing assistance to employees. Of those, the majority provide units, either owned or master-leased, that they then rent or provide as compensation to employees.

What type of housing assistance do you provide?

Source: 2021 Employer survey

Housing Costs and Supply



This section summarizes information that can be found in more detail in Chapter 5 – Housing Market for each county.

Housing Costs and Local Wages

The balance between household income and what housing costs is a struggle in the Teton Region. The increase in home sale prices and rents in the Region has been far outpacing the rise in wages, meaning that homes are becoming more unaffordable for people earning their living locally.

Housing supply shortages are precipitating price increases.

Change in Home Prices and Wages: 2015-2021

Growth in Housing Prices Compared to Wages: Teton Region Counties, 2015-2021

	Average yearly % change 2015 to 2021		
	Sale prices	Rents	Wages
Teton County, Wyoming	13%	>9%	7.1%
Teton County, Idaho	15%	>9%	4.9%
N. Lincoln County, Wyoming	16%	>9%	4.9%

Available Homes by County

The supply of homes priced under $500,000 throughout the region has drastically declined. Local residents and employees in Teton County, Wyoming, used to find homes at these price points in neighboring counties; however, this option is disappearing. Variations by county are shown below:

> *"… my household has saved money for a down payment and could manage a mortgage that would make a $700,000 home manageable for us. However, there's nothing on the market close to that price range."*
>
> -2021 Employer Survey Comment

- The median sale price of single family homes exceed 200% AMI in all markets, meaning that households earning in excess of $200,000 have trouble affording this product. In Teton County, Wyoming, single family homes are basically unattainable for residents making their living locally.
- Attached homes offer more affordable options; however, supply in Teton County, Wyoming, at prices below $1 million (or 300% AMI) are limited (9 units for sale). Supply in general is limited in Teton County, Idaho, (22 units for sale) and non-luxury attached units in Lincoln County priced under $500,000 are very limited (10 units for sale).
- Available rentals are most affordable in N. Lincoln County, but still require an income of $70,000 to afford the average rent.

Housing Prices in the Teton Region Compared

	Teton County, WY	Teton County, ID	N. Lincoln County, WY
Median Sale Price (Jan-Oct 2021) – Single Family	$2.9 MM	$750,000	$699,500

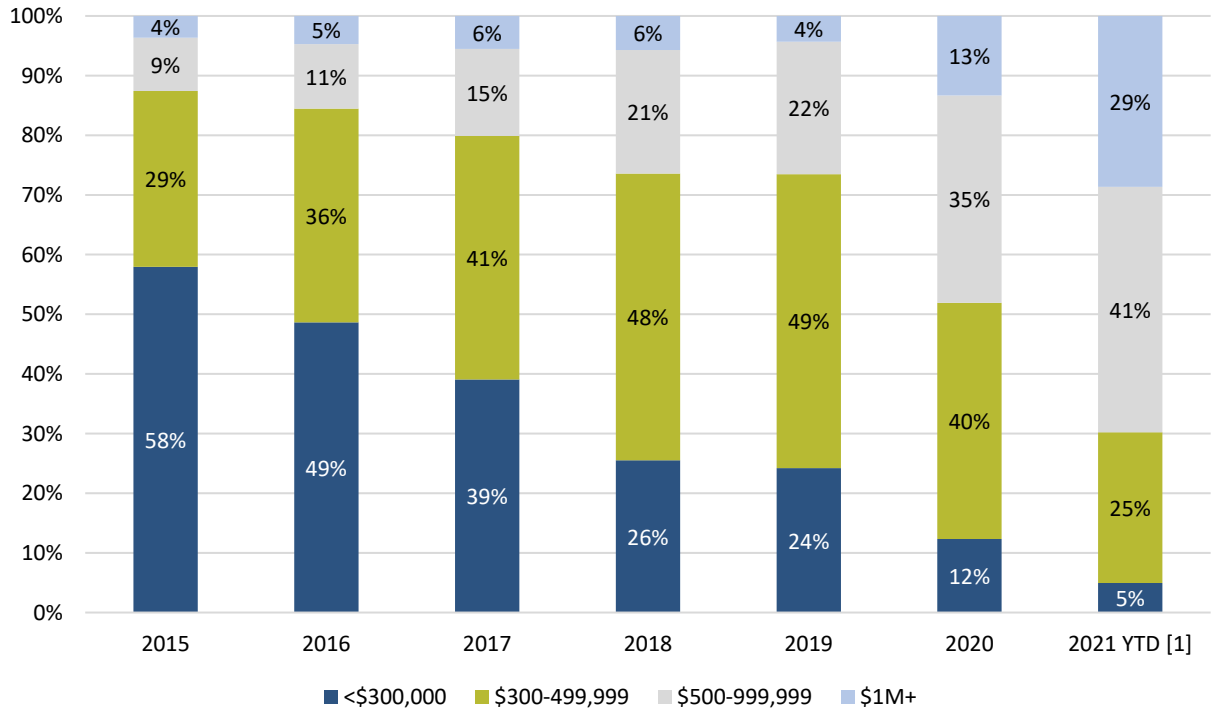
[1]N. Lincoln County note: Only 9 attached units sold; 7 were luxury properties with airplane hangers; 2 units sold for under $500,000.



Sources: 2021 Employee/household survey, MLS, property manager interviews, online rental listings, consultant team

Prices That Persons Making Their Living Locally Can Afford

Most residents and employees in the Teton Region seek homes priced from $200,000 up to $500,000 for purchase, with workers in Teton County, Wyoming, searching up to $750,000.

As illustrated below, just a few years ago, homes priced below $500,000 were available over the pass in Teton Valley and in N. Lincoln County, Wyoming, which is where many employees working in Teton County, Wyoming, searched for and found homes to buy. Since the recent boom in housing prices, homes priced below $500,000 have quickly disappeared. Households searching for homes over $500,000 can still find some product, but these prices are hard for workers in Teton County, Idaho, and N. Lincoln County to afford. And supply is very limited – below a 4-month supply; and even lower for homes under $500,000. As options throughout the Teton Region diminish, it becomes even more important to provide opportunities locally.

Home Sale Price Distribution by Year: Teton County, Idaho, and N. Lincoln County, Wyoming 2015 to October 2021

Source: Note: inclusive of sales with a known price greater than zero
[1] last sale on Oct 29, 2021
Source: MLS, consultant team

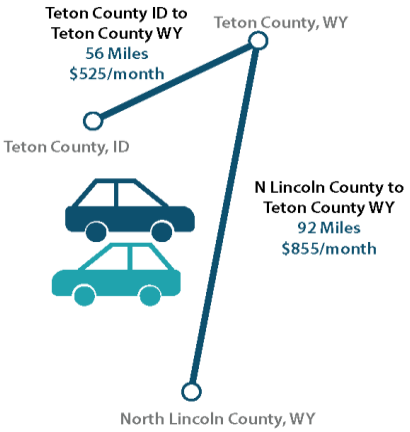
The majority of renters making their living in the Region primarily need rentals priced between $850 up to $2,600 per month for a three-person household.

Rentals at these prices can be found in N. Lincoln County and Teton County, Idaho, but are extremely limited. Rental vacancy rates in all counties are below 1%, meaning that there is not enough supply for new residents to find homes nor for existing residents to move into more suitable rentals. Residents are stuck in their homes.

"[We are] looking to expand our family, but we cannot do so with the current space and have no availability to move into a bigger unit."

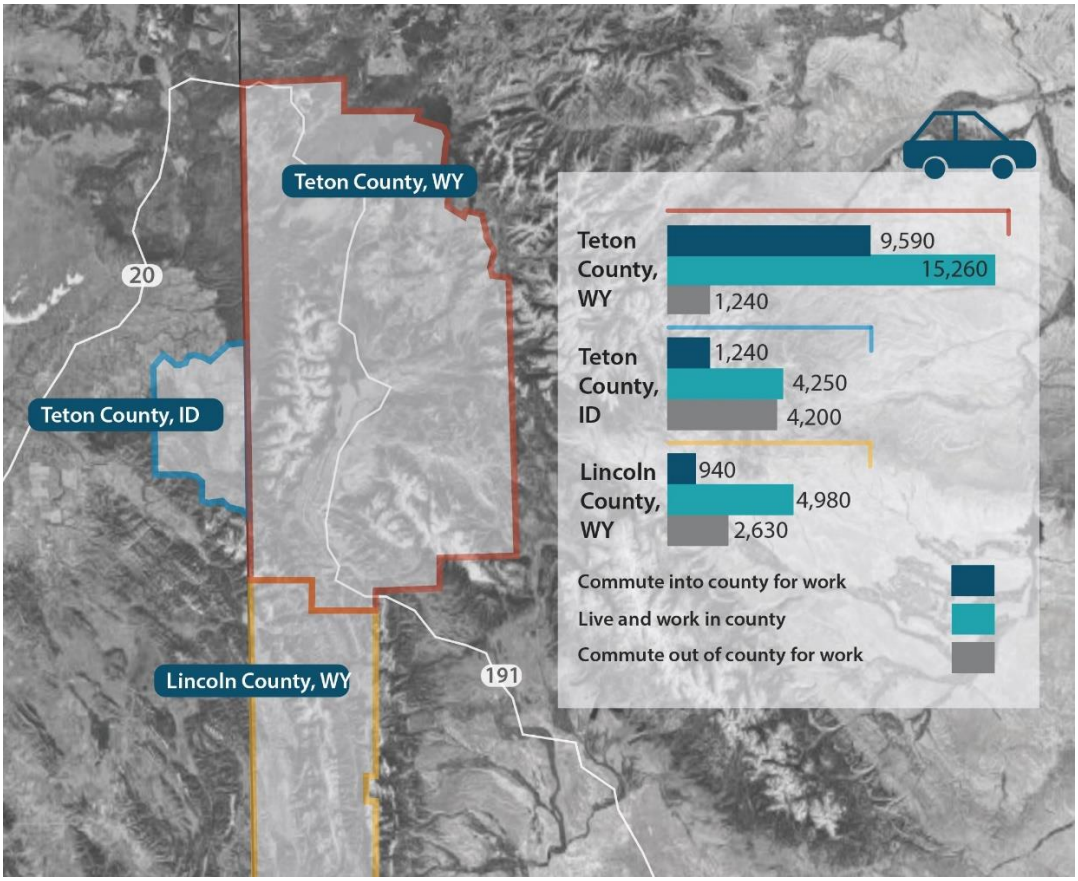
-2021 Employee/Household Survey comment

Commuting in the Teton Region



This section summarizes information that can be found in more detail in Chapter 3 – Jobs, Seasonality, and Commuting for each county.

Where Residents Live and Work



Commuting is a result of the imbalance between jobs and available and affordable housing in the Teton Region (see "Jobs and Housing Imbalance" section, above). In the effort to find homes they can afford, households search for housing away from their place of work, adding significant commuting costs to households and vehicle and traffic impacts to the community.

When workers from Teton County, Wyoming, successfully compete for homes in neighboring counties, this then pushes Teton County, Idaho, workers, for example, to places further out, such as Rexburg, continuing the pattern.

Cost to Commute

Commuting in the Teton Region: 2021

Source: LEHD, QCEW, LAUS, 2021 Employer survey, Consultant Team

About 61% of employees in Teton County, Wyoming, live in the county, compared to a respective 77% and 83% of employees in Teton County, Idaho, and N. Lincoln County living within their county of employment. Despite home price increases and low availability, the percentage of employees that live and work in Teton County, Wyoming, has remained fairly stable over the past decade (between 58% to 61%). ***The substantial inventory of units with employment-, income-, and/or price-limits in Teton County, Wyoming, has helped to retain 61% of workers living locally. Without these units, an estimated 55% of workers would be living in the county.***[5]

Where Employees Live

	Work in:		
Live in:	**Teton County, WY**	**Teton County, ID**	**N. Lincoln County, WY**
Teton County, WY	61%	2%	1%
Teton County, ID	13%	77%	<1%

TOTAL %	100%	100%	100%
TOTAL #	24,825	5,490	5,650

Source: QCEW, BEA, LEHD, Consultant team

Costs of Commuting

Commuting has costs to the employees that must travel, businesses that employ them, and on the community and environment.

- Employees incur the expense, time, stress, unpredictability in bad weather, and other effects of commuting. For families with young children in particular, having both parents commuting from Alpine or other distant communities is a struggle. ***When it costs an average of $500 per month to commute from Teton County, Idaho, and $850 to commute from N. Lincoln County to Teton County, Wyoming, for work, these costs quickly erode any cost savings these households may have had by paying lower rent in these communities.***[6]

> *"[I] Have a second job to pay for gas to commute to Jackson."*
>
> *-2021 Employee/Household Survey Comment*

[5] See Teton County, Wyoming, report Chapter 6 – Housing Program Accomplishments and Challenges
[6] See Section 3 – Jobs, Seasonality, and Commuting in the county reports for more information. The Teton County, Wyoming, report shows the data support for and calculation of commute costs.

- Employers incur the risk of losing in-commuting employees to jobs nearer to their home, increased tardiness and absence in bad weather or family obligations at home, increased turnover (and associated costs to refill jobs) when employees grow weary of the commute, and resulting decreased level of service. ***Forty-one percent (41%) of employers in Teton County, Wyoming, that responded to the survey had difficulty retaining or attracting employees due to long commutes.***

> *"When our landlord sold their house in Jackson we decided to buy in Alpine... If I can find a good paying [job] in Alpine, I'll never go to Jackson again."*
>
> *-2021 Employee/Household Survey Comment*

- The community experiences impacts through increased traffic, road maintenance, need for parking when commuters arrive to work, and air quality effects of significant vehicle miles traveled. As shown below, commuters into Teton County, Wyoming, from Teton County, Idaho, and N. Lincoln County contribute a combined average of 75 million vehicle miles traveled per year driving to work. ***The cost, traffic, and emissions of commuting can be mitigated through transportation options or avoided through local housing options.***

Average Vehicle Miles Traveled by Commuters within the Teton Region: 2021

Commute between Teton County, WY and:	Teton County, ID	N. Lincoln County, WY
Average miles commuted ONE WAY (2021 survey)	28	46
Days per week commuter drives alone (2021 survey)	3.9	3.9
Round-Trip miles per week	220	360
Miles per year (assuming 50 weeks of commuting)	***10,750***	***17,500***
# of in-commuters traveling	3,220	2,340
Total yearly vehicle miles traveled	34,615,000	40,950,000

Source: 2021 Employee/household survey, consultant team

Housing Problems

The demographic, economic, and market dynamics in the Teton Region work together to create a collection of problems for local working households. These problems include:

- Paying more for housing than household budgets can support ("cost burden"),
- Overcrowding,
- Difficulty finding housing,
- Settling for or being stuck in housing that does not meet household needs, and
- Being forced to move.

This section is intended to encourage and not frustrate actions to address the housing needs in the Teton Region. While the impacts are significant, ***this section can help the counties and communities in the Region understand the impacts of the housing shortage and prices on the community and prioritize limited resources to make a difference.***

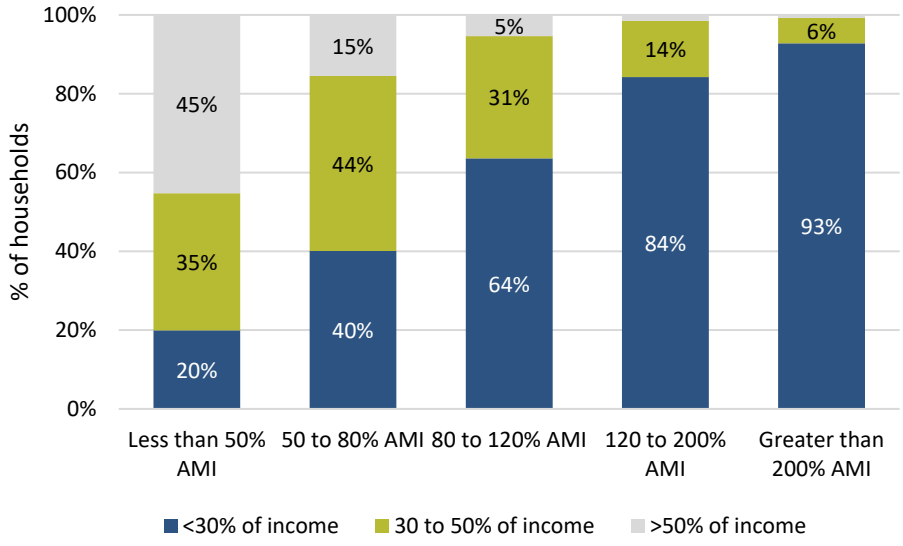
This chapter reports on responses from the 2021 employee/household survey. Results are from the combined responses from the English and Spanish surveys, unless otherwise noted. Appendix E contains comprehensive crosstabulations of these problems by county of residence and tenure, income level, and Hispanic/Latino ethnicity.

Cost Burden

Households are considered to be cost burdened if their housing payment (rent or mortgage plus tax, insurance, utilities) exceeds 30% of their gross income. Households paying over 50% are extremely cost burdened. Cost burdened households often have insufficient income for other life necessities including food, clothing, transportation, and health care.

> *"For many years if you had two jobs it was enough for one person to pay rent and have some left over. But this year people must have at least three jobs."*
>
> *-2021 Employee/Household Survey comment*

Overall, 29% of owners and nearly half (46%) of renters are cost burdened by their housing payments. The below chart shows that the lower a household's income, the more likely they are to be cost burdened.



The notable shift between 80% AMI and higher incomes could guide housing policy makers to make deeper investments in the inventory accessible to households below 80% AMI. The majority of renters (54%) fall into this income range and are experiencing housing instability and financial strain.

Other observations based on data found in the Appendix include:

- Residents in N. Lincoln County are the least likely in the region to experience cost burden (20% of owners and 32% of renters); however, when commutes costing $850 per month are added, housing cost savings are quickly eroded.

- Hispanic/Latino households also experience a similar level of cost burden as households earning <80% AMI in the below chart. About 62% of Hispanic/Latino households earn in this income range.

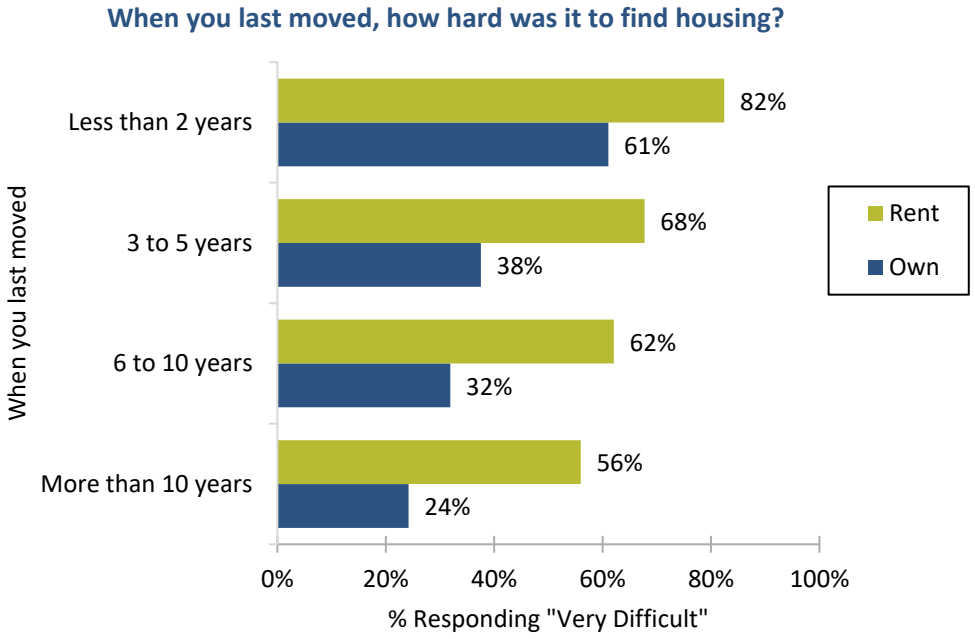
Percent of Households that are Cost Burdened by AMI:
Teton Region Employed Households, 2021

Source: 2021 Employee/Household Survey

Overcrowding

Overcrowding, as measured by more than two persons per bedroom, is not widespread in any of the counties and is experienced at similar rates. About 2% of owners and 8% of renters are overcrowded.

> *"I sleep in the living room."*
>
> *-2021 Employee/Household Survey comment*



This problem is much more prevalent with Hispanic/Latino households (19%) and very low income households (14%). These households are also more likely to live with extended family and have extra roommates to afford housing. A lack of larger homes (e.g., 4-or-more bedrooms) was also noted by Hispanic/Latino households, some of which are occupying smaller homes than they need due to lack of supply.

Difficulty Finding Housing

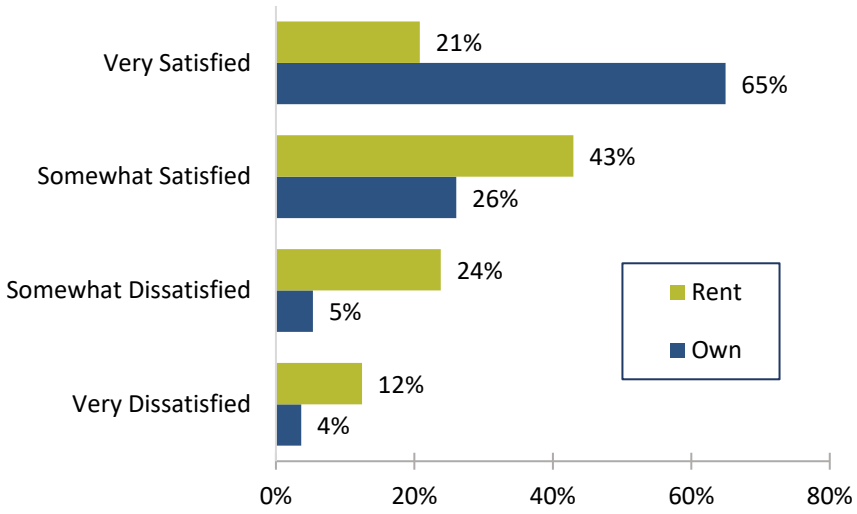
Difficulty finding housing has been a problem for local workers for many years. What is new is that households throughout the region now have similar difficulty locating suitable housing, and that both owners and renters searching for homes have experienced significantly increased difficulty within the past two years.

- For renters, 83% found it very difficult to find housing in the past two years. Rentals have been near zero vacancy for several years. The recent rise in demand and rapid increase in prices aggravated an already tight rental market.

- For owners, 61% found it very difficult to find housing in the past two years, a significant increase compared to those who bought 3 to 5 years ago (38% "very difficult"). The limited inventory and loss of housing choices under $500,000 in all three counties has had an impact.
- Difficulty finding housing is intensified for households with incomes below 120% AMI (81% "very difficult" within the past 2 years), which is again related to the rapid rise in home prices and lack of inventory for households in this income range.
- Similarly, Hispanic/Latino households (88% "very difficult") express greater difficulty, which, on average, are lower income and are comprised of a higher proportion of renters than other households.

Source: 2021 Employee/Household Survey

Housing Satisfaction



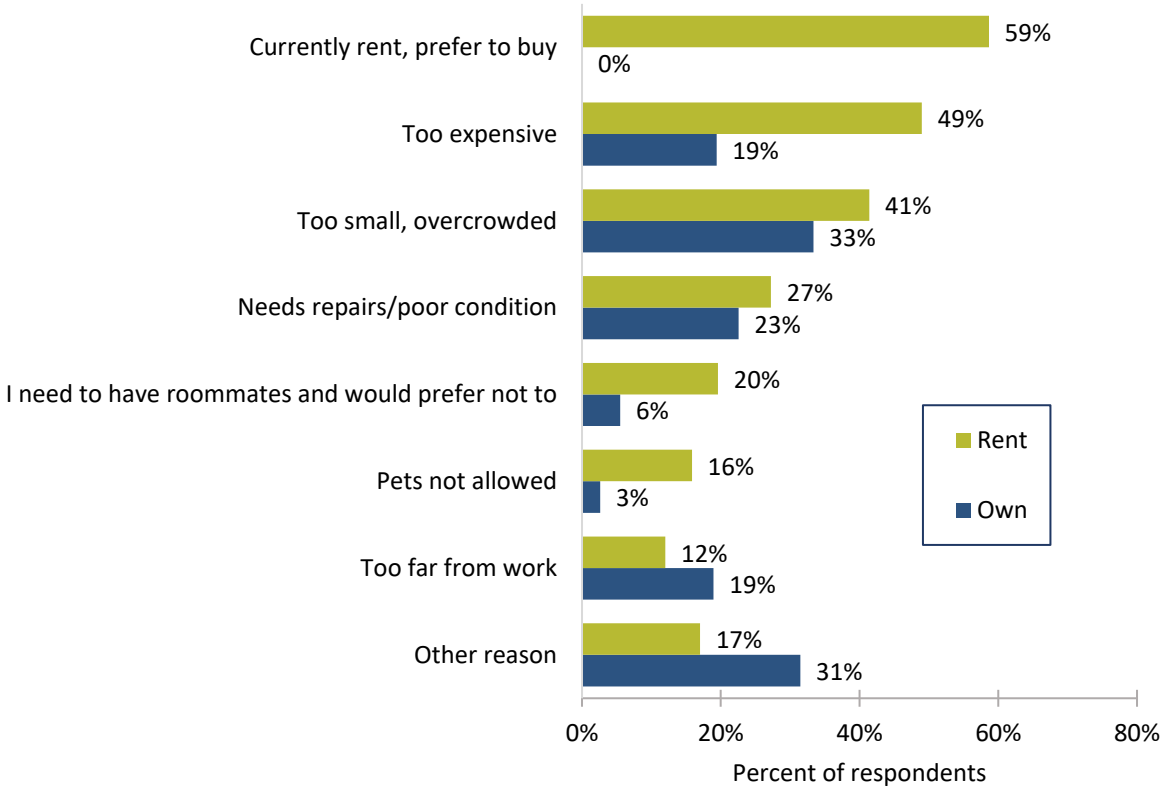
Residents and employees that are happy and secure in their housing are more likely to stay in their community and their jobs.

- About 45% of employed households in the Teton Region are very satisfied with their current residence. This includes 65% that own their home and about one-in-five (21%) renters. This illustrates the importance of homeownership in building stability, security, and satisfaction among residents making their living in the region.

> *"Undesirable Housing is the biggest stressor and impact to my quality of life."*
>
> *-2021 Employee/Household Survey comment*

- Respondents living in N. Lincoln County were less likely to be "very satisfied" with their housing than the other counties (56% owners, 11% renters); however, most of these respondents commute to Teton County, Wyoming, for work. Most of the dissatisfaction was related to the commute – distance, time, stress, and cost.

How satisfied are you with your current residence?
All Employed Households: 2021



Source: 2021 Employee/Household Survey

The 55% of respondents that were less than fully satisfied with their home were asked for more detail.

- Most renters that are not fully satisfied want to buy a home (59%). This equates to 46% of renters overall in the Region. Renters wanting to buy primarily earn below 120% AMI. About 68% of survey respondents would consider purchasing a deed restricted home.
- One-third of owners are in homes that are too small. This indicates that many are stuck in their homes; that there are not sufficient options for owners to upsize as their family grows. Another 23% stated their home needs repairs, indicating that programs that can help with low cost loans or grants would be of benefit.
- Commuters into Teton County, Wyoming, for work were interestingly less likely to select all of the below problems, except "too far from work," which was selected by 60% of commuters. In other words, the commute is a trade off for households that move further away to purchase homes and find more suitable housing.
- Hispanic/Latino households had similar responses to the below, except renters were less likely to want to buy, equating to 37% of renters overall. Primary difficulties finding housing included homes being too expensive and little availability. The majority that want to buy earn under 80% AMI (68%). Other reasons provided included lack of credit, immigration issues, limited income, and space for children (i.e., homes too small). The average size of renters wanting to buy is about 3.7-persons.
- "Other" issues provided included:
    - For renters, housing instability (fear of losing home, home selling, rent rise, etc.), having to live with family or roommates, and having a home tied to work (no flexibility).
    - For owners, having to have roommates, property taxes too high, and being stuck in a home that the household has outgrown.

If you are not fully satisfied with your residence, why not?

Source: 2021 Employee/Household Survey

"We want to have kids and cannot afford or find more space for that next step."

"The threat of being kicked out - either through landlord selling or raising the rent to predatory levels - is constant."

-2021 Employee/Household Survey comment

Forced to Move

Current housing trends highlight the instability of the rental market in the Teton Region. When renters were asked if they had been forced to move in the past three years, nearly half (46%) said yes, and many more than once. This equates to over 2,000 renter households in the Region.

Over 2,000 renters (46%) in the Teton Region were forced to move an average of 2-times each over the past three years.

Renters that were forced to move had to do so an average of two-times during the past three years for the following reasons:[7]

- 23% had to move because the home was sold by the owner;
- 18% had to move due to a significant rent increase (which averaged $660 in the Region);
- 11% had to move because the unit was directly converted to a short-term rental; and
- 11% had to move because the owner moved in.

Apartments and mobile homes are less susceptible to all of the above instability factors, excluding rising rents, than owner-leased condominiums, townhomes, and single family homes. Rentals that are rent restricted, such as low income housing tax credit rentals, are also protected from significant market rent increases.

The percentage of renters affected by each of the above factors was fairly consistent for households residing in each of the counties in the region. Notable differences include:

- Households commuting from Lincoln County were more likely to indicate "significant rent increase" as a reason for displacement (24%). Survey comments indicate that some experienced rent increases in Teton County, Wyoming, and then moved to Lincoln County to find homes.
- Short-term rental conversion affected a higher percentage of Teton County, Idaho, households than the other counties (18%), where state legislation limits the ability to restrict short term rentals.

> *"We are facing potentially losing over half of our employees due to losing their rental housing. Each one of them is frantically seeking long term rentals. The rentals they are currently in are being turned into VRBO's..."*
>
> *-2021 Employer Survey Comment (Idaho employer)*

To further understand the general stability of households, or not, in the Region, the English version of the survey also asked respondents if they plan to move within the next five years and, if so, if they are moving because they "have to" or because they "want to." As shown below:

- Twelve percent (12%) of respondents plan to leave the Teton Region within the next five years because they have to. This includes 4% of respondents that own their homes and 26% of renters. ***In Teton County, Idaho, and Teton County, Wyoming, this would equate to 1,250 renter households being forced to leave***.
- Results were similar across the Region, with the exception of renters in Teton County, Idaho, who were less likely to leave the Region because they "have to" (19%).

[7] Both the English and Spanish survey versions asked renters if they were forced to move. The specific reasons why renters were forced to move were asked on the English version of the survey only. Open ended responses provide additional insight on the Spanish version (reference Appendix).

Within the next five years, do you plan to:

	Owners	Renters	TOTAL
Stay in your current residence	78%	23%	57%
Move within the Region	11%	45%	24%
Because you have to:	*2%*	*20%*	*9%*
Leave the Region	11%	32%	19%
Because you have to:	*4%*	*26%*	*12%*

Source: 2021 Employee/Household Survey

Households being forced to leave primarily earn between 50% and 200% AMI – the majority of the income spectrum. Residents from all stages of life are also affected – single persons, young families, working households, and retirees. Reasons centered around the unaffordability of the area, losing housing due to rentals being sold or price increases, tired of the housing instability, no homes available, and *"having stable housing that is LESS than 30% of my annual income is now important to actually build the life I want."*

"After 11 years of living, local year round employment and thinking we could make it work long term starting a family, the dream was sold out from under us... Even though we make really good money now there is no possibility of owning a home. Sad to leave this community."

"Can't afford a rental or house. I'm a full-time teacher."

"Can't afford to stay as a retired individual."

"Moving 4 times in three years is physically, mentally, and financially too much to handle."

-2021 Employee/Household Survey comments

Housing Units Needed

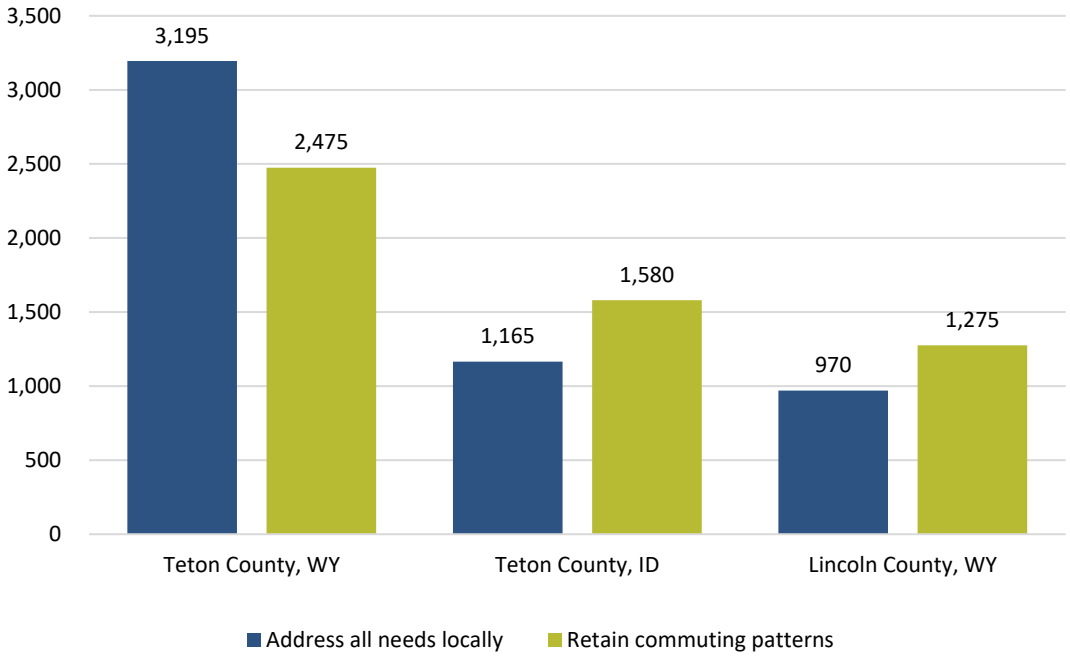
This section summarizes information that can be found in more detail in the Housing Units Needed[8] chapters in each of the county reports.

Current and Future Housing Needs

There is a current shortage of housing for local residents and employees in the Teton Region. ***There is an estimated need for about 5,300 housing units in the Teton Region to address the following components of demand through 2027***:

- Increase the rental supply to a functional level (i.e., 5% vacancy rate) and house persons who are living in their car, hotels, couch surfing, etc. (i.e., currently unhoused);
- Keep up with job growth (ranging from 2.4% in Teton County, Wyoming, up to 4.8% per year in Teton County, Idaho), which includes filling the 15% to 19% of unfilled jobs in the Region; and
- Replace employees as they retire (between 10% to 15% in the Region over the next 5 years).

Each component of the above demand, along with the recommended price and tenure mix, for each county is provided in the county reports.



About 60% of homes in Teton County, Idaho, and N. Lincoln County, and 80% in Teton County, Wyoming, will need to be priced below market prices to support local residents and employees. Core price ranges vary by county, but generally span rents between $850 and $2,000 per month for a three-person household and homes for ownership between $200,000 up to $750,000 for the Region. This will require local policies, subsidies, and creative partnerships to produce, building upon the existing achievements in the Region in this regard.

It is important to note that ***communities rarely address 100% of the demand***. By understanding the different components of demand, however, each county will have more information upon which to set goals and priorities and target available resources. ***How much housing is addressed within each county in the Teton Region depends largely upon program capacity and policy decisions***.

Finally, the amount of housing needed will vary depending on whether the current commuting patterns in the Teton Region are retained or more workers are housed at the place of impact – i.e., where jobs are created. If housing is provided at a pace matching the demand within each county, then the number of units needed in Teton County, Wyoming, will be higher than if current commuting patterns are retained. If current commuting patterns are retained, then more housing needs to be provided in Teton County, Idaho, and N. Lincoln County to absorb workers filling jobs in Teton County, Wyoming. Future direction is largely dependent upon the availability of local resources and policy direction to prioritize allocating needed resources toward housing for local residents and employees.

[8] Chapter 8 for the two Teton counties and Chapter 6 for N. Lincoln County

Housing Needed Through 2027, Teton Region Counties
(5,330 total – 60% to 80% priced below market)

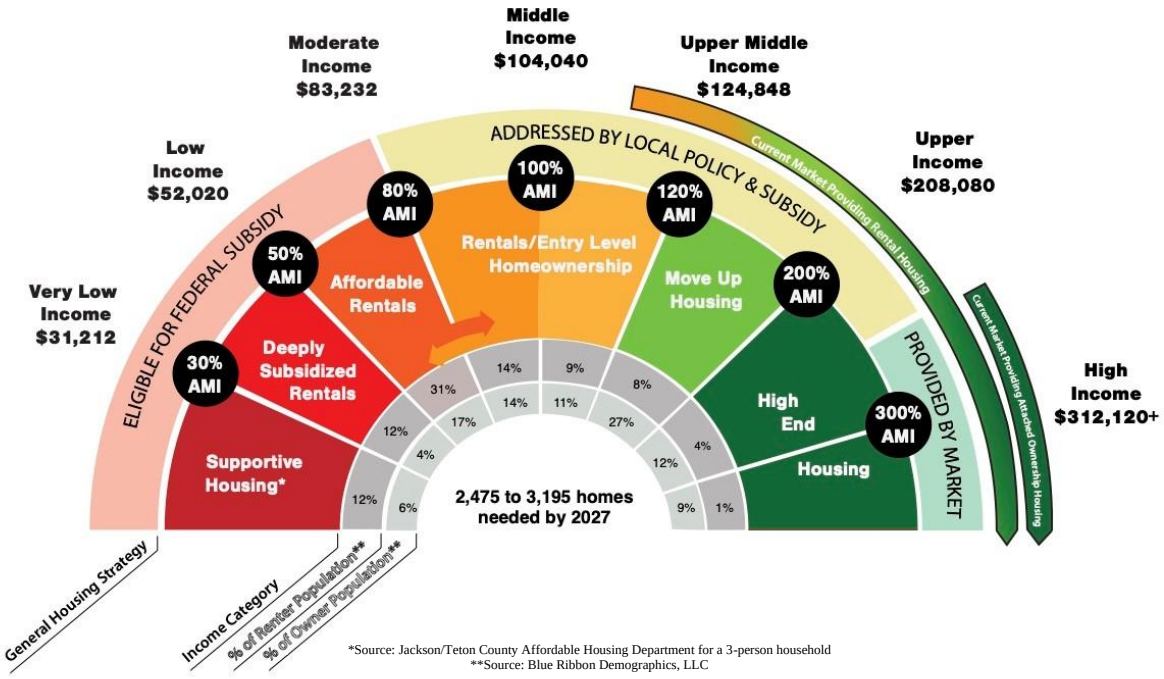
Strategy Recommendations

There is good momentum for addressing housing needs in the Teton Region. And continued momentum is needed to help address the gap of over 5,300 homes at prices that local residents and employees can afford. ***The magnitude of the issue requires a robust and regional response from all sectors of the community (public, private, non-profit) working collaboratively to engage community support and accelerate housing solutions.***

From a regional perspective, addressing housing needs in one county will impact a neighboring county. It is, therefore, important to ***maintain a regional dialogue about the problem, recognize the local and regional implications of housing polices, and work together on solutions and policies that carry benefits and impacts across jurisdictions.***

Further, coordination of housing efforts could result in efficiencies and enhance effectiveness through sharing of expertise, lessons learned and resources. ***Creation of a Regional Housing Initiative or Forum could be a first step.*** Continuing to track regional housing conditions and achievements, along with updating the information in this report every five-to-ten years, will also be important for understanding and showing progress over time, what initiatives are most effective, and where more resources should be allocated.

Finally, each county in the Teton Region varies widely in the amount of resources currently committed and able to be committed to addressing housing needs in the Region. As a result, ***recommendations specific to each county are provided within each county report.***



Teton County, Wyoming

Chapter 1 – Report Snapshot and Recommendations

Overview of the Teton County, Wyoming, Housing Needs Assessment

This Assessment centers on the understanding of what households can afford for housing in Teton County and explores where their needs are being met, and where there are gaps. It uses the definition that housing is affordable when monthly housing costs (rent or mortgage, plus utilities, insurance, and property taxes) do not exceed 30% of a household's gross income (i.e., income before taxes).

Teton County WY Spectrum of Housing Needs (January 2022)

*Source: Jackson/Teton County Affordable Housing Department for a 3-person household
**Source: Blue Ribbon Demographics, LLC

The housing bridge, illustrated above, presents a picture of what affordability in Teton County for its residents and workforce should look like. The bridge portrays a spectrum of housing that is affordable and most likely to be sought by households in different income groups. It indicates the percentage of households earning incomes in each income range and the type of housing likely to be needed at the different income levels. The bridge depicts what may be ideal for most communities – the availability of housing that is affordable to households at all income levels and provides options for changing life circumstances.

It is from this perspective that the housing needs assessment was conducted. The housing bridge summarizes what you are about to read. It illustrates the mix of housing needed by residents making their living in the county and at which income level. It shows where the market is providing housing and where it is not; and how much additional housing is needed to address current shortfalls and keep up with future job growth. More specifically:

- The housing rental market for residents and local employees searching for homes is expensive. A three-person household earning about $110,000 per year coming to Teton County may find housing that would be defined as affordable in the market.
- Households making their living locally are basically priced out of market rate ownership housing – it has simply gotten too expensive.
- To address the current housing shortfall and keep up with future job growth, ***at least 80% of the 2,500 to 3,200 homes needed by 2027 in the county will need to be priced below market***. Addressing housing needs will require local policies, subsidies, and creative partnerships, building upon the already significant achievements of the town, county, local organizations, employers, private sector, and community in this regard.

The information that follows provides the story behind this bridge. It summarizes the local housing challenges felt by residents, employees, employers, and the community as whole; and the great strides being taken to improve housing options for residents and employees to support a thriving and vibrant Teton County community.

Recent Successes and Recommendations

Summary of Recent Successes

There are many successes to celebrate. The Jackson/Teton County Affordable Housing Department, Jackson Hole Community Housing Trust, Habitat for Humanity, private sector developers and non-profit community have been working hard to address the current housing gaps in the community. Employers have also been notably active, some of which have had robust housing assistance programs in place for a decade or more and others recently coming to the table. In particular, since 2014:

- The community has **implemented most recommendations** of the 2014 Housing Needs Assessment and the 2016 Housing Action Plan. This is impressive.
- The rate of **deed restricted housing production has increased** in recent years. Since 2014, 411 units have been built and 358 more are planned. A concerted effort by the Jackson/Teton Affordable Housing Department to secure and provide land in combination with mitigation funding, public/private partnerships and 2:1 incentive bonus in the land use code have made this possible.
- The community has a **diverse toolbox** of housing programs and strategies in place, and committed local agencies with capacity and expertise. Housing professionals have explored and implemented many innovative ideas including land use incentives, preservation, and public private partnerships.
- The community passed a Special Purpose Excise Tax that **dedicated $5.5 million for housing** in 2019.
- Private donors have recently engaged in solutions such as The Community Housing Fund and **specific philanthropic support.** For example, the JHCHT received $10 million from the Hughes Charitable Trust. The county is partnering with the Cummings Foundation, which is donating $11.5 million in land and investing $10 million cash at no return.
- Flat Creek Apartments will help address the greatest need - **rentals below 80% AMI**.

- Non-profits engaged on **affordable homeownership** are making steady progress. More is needed!
- **Employers are assisting** at least 800 seasonal and year-round employees with housing units, stipends, or other assistance to help relieve family burdens and increase stability. Opportunities for improved coordination, education, and collaboration exist.
- Over $37 million in public funds have been invested to create 241 deed restricted units (either built or in development), including 94 units built by Habitat for Humanity or the Jackson Hole Community Housing Trust.
- Over $95 million in private capital has been leveraged by public funds to create 241 deed restricted units.
- The production of units with employment-, income-, and/or price-limits has helped to **retain 61% of workers living locally**.

The Path Forward

As summarized above, there is good momentum and foundation for addressing housing needs in the community. And much more is needed. Deed restricted housing is currently being produced at a rate of about 80 units per year. Projecting out to 2027, there is a need for about 3,200 housing units. At 80 units/year the community would produce 400 units, which would only address about 13% of the need.

Communities rarely make the policy decision to tackle the full need, as scarce resources, other community priorities and constraints are considered. We recommend that the community set housing goals and implement solutions beyond the status quo. ***The extent of the issue requires a robust and regional response from all sectors of the community (public, private, non-profit) working collaboratively and transparently to build and engage community support and accelerate housing solutions.***

Recommendations

These big picture recommendations set the table for diving into more detail in the next phase: developing the community's housing strategy plan. The below recommendations can be revised, expanded, and made more specific and actionable through that community collaboration process. The recommendations are organized in broad categories, as follows:

Regional Nature of Housing

Significant demand for homes throughout the Teton Region from local residents and employees will continue. Thousands of employees that work in the county reside in neighboring Teton County, Idaho, Lincoln County, Wyoming, and other areas. This means that, the extent to which Teton County, Wyoming, and other counties in the Teton Region address their housing needs will impact each other. It is important to maintain a regional dialogue about the problem, recognize the local and regional implications of housing polices, and work together on solutions and policies that carry benefits and impacts across jurisdictions.

Grow Funding and Capacity

- Increase funding sources with all currently available tools including public, private, and non-profit approaches.
- Create a predictable and transparent manner to allocate public funds to non-profit and for-profit development partners. Consider creating a Housing Trust Fund that creates separations between the allocation entity and the development approval entity.
- Build local and regional collaborations to influence state legislators in order to obtain a meaningful and reliable long-term funding source, such as a Real Estate Transfer Tax or change to the Lodging Tax, and improve access to federal pass-through funds for housing (e.g., American Rescue Plan Act (ARPA) and Infrastructure Investment and Jobs Act).
- Other potential opportunities include the Tourism Improvement District & Housing Trust Fund which are both being considered at the state level.

Expand Who is at the Table

- Engage and empower community stakeholders to address the housing issue by increasing and bridging collaboration and coordination between housing providers, businesses, and developers.
- Employers have long been engaged in housing solutions, and are seeking greater participation going forward. Convene employers and form cohorts to engage in specific solutions such as pooling resources to build employee rental housing and providing management assistance to ease the "housing business" side of the equation.
- Actively engage representation from the Latinx community and diversify outreach and education to ensure community members can better access resources. This community has specific challenges and concerns that should be addressed when planning and building housing solutions.
- Dedicate resources to a non-governmental entity to educate the community about the value of having the workforce living locally, housing terms, projects in the pipeline, and to track and demonstrate community-wide successes. Look to existing organizations to help fill this niche where possible.
- Engage leaders and stakeholders in the Teton Region to understand and help mitigate impacts associated with housing 22% of the county's the workforce in neighboring counties in the Region. Examples include supporting housing investments in neighboring communities (e.g., through technical assistance, shared resources, and collaborative planning) and establishing and funding a more robust regional public transit system.

Align Resources with the Greatest Needs

- Better leverage public funds with non-profit partners, such as the Jackson Hole Community Housing Trust and Habitat for Humanity, to target specific niches in the spectrum of need and enable these organizations to stabilize employment and ramp up capacity.
- Ensure preservation of the limited supply of "naturally occurring" affordable housing, such as mobile homes, small apartments, and accessory units.
- Grow programs to support tenant rights and help alleviate housing insecurity.
- Expand investment in strategies that use the existing housing stock to serve the workforce, including the Preservation Program, and consider adding a short term rental conversion program.

- Focus public investments on affordable workforce housing proportional to the need for both rental and ownership. Recent development is proportionally heavy for households earning over 120% AMI. The best practice of focusing public investments on permanent deed restrictions is already in place. Consider focusing near term investments (e.g., over the next five years) for households earning less than 120% AMI. Larger per unit investments will be needed, but the resulting housing inventory will be more diverse and better serve the workforce.
- Continue to use incentives that encourage and support the private sector to create workforce housing that is employment based for households earning more than 120% AMI, both rental and ownership. Private sector led efforts are a good fit for addressing this aspect of the housing need.

Create More Development Opportunities

- The current policy of concentrating workforce development within the town of Jackson supports many community goals and priorities; however, land is limited and expensive. Explore options that may expand access to land opportunities for community housing.
- Exempt deed restricted housing from the growth cap.
- Create opportunities to further activate the private sector in housing solutions, including purchasing deed restricted units in new buildings, and creating a revolving impact fund that could reduce pre-development risk.

Chapter 2 – Community Demographics

This chapter describes a few key characteristics of the people and households in Teton County, Wyoming, including growth over time, age, ethnicity, the mix of owner and renter households, type of housing occupied, and household income. This information provides a picture of community change over time and inform the size, type, and tenure of housing needed by residents.

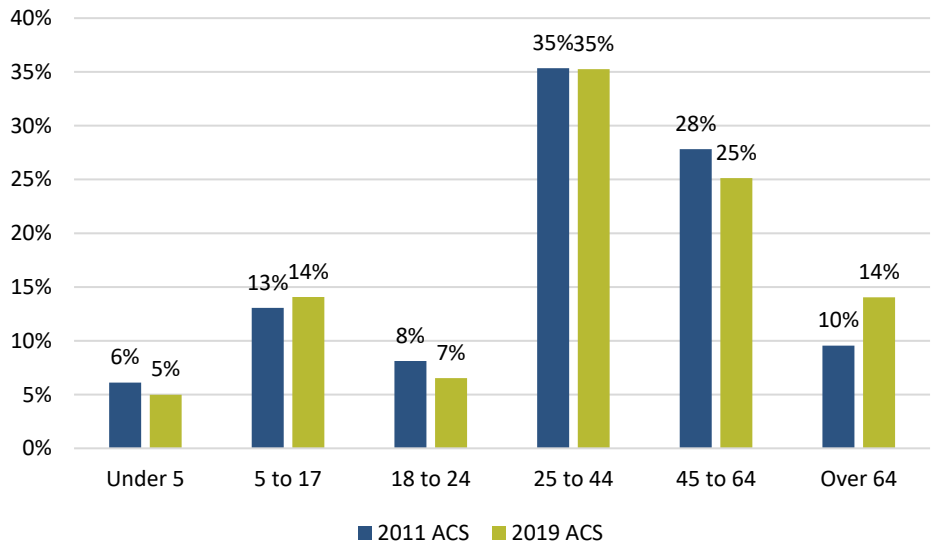
Population and Households

The population of Teton County, WY, increased by about 2,000 residents from 2010 to 2020. This amounts to a population increase of 0.9% per year on average, which is higher than that of Wyoming (0.2%) over the same time period.

Population: 2010 to 2020

	2010	2020	% growth (2010 to 2020)
Population	21,294	23,331	10%

Sources: 2010 Census, 2020 Census



Age

The county's median age has increased from about 37 to 39. This is mostly due to an increase in persons over 65, rather than any significant change in younger age groups.

The core workforce age 18 to 64 has changed very little since 2011. In particular, persons age 25 to 44 represent the largest share of the county's population (35%), which has been consistent since 2011. The predominance of restricted workforce housing options has helped keep this younger population in the community.[9]

[9] See Chapter 6 – Housing Program Accomplishments and Challenges

Population Distribution by Age: 2011 to 2019

Sources: 2011 and 2019 5-year ACS

Ethnicity

The racial and ethnic composition of the county has changed little in the last decade based on census information. The number of people who identify as Hispanic or Latino increased slightly from 2010 to 2020 and now amount to about 3,300 residents, comprising about 14% of the population.

As discussed in other sections of this report, Hispanic/Latino households have generally had a more difficult time locating suitable housing in the county than other households. On average, these households tend to have lower incomes and larger households (3.8 persons on average), contributing to their challenges.[10]

Hispanic or Latino Population: 2010 to 2020

	2010	2020
Hispanic or Latino	15%	14%

Sources: 2010 Census, 2020 Census

Tenure (own or rent)

Owner-occupancy of homes has been relatively stable in Teton County over at least the past ten years at about 60%. When solely households with employees that work in Teton County are considered, however, the ownership rate varies. Based on 2021 employee/household survey responses:

- About 47% of employees that live in the county own their home.
- In contrast, 61% of commuters into Teton County, Wyoming, own their home.

[10] See Regional Overview for more information

This difference illustrates the long observed trend that when employees want to purchase homes, many leave the county to do so.[11]

Percent of Resident-Occupied Households by Tenure: 2011 - 2019

	Owners		Renters	
	2011	2019	2011	2019
Teton County, WY	61%	60%	39%	40%

Source: 2011 & 2019 5-Year ACS

Unit Type

Overall, 49% of all households and 28% of all renters live in single-family homes or cabins and about 41% live in multi-family units (apartments, townhomes, or condominiums).

About 4% of renters reside in accessory dwelling units (160 households), indicating the extent to which this type of home contributes to resident housing. With about 1,050 accessory dwelling units in the county,[12] this means that about 15% of units are utilized by local renters.

About 2% of respondents indicated they are currently not housed, but rather couch surfing, camping, or living in a vehicle (equivalent to 165 households). Two-thirds of these households are lower income, earning below 80% AMI.

Type of Housing Occupied by Tenure: Teton County, WY, 2021

	Own	Rent	Total
Apartment or condominium	11%	42%	26%
Townhome/multi-plex	18%	12%	15%
Single-family house/Cabin	67%	28%	49%
Mobile home	2%	4%	3%
Accessory dwelling/in-law/caretaker unit	0%	4%	2%
Motel/Hotel or Dormitory housing	0%	3%	2%
Not housed (couch surfing, car, tent, etc.)	0%	2%	2%
Other*	1%	3%	2%
TOTAL	100%	100%	100%

Source: 2021 employee/household survey

*Employee or affordable housing, basements, rooms, and with family common among "other" respondents

Household Size

The distribution of households by number of people per household by tenure helps to illustrate the size of homes needed by residents. The 2019 ACS estimates that there are about 2.5 persons per home on average in Teton County, Wyoming, a figure that has declined by about 14% since 2011.

[11] See Chapter 5 – Housing Market
[12] See Chapter 4 – Housing Inventory

Average Household Size: 2011 to 2019

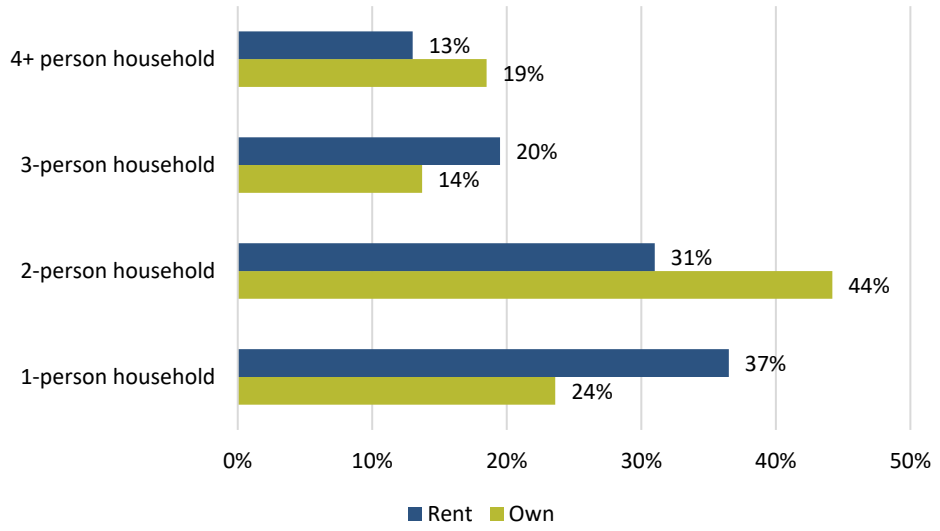
	2011 ACS	2019 ACS	2021 Employee /Household Survey
Total households	2.9	2.5	2.6
Own	2.7	2.5	2.6
Rent	3.2	2.5	2.6

Sources: 2011 and 2019 5-year ACS

Responses to the 2021 employee/household survey show larger household sizes than those reported by the 2019 ACS, averaging about 2.6-persons per home, and substantially fewer one-person households.

In addition, a higher percentage of households reported residing with roommates, other family members, or with family and roommates in 2021 (10%) than in the 2014 survey (6%) when the same question was asked, as well as a lower percentage of households living alone (21% vs. 29%, respectively).[13]

This is not surprising given the rising cost of homes for Teton County residents, short supply, and loss of rentals through home sales, conversion to short term rentals, or other factors.[14] Many households have been forced to double-up or move in with family as a result of these conditions, if they have been able to stay in the area.



> *Myself and my partner raise our 5 yo daughter, but we also have a single roommate who rents our second bedroom. Our daughter does not have her own room . . ."*
>
> *-2021 Employee/Household Survey Response*

When considering housing for local residents moving forward, household sizes prior to COVID are a better reflection of needs than current household sizes, which reflect emergency housing measures for many. The below chart reports the pre-COVID household size distribution, showing that:

- Renters are primarily 1-person (37%) and 2-person households (31%).
- Owners are also predominately 1-person (24%) and 2-person (44%) households.
- The low incidence of larger households is reflective of the comparatively low percentage of households occupied by families with children in Teton County (23%).[15]

[13] 2014 housing survey for the Western Greater Yellowstone Area Housing Needs Assessment, Rees Consulting, Inc., et al.
[14] See Regional Overview and Chapter 5 – Housing Market
[15] See Regional Overview

Household Distribution by Size and Tenure: 2019

Source: 2019 5-year ACS

Household Income

The median family income reported by the U.S. Department of Housing and Urban Development (HUD) for a family of four increased from $90,700 in 2015 to $115,600 in 2021, an increase of 4% per year on average.

Median Family Income for Teton County, WY, 2021

Persons per Household	50% AMI	80% AMI	100% AMI	120% AMI
1	$40,460	$64,736	$80,920	$97,104
2	$46,240	$73,984	$92,480	$110,976
3	$52,020	$83,232	$104,040	$124,848
4	$57,800	$92,480	$115,600	$138,720
5	$62,424	$99,878	$124,848	$149,818
6	$67,048	$107,277	$134,096	$160,915

Source: HUD, Jackson/Teton County Affordable Housing Department[16]

The income distribution of Teton County households by AMI is shown below. Housing that is available to residents should generally be priced proportionate to household income distributions. When focusing on local employee households in Teton County, Wyoming, however, the AMI distribution of all households skews high due to the large number of wealthy individuals that do not work in the area, but

[16] HUD makes an adjustment so that the 80% numbers actually calculate at 70%. The HUD adjustment applies for federal funding such as LIHTC, but Jackson/Teton County use the actual 80% number to calculate sales and rental prices for local restrictions.

that may claim residency for tax advantages.[17] This discrepancy is considered when calculating the housing needs for the county.[18] Responses to the survey illustrate this discrepancy:

- The average income of households comprised of residents working outside the region is over four-times that of local working households, and
- Households with no workers earn about 40% more than local workers.

Average Household Income by Work Status: Teton County Residents

Commute out/do not work local*	Do not work*	Live and work locally
$588,150	$185,700	$135,900

Source: 2021 Employee/Household survey
*Modest sample sizes: illustrates comparative trend only

Based on existing resident distributions, significant differences between owners and renters are apparent:

- About 68% of renters earn below 100% AMI, meaning the majority of rents for residents should be priced at or below this level.
- About 56% of owners earn higher incomes over 120% AMI; however, about 24% have low or very low incomes.

Teton County, Wyoming, Household Distribution by AMI: 2021

	3-person AMI	Own	Rent	Total
<50%	$52,020	12%	28%	19%

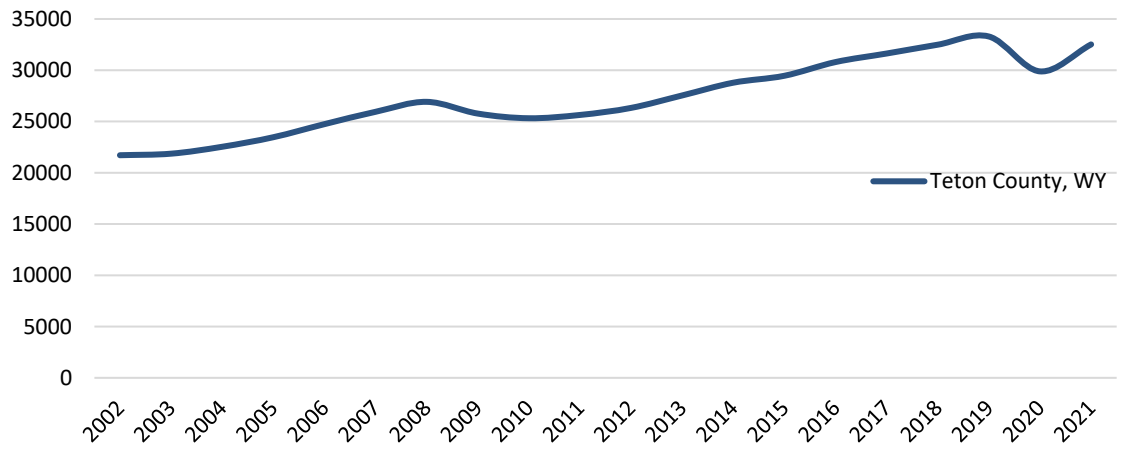
[17] See Chapter 4 – Housing Inventory
[18] See Chapter 8 – Housing Units Needed

Chapter 3 – Jobs, Seasonality and Commuting

Jobs Estimates and Projections

There are about 32,500 jobs in Teton County, Wyoming.



Job Estimates and Projections: 2010 to 2027[19]

	2010	2015	2021 (est.)	2027	Annual Growth Rate 2010-2019	Annual Growth Rate 2021-2027
Teton County, WY	25,318	29,463	32,520	37,584	3.1%	2.4%

Source: QCEW, BEA, Consultant Team

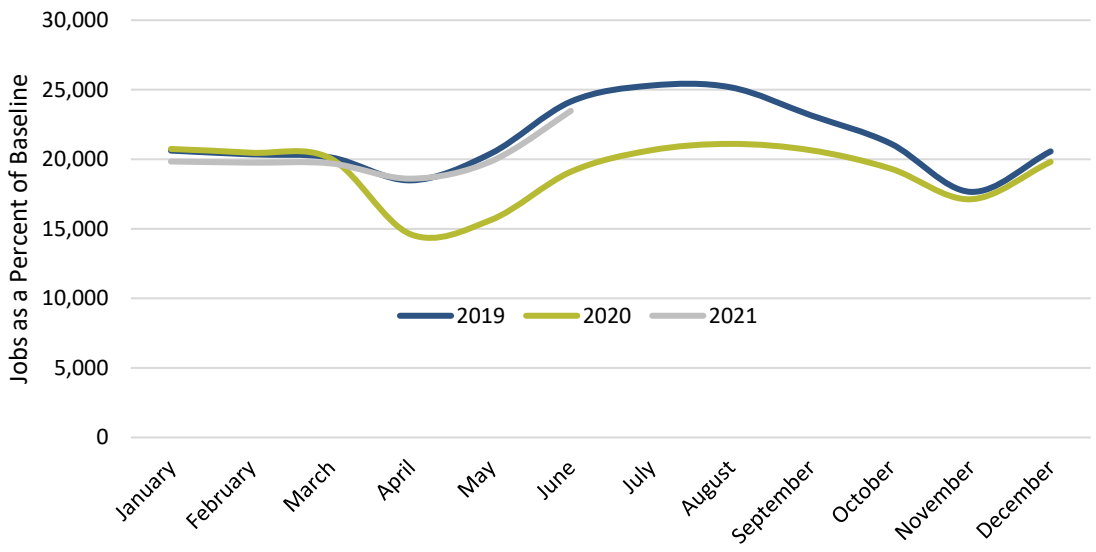
Jobs in Teton County, Wyoming, grew at a rate of 3.1% year on average since 2010 (the low point of the prior recession). The number of jobs declined about 10% in 2020 during the COVID pandemic, but have almost recovered to 2019 levels. Looking forward, job growth is estimated to continue at a rate similar to the past 20 years.[20]

Job Estimates: 2002 to 2021

Source: QCEW, BEA, Consultant Team

Seasonality of Jobs

Teton County, Wyoming, has the greatest seasonality of employment in the study area. The seasonal job changes have been consistent for the past 20 years, with the exception of the 2020 COVID pandemic,



[19] Estimates are calculated by adjusting the QCEW count of wage jobs by the BEA percentage of jobs held by proprietors to ensure all jobs (wage and proprietor) are included in the estimate.

[20] The 2021-2027 growth rate estimate is equal to the 2001-2019 average annual growth rate. The Wyoming Division of Economic Analysis projects a job growth rate of 0.84% for southwest Wyoming, which may reflect the larger region, but is inconsistent with the actual job growth Teton County has seen over the past 20 years.

when employment decreased in April through September. Employment in 2021 is again tracking with 2019 employment and seasonality trends. As shown below:

- Jobs increase the most in the summer (43%), with a smaller peak in the winter (17%). In 2019, about 7,600 seasonal summer jobs and 3,000 seasonal winter jobs were added to base employment.
- Accommodations and food services accounts for at least two-thirds of the seasonal job fluctuation in both the summer and winter. Arts, entertainment and recreation also contribute to summer and winter peaks, and retail and bar/restaurant show notable job increases in the summer.

Jobs by Month Teton, WY: 2019 - 2021

Source: QCEW

Baseline and Peak Employment, 2019

Year-round Jobs (base employment)	Peak Summer Jobs	Peak Winter Jobs
17,658 (April, Nov)	25,300 (July)	20,625 (Jan)

Source: QCEW

About 28% of year round residents in Teton County, Wyoming, hold at least one seasonal job during the year. This means that employers do not need to recruit from outside the area to fill many seasonal jobs. Employers responding to the employer survey estimate that about 43% of seasonal employees return to work for them from prior seasons, on average.

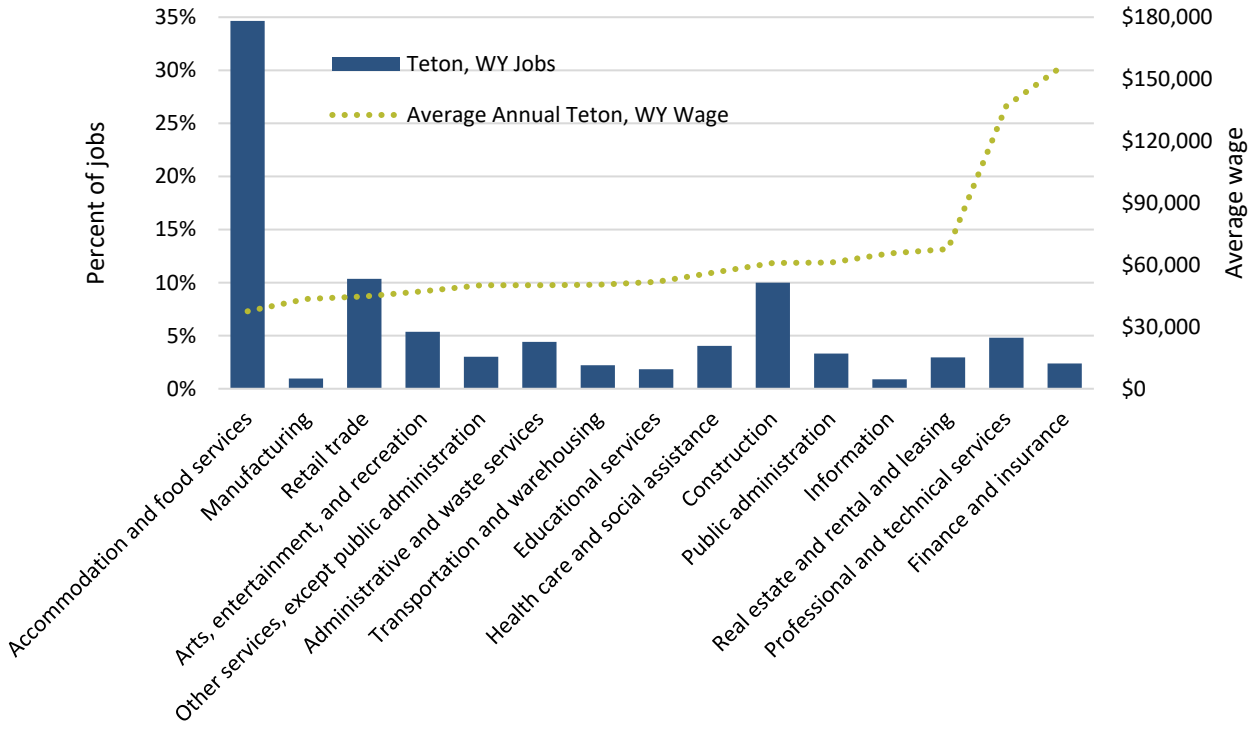
Wages and Jobs by Sector

The average wage paid in Teton County, Wyoming, in 2020 was about $60,000. Wages have increased an average of 7% per year since 2015, including a 16% increase in 2020. Despite the fast rise this past year, wage increases were still far below changes in housing prices (see Chapter 5 – Housing Market). Preliminary 2021 wage data indicates growth will continue.



Source: QCEW

- Jobs in Teton County, Wyoming are more tourist oriented than the other counties in the Region. About 35% of county jobs are in the lowest paying industry – accommodations and food service. Jobs in this sector fell sharply in 2020 after showing steady growth since 2012, but have mostly recovered to 2019 levels.
- Construction, which pays an average wage, was the only industry with significant job growth in 2020, but the number of construction jobs is still below the 2007-2008 peak.
- Only professional & technical services and finance & insurance pay substantially higher wages than the average. These industries, however, only comprise about 7% of jobs in the county.

> *"There is no scenario where someone working in the local economy, outside real estate or finance, can make their living and participate in the housing market."*
>
> *-Stakeholder interview*

Jobs per Employee and Employees per Household

- The number of jobs per employee and the number of employees per employed household are used to translate job growth into the number of housing units needed by workers to fill new jobs.
- Workers in the Teton Region, hold about 1.3 jobs on average during the year and have about 1.9 employees per household.
- The number of jobs held fluctuates with the seasons. Employees hold an average of 1.4 jobs over the summer and 1.3 jobs over the winter. Many employees, particularly in lower paid service positions, need to hold more than one job to afford to live in the area. This was noted both by employers, as well as respondents to the survey.

Commuting

Teton County, Wyoming, is an employment center in the region, employing local residents, as well as those residing in other counties. Between 39% and 42% of employees who work in Teton County, WY, commute into the area for work from homes outside of the county.[21] This reflects average year-round commuting, meaning it includes employees filling year-round and seasonal jobs. This equates to between 9,680 and 10,425 workers traveling into the county for work.

# of commuters:	Teton County, WY

Source: QCEW, BEA, 2019 5-Year ACS, 2021 employee/household survey, Consultant Team

Commuting patterns within the region show that:

- About 13% of employees commute in to Teton County, Wyoming, from Teton County, Idaho, and 9% commute in from Lincoln County, Wyoming.

[21] Commute percentage range is estimated from multiple sources. Employers on the 2021 employer survey reported that 39% of employees commute from homes outside of Teton County, Wyoming. Adjusting the US Census Longitudinal Employer-Household Dynamics (LEHD) for proprietors in combination with LAUS data indicates that 42% of county jobs are filled by commuting employees.

- The vast majority of workers living in the county are employed locally (93%). Most residents that are employed outside of the county work for employers outside of the Teton Region, many via remote work.

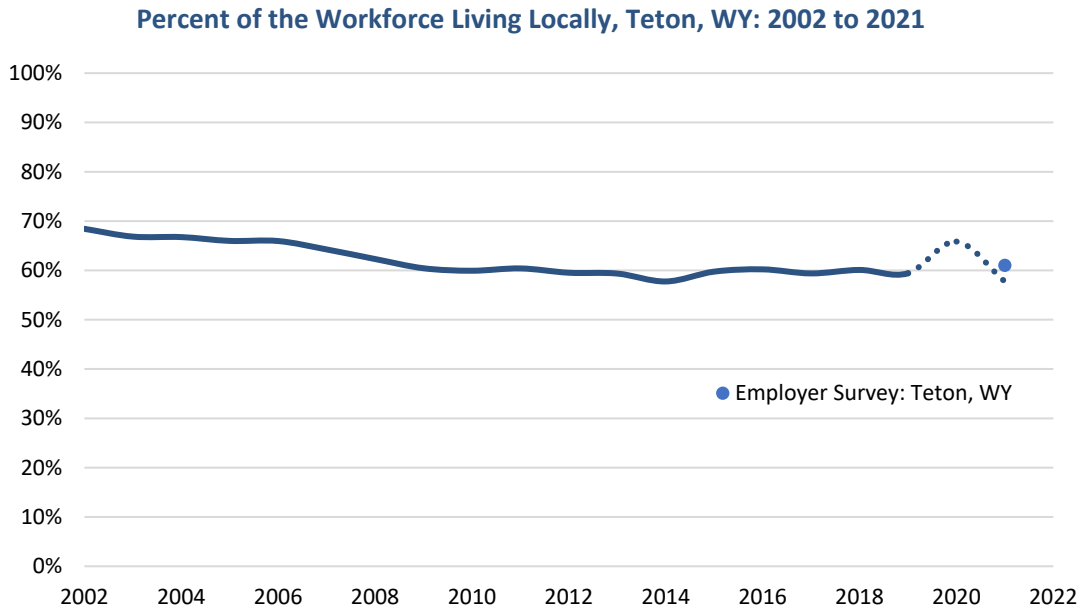
*Data sources indicate that the percentage of workers living locally is between 58% to 61%



There is a literal crisis going on in this area. … I make "good" money for what I do but still have to commute an hour a day because I could never afford to live in Jackson.

-2021 Employee/Household Survey Comment

The percentage of in-commuters is of particular interest in Teton County, Wyoming, given that a goal of the Comprehensive Plan is to ensure that 65% of employees have opportunities to reside in housing in the county. As shown below, the percentage of the workforce living locally has remained relatively consistent (about 60%) for the past 10 years[22], indicating that, despite the housing challenges in the area, a consistent percentage of workers have been able to find local housing opportunities.

About 25% of working households that live in Teton County, Wyoming, reside in employer-provided and income- or employment-restricted housing provided through the Jackson/Teton Affordable Housing Department, Jackson Hole Community Housing Trust, Habitat for Humanity, and others. Without this housing, only about 55% of employees would be living locally instead of the current 61%.[23] More work is needed, however, to achieve the 65% goal.

[22] The COVID year shows a break in this long term trend, with recent 2021 data indicating a return to pre-COVID commute percentages.

Forced to Commute

The 2021 Household and Employee survey asked employees where they work and how often they use different travel modes to get to work.

- Commuters into Teton County, Wyoming, drive alone an average of 3.8-days per week.
- The average in-commuter coming from Teton County, Idaho, travels 28 miles one-way to work. In-commuters coming from N. Lincoln County, Wyoming, travel 46 miles one-way on average.

Commuting patterns result in significant costs and vehicle miles traveled. The below shows the importance of providing housing near jobs, especially for low wage employees.

> *"I find it frustrating that in order to find a more "affordable" home that I need an hour commute at least."*
>
> *-2021 Employee/Household Survey Comment*

- Over the course of a year, in-commuters from Teton County, Idaho, will drive over 10,000 miles traveling to work; in-commuters from N. Lincoln County will travel over 17,000 miles.
- At the federal mileage rate of $0.585 per mile, in-commuters from Teton County, Idaho, pay $6,290 and in-commuters from N. Lincoln County pay $10,240 – or between about $500 and $850 per month.

Average Commute Miles Traveled and Cost Per Year: 2021

Commute between Teton County, WY and:	Teton County, ID	N. Lincoln County, WY
Average miles commuted ONE WAY (2021 survey)	28	46
Days per week commuter drives alone (2021 survey)	3.9	3.9
Round-Trip miles per week	220	360
Miles per year (assuming 50 weeks of commuting)	***10,750***	***17,500***
Cost per mile (2022 federal IRS rate)	$0.585	$0.585
Cost per year	***$6,290***	***$10,240***

*conservative - cost to drive self only (does not include cost to carpool/other modes)
Source: IRS, 2021 employee/household survey, Consultant Team

About 41% of in-commuters stated that they would prefer to live in Teton County, Wyoming, if housing they could afford was available. Variations are apparent based on the employee composition of households and where they are coming from:

- Households with at least one household member working in their county of residence are much less likely to prefer to live in Teton County, Wyoming, (32%) compared to households in which all working members commute to the county (49%). As households become more settled in their place of residence (which may include some members gaining local employment), their desire to relocate declines.
- In-commuters from Teton County, Idaho, are also less likely to prefer to live in Teton County, Wyoming, than in-commuters from N. Lincoln County, at a respective 35% and 50%. While the cost, distance, and difficulty of the commute affects in-commuters from both counties, survey comments from Lincoln County in-commuters uniquely indicate that the comparative lack of services and amenities affects their local satisfaction.

% of commuters that would prefer to live in Teton County, WY	
All commuter households	41%
Split household (at least one household member works in their county of residence and one or more commutes)	32%
Commuter household (all employed household members commute)	49%

Source: 2021 Employee/Household Survey

Employer Commute Assistance

About 42% of employers in Teton County, Wyoming, indicated that they provide their workers with some work commute options or assistance. Employers providing assistance cover the full range of business types in the county. Of employers providing assistance, telecommuting was the primary option (45%) as shown in the table below. As an alternative to commute assistance, one employer noted in the survey that they opened a second office in Teton County, Idaho, to reduce commuting.

Type of work commute options or assistance:	% of Employers
Telework / work from home flexibility	45%
Travel stipend (i.e., travel time compensation, etc.)	30%
On-site vehicle for employee errands	27%
Bus passes / coupons	26%
Bus/shuttle (operated/financed at least in part by the business)	10%
Carpool / Vanpool program	6%
Other (e.g., company vehicles, gas card, mileage reimbursement)	19%

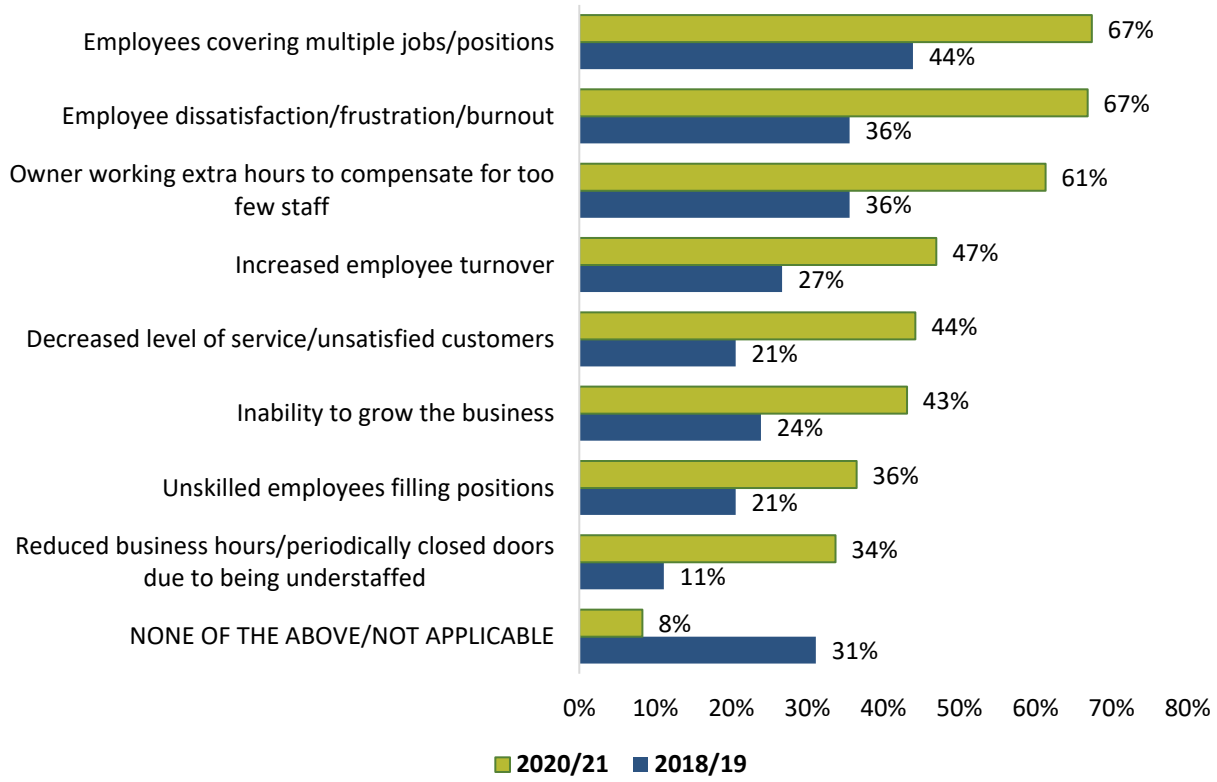
*Totals exceed 100% because employers could select multiple options.

Unfilled Jobs and Turnover

Teton County employers responding to the survey reported that an average of 15% of jobs were unfilled. Prior to COVID, unfilled job rates were more typically 5% to 7% in most mountain resort communities.

Unfilled Jobs	
# jobs unfilled	4,940
% jobs unfilled	15%

Source: 2021 Employer survey, interviews



With unfilled positions, businesses struggle to provide quality services and operate profitably. This is particularly challenging since COVID with the added business from more residents in town and for prolonged periods, combined with high visitation rates. As shown below, almost all businesses responding to the survey experienced problems related to being understaffed this past year (92%). For many, however, these problems are not new – nearly two-thirds of businesses in the county experienced understaffing issues prior to COVID.

> *"I no longer want to own my business due to the employment challenges compounded by the housing crisis."*
>
> *- 2021 Employer survey comment*

- Over 60% of businesses experienced problems that relate to employee burnout, including employees covering multiple jobs/positions, the owner working extra hours, and resulting frustrated and dissatisfied employees.
- Another 43% to 48% experienced issues related to the ability to provide quality services, including increased employee turnover, reduced level of service/customer satisfaction, and an inability to grow the business.
- Finally, about one-third had to reduce their business hours or close their doors due to being understaffed. Comments on specific impacts include:
    - Decreasing operating hours, including closing doors for one or more days per week, or permanently, due to an inability to adequately staff.
    - Reducing job intake or decreasing existing client base by 25% or more.

- Estimated lost revenue from reduced hours or closed days ranging from $1,000 to $7,000 per day and $50,000 up to $1,000,000 per year.

Has your business experienced any of the following problems related to being understaffed?

Source: 2021 Employer survey

The high incidence of unfilled jobs is paired with additional challenges.

Low unemployment rate. Unemployment rates in the late-summer and fall of 2021 were lower than they have been in the past 20 years and are well below the seasonal average. Finding employees to fill jobs was a challenge prior to COVID when the unemployment rate was just below 3%.

Unemployment Rate, September, Teton County, WY

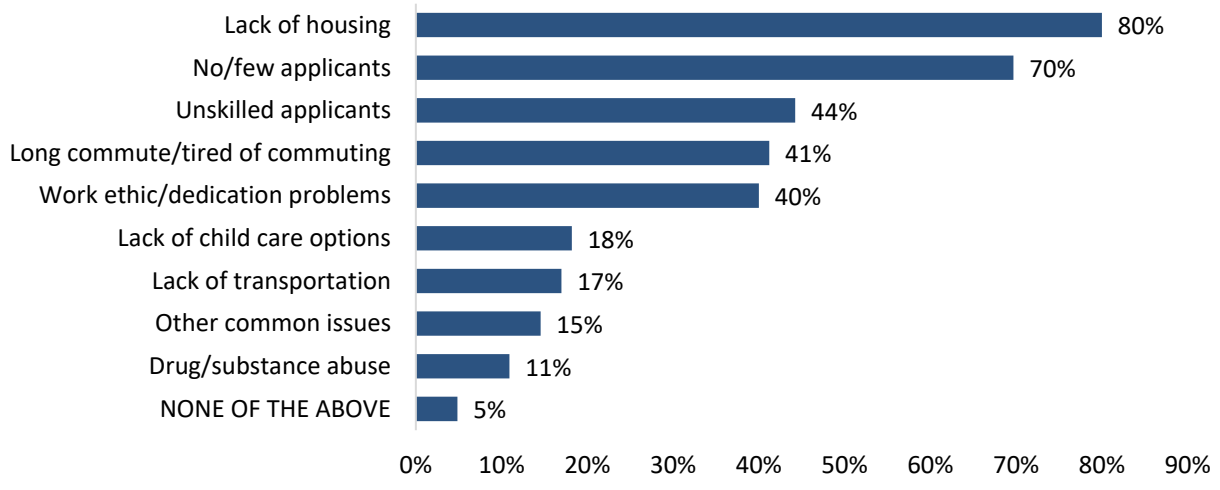
September 2021	1.6%
September 2001-2020 Average	2.9%

Source: LAUS

Decline in J-1 Visa[24] workers. As a result of the COVID pandemic and shut-downs in 2020, J-1 Visa workers were less available. About 7% of employers in Teton County, Wyoming, and Teton County,

[24] A J-1 Visa is a non-immigrant visa for a limited duration issued by the United States to research scholars, professors and exchange visitors participating in programs that promote cultural exchange, especially to obtain medical or business training within the U.S. All applicants must meet eligibility criteria.

Idaho, responding to the survey reported hiring J-1 employees in 2021, primarily in bar/restaurant, lodging/accommodations, recreation, and retail industries; however, fewer were hired than before the pandemic.



- In summer 2021, employers hired J-1s to fill about 2% of jobs in the two counties (about 750 jobs). The number hired was about 58% lower than in 2018/19.
- Employers anticipate hiring J-1s near pre-pandemic levels in 2022, helping to fill about 5% of jobs in the two counties (about 1,800 jobs).

Since the number of jobs has recovered from 2020, the lack of these workers is strongly felt. J-1 employees typically fill lower skill/lower paid positions that businesses must now recruit for locally.

Lack of and high cost of housing. Not only can new workers not find available housing, but homes that are available are too expensive for local wages. This affects entry-level and high-end management positions alike. Employees making over $100,000 per year struggle to find homes in the area. Young families have particular difficulty. This problem is not unique to Teton County, Wyoming. Neighboring Teton County, Idaho, and Lincoln County, Wyoming, are encountering similar problems as prices rise.

- When employers were asked about issues they experienced when finding or keeping qualified employees, the lack of housing was the number one issue (80% of respondents).
- Workers tired of long commutes have also impacted about 41% of businesses. With strong job markets in surrounding areas, these workers are susceptible to leaving their employment and accepting jobs closer to home.
- Lack of transportation and childcare were also cited by 17% and 18% of employers respectively. Many employers already offer transportation, while others may be considering it as a service to increase their ability to attract and retain workers.
- Several employers listed "other" issues, primarily noting the discrepancy between wages/cost of living, employees losing rental housing, and COVID exposure and vaccination issues.

Issues experienced in finding or keeping qualified employees:

Source: 2021 Employer survey

Employee turnover and difficulty recruiting. About 88% of employers in the county responding to the survey had employees leave and 77% had potential hires decline positions due to the inability to locate suitable housing in the area.

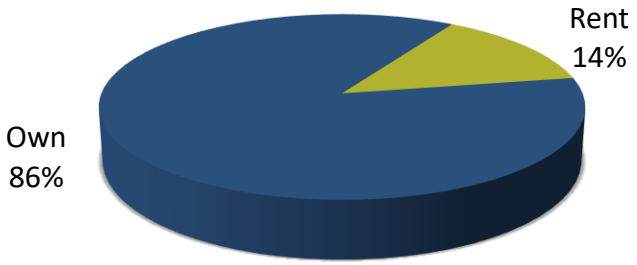
- The number of employees that left employment equates to 7% of jobs in the county; meaning that 7% of jobs were vacated and had to be refilled. Candidates were found for another 10% of jobs, but declined offers of employment.
- Turnover is costly to the business. Aside from affecting business hours and operations (as discussed above), it costs money to recruit and train new employees. Some studies have estimated that it costs about 20% of an employee's salary to replace that employee[25] costs that quickly add up with repeated turnover.

> *Losing an employee making $22/hour may not sound like a big deal, but it can take six months to train a new employee, which is a huge up front investment. The housing assistance we provide has absolutely been worth it. We have reduced turnover and associated costs significantly.*
>
> *-2021 Employer interview*

"How many people, in your estimation did not accept a job or left your employment in the past 12 months because they lacked or could not find housing they could afford in the area?"

	% of employers experiencing the problem	Average # of employees lost per business	% of total jobs in the county represented
Employee(s) left	88%	3.5	7%
Potential hire did not accept job	77%	5.8	10%

Source: 2021 Employer survey



Retiring Employees

Based on survey responses, about 13% of employees working in Teton County, Wyoming, expect to retire within five (5) years. This equates to about 3,200 employees.

- Pending retirees tend to hold more senior positions and be skilled staff. Businesses with succession plans may be able to fill skilled positions from within, but then need to fill the interior position that is vacated.
- Housing is another concern. About 86% of employees that expect to retire have stable housing because they own their homes. Many purchased 10 or 20 years ago or during the 2007/08 recession. New employees struggle to find homes to rent and the vast majority do not earn enough to purchase.

[25] See, e.g., The Center for American Progress, "There are Significant Business Costs to Replacing Employees," Nov. 2012, available at: https://www.americanprogress.org/issues/economy/reports/2012/11/16/44464/there-are-significant-business-costs-to-replacing-employees/

Tenure of Employees that Plan to Retire Within 5 Years:

Source: 2021 Employee/Household Survey

Pending retirees and the aging population present potential other challenges. For retired residents that prefer to age in place, lower maintenance, smaller patio homes or attached product are often desired as residents age. The need for senior care services and life care or assisted care options will also increase. Finally, rising property taxes are a burden on income-earning households under the current environment, much less for senior households on fixed incomes.

Chapter 4 – Housing Inventory

Housing Units – Number and Occupancy

Teton County, WY has 13,156 housing units based on local estimates.[26] Housing units have been added at a rate of about 1.3% per year since 2015, which is a faster rate than during the previous five years (about 0.8% on average).

Housing Unit Estimates, Teton County, WY: 2010 to 2021

	2010	2015	2021	2015-2021 Annual Growth Rate
Housing Units	11,650	12,160	13,156	1.3%

Source: Teton County and town of Jackson Planning Department

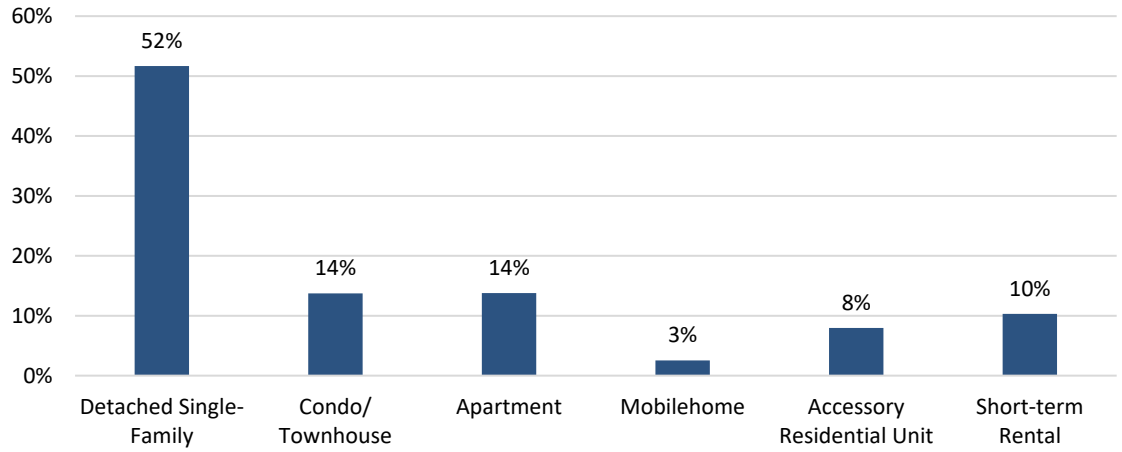
About 73% of Teton County housing units are occupied by resident households. The other 27% are second homes, short-term rentals, or vacant in the transition of being sold or rented. The lack of a state income tax in Wyoming results in a higher claimed occupancy rate than daily occupancy rate[27], but trends show little change in occupancy characteristics over the past 20 years.

Occupancy and Tenure, Teton County, WY: 2000-2020

	2000	2010	2020
Occupancy Rate	75%	70%	73%

Source: 2000, 2010, 2020 Census

Types of Units



Detached single-family homes account for half of the units in Teton County, Wyoming. Of the remaining:

- 14% are condominiums or townhomes.
- 14% are rental apartments in multifamily or mixed-use buildings.
- Most of the accessory residential units (8% of the housing stock) can be used as guesthouses or rented to the workforce. Some, however, are required to be occupied by the workforce and cannot be used as guesthouses.
- The short-term rentals (10% of housing stock) can be rented-short term or occupied as a residence. The vast majority of short-term rentals are in the unincorporated County, as described below.

[26] Housing units are locally reported by the Teton County and the town of Jackson Planning Departments based on Teton County Assessor records and building permits. They vary from Census numbers because they do not include units on federal land or condo-hotel units. The 2020 Census unit count showed fewer units added since 2010 than building permit data. Building permit data is used for the purposes of this report.

[27] The annual ACS estimate of occupancy, based on a sample of residents in the community each year, is about 10 percentage points lower than Census counts, the latter of which asks every person in the country to state their place of residence. IRS filings from Teton County also exceed household estimates by the Census.

Type of Units, Teton County, WY: 2021

Source: Town of Jackson, Teton County, WY, Consultant Team

Housing unit occupancy by income level indicates the extent to which different housing types may provide "naturally occurring" affordable housing. The below table shows the type of housing units occupied by income level (AMI). The sample includes respondents that are residing in market rate housing, meaning that the table excludes respondents that are living in employer-assisted or income, employment, rent or price-limited homes. As shown:

- Households with incomes greater than 120% AMI are more likely than other households to live in single family homes and less likely to live in multi-family units.
- Households earning between 80% and 120% AMI are just about as likely as lower-income households to live in multi-family units.
- Accessory dwelling units predominately provide housing for households earning between 50% to 120% AMI.
- Households earning under 80% AMI are the most likely to reside in mobile homes or currently not permanently housed, but rather couch surfing, camping, or living in a vehicle.

Type of Unit Occupied by AMI: Teton County, WY, 2021
(Respondents Residing in Market Rate Homes)

	Less than 50%	50 to 80%	80 to 120%	120 to 200%	Over 200%
Apartment or condominium	37%	31%	30%	16%	11%

Age of Units

Assessor records show a declining rate of development in Teton County, Wyoming.

- Teton County, WY more than doubled in size in the 1970s and kept strong housing production until the peak of housing development in the 1990s.
    - About 45% of housing stock in Teton County, WY was built prior to 1990.
    - Another 25% was built in the 1990s.
- Only 30% of the housing in Teton County, WY has been built or significantly upgraded in the past 20 years.

Age of Units, Teton County, WY: 2021

Source: Teton County, WY Assessor, Consultant Team

Building permit data, which is only available back to 2002, indicates a growth rate of 205 units per year in the 2000s. The building permit data reflects the slowdown in development from 2010 to 2018, with a sharp increase in production in 2019 and 2020.

The uptick in multi-family develop accounts for the increase in supply. The number of detached single-family homes built each year is relatively constant, even in years like 2019 and 2020 when the total number of units jumps.

Units Added per Year, Teton County Wyoming

	2002-2010	2011-2018	2019	2020
Detached Single Family	97	77	103	88
Condo/Townhouse	51	30	78	67

Short Term Rentals

In Teton County, Wyoming, and the town of Jackson, short-term rental is defined as a rental period of 30 days or less. In Teton County, 10% of renters responded that they were forced to move in the past three years due to conversion of their unit into a short-term rental. While this represents significant displacement of renters (about 380 renter households), it is a lower percentage than in Teton County, ID (18%) where there are fewer limits on short-term rentals.

In the town of Jackson there are 192 permitted short-term rentals. By zoning, short-term rentals must be located within the Lodging Overlay or a designated resort, and a short-term rental permit is required. As a result, short-term rental is prohibited in most of the town, and has been since the Lodging Overlay and resort designations were put in place in 1994. The town does periodic monitoring and enforcement of unpermitted rental.

In unincorporated Teton County there are another 1,163 units in designated resorts than can be rented short-term or occupied long-term. As in the town of Jackson, short-term rental is prohibited outside of designated resorts and has been since 1994. The vast majority of existing units allowed to short-term rent received that approval before 1994. A short-term rental permit is not required in the county. The county does complaint-based enforcement, but does not actively monitor short-term rentals.

Employer Assisted Housing

In recent years, particularly since the COVID pandemic, the ability of employees to find housing they can afford has become more challenging and employers expressed concern that people cannot find places to live. Local wages have not kept up. Employers report that turnover has been high and there is a constant need to search for and train new staff.

To improve the ability to recruit and retain employees, employers throughout the Teton Region have been increasing efforts to help employees find and afford housing and are having a significant impact, as shown in the below table. About 36% of employers in Teton County that responded to a summer 2021 survey indicated that they are providing housing assistance to their employees (64 of 179 respondents).

Employers assisting with housing cover the entire industry spectrum. Some employers have robust housing assistance benefits and programs that have been in place for decades (e.g., St. John's Health, Jackson Hole Mountain Resort, Teton Science Schools), whereas others are relatively new to helping with housing, acting in emergency response to recent housing shortages and price increases.

Employers are providing numerous types of assistance, as summarized in the below table.

- The most frequent type of assistance provided by employers is directly providing housing. The scale of this assistance ranges from one or just a few units for smaller employers to almost one hundred for large employers. Some are currently building more, and many are looking to do so in the future. Yet, the cost to do so is a major obstacle.
- Housing stipends were noted as being, in many cases, more cost effective than buying or building housing for employees. One employer recently raised their stipend by 33% to $1,000 per month to keep up with rising prices. Some challenges with this tool include that, without

increased supply, it puts more upward pressure on rents, and the stipend often goes into the pocket of out-of-area owners rather than recirculating in the local economy.

Employer-Provided Housing Assistance: 2021

Type of Assistance	Number of Businesses	Amount of Assistance
Employer-owned or employer-leased units rented to or provided as compensation to employees	45	707 beds
Employer-provided units for employees to purchase	3	34 units *(all but six provided by the town of Jackson or Teton County)*
Temporary / relocation housing	8	45 units *(most provided by St. John's Health)*
Down payment / mortgage assistance to buy a home	6	12 employees assisted last year
Rent assistance - help with first/last/deposit	10	57 employees assisted last year
Housing stipend	15	Average stipend of about $1,000 per month; some employers provide as much as $5,000 per month

Source: 2021 Employer Survey, consultant team
NOTE: the summary excludes businesses in Alta, which are summarized in the Teton County, Idaho, section; and exclude units provided inside Grand Teton National Park.

When asked how providing assistance has impacted their business, respondents acknowledged that there are tradeoffs.

- Assistance costs money ("expensive," "less revenue," "cost passed on to clients") and has program management requirements ("have 12 full time staff dedicated to take care of housing").
- Benefits include attraction and retention of staff, predictable rent and secure housing for employees, workforce and staffing stability, and for some "without employee housing, we wouldn't be able to operate our business."

> *Allowed business to have sufficient staffing, with added burden of landlord role, which confuses typical employer/employee boundaries.*
>
> *-2021 Employer survey comment*

For employers that do not provide housing assistance, the primary reason was that they cannot afford to provide assistance (61%) and just over one-third prefer to pay higher wages instead. About 3% stated that they provided housing in the past that was not successful.

Employer Reasons for Not Providing Housing Assistance to their Employees	
Cannot afford to provide housing or housing assistance	61%
I prefer to pay higher wages instead	37%
Do not want to be in the housing business	29%
Do not have the expertise or knowledge to help with housing	19%
Housing assistance is not needed for our employees	18%
Housing is the employee's responsibility	17%
Provided housing in the past that was not successful	3%

Source: 2021 Employer Survey, consultant team

There is an opportunity to collectively engage employers in housing solutions to share and build upon the already rich experiences and successes of employers in the community. Sixty-percent (60%) of employers indicated that they would be interested in providing assistance in the future. When asked what would encourage or help them provide housing, about one-half indicated that partnerships, participating with other employers, and matching grants would help.

What would encourage or help you to provide housing or housing assistance?	
Partnering with government, private, or non-profit entities	49%
Opportunities to participate with other employers	47%
Matching grants	45%
Low-cost loans	29%
Technical assistance	11%

Interviews with employers reinforced survey responses. There is growing recognition among local employers that local companies, organizations, and governmental jurisdictions must work together toward solutions.

Redevelopment

Over the past 20 years, redevelopment has increased. Since 2017, 113 residential units have been demolished to make way for new development. On those sites, 167 units have been built - a net increase of 54 units. In many instances, however, new homes being built are more expensive than those they replaced.

- The mostly commonly demolished unit type were apartments. However, there was still a net increase of 15 apartments through redevelopment.
- The 15 mobile homes demolished for new development were not replaced as mobile homes. Nine were redeveloped as 12 employer-owned, workforce apartments. Six were redeveloped as a hotel.

Residential Units Gained & Lost Through Redevelopment, Teton County, WY, 2017-2020

	Razed	Redeveloped	Net Change
Detached Single Family	32	37	5
Condo/Townhouse	2	49	47
Apartment	62	77	15
Mobile home	15	0	-15
Accessory Residential Units	2	4	2
Total	**113**	**167**	**54**

Pending Development

A significant number of units are currently being planned and built.

- 68% of units with a building permit are restricted, but only two units are restricted to be affordable below 80% of median income.[28]
- There are fewer units at the development plan stage, most of which are market rate units.

	Building Permit	Development / Sketch Plan	Pre-application
0-50% Median Family Income	1	1	14
50-80% Median Family Income	1	0	14
80-120% Median Family Income	65	4	16
Workforce	151	4	16

Chapter 5 – Housing Market

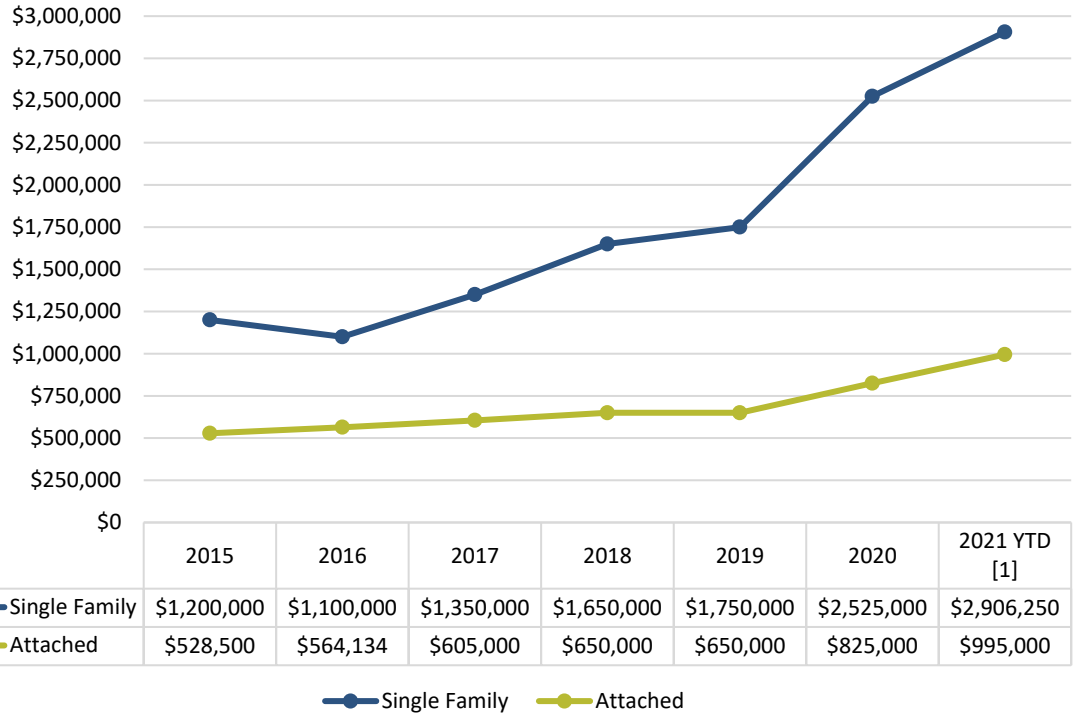
This chapter evaluates how key aspects of the housing market have changed in recent years. It provides an overview of:

- Home sale and rental prices,
- Recent and current availability of homes,
- The affordability of homes to local residents and employees, and
- Real estate agent and property manager observations about housing market changes in the past 20 months during the COVID-19 pandemic.

All information below is for Teton County, Wyoming, unless otherwise specified.

Home Ownership Market

Price Trends (2015 to October 2021)



The housing market in Teton County, Wyoming has long been challenging for the local workforce to afford. These challenges have gotten worse in the past two years. As seen in the figure below, prices have rapidly increased, effectively pricing the local workforce out of market rate housing.

- The median sale price of attached product during the first ten months of 2021 was $995,000 and over $2.9 million for a single family home.
- Sale prices have been rising 16% per year on average since 2015 for single family homes and 9% for attached condominiums and townhomes. From 2019 to 2020 alone, median single family home prices jumped 44% and attached product increased by 27%.

"I have money saved for a down payment, and I make over 6 figures a year working full time in Teton County and I STILL can't afford to buy."

–2021 Employee/Household Survey Comment

Median Sale Prices: 2015 to October 2021

	2015	2016	2017	2018	2019	2020	2021 YTD [1]
Single Family	$1,200,000	$1,100,000	$1,350,000	$1,650,000	$1,750,000	$2,525,000	$2,906,250
Attached	$528,500	$564,134	$605,000	$650,000	$650,000	$825,000	$995,000

Price Per Square Foot

The annual average sale price per square foot from 2015 through 2020, and sales through October 2021, also shows significant increases.

- From 2015 to 2020, the average price per square foot increased for both single family homes and attached product by 11% and 9% per year on average, respectively.
- The average price per square foot of single family homes sold in the first ten months of 2021 increased by 25% over the 2020 average, and 35% for attached product.

Average Sale Price Per Square Foot: 2015 to October 2021

	Single Family	Attached
2015	$567	$521
2016	$519	$558
2017	$615	$578
2018	$806	$655
2019	$800	$681
2020	$940	$786
2021 YTD [1]	$1,176	$1,062

Source: MLS, consultant team

Homes for sale under $500,000 have all but disappeared from the market, and those from $500,000 to $1 million have significantly declined.

- The share of sales under $500,000 fell from 21% in 2015 to 3% in 2021. Since 2015, almost all homes sold for less than $500,000 were attached product. Only 21 single family homes sold for under $500,000 from 2015 through October 2021.
- The share of sales between $500,000 and $1 million fell from 37% in 2015 to 22% in 2021.
- Seventeen (17) homes sold during this period were deed restricted units, which sold for a median price of $317,500; significantly below market prices. All but one were condominiums.

When someone comes to me with $500,000, I have nothing in Teton County, Wyoming – we need to talk Victor or Alpine.

-Real estate agent interview

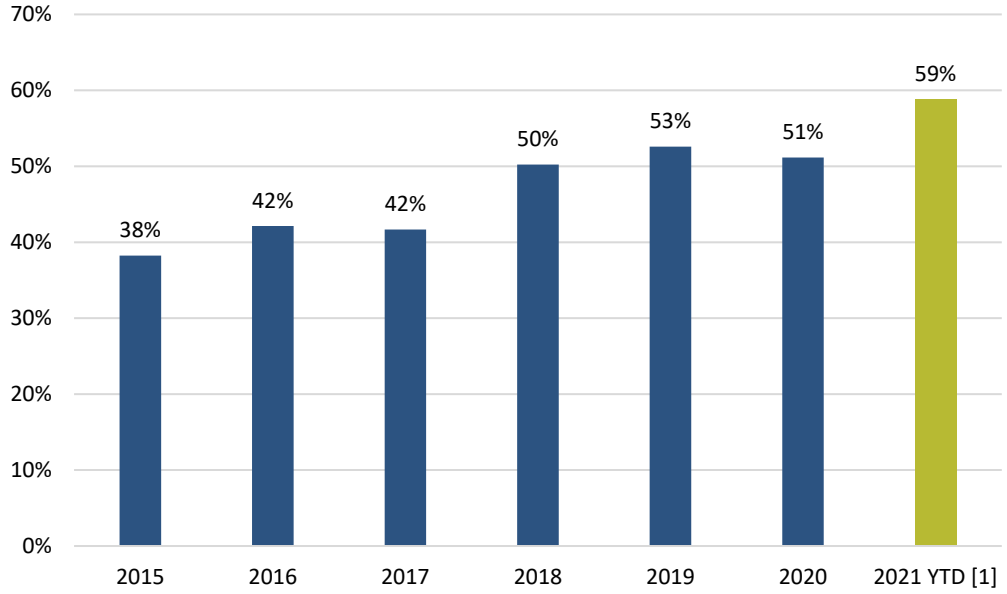
Availability



A general industry standard is that when the number of homes available for sale is below a 6-month supply, it is a seller's market – meaning that there are more buyers than homes available to purchase, resulting in rising prices.

Teton County is in an extreme seller's market, particularly for homes priced under $1 million. The number of homes listed in November 2021 shows an average supply of only 3.4-months. This varies from a 0.6-month supply under $1 million up to 4.6-months for homes priced over $1 million. Only eight homes are priced under $1 million.

[1] last sale on Oct 29, 2021, inclusive of sales with a known price greater than zero
Source: MLS, consultant team

Not only is housing scarce, but the percentage of cash sales also increased during the pandemic, adding to the challenges for local residents to compete for homes. As shown below, 59% of homes sold through October 2021 for cash; rising from 51% in 2020 up from 38% in 2015.

Note: inclusive of sales with a known price greater than zero
[1] last sale on Oct 29, 2021
Source: MLS, consultant team

Local Workforce Affordability

Current home listings are well out of reach for most local resident households. The median list price of single family homes in November 2021 was $4.4 million and $1.8 million for attached product, averaging $1,602 per square foot. More specifically:

- A sampling of the lowest priced single family listings includes:
  - A recreational summer cabin that does not include the land for $275,000
  - A 2 bedroom log home southwest of South Park for $699,000.
  - The third least expensive single family home was listed for $1,350,000.
- There were six condos/townhouses listed under $1 million on November 1, starting at $699,500 up to $995,000.

Affordability of Current Listings Compared to Average Household Income

AMI	Max Affordable Price (3-person household) [1]	Owner Household Distribution	Nov. 1, 2021 Listings	
			Single Family	Attached
0-50%	$195,700	12%	0%	0%

Changes over past 20 months

From March 2020 when COVID-19 was declared a pandemic to May that year, there was a sizeable slowdown in residential real estate sales as people sheltered in place. As summer 2020 arrived, the flood gates opened as people sought refuge from urban environments or capitalized on work at home policies. An already hot real estate market caught fire. One interviewee said it was like a switch got flipped and real estate agents were inundated with calls from buyers.

> *"There is an unlimited global demand for housing in our area and a finite supply of homes, land, labor and materials. The problems sometimes feel insurmountable."*
>
> *– Contractor interview*

This slowdown and spike in activity is reflected in the MLS data. There were only 58 homes sold in the second quarter of 2020 and 204 in the third quarter, a roughly 250% increase.

Interviews with Realtors and property managers provided key insights into market changes during and since 2020:

- Teton County, Wyoming, has long been a preferred location for wealthier homeowners to purchase in part due to favorable tax laws. The federal tax code changes in 2018 increased this interest, which again increased during the COVID pandemic.
- The majority of buyers were not from the area and were a mix of retirees, those soon to be retired, and remote workers. The occupation of remote workers varied, but interviewees often mentioned locales such as Wall Street and Silicon Valley.
- Locals who sold generally moved out of the county. Many capitalized on high sale prices to retire elsewhere or start another life chapter. Few repurchased in the area due to the high prices, unless they were able to downsize.
- Most homes were sold to new resident owners or second home owners. Some sellers gave preference to existing local residents, but rising prices and competing (often cash) bids meant that most locals were priced out.
- The rise in real estate value has translated into an increase in assessed value and higher property taxes owed, which has strained many homeowners' budgets and forced others to sell and leave the area.

> *"[We are] looking to expand our family, but we cannot do so with the current space and have no availability to move into a bigger unit."*
>
> *-2021 Employee/Household Survey comment*

Rental Market

Rent Trends and Local Workforce Affordability

Rents have increased significantly in the past couple of years. Some properties have risen 50% or more. Typically properties that have a turnover in tenancy will increase rents significantly, with landlords and property managers resorting to a "throw out a price and see what sticks" approach during the pandemic. While many owners kept rent increases to no more than 3% to 5% for renewing tenants, others increased rents by $500 or more, displacing many renters.[29]

> *We were in trouble before, but COVID sent the market into orbit.*
>
> *-Property manager interview*

Property managers noted that most of the higher priced rentals (e.g., over $5,000 per month) are filled by non-local workers: second home renters or work from home tenants employed in higher paying jobs outside of the area. The competition and resulting rent increases have been devastating to local workers seeking rentals. Also contributing to rising rents are escalating home values, which in turn increase property taxes and, therefore, rents charged by landlords to cover costs.

[29] See Regional Overview

The below table illustrates the typical rent ranges in Teton County compared to the average price of available rentals advertised in October and November 2021. As shown:

- Advertised rentals generally fall on the high side of the ranges given. This is largely because most managed rentals are filled by word of mouth and are never advertised. The units listed, therefore, tend to be higher priced homes that local employees cannot afford.
- Households need to earn a minimum of 115% of the area median income to afford average advertised rents. This starts at an income of $106,000 to afford a one-bedroom rental.
- Renters also need significant resources to move into units. Most rentals require an upfront payment for the first and last month rent, plus security deposit typically equal to the monthly rental rate. Meaning, if the monthly rental rate is $3,000, tenants need to pay $9,000 to move in. This is an insurmountable barrier for many renters. Several employers have been helping employees cover these costs to avoid losing their employees.[30]
- Local working residents typically search for rentals priced under $3,000. About 25% of advertised rentals were priced over $5,000, which is out of range for most residents.

> *"For many years if you had two jobs it was enough for one person to pay rent and have some left over. But this year people must have at least three jobs."*
>
> *-2021 Employee/Household Survey comment*

Rent Prices by Bedroom Size: 2021

	0/1-bedroom	2-bedroom	3+-bedroom	Overall Avg.
Property manager interviews (typical range)	$1,500-$2,500	$2,000-$3,000	$3,000-$5,000	$1,500-$4,500
October-November 2021 average listed rents	$2,656	$3,685	$4,183[2]	$3,469
AMI affordability[1]	115%	142%	181%	133%
Income needed to afford rent	$106,240	$147,400	$167,320	$138,720
Number of average wages needed to afford rent	1.8	2.5	2.8	2.3

[1]Note: calculation assumes 2 people in a 0/1 bedroom units and 3 people in 2- and 3-bedroom units
[2] Calculation excludes 13 rentals priced over $5,000 per month, which increases the average to $9,164
Source: Property manager interviews, online rental listings (local property managers, JH News, Craigslist, Facebook, Zillow, Hotpads, Apartments.com), consultant team

Survey respondents were asked how much they pay for rent. As shown below:

- Rents paid by residents in Teton County fall on the lower end of rent ranges presented in the above table. In other words, they occupy older units and/or have been in their units for several years and their rents have not increased to full market rate.

> *"[I] Have a second job to pay for gas to commute to Jackson."*
>
> *-2021 Employee/Household Survey Comment*

[30] See Chapter 4 – Housing Inventory for more information about employer assisted housing.

- Employees that commute in for work pay less for rent than county residents. When the average commute cost of $500 per month[31] (or more) is added to rent, however, this difference is eroded. Commuters end up paying more on average for rent plus commute costs than employees living in the county pay for rent.

Rents Paid by Bedroom Size: Teton County Residents and Commuters, 2021

	0/1-bd	2-bd	3+-bd	Overall Average
Live in Teton County, WY	$1,549	$2,099	$2,581	$1,987
Commute in for work	$1,306	$1,535	$1,793	$1,577

Source: 2021 Employee/Household Survey

Availability

As a general rule, vacancy rates at or below 3% are very low, double-digit vacancy rates are very high, and a vacancy rate of around 6% that is trending downward typically indicates to developers that construction of additional units should begin.

Rental unit turnover in Teton County tends to be highest in May and, secondarily, in November. A search for rentals during October and November 2021 only produced 48 rental listings. This is equivalent to less than 1% vacancy per month. Additionally, about 25% of listings were priced way out of reach of the local workforce (e.g., $15,000-$25,000 per month). Property managers and real estate agents noted that:

- Near-zero vacancy rates in Teton County have been common for at least the past several years. What is new is that rising rents and low availability in Victor, Idaho, and Alpine, Wyoming, mean that renters unable to find housing in Teton County, Wyoming, are now seeking homes further out, such as Pinedale, Wyoming, to the south and Saint Anthony and Ashton, Idaho, to the west. The commute to Jackson is three hours round trip in good weather from these communities.
- Units that become available are typically filled within days, if not hours.
- Most property managers do not maintain a waitlist due to the volume of calls they receive.

Adding to low vacancies is also a loss of long term rentals this past year.[32] One property manager lost 90 of their 180 units this past year due to owners selling their rental or converting to short term rental.

When vacancy rates are this low, the rental market is near capacity and cannot absorb new residents or employees moving to the area. This results in several issues:

- Renters have difficulty moving from one unit to another as their circumstances change or landlords impose higher rents or new rules;

[31] See Chapter 3 - Jobs, Seasonality, and Commuting
[32] See Regional Overview

- Renters fear reporting needed repairs to landlords due to concerns of retaliation through rent increases or non-renewal of leases. About 12% of renters responding to the employee/household survey noted this as a problem;
- New employees struggle to find housing when hired by local businesses;
- Rents increase at rates much faster than incomes; and
- Landlords have little incentive to make repairs and capital investments.

My roommates and I are very lucky to live in our current home (cabin/shack, whatever you want to call it) but to consider ourself lucky to cram into a 2 bedroom house (I live in a laundry room converted into a bedroom) that is falling down is absurd. We fear to ask the landlord to make basic repairs to the house because we don't want her to raise the rent.

-2021 Employee/Household Survey Comment

Chapter 6 – Housing Program Accomplishments and Challenges

Tools and strategies to address community housing needs have been in operation and development for over 20 years in Teton County and commendable progress has been made. The purpose of this chapter is to capture what has been accomplished with regard to community housing production and programs. Particular focus is on changes seen since the prior housing needs assessment was completed in 2014. This section reviews existing subsidized housing inventory, projects in the works, and structures and organizations in place to facilitate more housing options for local residents and employees.

This section will be useful when devising the Housing Action Plan to understand what has worked well and where changes or alternative approaches may be helpful to address existing and projected needs.

Deed Restricted/Subsidized Housing Inventory

Since 2014, about 411 new deed restricted units have been added to the local inventory. Deed restricted units now represent about 14% of total housing units in the County.

New Deed Restricted Inventory 2015 – 2021

	Owner	Rental	AMI ≤50%	AMI 51%-80%	AMI 81%-120%	AMI >120%	Total
2014 Baseline	**522**	**965**	**126**	**202**	**586**	**93**	**1,488**
New Since 2014	103	308	10	40	161	200	411
%	25%	75%	2%	10%	39%	49%	100%
Created/year	15	44	1	6	23	29	59
Total Deed Restricted Created	625	1,273	136	242	747	293	1,899

Source: 2014 Housing Needs Assessment, Jackson/Teton County Affordable Housing Department

New units created have been predominantly rental housing (75% of new units), and nearly half are priced for households above 120% Area Median Income. Only 10 units have been produced to support households below 50% Area Median Income.

The rate of production for new deed restricted units has been about 59/year. This rate of production has generally been trending upwards, with the lowest production in 2017 at 12 units and an average of about 82/year since then.

"Without housing options that are affordable to the full spectrum of the local workforce, we will not achieve our goals of stewarding our ecosystem, managing our growth, and enhancing our quality of life. We may fail to provide basic services like public safety, utilities, education, healthcare, and road maintenance."

– 2021 Supply Plan

Expiring Restrictions

The expiration of some restrictions poses a challenge to growing the overall deed restricted inventory; 52 restrictions burned off since 2014, and an additional 35 are set to expire by 2030. Jackson/Teton County Affordable Housing Department has been able to re-restrict some of these expiring units. At a cost of about $150,000 per deed restriction, this process takes valuable resources that could otherwise be used to secure new restrictions and underscores the importance of permanent restrictions.

Total Deed Restricted Inventory – Including Expirations

			AMI				
	Owner	Rental	≤50%	51%-80%	81%-120%	>120%	Total
Total Deed Restricted Created	625	1273	136	242	747	293	1899
Lost to Expiration	-52	-	-	-	-36	-16	-52
Current Total Deed Restricted	573	1273	136	242	711	277	1847
%	31%	69%	7%	13%	38%	15%	100%

Source: 2014 Housing Needs Assessment, Jackson/Teton County Affordable Housing Department

Production Tools

Over the past seven years, regulations, incentives, and public/private partnerships have produced a similar percentage of the deed restricted housing inventory. A more comprehensive list of tools used for housing production is included in Appendix B.

Source of Deed Restricted inventory 2015-2021

Source: Jackson/Teton County Affordable Housing Department, consultant team

- **Commercial Mitigation** is the primary regulatory tool. This tool requires new commercial development to mitigate some of the housing need for the new employees associated with the business. Commercial Mitigation has produced 108 units for sale and for rent to households below 120% AMI since 2014.
- **The 2:1 Workforce Housing Density Bonus** incentive was part of the 2018 update to the Jackson Land Development Regulations. A total of 140 deed restricted units serving households earning above 120% AMI have been constructed utilizing this incentive program. The density bonus allows developers to create 1 square foot of deed restricted housing for every 2 square feet of market housing, increasing the efficient use of land. Appendix G of the *2021 Jackson and Teton County Affordable Housing Supply Plan* can be referenced for more information.
- **Public Private Partnerships** have created 106 deed restricted units. This has been the most effective tool for producing housing priced affordable for households earning below 80% AMI and between 80% to 120% AMI.

By Sector

The two non-profit housing providers in the area, Jackson Hole Community Housing Trust and Teton Habitat for Humanity, are focused on providing affordable homeownership opportunities. By engaging in public private partnerships, these two entities have helped add 102 units to the deed restricted inventory since 2014. This represents 12% of the total deed restricted units created, but 81% of all new homeownership units. These two entities have been successful in aligning their production with deep affordability. Habitat for Humanity has created 24 units serving 30% to 80% AMI households, and has an additional 18 planned.

Scaling up the work of these two agencies would provide significant community housing benefit. There is also a gap in the local housing provider landscape that focuses on developing rental housing below 80% AMI.

Pipeline - New Deed Restrictions Anticipated

Jackson/Teton County Affordable Housing Department, Jackson Hole Community Housing Trust (JHCHT), Teton Habitat for Humanity, and several private sector developers have collaborated to create a robust pipeline of projects in the predevelopment and planning entitlements phases. The new deed restricted units proposed represent a significant increase in the level of historic production. The majority of these units are being produced through public-private partnerships.

Project Pipeline

			AMI				
	Owner	Rental	≤50%	51%-80%	81%-120%	>120%	Total
Pipeline - In Planning Approvals	87	205	16	15	85	176	292
Pipeline - In Predevelopment	18	48	48	18			66
Total Pipeline	105	253	64	33	85	176	358
%	29%	71%	18%	9%	24%	49%	100%

Source: 2021 Jackson and Teton County Affordable Housing Supply Plan, interviews

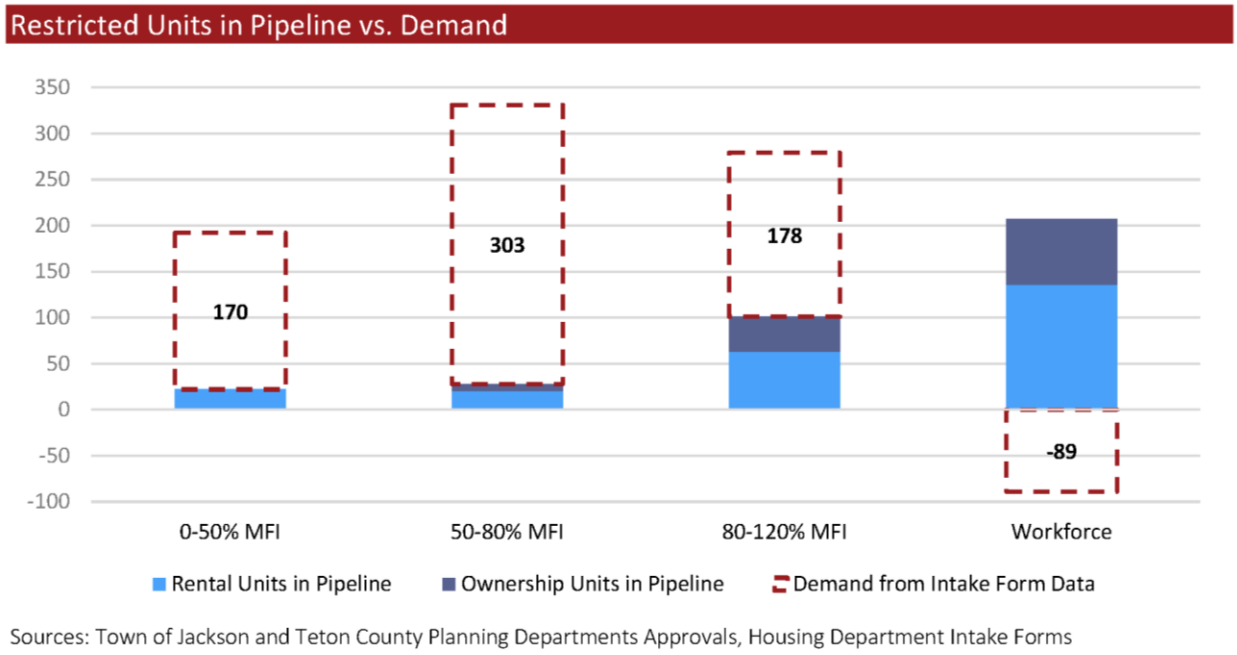
About 358 additional deed restricted units are anticipated based on the projects in the development pipeline. Assuming these all get built over the next three years, this would represent a significant increase in the annual production rate, at about 120 units/year. There will likely be pressure to provide further public investment and philanthropy for of each of these projects, as they face escalating construction costs and labor shortages (see Chapter 7 – Housing Resources, Opportunities and Constraints for more information about construction/development costs).

Production continues to favor rental housing (71% of planned units). Nearly half the proposed units have income targets for households above 120% AMI (49%).

Waitlists

There are currently four avenues for those seeking deed restricted housing, using a variety of selection methods.

- Direct application to property managers of deed restricted rentals
- A weighted drawing process administered by Jackson/Teton County Affordable Housing Department
- A date/time-based waitlist administered by Jackson Hole Community Housing Trust
- Curated process administered by Teton Habitat for Humanity



Each agency has a significant pool of applicants for any housing that becomes available, and there is most likely redundancy among the people waiting on various lists. From the consumer perspective this is not an efficient system.

Regarding waitlist trends, demand far exceeds supply of housing units. Habitat for Humanity recently had 40 applicants for three homes. They reported most applicants had incomes between 30-50% AMI. Jackson Hole Community Housing Trust has 350 interested households on their waitlist. Average income for buyers at King Street, currently in the sales process, is 89% AMI.

The *2021 Jackson and Teton County Affordable Housing Supply Plan* provides a compelling case for increased focus on rental housing for households below 80% AMI and homeownership opportunities for households below 120%.[33] Based on the Jackson/Teton County Affordable Housing Department's Intake Forms, ***90% of people looking for housing have incomes under 120% AMI.*** There are about 650

[33] 2021 Jackson and Teton County Affordable Housing Supply Plan page 3

households with incomes below 120% AMI seeking housing, far more than the 182 units planned at these price points. In contrast, there are only about 120 households seeking housing priced above 120% AMI, fewer than the total units planned. This mismatch between demand and production is driven by the 2:1 Incentive tool, the high cost of construction, and the unit mix in public/private partnerships underway. Action planning should include a discussion about the tradeoffs of deeper subsidies to achieve units that are affordable to local wage earners, even if fewer units are created overall.

Sources: Town of Jackson and Teton County Planning Departments Approvals, Housing Department Intake Forms

Source: Page 3 of 2021 Supply Plan

One potential outcome of the significant inventory of units in the over 120% category coming online is that households with lower incomes will "rent burden" themselves to live in the new units, because there are no other options in the market. This dynamic presents a mixed policy outcome.

On the one hand, rent burden can lead to housing instability. Rent burdened households have reduced ability to pay for basic needs beyond housing, withstand short term financial hardships, and save. Rent burden also drives forced "financial co-habitation," meaning that households are combining to afford rent, when they would prefer to live alone. On the other hand, the new housing will create some opportunities for people to find housing where there was none (although it may be beyond their budget), reduce commutes, and have higher quality housing. The new housing created may also remain more affordable over time, as rents on unrestricted housing continue to climb (see Regional Overview for more information and details about cost burden and overcrowding).

Price Points for Affordable and Workforce Housing

The Jackson/Teton County Affordable Housing Department published the following rates for rental properties. Workforce rental rates are not capped but are restricted for occupancy by local workers. It is uncertain how these rents will perform compared to the market over time. We recommend tracking

rents paid and income of occupants in these higher priced deed restricted rentals over time to better understand cost burden, recruitment and retention of employees, and housing satisfaction.

Affordable Rental Rates: 2021

	0 - 50%	50% - 80%	80% - 120%
Studio	$516	$860	$1,375
1-bedroom	$607	$1,012	$1,618
2-bedroom	$694	$1,156	$1,850
3-bedroom	$780	$1,301	$2,081

Source: https://www.tetoncountywy.gov/1829/Maximum-Affordable-Rental-Rates; Effective April 9, 2021 until updated by HUD in 2022

Two for sale deed restricted projects are just completing construction. King Street, built by the Jackson Hole Community Housing Trust is 100% under contract, with units priced below 120% AMI. Kelly Street site, which is 12 units of for-sale workforce housing, is advertised to be deed restricted for full-time residency, with at least one member of the household earning at least 75% of their income in the county. Both developments are public-private partnerships with the Jackson/Teton County Affordable Housing Department.

Kelly Street Asking Prices: 2022

Demographics of Those Served

Who lives in workforce housing is determined in large part by whether the homes were built for owner or renter occupancy, the type and size of units, and targeted incomes and price points. By strategically targeting housing for households not otherwise served by market rate homes, the mix of households occupying deed restricted homes differs from households occupying market rate housing.

> *"Nobody is building housing that addresses the housing needs of hourly wage workers."*
>
> *– Stakeholder interview*

As shown below, employer-assisted and restricted and workforce housing provided in Teton County, Wyoming:

- Helps families with children to purchase homes.
- Permits working age residents to purchase homes and gain stability in the community. This is particularly important as homeowners in market rate homes reach retirement age.
- Helps renters live without roommates and still afford rent, adding to their satisfaction and increasing their likelihood of remaining in the community.
- Provides more affordable homes in better condition. Renters in restricted rentals are much less likely to be housing cost burdened (37%) than in market rate rentals (51%).

Workforce housing has also provided opportunities for essential and core service employees to purchase homes locally, including health care and social assistance, education, entertainment and recreation, non-profit, and service workers. The ability for workers to purchase homes promotes worker stability by reducing housing stress; providing a pride of investment in the community; and increasing job satisfaction, attendance and performance, and thereby reducing job turnover.

Effect on Local Workforce Occupancy Rate

About 61% of employees in Teton County live in the county, which has remained relatively consistent for the past 10 years.[34] The provision of restricted and employer-provided housing has a definite impact on this measure. As shown below:

- Employees that live and work in Teton County, Wyoming, occupy about 7,970 housing units in the county. About 2,000 (25%) of the 7,970 households with a local employee reside in employer-assisted or income-, employment-, rent- or price-limited homes.
- If the current inventory of 2,000 restricted and employer-provided homes were instead market-rate homes without any restrictions on occupancy, then only about 1,200 of the 2,000 homes would be occupied by a local employee.
- With 800 fewer units housing county employees, the percentage of jobs filled by local employees would drop by about 6-percentage points, from 61% to 55%.

[34] See Chapter 3 – Jobs, Seasonality and Commuting

Keeping the workforce local helps avoid the negatives of commuting and helps the community and economy as discussed in detail in other sections of this report.

Estimated Change in Local Employee Households if Restricted Homes Were Market Rate

Ethnicity

In the region, about 15% of households identify as Hispanic/Latino. A similar 13% of households residing in Deed Restricted homes are Hispanic/Latino. Variations are apparent by income level, however.

> *"For me it is difficult because I don't have credit"*
>
> *-2021 Employee/Household Survey Comment (Spanish version)*

Hispanic/Latino households are under-represented in the housing inventory that is serving households below 80% of AMI. About 27% of non-Hispanic/Latino households that earn under 80% AMI are residing in employer-assisted or restricted housing compared to 18% of Hispanic/Latino households that earn under 80% AMI.

	All Respondents		Living in Employer/ Restricted housing	
	Not Hispanic/Latino	Hispanic/Latino	Not Hispanic/Latino	Hispanic/Latino
<80% AMI	32%	62%	51%	64%
80 to 120% AMI	21%	21%	25%	26%
120 to 200% AMI	26%	13%	20%	9%
>200% AMI	20%	4%	5%	2%

Source: 2021 survey

From the survey, several survey respondent comments from the Spanish version refer to the inability to get loans or qualify for deed restricted housing due to things due to lack of credit, or lack of documentation of legal status. The presence of pets, children, and larger family status where also cited as challenges. Nearly all (88%) reported having difficulty locating housing in the past couple of years.[35]

Increasing outreach, education, and reducing barriers for Latinx families could help promote equity within the deed restricted and employer owned housing. Creating more housing priced below 80% AMI will also support the Latinx community.

None of the housing agencies currently track households by ethnicity. Habitat for Humanity reported serving many of households from the Latinx community, but did not provide specific data. Starting to track households by ethnicity and pursue affirmative fair housing marketing is recommended to ensure equitable access to local housing resources.

Other Housing Programs in Operation

Jackson/Teton County Housing Authority

The Jackson/Teton County Housing Authority is a regional housing authority that exists to purchase and own affordable properties. It has the ability to carry debt, acts as property manager of the properties it owns, and reviews Critical Services Provider applications for housing. It is directed and authorized by the Town Council and Board of County Commissioners and staffed by the Jackson/Teton County Affordable Housing Department.

Jackson/Teton County Affordable Housing Department

The Jackson/Teton County Affordable Housing Department (Housing Department) is responsible for implementing the Comprehensive Plan goals related to ensuring a variety of workforce housing opportunities so that at least 65% of those employed locally also live locally. The Housing Department seeks to use incentives, regulations, and partnerships to increase the supply of housing to keep pace with the growing need. The Housing Department is also responsible for the Housing Supply Plan. The Housing Department Director reports to the Board of County Commissioners and the Town Council. Teton County is the lead agency overseeing housing. The Housing Director receives recommendations from the Housing Supply Board and the Jackson/Teton County Housing Authority Board.

In addition to supporting increasing the supply of deed restricted housing and ensuring ongoing program compliance, the Housing Department operates four additional programs:

1. Preservation Program – offers up to $200,000 or 20% of home value, whichever is less, to prospective buyers or current property owners to deed restrict existing housing stock. This new program has created three deed restricted units. An additional $2 million is budgeted to secure about 13 more units in 2022. If the pilot program is successful, the Housing Department anticipates pursing about 10 units per year. The program to date has been funded by the town, county, and $45,000 of philanthropy.

[35] See Regional Overview - Housing Problems for more information about housing problems for owners and renters

2. First/Last/Deposit Pilot – a collaboration with community stakeholders, including One22, to provide assistance with first and last month's rent and security deposit for working households. $50,000 is budgeted for 2022.
3. Accessory Residential Unit (ARU) Program – Design competition to create "pre-approved" accessory structures that could be built within the town of Jackson. $100,000 is budgeted for 2022.

Jackson Hole Community Housing Trust

The Jackson Hole Community Housing Trust (JHCHT) is a private, non-profit organization. It builds affordable housing in the Jackson Hole area with support from partners, tax deductible donations and public funding sources. In 2021, the organization received $15 million in philanthropic support. These funds far exceed historic annual donations, and will help to accelerate three additional development projects.

JHCHT has developed or acquired 181 permanently deed-restricted single-family homes, duplexes, townhomes and condominiums since its inception in 1990. JHCHT typically focuses on affordable homeownership, although they have some affordable rental units as well. Projects tend to be smaller scale; the largest site has 36 units. Developments have historically primarily served households below 80% AMI, but JHCHT desires to also serve up to 120% AMI.

JHCHT is completing construction and sales of King Street ownership homes. All 24 units are under contract. The project was made possible with a contribution of $1.25 million plus land from the town of Jackson, $2.1 million from philanthropy, and the sale of two commercial spaces.

JHCHT has four additional developments planned, which could produce about 100 units. Three developments will be for sale and one will be rental housing. The organization has expressed interest in increasing housing production. Access to capital is one of their major hurdles. They have also expressed the need for more predictable financial commitments, which would enable them to plan and commit to more housing development and fund additional staff capacity.

Habitat for Humanity of the Tetons

Habitat for Humanity is a non-profit that builds and repairs houses using volunteer labor and donations to make homes and renovations affordable for low-income households. It requires new homeowners to participate with volunteer hours, provide money for a down payment, and pay a mortgage on a 0% interest loan. Homeowners make mortgage payments to Habitat, which sells the loans and reinvests proceeds to build more homes. Habitat focuses on building homes that are priced for households earning between 30-80% AMI, and uses several strategies to attain those price points, including philanthropic support from individuals, businesses, and government.

Habitat for Humanity has completed 51 homes since it was formed in 1995 and has 18 more homes now in the development pipeline. Habitat is currently building about six homes per year, which is their preferred rate of production. Ramping up further would require a second crew, and would be challenging from a staff, volunteer, and philanthropic perspective. While their current focus is within Jackson Hole, they have periodically had discussions about extending their geographic reach to other communities.

> *"We can't build enough to satisfy everyone, there has to be level setting among stakeholders about what our community goals are at some point."*
>
> *-Habitat for Humanity Executive Director*

Similar to other builders, land and construction costs represent the greatest risks for Habitat. In addition to escalating costs of labor and materials, Habitat has faced an additional challenge from the global supply chain shortages. National vendors for materials like paint, windows, and appliances have historically donated or provided materials at reduced rates to Habitat. In the past 18 months, as these companies have struggled to fill orders for materials, their support has diminished.

Another unique attribute is their volunteer labor. While work was disrupted by COVID for about 13 weeks in spring of 2020, Habitat has been able to get back on track with their volunteer program.

Shelter JH

ShelterJH is a 501(c)4 membership-based non-profit founded in 2016. ShelterJH members build grassroots and political power to support community members living where they work, creating a more resilient future for Jackson Hole. As a 501(c)4 instead of the typical 501(c)3, ShelterJH can endorse, oppose, and support candidates to help keep housing supporters in office. They work to empower members to be their own housing advocates and lead the movement for housing justice.

The Casper Housing Authority

The Casper Housing Authority administers Housing Choice Vouchers (Section 8) for the Teton Region. The program supports renters by providing a subsidy for the rent amount above 30% of the voucher holders' income. Very few vouchers are in use in the region, based on the limited number of vouchers available and the rental rates that exceed the "fair market standards" that govern this federal program. Casper Housing Authority's participation in the Flat Creek Apartment project through project based vouchers has increased the financial feasibility of that project.

Homeless Services

There is no permanent supportive housing for homeless individuals or families in the area, however, several non-profits and faith-based groups provide temporary assistance. These groups include Good Samaritan Mission, St. John's Episcopal Church, Community Safety Network, and One22.

Chapter 7 – Housing Resources, Opportunities and Constraints

Government and Institutionally Owned Land

Providing land at low or no cost can be an effective strategy for catalyzing new affordable and workforce housing. The *Jackson and Teton County Annual Housing Supply Plan* relies heavily on this approach, and the Jackson/Teton County Affordable Housing Department (Housing Department) has been successful in creating public/private partnerships as a result. Eight public/private partnership projects are underway and will produce 358 new affordable units in the next few years.

Taking the land cost out of the development proforma is a helpful start to creating affordability, but, in today's construction market, is not sufficient on its own to meet the needs of most local employees.

The *2020 Jackson and Teton County Annual Housing Supply Plan* (Appendix G) has an inventory of government owned parcels that might be suitable for housing. Most of the parcels are less than an acre. The Jackson/Teton County Affordable Housing Department has been proactive in initiating public/private partnerships on these lands and has an informal goal to do one development partner request for proposals (RFP) per year. As the Housing Department utilizes existing land inventory, there is a risk that decreasing supply of government and institutionally owned land and escalating land values will reduce housing production.

Developers and planners observe that affordable housing production will increasingly come from redeveloping underutilized land within the town of Jackson. When land becomes available, the agency needs both funding and organizational capacity to move quickly. Securing land for future public/private partnerships is also important for responding to housing needs over the long term.

Local Funding Sources

Local Government

The Housing Department has invested about $36 million in workforce and affordable housing over the past five years. These investments have supported the creation of 246 deed restrictions, mostly on new construction. The funding sources supporting these investments are summarized in the below table.

Jackson/Teton County Affordable Housing Department Sources 2017-2021	
Mitigation Fees	$7,806,296
General Fund	$7,000,000
2019 SPET	$1,509,842
Land Owned, Appraised Value	$16,060,000
JTCHA	$156,638
2006 SPET	$3,900,405
Total	**$36,433,181**

Source: Jackson/Teton Affordable Housing Department, consultant team

Housing Department funds have been invested in capital projects via land and direct funds to the project. On average, investments total just under $150,000 per unit. The lowest per unit assistance was The Grove III at $79,000/unit. The highest assistance was for Redmond Street Rentals at $204,000/unit. Developers have expressed that a more predictable and transparent process for fund allocation would be beneficial.

Jackson/Teton County Affordable Housing Department Per Unit Investment 2017-2021

	Cost per unit
Total average across all types - land and cash	$149,106
Average for own	$96,292
Average for rent	$167,669
Average for workforce (greater than 120% AMI)	$98,182*
Average for affordable (less than 120% AMI)	$151,165*
Land only	$111,696

*analysis excludes Jackson Street, which is both affordable and workforce
Source: Jackson/Teton County Affordable Housing Department, consultant team

The 2019 Special Purpose Excise Tax (SPET) commits $5.5 million for housing. The Housing Department has deployed about $1.5 million. With an average investment of $150,000 per unit, the remaining $4 million could help create about 26 additional deed restricted units. Rising construction costs and the need for more units below 80% AMI, however, will likely require higher per unit investments.

"For this year, staff proposes to at least quadruple public investment in housing and to focus this investment on multifamily housing that serves households earning <120% of median family income."

– 2021 Supply Plan

The town of Jackson and Teton County have also supported the Housing Department with General Fund Allocations of $7 million over the past five years. In-kind support through fee waivers and staffing resources also contribute to housing programs and initiatives.

Federal passthrough grants from the American Rescue Plan Act will bring one-time infusions of about $3 million to the town of Jackson and $4 million to the county. These funds will likely go into the general fund, and a portion could be used for housing and housing-related infrastructure.

Non-profit and Private Sector

As noted above, Habitat for Humanity and the JHCHT use local philanthropy to help close the gap between construction costs and what local residents can afford. Other non-profit and private initiatives include:

"Other Non-profits have small armies of employees. If the community stepped up and invested in Habitat and JHCHT in a similar way – they could make the housing we need happen."

– Stakeholder interview

- ***Community Foundation of Jackson Hole*** – This organization raised about $35 million in 2020, of which about $15 million was from Old Bill's Fun Run. Housing solutions and housing

philanthropy have not been a major focus for the Community Foundation. In recent years, the Jackson/Teton Affordable Housing Department reported receiving a $40,000 grant, and JHCHT reported receiving a $25,000 grant to be used over three years.

- ***Teton Board of Realtors*** – Community Housing Fund – This initiative was launched in August 2021. It is a voluntary contribution whereby realtors, buyers and sellers can designate a contribution as part of a real estate transaction. Proceeds will support Habitat, the JHCHT, and Jackson/Teton County Housing Authority. Twenty-two real estate agents pledged $150,000 to seed the fund and complete the capital campaign for the JHCHT's King Street Development.

Development Environment

The development environment in Jackson and Teton County presents many challenges for creating workforce housing. These challenges include the remote, rural nature of the community, and associated difficulty getting resources, and competition for skilled labor and materials. The regulatory environment of Jackson and Teton also offers a mix of positive and challenging aspects.

Teton County and Jackson completed a major update to the Land Development Regulations in 2018. Some of these changes, such as the 2:1 Density Bonus, have already produced results. Others, such as the elimination of Inclusionary Zoning, may have had negative impacts, but are challenging to measure. A full summary of the tools that can work for and against the ability to build housing cost-effectively is included in Appendix B.

The primary observation by developers was not that specific land use codes needed improvements, but rather that the overall process is slow due to the layers of regulation and the Planning and Building department frequently being short staffed. It is challenging to attract and retain skilled labor to process development applications, such as building inspectors and planners. At the time of this study, Teton County was working to fill seven of sixteen full time positions in the Planning and Building department. The hiring manager reported a direct link between the cost of housing in the area with the high turnover in his department and difficulties hiring new employees, affecting both entry- and mid-level positions.

Developers also expressed the need to reduce risk in the entitlements process by making more uses "by right" or administrative in nature. The two tools that developers were most positive about were the 2:1 Density Bonus and the Jackson/Teton Affordable Housing Department provision of land and infrastructure. One developer suggested extending density bonuses to other land use zones, "provided the additional density was for locals housing." For example, when building a new restaurant in a commercial zone, extend a density bonus to build units for local workers on the same parcel.

Cost of Residential Construction

The cost to develop housing varies by multiple factors, including location, target demographic, density, and product type. The primary residential development costs include land acquisition, construction costs, soft costs, site work, and financing. Overall, developers and contractors reported on the current challenges to build affordably in the area as greater than ever before. These challenges include high land, labor, and construction materials costs, which are making it ever more difficult to overcome the

gap between cost to build and what local wage earners can afford. Labor shortages and overall escalating costs also add significant risk to community housing development.

Land Acquisition

Land costs vary considerably, depending on the location of the parcel, zoning, and access to infrastructure. Average land price for community housing projects between 2017 and 2021 was about $112,000 per unit; however, this is rising. Land zoned for multi-family uses recently appraised for over $7 million per acre. Assuming 20 units per acre could be built, this would translate to a per unit land cost of $350,000. The limited availability of land and competition with other uses, such as luxury housing, are putting tremendous upward pressure on land values.

> *"Just putting the land under the deal doesn't pencil anymore, it won't create anything that remotely resembles affordable."*
>
> *- Stakeholder interview*

Construction Costs

The industry standard for cost to construct the building is typically 60% to 70% of total development costs, although in five recent community housing developments in Jackson, the range was actually broader (53% to 85%). Local developers and contractors report that the cost of construction for a townhome or multifamily product with medium-level finishes ranges from $375 to $450 per square foot, which includes materials and labor only (i.e., land, soft costs, site work, and developer fee are excluded). Contractors reported that single-family homes cost no less than $700 per square foot to build. The rest of this analysis centers on attached housing.

The average construction cost per square foot for the five recent projects was $336, with $382 for site built and $267 for modular. High-end finishes (stone, cedar siding, granite) increases construction costs. Contractors reported that the cost to build market rate construction of attached residential product with high-end finishes begins at $700 per square foot, with "the sky as the limit."

Developers and contractors noted worsening conditions with regard to construction costs, and stated that they would not be able to replicate the cost per square foot of these recent projects. One contractor recommended using a 25% cost escalator for projecting costs on anything that does not yet have a building permit.

> *"We are facing competition for labor from all of the surrounding communities now, and I need to build in $60,000 hotel allowances for crews from other markets. This adds up fast."*
>
> *– Contractor interview*

While supply chain issues have impacted construction materials nationally and globally, developers and contractors working locally emphasized that labor is the greatest challenge and driver of cost increases. Lower paid positions are especially hard to fill, which is attributed to the tight housing market and sharp decline in J-1 Visas, creating significant competition for employees. Contractors reported labor shortages across all trades and levels of experience and noted that many subcontractors left the

Jackson area in recent years as housing prices became more unaffordable.

High construction costs are also limiting the opportunity to provide amenities like structured parking, which could make more efficient use of limited land.

The Jackson/Teton Affordable Housing Department and other funders should be prepared to provide greater gap funding to create the same level of affordability over the next few years.

> *"Scale is really important. Larger projects give us the ability to draw labor from markets like Salt Lake City. We can drive down construction costs a bit with this strategy."*
>
> *– Contractor interview*

Soft Costs

Soft costs are expenses that are not considered direct construction costs and include architectural, engineering, permitting, taxes, insurance, and legal fees. Soft costs were reported to average 13% to 25% of total project costs. Developers of affordable housing reported being able to keep soft costs lower than they would be for market rate projects. The ability to waive some town of Jackson fees for 100% Deed Restricted development helps developers. Water and sewer fees cannot be waived and are more substantial. Overall, the fee environment for community housing development in Jackson is not overly onerous compared to other mountain towns.

Developer Profit

When building community housing in Jackson, both non-profit and for-profit developers reported accepting lower developer fees compared to what they might earn building community housing elsewhere, or building market rate housing. Habitat for Humanity and JHCHT charge only a project management fee to cover staff time. For the proposed Low Income Housing Tax Credit (LIHTC) development, Flat Creek Apartments, Blueline Development reported that the developer fee will be capped below industry standards. Lower developer fees help reduce overall project costs, but further restricting developer fees may act as a disincentive for developers to take on the risks of building housing in this environment.

Site Work

Site work includes grading the site, installing utilities, paving roads and parking, etc. Stie work costs vary significantly based on site location. Site work can be a barrier if off-site infrastructure is required or if infrastructure upgrades are needed. One developer expressed how the need for off-site improvements killed the financial feasibility of a community housing project he was pursuing. Aside from that, local developers did not express many hurdles associated with site work, but did express concerns this would be a bigger issue as infill opportunities within Jackson become scarcer. Public sector participation in site work and infrastructure capacity can help to reduce risk and create affordability, similar to what occurred at Grove III.

Financing Costs

Financing costs generally make-up less than 5% of the total development costs. Financing mechanisms used to develop affordable housing, however, can cost more than traditional financing, such as LIHTC, or when multiple funding sources are used. Financing costs are often included in soft costs.

Total Development Costs

Based on an assumption of $425/square foot cost to build, 20% soft costs, and 10% developer fee, and land value above, it costs about $847,250 to build a 900 square foot condo or apartment. To make this home affordable for a household at 100% of Area Median Income would require an additional subsidy of about $456,250.

> *"When we build a $15m house, there are 50 guys working there, and it goes on for 30 months. We need to house these people. Then the caterers, landscapers, housekeepers etc.etc.; they all need housing too. I think we should build four/five [deed restricted] units to go with every $10+million home. Real money needs to change hands."*
>
> *– Contractor interview*

Cost to Build – 900 square foot condo or apartment: 2021

	Assumptions	Cost
Labor and Materials (hard costs)	$425/sq ft	$382,500
Land and infrastructure	20 units on 1 acre at $7million/acre	$350,000
Design, fees, financing (soft costs)	20% of hard costs	$76,500
Developer fee	10% of hard costs	$38,250
Total Development Costs		**$847,250**
Price affordable for households at the median income [1]	100% AMI,	$391,000
Gap (subsidy needed)		**$456,250**

[1] Max purchase price assumes 30-year mortgage at 5.37% with 5% down and 20% of the payment covering taxes, HOA, PMI and insurance.

Source: consultant team

Chapter 8 – Housing Units Needed

This section addresses the question:

> *How many additional housing units are needed to address housing deficiencies for residents and support the labor force needed to sustain businesses and the economy.*

Needs are projected through 2027 and quantified in two categories:

- Catch-Up Needs – the number of housing units needed now to address current deficiencies in housing based on employees needed to fill unfilled jobs and the number of units needed for a functional rental supply.
- Keep-Up Needs – the number of units needed to keep-up with future housing demand through 2027 based on job growth and jobs vacated by retiring employees. Housing shortages worsen when local job growth and the need for more workers exceeds the growth in available housing units.

This section estimates housing units needed to support employers, keep up with future job growth and improve housing options for area residents based on information presented in other sections of this report. Estimates are a subset of the total demand for housing in the county. Estimates do not include current waitlists for housing, overcrowding, or households that will be forced to leave due to housing conditions.[36] Nor do figures represent the entire housing market – remote workers or retirees moving in from elsewhere, second homeowner purchases, and other market segments, which are outside the scope of this analysis.

Catch-up Needs (Current Conditions)

Unfilled jobs

Labor is in short supply, both locally and nationally. In such a competitive environment, the near-zero rental vacancy rates, and high and rising home prices and rents, make it even more difficult to attract labor to the area. Eighty-percent (80%) of employers stated that the lack of housing affected their ability to find and keep employees. More housing that local employees can afford is needed for businesses to hire and retain the workers they need to thrive.

Employer survey respondents reported that 15% of jobs were unfilled this summer, which is high and has been affecting business operations and employee satisfaction. Because all jobs are rarely filled, the following estimate seeks to lower the unfilled job rate to 5%, which was more typical prior to the pandemic.

About 84% of employees reside in the Teton Region. If this pattern is maintained, then the number of homes needed locally is about 1,115 to bring the current 15% unfilled job rate down to a 5% rate.

[36] See Regional Overview – Housing Problems and Chapter 6 – Housing Program Accomplishments and Challenges

Units needed to help fill jobs	
A. Current unfilled jobs (15%)	4,940
B. Reduced unfilled jobs (5%)	1,625
Jobs to fill (A – B)	3,315
Jobs per employee	1.3
Employees per household	1.9
Housing units needed	1,330
% of employees living in the Teton Region	84%
Housing needed for Teton County, WY, employees to live in the Teton Region	1,115

While this catch up need is important to understand for relieving current business employee shortages, much of this figure is also incorporated in the estimate of future job growth. This potential for double-counting is addressed in the summary of housing needs below.

Functional Rental Supply

The current rental supply in the county is not functional because vacancies are below 1%, placing substantial upward pressure on rents. When vacancy rates are this low, the rental market is near capacity and cannot absorb new residents or employees moving to the area, much less provide opportunities for current residents to find more suitable rentals as their housing needs change. Renters are "stuck" in their homes, and subject to burdening rent increases.

- A 5% vacancy level, while still low, provides some choice and availability of units for residents and employees. To increase the vacancy rate to 5%, about 200 rental units are needed.
- To also provide housing for persons who are now camping or living in motel rooms would require about 165 additional units.

Rentals Needed for a Functional Market	
Total rentals (2021)	3,830
Number of rentals if 5% vacancy rate	4,030
New rental units needed	200
Units needed for unhoused persons	165
Total additional rentals needed	365

Future (Keep-Up) Needs

Retiring employees

Employers will need to fill the jobs vacated by retirees in addition to any newly created jobs. Some retirees will leave the area upon retirement; however, when they sell their homes, the majority will be purchased by second-home owners or remote workers rather than local employees.

About 13% of employee/household survey respondents stated they expect to retire over the next five years. Assuming that 80% of retiree homes will not be available to new employees filling vacated jobs, 1,345 homes will be needed.

About 84% of employees reside in the Teton Region. If this pattern is maintained, then 1,125 homes are needed locally.

Retiring employees	
% to retire by 2027	13%
# to retire	3,200
Employees per household	1.9
Total housing units	1,685
Needed housing units (80% of retired)	1,345
% of replacement employees living in the Teton Region	84%
Housing needed for Teton County, WY, employees to live in the Teton Region	1,125

New Jobs

To keep up with estimated job growth over the next five years (5,064 new jobs), approximately 2,035 additional housing units will be needed. Because this study focuses on the Teton Region as a whole, the below estimate shows how many housing units are needed to keep new workers in the Teton Region based on current commuting patterns. The next section shows how many of these units may be needed in Teton County based on various assumptions.

About 84% of employees reside in the Teton Region. If this pattern is maintained, then 1,705 housing units are needed locally.

Estimated Housing Needed by the Workforce Filling New Jobs, 2021 – 2027

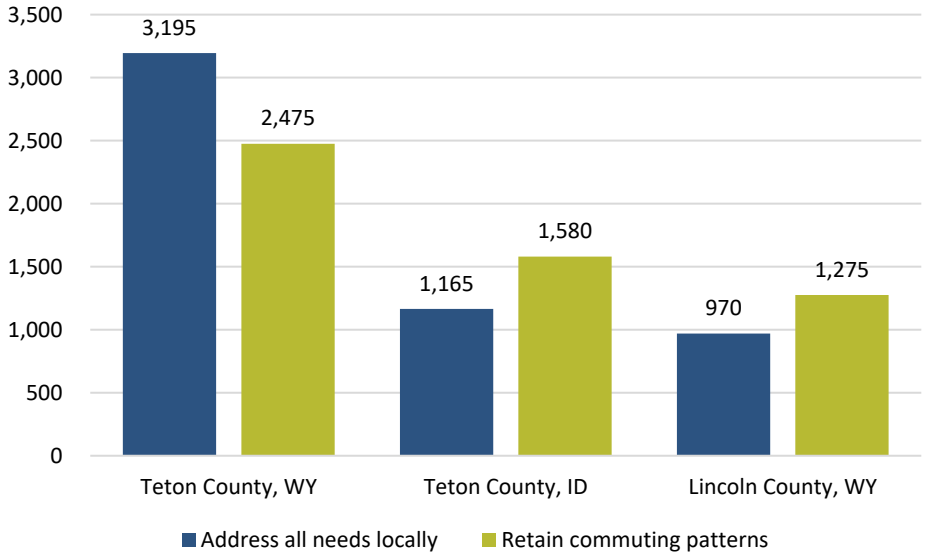
	Low
Increase in Jobs between 2021 to 2027	5,064
Jobs per Employee	1.31
Employees per household	1.9
Housing needed	2,035
% of employees living in the Teton Region	84%
Housing needed for Teton County, WY, employees to live in the Teton Region	1,705

Regional Distribution of Catch-Up and Keep-Up Needs

Based on estimated catch-up and keep-up needs in Teton County through 2027, an additional 3,195 housing units will be needed. The number of housing units needed in Teton County will vary depending upon whether the total housing need is provided locally, or if current commuting patterns within the

Teton Region are retained and units are constructed based on where employees presently live. As a job center in the Teton Region, if current commute patterns are retained, then the number of units needed within Teton County declines, but is displaced to Teton County, Idaho and N. Lincoln County. Under the current commuting patterns, the number of units needed in Teton County is about 2,475, whereas the need would be 3,195 if housing was aligned with the location of new jobs.

In Teton County, Wyoming, about 80% of the housing needed should be priced below-market. As discussed further below, this means ownership housing priced below $780,000 (200% AMI) and rentals priced below $2,600 per month (100% AMI).



Summary of Housing Needs Through 2027

	Address All Needs Locally	Retain Commuting Patterns
Catch-Up	**365**	**365**
Unfilled Jobs (reduce from 15% down to 5% unfilled)	*1,115*	*830*
Functional rental supply	365	365
Keep-Up	**2,830**	**2,110**
New jobs (2.4% growth)	1,705	1,270
Retiring employees (13% retiring)	1,125	840
TOTAL through 2027	**3,195**	**2,475**
Below market (80% of units)	2,555	1,980
Market rate (20% of units)	640	495

*Housing needed to fill currently unfilled jobs is shown in the table to illustrate the existing shortage of housing related to filling current positions. This number, however, is largely a subset of the new job growth estimate so is not included in the overall total to conservatively prevent double-counting.

The figure below shows the total housing needs through 2027 in the study area based on whether all needs are addressed locally or if current commuting patterns are retained.

Housing Needed Through 2027, Teton Region Counties
(5,330 total – 60% to 80% priced below market)

Needs by Own/Rent and Income

Ownership and rental housing for local employees and residents is needed. While the majority of workers filling new jobs will rent homes (about 70%), a significant percentage of current renters (46%) want to buy homes.[37] If ownership opportunities are provided, this can then free up rentals for occupancy. These dynamics support retaining the current tenure mix in the county among locally employed households: 47% own and 53% rent.

The precise ratio, however, is dependent upon the community's desired direction and housing policy. Rentals are needed to help recruit new workers and residents to the region; ownership is needed to retain year-round residents and support community stability.

Summary of Housing Needs by Own/Rent Through 2027

	Low (housing aligned with commuting patterns)	High (housing located where jobs are created)
Units needed through 2027	**2,475**	**3,195**
Ownership	1,165	1,505
Rental	1,310	1,690

The following table shows the income targeting for the additional units needed based on the income distribution of renter households that work in Teton County. As shown below:

[37] See Regional Overview - Housing Problems

- Market rate rentals in the county currently serve households earning over 120% AMI. The vast majority of new rentals need to be priced to be affordable to households earning below 120% AMI; 55% should be priced below 80% AMI.
- There are 253 rentals in the pipeline for development covering a range of affordability levels from 50% AMI through unrestricted market prices.
    - Rentals above 120% AMI are the largest segment and, when constructed, will address about 50% of the need at this price point (164 of units needed). This supply will add a significant boost to supply at this range.
    - A much lower 6% of estimated needs will be addressed by pipeline development under 120% AMI. Increasing the development of this product is needed.

Rental Units Needed by AMI Through 2027, Teton County, WY

	AMI				
	≤50%	50.1% - 80%	80.1% - 120%	120.1 - 200%	>200%
Max. Income	$52,020	$83,232	$124,848	$208,080	>$208,080
Max. Affordable Rent	$1,300	$2,080	$3,120	$5,200	>$5,200
Renter Income Distribution	24%	31%	23%	17%	5%
Rental Units Needed by AMI*	**360**	**465**	**345**	**255**	**75**
Pipeline development	62	11	3	----- 164 -----	

Incomes at each AMI are reported for a 3-person household

* Units Needed total is based on the mid-point of the low and high housing need estimates

The following table shows the income targeting for the additional units needed based on the income distribution of owner households that work in Teton County.

- The majority of owners earn under 200% AMI. The current housing market provides some attached product that households earning 250% AMI could afford, but single family homes are well above this. Market rate for sale product is basically not existent at prices that residents making their living in the county can afford.
- When considering ownership product for local residents and employees, most should be priced between $300,000 up to $780,000 (80% to 200% AMI). For renters looking to buy, product priced for households earning primarily between 50% AMI up to 120% should be the focus.
- Prior to the recent boom in prices in the Teton Region, homes priced below $500,000 were available in Teton County, Idaho, which is where many employees working in Teton County, Wyoming, searched for and found homes to buy. This is no longer a viable option; however, households searching for homes over $500,000 can still find some product. As options in neighboring counties diminish, it becomes even more important to provide opportunities for this demographic locally.
- About 118 homes for ownership are in the development pipeline, a substantial 90% of which will be priced for owners earning under 120% AMI, meeting about 15% of the estimated need in this income range. Twenty-four (24) homes are priced for households earning under 80% AMI - a great achievement in the high cost market. This is a good target for first time homebuyers.

Ownership Units Needed by AMI Through 2027, Teton County, WY

	AMI					
	≤50%	50.1% - 80%	80.1% - 120%	120.1 - 200%	200.1 - 300%	>300%

Teton County, Idaho

Chapter 1 – Report Snapshot and Recommendations

Overview of the Teton County, Idaho, Housing Needs Assessment

This Assessment centers on the understanding of what households can afford for housing in Teton County, and explores where their needs are being met, and where there are gaps. It uses the definition that housing is affordable when monthly housing costs (rent or mortgage, plus utilities, insurance, and property taxes) is equal to no more than 30% of a household's gross income (i.e., income before taxes).

Source: Dept. of Housing and Urban Development for a 3-person household
**Source: Blue Ribbon Demographics, LLC; 2021 Employee/Household survey

The housing bridge, illustrated above, presents a picture of what affordability in Teton County for its residents and workforce should look like. The bridge portrays a spectrum of housing that is affordable and most likely to be sought out by households in different income groups. It indicates the percentage of households earning incomes in each area median income range and the type of housing likely to be needed at the different income levels. The bridge depicts what may be ideal for most communities – the availability of housing that is affordable to households at all income levels and provides options for changing life circumstances.

It is from this perspective that the housing needs assessment was conducted. The housing bridge summarizes what you are about to read. It illustrates the mix of housing needed by residents making their living in the county and at which income level. It shows where the market is providing housing and where it is not; and how much housing is needed to address current shortfalls and keep up with future job growth. More specifically:

- The rental housing market for residents and local employees searching for homes has gotten expensive for local wage earners. A three-person household earning about $60,000 per year coming to Teton County may find something that meets the definition of affordable in the market. By this summer, if rents keep rising as fast as they have been, an income closer to $70,000 per year will be needed to afford market rate rentals.
- Households making their living locally were able to find a few attached homes to buy (condominiums, townhomes, etc.) for under $400,000 (150% AMI) in the first 10 months of 2021, although homes in this price range are now essentially nonexistent. Market rate single family homes are now mostly over $500,000 (175% AMI). This is a big shift from just two years ago when three-fourths of homes were priced under $500,000.
- To address the amount of housing needed to catch up to current shortfalls and keep up with future job growth, ***at least 60% of the approximately 1,165 to 1,560 homes needed by 2027 in the county will need to be priced below market***. This will require local policies, subsidies, and creative partnerships to produce, building upon the already significant achievements of the cities, county, local organizations, employers, private sector and community in this regard.

The document that follows provides the information and story behind this bridge. It summarizes the local housing challenges felt by residents, employees, employers, and the community as whole; and the already great strides being taken to improve housing options for residents and employees to support a thriving and vibrant Teton County community.

Recent Successes and Recommendations

Summary of Recent Successes

The local jurisdictions and employers have been working hard to address the current housing gaps in the community. There are many successes to celebrate. In particular:

- Local stakeholders have created the *Affordable Housing Strategic Plan* and *Housing Supply Plan*, clearly spelling out the challenges and proposed strategies to address them. Local jurisdictions have adopted the *Affordable Housing Strategic Plan* and implementation has started.
- The Joint Housing Authority has been established. Funding for an executive director is secured. The organization has an active Board of Commissioners with strong expertise in housing and planning. Local jurisdictions have also committed staff time and funding. The city of Victor recently entered into an agreement with the Joint Housing Authority to lease land at Sherman Park for a potential 72-unit affordable housing project.
- Employers have increased their engagement in providing employee housing, currently assisting over 300 seasonal and year-round employees with housing units, stipends, or other assistance to help relieve family burdens and increase stability.
- The city of Driggs has partnered with Northwest Real Estate Capital Corporation for the development of affordable rental housing in downtown Driggs at Depot Square. The team secured Low Income Housing Tax Credit funding to build 30 restricted rentals affordable for residents earning between 30% and 60% AMI. Community development block grant funding and tax increment financing revenue from the Driggs Urban Renewal Agency were also part of this project's financing.

- Local jurisdictions have added housing as a top priority in their comprehensive plans, and started assessing local zoning regulations to increase the diversity of housing types.

The Path Forward

As summarized above, there is good momentum and foundation for addressing housing needs in the Teton Valley. And continued momentum is needed to help address the gap of up to 1,580 homes. ***The magnitude of the issue requires a robust and regional response from all sectors of the community (public, private, non-profit) working collaboratively to engage community support and accelerate housing solutions.***

Recommendations

The below recommendations can be revised, expanded, and made more actionable through community conversations and policy direction by elected and appointed officials.

Regional Nature of Housing

The demand for homes in Teton Valley from local residents and employees, as well as workers in Teton County, Wyoming, is extensive and will continue. This means that, the extent to which each county in the Teton Region addresses their housing needs will affect housing needs in other communities in the Region. It is important to maintain a regional dialogue about the problem, recognize the local and regional implications of housing polices, and work together on solutions and policies that carry benefits and impacts across jurisdictions.

Implement the Affordable Housing Strategic Plan and Supply Plan

The community is on the right track with these recently adopted plans. Additional considerations that will support implementation include:

- Assess and update housing goals by tenure in light of the extensive housing (both rental and ownership product) needed, available and planned land and funding resources, and community priorities. In doing so, recognize that communities rarely make the policy decision to tackle the full need, as scarce resources, other community priorities and constraints are considered.
- Activate the Supply Plan strategies by pursuing the public/private partnerships needed to produce housing. This includes multiple steps:
    - Create more detailed project feasibility assessments to attract skilled builders/developers for projects.
    - Cultivate local expertise in constructing deed restricted housing in the Valley. This may include, for example, a Habitat for Humanity Affiliate, a local builder, a community land trust, or the Housing Authority.
    - Plan a consistent pipeline of projects. This shows dedication to projects, helping to attract skilled builders/developers, and helps guide resource allocation.
- Create deed restriction stewardship and applicant selection processes before units come online. Many mountain towns have a laundry list of lessons learned in the stewardship and management of deed restrictions, which can help the Housing Authority start on the right path.

- Implement the local funding source recommendations that are currently being refined as part of the *Affordable Housing Strategic Plan*. The most successful housing programs have a layer of funding strategies, including revenue from housing rents and sales, transaction fees, local government sources, grants, loans, philanthropy, among others. Specific considerations include:
    - State and federal resources. Depot Square illustrates the effectiveness of these resources.
    - There is a promising bill in legislation to create State Housing Fund of $50 million, providing access to additional federal funds and tax credits of about $120 million.
    - American Rescue Plan (ARPA) and Infrastructure and Jobs Act funding can be leveraged to help produce needed housing. ARPA funds can be used to construct new low to moderate income housing and/or build infrastructure to support developers who commit to a portion of their development being deed restricted.
- Track progress and monitor the housing supply – good record keeping can ensure that the housing program remains on track. Monitor and educate the community of progress – community housing units produced and program successes. Also track building permit activity, changes in short term rental use, and loss of units through redevelopment and sales.
- Actively educate local residents on available housing programs and options. Ensure marketing reaches all segments of the population that can benefit to ensure broad knowledge of and, therefore access. This includes seniors, the Hispanic/Latino community, local employees, etc.

Share Successes

Another hallmark of successful housing initiatives for local residents is robust community outreach, engagement, and story-telling. Invest in educating the community about the value of having the workforce living locally, housing terms, and projects in the pipeline. Track and demonstrate community-wide successes. A good program can be the cornerstone to get units built, community buy-in, and political will. Bringing a diversity of voices into the conversation is vital. A good website is an important starting point, with a dashboard that highlights successes.

Continue to Improve the Regulatory Environment

Update zoning to improve the ability to build a variety of housing within the cities and make the regulatory environment more favorable.

- The Valley is in a good position to utilize low base zoning to craft an effective density bonus program to facilitate the private sector to produce deed restricted product (e.g., similar to the 2-for-1 program in the town of Jackson). The valley's cities could also consider a policy that delivers deed-restricted affordable housing in exchange for rezone or annexation. The lack of regulatory options, such as inclusionary zoning and linkage, in Idaho, makes it even more important to have incentives that engage the private sector.
- More multi-family rentals at all price points would be helpful, as well as more attached for sale housing. Ensure zoning allows and facilitates the type of development wanted.
- Review Accessory Dwelling Unit (ADU) regulations and consider incentives tied to affordability requirements.
- Disallow short term rentals in new inventory to protect the limited housing supply for local occupancy. State statutes (HB 511 and HB 216) limit the ability to restrict existing short-term

rentals, but voluntary covenants on new product are a likely option. Explore the ability to further regulate short term rentals based on community health, safety, and welfare standards.

- When planning homes for residents, consider larger family needs and options for intergenerational living. Larger families, and particularly the Hispanic/Latino community, noted problems locating suitable housing based both on a lack of larger units for families and limitations on the number of people per home. Co-op housing might be explored for intergenerational living options.
- Review parking requirements, setbacks, and minimum lot sizes to ensure efficient use of land.

Support the Momentum of Employers

Create more structure for employers to learn from each other and work collaboratively on new development and master leasing programs. This could take the form of a summit or standing meeting focused on opportunities for employers to work together to address their employee housing needs. There may also be a role for a public or private entity to help with property management so that employers do not also have to be landlords.

Further Study Senior Needs

The population is aging, the workforce is aging, and many seniors desire to age in place. Lower maintenance, smaller patio homes or attached product are often desired as residents age. The need for senior care services and life care or assisted care options will also increase. There are currently no assisted living centers or skilled nursing facilities in the Teton Valley. This study is focused more broadly on community needs as a whole; the specific needs of seniors deserve more targeted research.

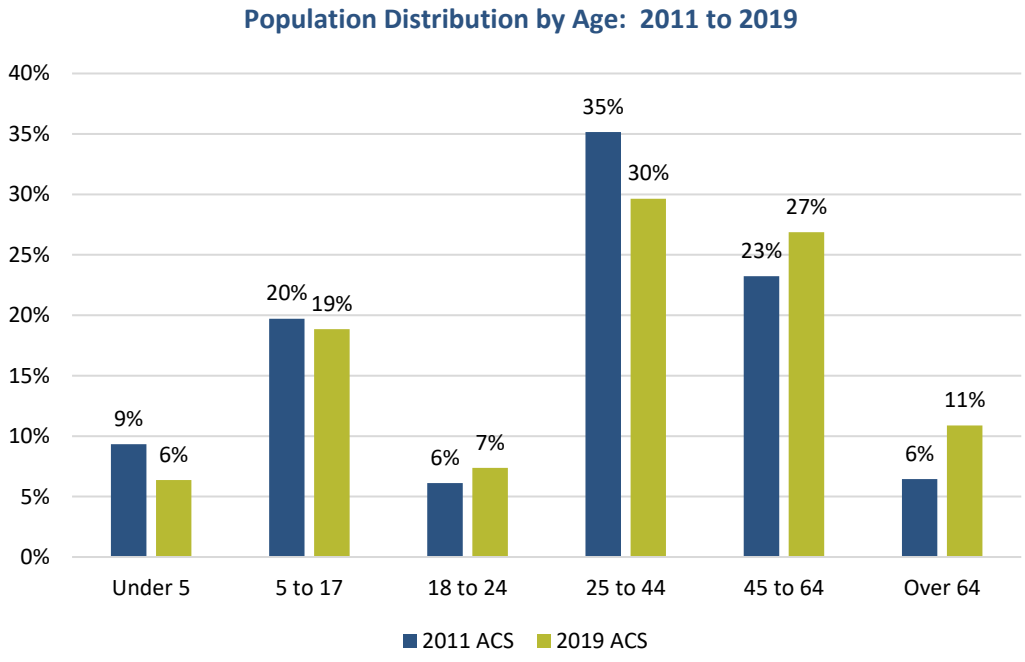
Preserve Homes Upon Resale

Consider a voluntary deed restriction policy. Much of the Teton Valley workforce owns homes that were attainable before the dramatic rise of home prices. Consider a voluntary deed restriction program for homeowners who desire to keep their units available to the workforce and local residents after sale.

Chapter 2 – Community Demographics

This chapter describes a few key characteristics of the people and households in Teton County, Idaho, including growth over time, age, ethnicity, the mix of owner and renter households, type of housing occupied, and household income. This information provides a picture of community change over time and inform the size, type, and tenure of housing needed by residents.

Population and Households



The population of Teton County, Idaho, increased by just under 1,500 residents from 2010 to 2020 and more than 700 households. This amounts to a population increase of 1.4% per year on average, which is slightly lower than that of Idaho overall (1.6%).

	2010	2020	% growth (2010 to 2020)
Population	10,170	11,630	14%

Sources: 2010 Census, 2020 Census

Age

The county's median age has increased from about 34 to 37 years since 2011. The share of the population age 45 and up has increased to about 38% of residents. The workforce is getting older – shifting from the early career, 25-44 demographic, to the late career, 45-64 demographic. The comparative decline in the percentage of persons under 5 years of age and the younger workforce (25 to 44) indicates the county is losing, or at least not replacing, younger families and workers as they age.

Sources: 2011 and 2019 5-year ACS

Ethnicity

The racial and ethnic composition of the county has changed little in the last decade based on census information. The number of people who identify as Hispanic or Latino increased slightly from 2010 to 2020 and now amount to about 2,000 residents, comprising just over 17% of the population.

As discussed in other sections of this report, Hispanic/Latino households have generally had a more difficult time locating suitable housing in the county than other households. On average, these households tend to be lower income and have larger households, contributing to their housing challenges.[38]

	2010	2020
Hispanic or Latino	16.9%	17.4%

Sources: 2010 Census, 2020 Census

Tenure (own or rent)

Owner-occupancy of homes increased from 71% in 2010 to 78% in 2019.

About 72% of households with employees that live and work in Teton County own their homes. A significantly higher proportion of the local workforce has been able to purchase homes than households that live and work in Teton County, Wyoming (47% own). Homeownership helps build stability, security, and satisfaction among residents making their living in the region.[39]

Percent of Resident-Occupied Households by Tenure: 2011 - 2019

	Ownership		Rental	
	2010	2019	2010	2019
Teton County, ID	71%	78%	29%	22%

Source: 2010 Census, 2019 5-Year ACS

Unit Type

Overall, 73% of all households and 40% of all renters live in single-family homes or cabins. A much lower 18% live in apartments, condos, or townhomes, which is reflective of the fact that the inventory of homes in the county are largely single family homes.[40]

About 5% of renters reside in accessory dwelling units (45 households), indicating the extent to which this type of home contributes to resident housing.

About 3% of respondents indicated they are currently not permanently housed, but rather couch surfing, camping, or living in a vehicle (equivalent to 120 households). The majority of these households (93%) are lower income, earning below 80% AMI.

[38] See Regional Overview – Housing Problems for more information
[39] See Regional Overview – Housing Problems for more information

TOTAL	100%	100%	100%

Source: 2021 employee/household survey

*Employee or affordable housing, basements, rooms, and with family common among "other" respondents

Household Size

The distribution of households by number of people per household by tenure helps to illustrate the size of homes needed by residents. The average household size in Teton County, Idaho, has increased from about 2.6-persons in 2011 to about 3-persons currently.

Average Household Size: 2011 to 2019

	2011 ACS	2019 ACS	2021 Employee/ Household Survey
Total households	2.6	3.1	2.9
Own	2.6	3.1	2.8
Rent	2.5	3.1	3.0

Sources: 2011 and 2019 5-year ACS

Responses to the 2021 employee/household survey show a significantly higher percentage of households residing with roommates, other family members, or with family and roommates in 2021 (16%) than in the 2014 survey (4%) when the same question was asked, as well as a lower percentage of households living alone (14% vs. 21%, respectively).[41]

This is not surprising given the rising cost of homes for Teton County residents, short supply, and loss of rentals through home sales, conversion to short term rentals, or other factors.[42] Many households have been forced to double-up or move in with family as a result of these conditions.

There are multiple families sharing space. There are 6 people in the 2 bedroom unit below me.

[41] 2014 housing survey for the Western Greater Yellowstone Area Housing Needs Assessment, Rees Consulting, Inc., et al.

[42] See both Chapter 5 – Housing Market and Regional Overview for more information

When considering housing for local residents moving forward, household sizes prior to COVID are a better reflection of needs than current household sizes, which reflect emergency housing measures for many. The below chart reports the pre-COVID household size distribution, showing that:

- Renters are primarily 1-person (37%) and 2-person households (29%).
- About one-third of owner households are 2-persons, with 29% being four-or-more. Families with children (39% of households) and Hispanic/Latino households (average size of 4.2-persons) contribute to the predominance of larger households.

Household Distribution by Size and Tenure: 2019

Source: 2019 5-year ACS

Household Income

The median income reported by the U.S. Department of Housing and Urban Development (HUD) for a 4-person household has increased from $64,000 in federal fiscal year 2015 to $79,500 in fiscal year 2021, an increase of just under 4% per year on average.

Median Family Income for Teton County, ID, 2021

Persons per Household	50% AMI	80% AMI	100% AMI	120% AMI
1	$26,750	$42,800	$53,500	$64,200
2	$30,600	$48,900	$61,200	$73,440
3	$34,400	$55,000	$68,800	$82,560
4	$38,200	$61,100	$76,400	$91,680
5	$41,300	$66,000	$82,600	$99,120
6	$44,350	$70,900	$88,700	$106,440

Source: HUD

An understanding of how much households earn across the income spectrum is important in informing the availability and need for housing that Teton County residents and employees can afford.

The table below equates the median income of households in Teton County to the equivalent AMI level for a 3-person household, which is the average size of households in the county. There are clear distinctions between owners and renters in terms of income.

- Over half of renters (51%) earn below 80% AMI.
- About 20% of renters have incomes above 200% AMI. Based on the 2021 employee/household survey, the majority of these renters (68%) work in Teton County, Wyoming, which pays higher average wages than in Teton County, Idaho.[43]
- The majority of owners earn between 100% and 200% AMI (51%). Only 13% earn over 200% AMI, or about $250,000 for a three-person household.

Teton County, Idaho Household Distribution by AMI: 2021

	3-person AMI	Own	Rent	Total
<50%	$34,400	14%	29%	18%
50 - 80%	$55,000	13%	22%	16%

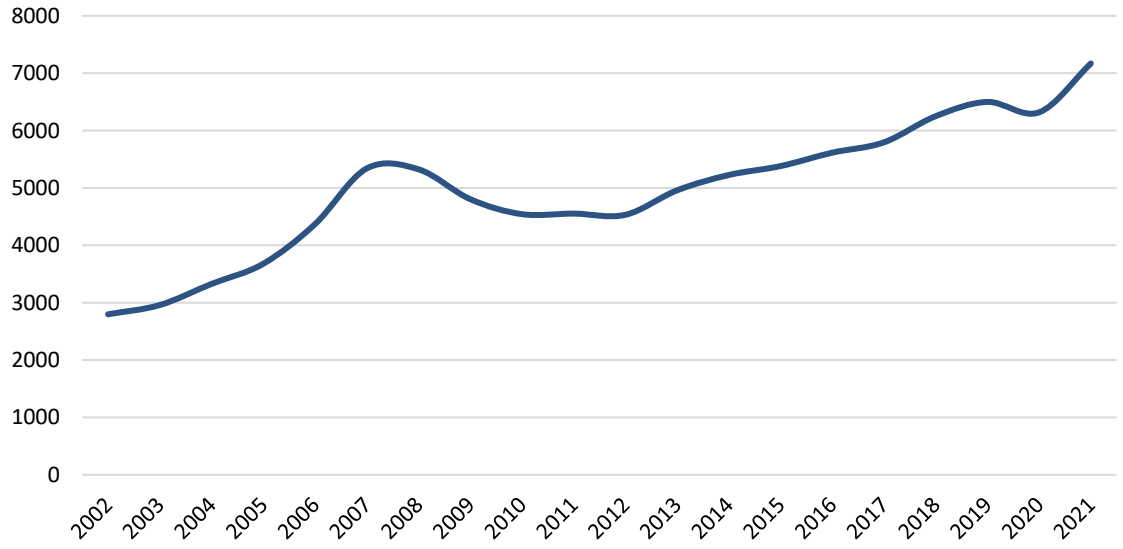
Chapter 3 – Jobs, Seasonality and Commuting

Jobs Estimates and Projections

There are about 7,190 jobs in Teton County, Idaho.



Job Estimates and Projections, Teton County, ID: 2010 to 2027[44]

					Annual Growth Rate	
	2010	2015	2021 (est.)	2027	2012-2019	2021-2027
Teton County, ID	4,543	5,380	7,190	9,474	5.3%	4.8%

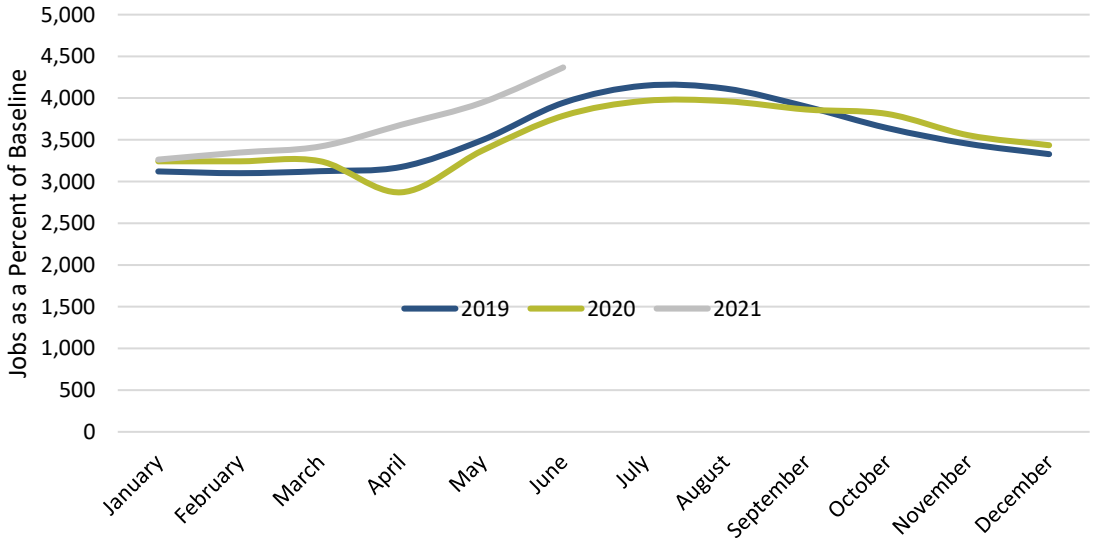
Source: QCEW, BEA, Consultant Team

Jobs in Teton County, ID have grown at a strong rate of 5.3% year on average since 2012 (the low point of the prior recession). The Covid pandemic introduced a short-term drop in the number of jobs in 2020, but jobs more than recovered by October of that year. Jobs through the first six months of 2021 increased 10% compared to the same period in 2019. Looking forward, job growth is expected to continue to be strong.[45]

Job Estimates, Teton County, ID: 2002 to 2021

Source: QCEW, BEA, Consultant Team

[44] Estimates are calculated by adjusting the QCEW count of wage jobs by the BEA percentage of jobs held by proprietors to ensure all jobs (wage and proprietor) are included in the estimate.



[45] The State of Idaho projects an annual growth rate of 1.5% for eastern Idaho, which has been historically much lower than for Teton County specifically. An estimated 4.8% growth rate was instead used, which is in line with the actual growth rate between 2015 and 2019.

Seasonality of Jobs

Jobs in Teton County typically increase between 25% to 28% during the peak summer tourist season; a pattern that was briefly interrupted during the 2020 COVID pandemic, but quickly recovered to typical patterns. In 2019, about 870 summer seasonal jobs were added to base level employment.

Industries adding the most summer jobs include accommodation and food service; administrative and waste services; arts, entertainment, and recreation; and construction.

Baseline and Peak Employment, 2019

	Year-round Baseline Jobs	Peak Peak Jobs (July)	Peak % over base
Teton County, ID	3,100	3,970	28%

Source: QCEW

About 29% of year round residents in Teton County, Idaho, hold at least one seasonal job during the year. This means that employers do not need to recruit from outside the area to fill many seasonal jobs. Employers responding to the employer survey estimate that about 43% of seasonal employees return to work for them from prior seasons, on average.

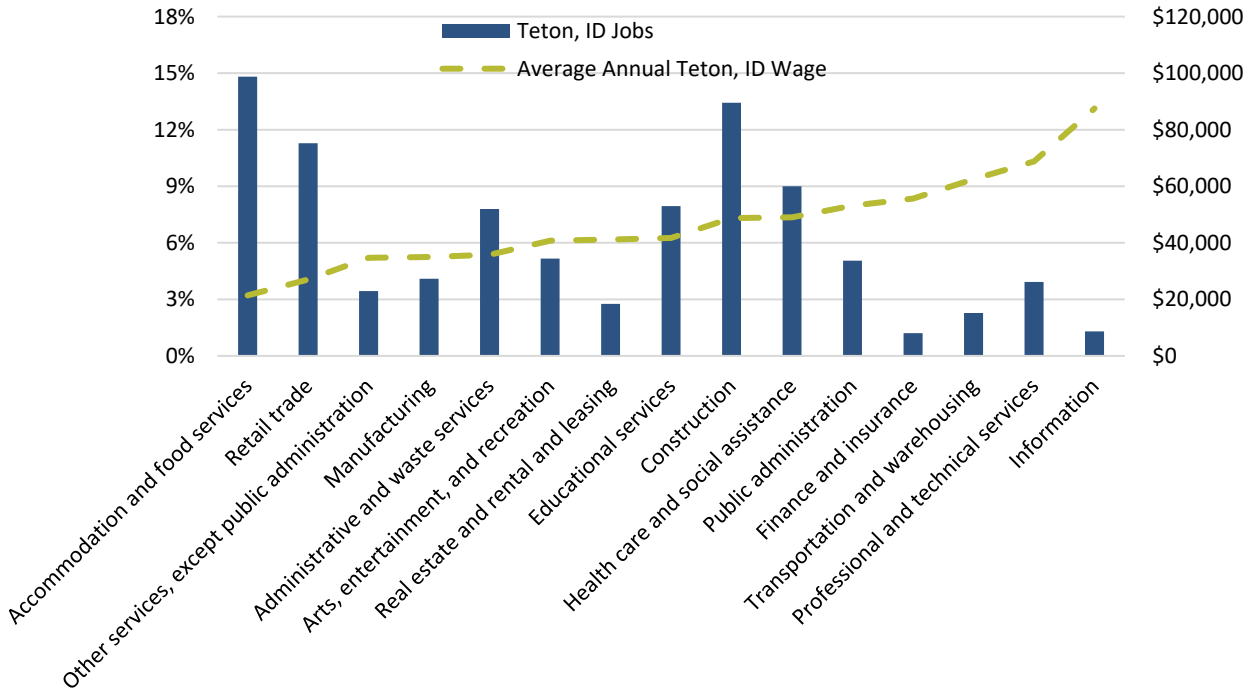
Wages and Jobs by Sector

The average wage paid in Teton County, Idaho, in 2020 was about $40,500, which is about 32% lower than the average wage paid in Teton County, Wyoming ($60,000). Wages have increased an average of 4.9% per year since 2015, including an 8% increase in 2020. Preliminary 2021 wage data indicates growth will continue.



Source: QCEW

Teton County has three industries that each make up over 10% of jobs, two of which are the lowest paying sectors.

- Accommodations and food service accounted for almost 15% of jobs in 2019, and is the lowest paying sector with wages averaging about $21,400 per year.
- Construction accounts for over 13% of jobs and pays more than the average wage ($48,700). Construction is the fastest growing industry in the region.
- Retail trade pays just under $27,000 per year and is the third largest industry (11% of jobs).

Jobs per Employee and Employees per Household

The number of jobs per employee and the number of employees per employed household are used to translate job growth into the number of housing units needed by workers to fill new jobs.

- Workers in the Teton Region hold about 1.3 jobs on average during the year and have about 1.9 employees per household.
- The number of jobs held fluctuates with the seasons. Employees hold an average of 1.4 jobs over the summer and 1.3 jobs over the winter. Many employees, particularly in lower paid service positions, need to hold more than one job to afford to live in the area. This was noted both by employers, as well as respondents to the employee/household survey.

Average Jobs per Employee by Season: Teton Region

Very few employees commute into Teton County, Idaho, from other counties in the Teton Region. The majority come from other counties in Idaho.

Conversely, about 38% of workers living in the county commute to Teton County, Wyoming, for work (about 3,200 employees). Teton County, Idaho, has long been a bedroom community for Teton

> *"I can see this impacting us more and more. We have talked about creating a vanpool from Rexburg (and vicinity) and may have to do that soon."*
>
> *-2021 Employee/Household Survey Comment*

[46] Commute percentage range is estimated from multiple sources. Employers on the 2021 employer survey reported that 21% of employees commute from homes outside of Teton County, Idaho. Adjusting the US Census Longitudinal Employer-Household Dynamics (LEHD) for proprietors a similar 23% of county jobs are filled by commuters.

County, Wyoming, providing less expensive ownership and rental options for Teton County, Wyoming, workers than available nearer their job. With escalating housing costs in the Teton Valley of Idaho, however, these opportunities are diminishing, as well as pushing Teton County, Idaho, workers further out to lower cost housing markets.[47]

	Where Workers in Teton County, ID, Live	Where Residents in Teton County, ID, Work

The primary commute mode used by Teton County residents is to drive alone. Both lower income (below 80% AMI) and Latinx respondents utilize shared modes of travel more frequently than others, including carpool and bus. Overall only 6% of respondents utilized bus service. A few noted they would use the bus more if better options (e.g., times, frequency) existed.

Employer Commute Assistance

About 33% of employers in Teton County, Idaho, that responded to the survey (16 of 49 respondents) indicated that they provide their workers with some work commute options or assistance. Employers providing assistance cover the full range of businesses and services in the county. Of employers providing assistance, telecommuting was the primary option (56%) as shown in the table below. As more employees search for homes outside of the Teton Valley, some employers are considering expanding services, as noted above.

[47] See Chapter 5 - Housing Market for more information

Type of work commute options or assistance:	% of Employers
Telework / work from home flexibility	56%
On-site vehicle for employee errands	44%
Travel stipend (i.e., travel time compensation, etc.)	31%

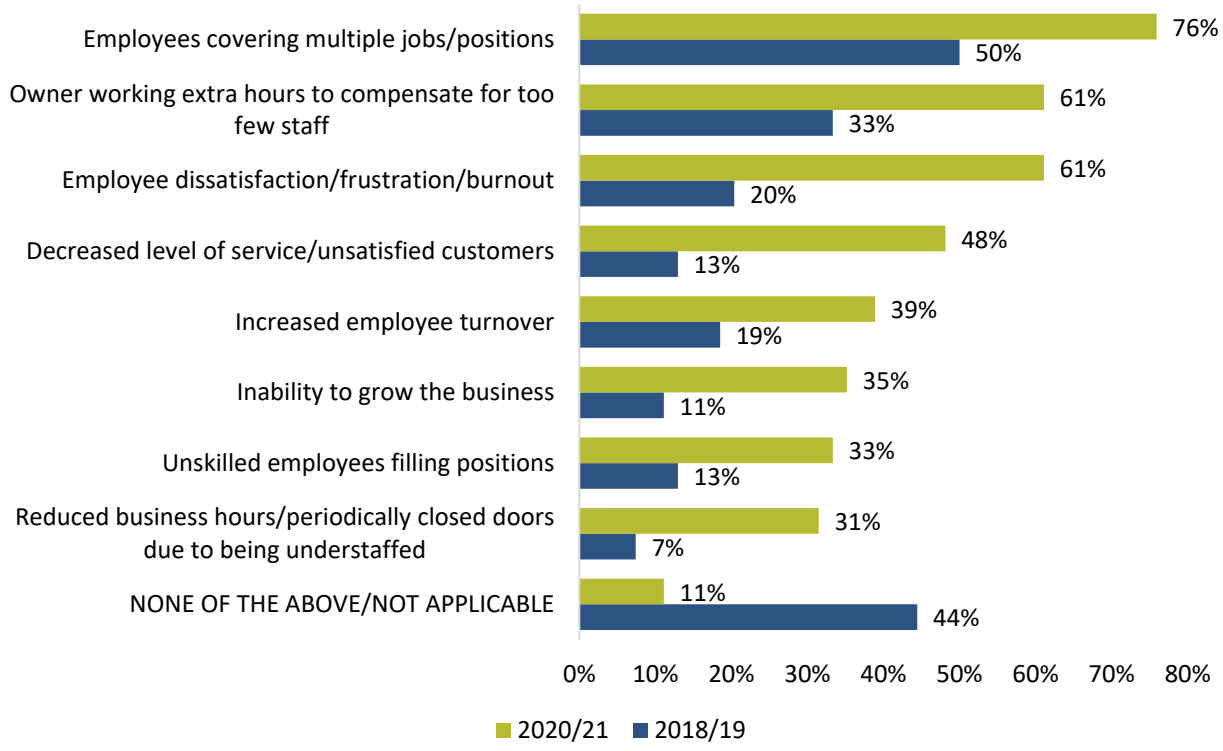
*Totals exceed 100% because employers could select multiple options.

Unfilled Jobs and Turnover

Teton County, Idaho, employers responding to the survey indicated that 19% of jobs were unfilled. In comparison, a lower 15% of jobs were reported unfilled by employers in Teton County, Wyoming. Prior to COVID, unfilled job rates were more typically 5% to 7% in most mountain resort communities.

Unfilled Jobs	
# jobs unfilled	1,400
% jobs unfilled	19%



Source: 2021 Employer survey, interviews

With unfilled positions, businesses struggle to provide quality services and operate profitably. This is particularly challenging post-COVID as business has ramped up combined with a tight regional job market. As shown below, the vast majority of businesses responding to the survey experienced problems related to being understaffed this past year (89%). While this problem is not new - about 56% of employers reported that they had understaffing problems prior to COVID – perhaps the most striking issue is how rapidly these problems have increased since 2018/2019. As shown in the chart below:

- Over 60% of businesses experienced problems related to employee burnout, including employees covering multiple jobs/positions, the owner working extra hours, and resulting frustrated and dissatisfied employees. A lower 20% to 50% of businesses were affected pre-COVID.
- Another 35% to 48% experienced issues related to the ability to provide quality services, including increased employee turnover, reduced level of service/customer satisfaction, and an inability to grow the business, up from 11% to 19% pre-COVID.
- About one-third had to reduce their business hours or close their doors due to being understaffed, which affected a lower 7% to 13% of businesses in 2018/19.

> *"I think this issue has only just begun. Finding staff that would stay year-round has always been a challenge, but recently, the housing situation seems to be a big issue."*
>
> *-2021 Employer survey comment*

Has your business experienced any of the following problems related to being understaffed?

Source: 2021 Employer survey

The large number of unfilled jobs is paired with additional challenges.

Low unemployment rate. Unemployment rates in the late-summer and fall of 2021 were lower than they have been in the past 20 years. Finding employees to fill jobs was a challenge prior to COVID when the unemployment rate was just below 3%.

Unemployment Rate, September, Teton County, ID

	Unemployment Rate
September 2021	1.5%
September 2001-2020 Average	2.8%

Source: LAUS

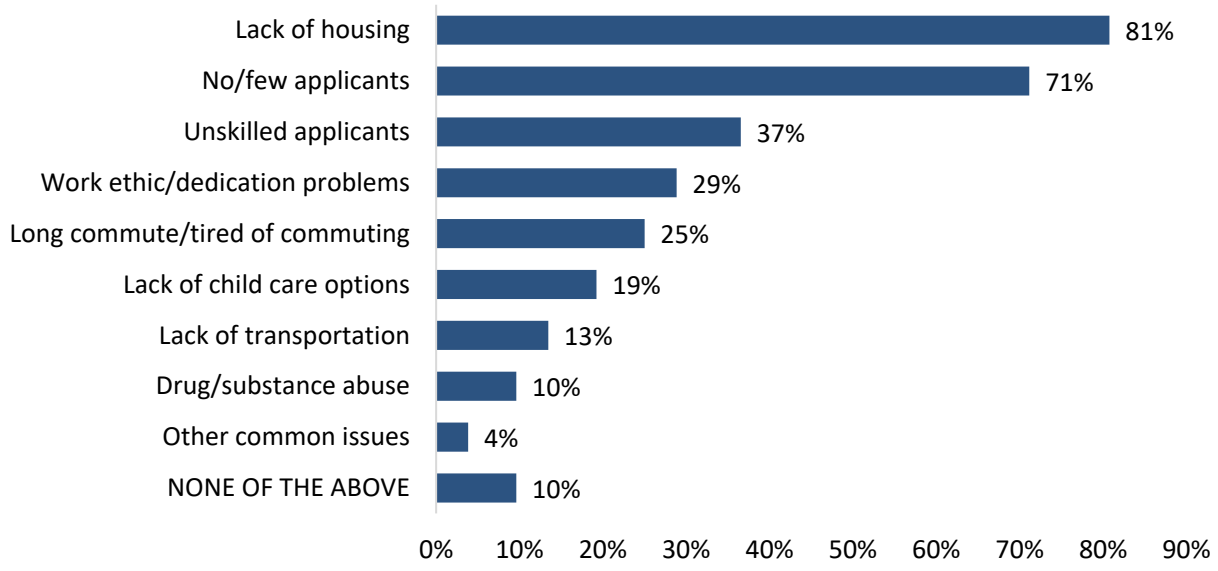
Decline in J-1 Visa[48] workers. As a result of the COVID pandemic and shut-downs in 2020, J-1 Visa workers were much less available. About 7% of employers in Teton County, Wyoming, and Teton County, Idaho, responding to the survey reported hiring J-1 employees in 2021, primarily in bar/restaurant, lodging/accommodations, recreation, and retail industries; however, fewer were hired than before the pandemic.

[48] A J-1 Visa is a non-immigrant visa for a limited duration issued by the United States to research scholars, professors and exchange visitors participating in programs that promote cultural exchange, especially to obtain medical or business training within the U.S. All applicants must meet eligibility criteria.

- In summer 2021, employers hired J-1s to fill about 2% of jobs in the region. The number hired was about 58% lower than in 2018/19.
- Employers anticipate hiring J-1s near pre-pandemic levels in 2022, helping to fill about 5% of jobs in the region.

Since the number of jobs has recovered from 2020, the lack of these workers is strongly felt. J-1 employees typically fill lower skill/lower paid positions and work multiple jobs that businesses must now recruit for locally.

Lack of and high cost of housing. Not only can new workers not find available housing, but homes that are available are too expensive for local wages. This affects the full range of vacant positions from entry-level through experienced management positions, with lower paid positions most impacted.



When employers were asked about issues they experienced when finding or keeping qualified employees:

- The lack of housing was the number one issue (81%), followed by no/few applicants (71%).
- Long commutes have also impacted about 25% of businesses, but this is more prevalent for Teton County, Wyoming, businesses (41%), for which many employees have a difficult commute over the pass.
- Lack of childcare and transportation ranked lower, but are services that can help make an employer competitive in recruitment and retention.

"Housing is the number one factor limiting my ability to bring new high paying year-round jobs to Teton Valley."

-2021 Employer survey comment

Issues experienced in finding or keeping qualified employees:

Source: 2021 Employer survey

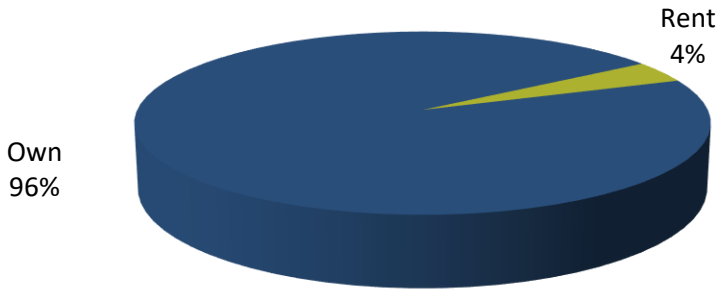
Employee turnover and difficulty recruiting. About 76% of employers in the county responding to the survey had employees leave and 78% had potential hires decline positions due to the inability to locate suitable housing in the area.

- The number of employees that left employment equates to 5% of jobs in the county; meaning 5% of jobs were vacated and had to be refilled. Candidates were found for another 12% of jobs, but declined offers of employment.
- Turnover is costly to the business. Aside from affecting business hours and operations (as discussed above), it costs money to recruit and train new employees. Some studies have estimated that it costs about 20% of an employee's salary to replace that employee[49] – costs that quickly add up with repeated turnover.

"How many people, in your estimation did not accept a job or left your employment in the past 12 months because they lacked or could not find housing they could afford in the area?"

	% of employers experiencing the problem	Average # of employees lost per business	% of total jobs in the county represented
Employee(s) left	76%	2.3	5%
Potential hire did not accept job	78%	5.7	12%

Source: 2021 Employer survey



Retiring Employees

Based on survey responses, about 15% of employees working in Teton County, Idaho, expect to retire within five (5) years. This equates to about 800 employees.

- Pending retirees tend to hold more senior positions and be skilled staff.
- Housing is a primary concern. Nearly all of employees that expect to retire have stable housing because they own their homes. Many purchased 10 or 20 years ago or during the 2007/08 recession. New employees struggle to find homes to rent and the vast majority will not earn enough to purchase.
- Some retiring employees will stay in the community. For those that decide to move, the homes they vacate likely not be affordable for the employees who follow.

[49] See, e.g., The Center for American Progress, "There are Significant Business Costs to Replacing Employees," Nov. 2012, available at: https://www.americanprogress.org/issues/economy/reports/2012/11/16/44464/there-are-significant-business-costs-to-replacing-employees/

Tenure of Employees that Plan to Retire Within 5 Years:

Source: 2021 Employee/Household Survey

Pending retirees and the aging population present potential other challenges. For retired residents that prefer to age in place, lower maintenance, smaller patio homes or attached product are often desired as residents age. The need for senior care services and life care or assisted care options will also increase. There are currently no assisted living centers or skilled nursing facilities for this population in the Teton Valley.

Chapter 4 – Housing Inventory

Housing Units – Number and Occupancy

Teton County, ID has 5,333 housing units. Housing units have been added at a rate of about 2.1% per year since 2015, which is more than twice the rate during the previous five years (about 0.6% on average).

Housing Unit Estimates, Teton County, ID: 2010 to 2021

	2010	2015	2021	2015-2021 Annual Growth Rate
Housing Units	4,561	4,704	5,333	2.1%

Source: Teton County Assessor

About 70% of Teton County housing units are occupied by resident households. The other 30% are second homes, short-term rentals, or vacant in the transition of being sold or rented. The 70% occupancy rate indicates a slight increase in occupancy since 2010. Considering the timing of the 2010 Census in the depth of the Great Recession and the 2020 Census at the beginning of the pandemic, this represents a relatively stable occupancy.

Occupancy and Tenure, Teton County, WY: 2000-2020

	2000	2010	2020 (adj.)
Occupancy Rate	79%	67%	70%

Source: 2000, 2010, 2020 Census, Teton County Assessor, Consultant Team

Types of Units

There is little diversity in the housing stock in Teton County. Housing units are predominately single-family homes (76%). About 12% of units are multi-family and 10% are mobile homes, which are typically more affordable options for local employees.

Stable rentals for local employees and a diversity of housing options for owners at different life stages are in short supply in the county. For example, apartments, unlike owner-rented single-family homes, townhomes, and condos, are not subject to being sold out from under the renter or the owner moving in and, in communities where apartments are defined as having to be rented for a minimum of 30-days or more, cannot legally be converted to short-term rental use. Increasing the diversity of housing types would support greater affordability and mobility in the market for households at all stages of life.

Source: 2019 5-year ACS

Housing unit occupancy by income level indicates the extent to which different housing types may provide "naturally occurring" affordable housing. The below table shows the type of housing units occupied by income level (AMI). The sample includes respondents that are residing in market rate housing, meaning that the table excludes respondents that are living in employer-assisted or income, employment, rent or price-limited homes. As shown:

- Households with incomes greater than 80% AMI are more likely than other households to live in single family homes and less likely to live in multi-family units.
- Households earning below 80% AMI are more likely to reside in multi-family units and mobile homes than other households.
- Accessory dwelling units predominately provide housing for households earning between 50% to 120% AMI.
- A significant percentage of households earning under 80% AMI are also currently not permanently housed, but rather couch surfing, camping, or living in a vehicle (about 110 households).

Type of Unit Occupied by AMI: Teton County, ID, 2021
Respondents Residing in Market Rate Homes

	Less than 50%	50 to 80%	80 to 120%	120 to 200%	Over 200%

Age of Units

Development in Teton County accelerated in the 2000's, when about 39% of the county's housing stock was constructed. Development slowed significantly during the 2007/08 recession, but beginning in 2015, construction has again picked up. About 55% of the housing in Teton County, ID has been built in the past 20 years.

This is different from development patterns in Teton County, Wyoming, in which the largest percentage of housing stock was constructed in the 1990's (25%), and construction slowed down in the 2000's (20% of units built).

Age of Units, Teton County, ID: 2021

Source: Teton County, ID, Consultant Team

Short Term Rentals

Short-term rental is defined as a rental period of less than 30-days. In Teton County, 18% of renters (about 180 households) responded that they were forced to move in the past three years due to direct conversion of their unit into a short-term rental.[50] The rate of displacement was lower in Teton County, Wyoming, (10% of renters), where more regulatory measures on short term rentals are (and can legally be) in place.

Short term rental permits are required in the cities of Victor and Driggs; the unincorporated county does not require permits. A snapshot Airbnb search returned 250 short term rentals in the entire county, plus those in Alta, Wyoming. This equates to just under 5% of total housing units in the county. Of these:

- There are 74 permitted short-term rentals in Driggs, with an estimated 10 to 15 more that may be unpermitted.
- Victor has 25 permitted short-term rentals.
- Tracking short term rentals in the county and supporting the use of ADUs as long term rentals are also recommended.

Many mountain communities throughout the west have moved toward increased regulation and requirements on short term rentals, if not limiting their use or banning them altogether. In Idaho, regulation is limited by House Bill 216[51], which passed in 2017. The bill bars local governments from prohibiting short-term rentals, but it does allow for regulation of short term rentals in the interest of the health, safety, and welfare of residents. The full extent of regulations that state law permits is not fully known, but some communities have adopted regulations ranging from occupancy restrictions (McCall) to a cap on the number of short-term rentals in residential zones (Sandpoint).

> *"We are facing potentially losing over half of our employees due to losing their rental housing. Each one of them is frantically seeking long term rentals. The rentals they are currently in are being turned into VRBO's."*
>
> *-2021 Employer Survey Comment*

Employer Assisted Housing

In recent years, particularly since the COVID pandemic, the ability of employees to find housing they can afford has become more challenging and employers expressed concern that people cannot find places to live. Local wages have not kept up. Employers report that turnover has been high and there is a constant need to search for and train new staff.

To improve the ability to recruit and retain employees, employers throughout the Teton Region have been increasing efforts to help employees find and afford housing. About 40% of employers in Teton

[50] See Regional Overview – Housing Problems for more information

[51] See HB 216 here https://legislature.idaho.gov/sessioninfo/2017/legislation/h0216/ for more information. Another bill, HB 511, also does not allow homeowner's associations to prohibit or restrict short term rentals unless the owner of the home being restricted agrees to it in writing; however, HOA's may assist in helping to enforce local regulations that may exist (e.g., permits, etc.).

County (including Alta) that responded to a summer 2021 survey indicated that they provide assistance with housing (21 of 53 respondents to the question). Employers assisting with housing cover the industry spectrum, including retail, recreation, construction, lodging, and non-profit.

> *Without employee housing we wouldn't be able to operate our business.*
>
> *-2021 Employer Survey Comment*

Of employers providing help with housing:

- The most frequent type of assistance is employer-owned and employer-leased units rented to or provided as compensation to employees, amounting to about 276 beds;
- Another 15 beds are provided as temporary or relocation housing;
- A few companies offer an employee housing stipend ranging from about $400 to $1,200 per month.

When asked how providing assistance has impacted their business, respondents acknowledged the financial impact ("expensive," "reduced profitability," "made our rates higher"), but that it helps to retain qualified, trained, and trusted staff and a "happy crew."

For employers that do not provide housing assistance, the primary reason was that they cannot afford to provide assistance (53%). Only 3% indicated that assistance is not needed for their employees. Among other reasons provided include corporate limitations and "researching building."

Employer Reasons for Not Providing Housing Assistance to their Employees	
Cannot afford to provide housing or housing assistance	53%
I prefer to pay higher wages instead	38%
Do not want to be in the housing business	31%
Do not have the expertise or knowledge to help with housing	31%
Housing is the employee's responsibility	28%
Housing assistance is not needed for our employees	3%
Other	7%

Source: 2021 Employer Survey, consultant team

Sixty-six percent (67%) of employers indicated that they would be interested in providing assistance in the future. When asked what would encourage or help them provide housing, about one-half indicated that partnerships and matching grants would help. Another 38% would find benefit in joint participation with other employers.

> *We are actively considering how to mitigate this risk and are interested in learning more about our options moving forward.*
>
> *-2021 Employer Survey Comment*

With the wide range of experience and activity in the county by employers in trying to help address employee housing issues, opportunities to partner and learn from each other are ripe to continue to boost effectiveness.

What would encourage or help you to provide housing or housing assistance?	
Partnering with government, private, or non-profit entities	50%
Matching grants	48%
Opportunities to participate with other employers	38%
Low cost loans	28%
Technical assistance	14%

Redevelopment

Over the past five years, nine mobile homes in Victor were either relocated or demolished due to redevelopment of the property they were on. Tracking demolition and redevelopment and comparative price points of replacement units would help understand the net growth or loss of housing over time.

Pending Development

While development since 2010 was down from the previous decade, recent activity indicates the beginning of another strong building cycle. The Teton County Assessor shows about 71 units added per year since 2010. However, the annual rate of production is likely to see a major jump this coming year, as there are over 600 units with pending, approved, or issued building permits.

Units with Pending, Approved, and Issued Building Permits, Teton County, ID

	Teton County, ID
Single Family	391
Multifamily	95
Accessory Dwelling Unit	67
Manufactured/Mobile Home	55
Total	608

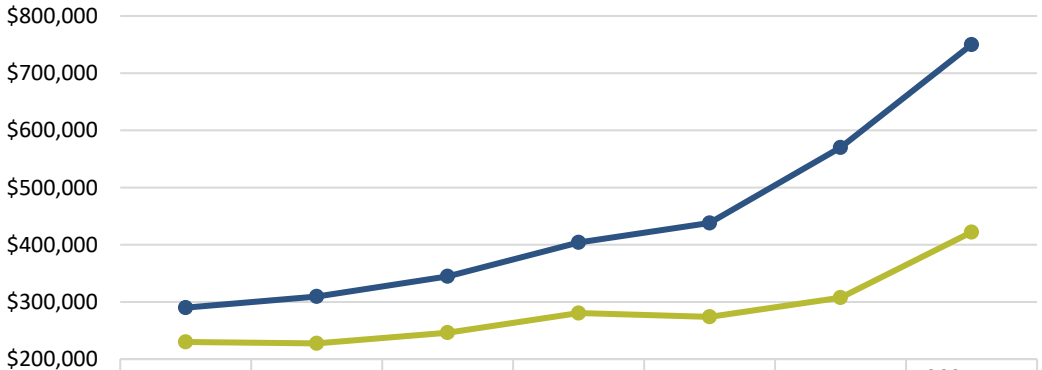
*See Chapter 6 – Housing Program Accomplishments and Challenges for more information on Depot Square

Chapter 5 – Housing Market

This chapter evaluates how key aspects of the housing market in Teton County, Idaho, have changed in recent years. It provides an overview of:

- Home sale and rental prices,
- Recent and current availability of homes,
- The affordability of homes to local residents and employees, and
- Real estate agent and property manager observations about housing market changes in the past 20 months during the COVID-19 pandemic.



Home Ownership Market

Price Trends (2015 to October 2021)

Real estate prices have escalated over the past few years to levels that are unaffordable to most local residents and employees.

- The median sale price of attached product during the first ten months of 2021 was $422,000 and $750,000 for a single family home.
- Median sale prices have been rising an average of 14% per year since 2015 for single family homes and 6% for attached condominiums and townhomes. From 2020 to 2021, median sale prices jumped 32% and 37%, respectively.

Teton County Idaho Median Sale Prices: 2015 to October 2021

	2015	2016	2017	2018	2019	2020	2021 YTD [1]
Single Family	$290,000	$309,500	$344,750	$404,000	$438,000	$570,000	$750,000
Attached	$230,000	$227,500	$246,250	$280,500	$274,000	$307,500	$422,000

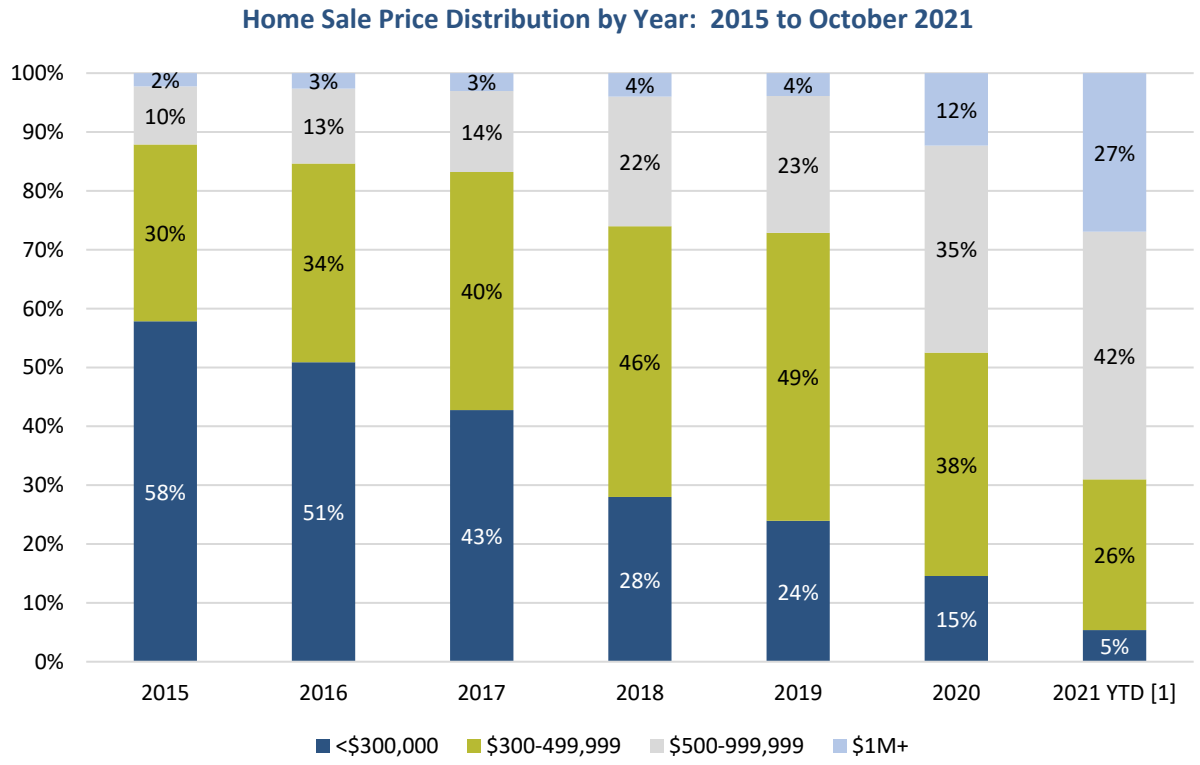
Price Per Square Foot

The annual average sale price per square foot from 2015 through 2020, and sales through October 2021, also shows significant increases.

- From 2015 to 2020, the price per square foot for both single family homes and attached product increased by 12% and 6% per year on average, respectively.
- The average price per square foot of single family homes sold in the first ten months of 2021 increased by 39% over the 2020 average. The increase for attached product was 41%.

Price increases far exceed the change in local average wages (4.9% per year) or median household incomes (3.7% per year) since 2015, meaning that affordability for locals is eroding.



Average Sale Price Per Square Foot: 2015 to October 2021

	Single Family	Attached
2015	$164	$173
2016	$177	$190
2017	$185	$169
2018	$215	$188
2019	$227	$214
2020	$291	$231
2021 YTD [1]	$405	$326
CAGR 2015-2020	12%	6%
% change 2020 to 2021 YTD [1]	39%	41%

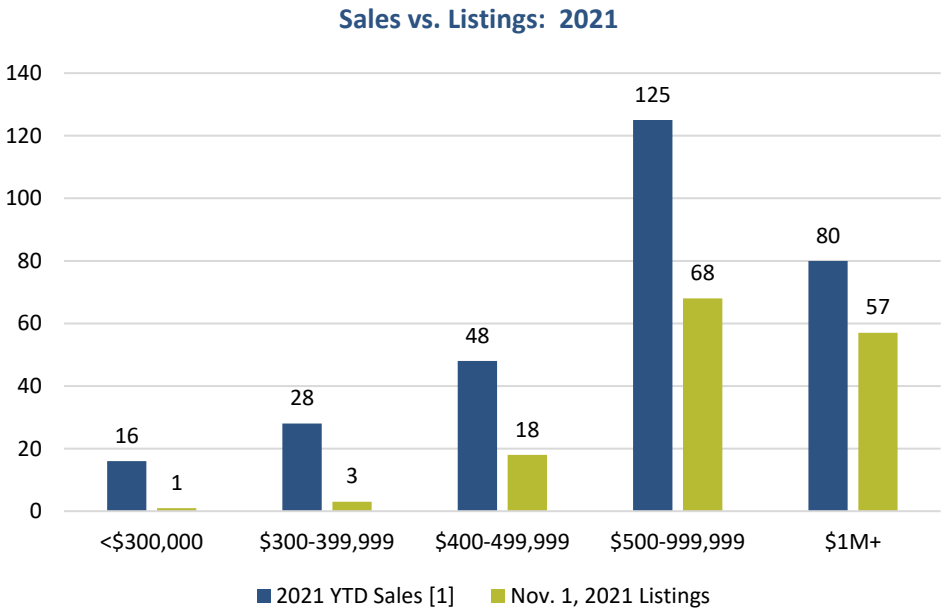
Homes for sale under $300,000 have basically disappeared from the market in recent years, and, over the last two years, homes priced between $300,000 to $500,000 have declined significantly.

- The share of sales under $300,000 fell from 58% in 2015 to 5% in 2021 – a drop of 53 percentage points. Beginning in 2020, 75% of sales under $300,000 were attached product.
- The share of sales between $300,000 and $500,000 fell from 49% in 2019 to 26% in 2021. The option of finding homes for $500,000 or less in the Teton Valley is quickly disappearing.



Note: inclusive of sales with a known price greater than zero

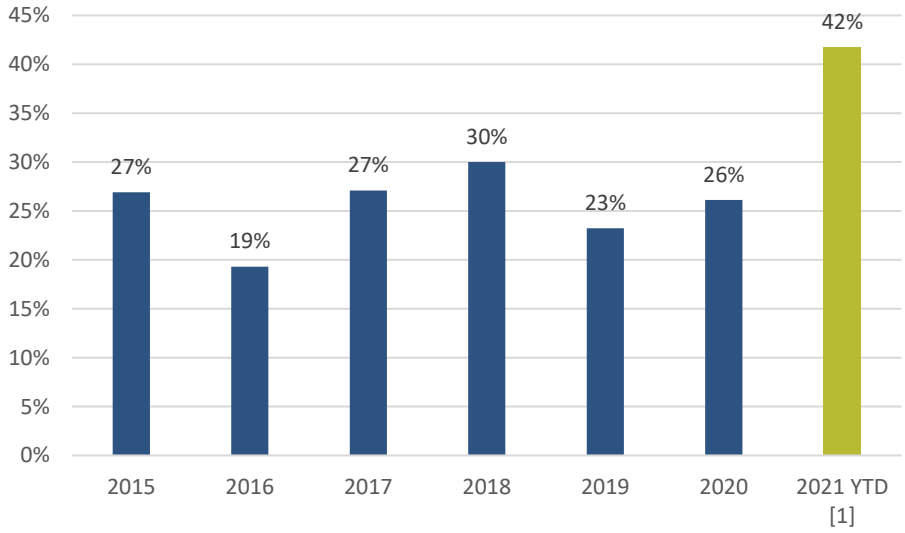
Availability



A general industry standard is that when the number of homes available for sale is below a 6-month supply, it is a seller's market – meaning that there are more buyers than homes available to purchase, resulting in rising prices.

Teton County is in a seller's market, and an extreme one for homes priced under $500,000. The number of homes listed in November 2021 shows an average supply of 4.4-months. For homes priced under $500,000, supply drops to 1.3-months. For homes above $500,000 there is a decent amount of supply, representing 7.9 months of inventory.

[1] last sale on Oct 29, 2021, inclusive of sales with a known price greater than zero
Source: MLS, consultant team

Not only is housing scarce, but the percentage of cash sales increased significantly in 2021, adding to the challenges for local residents to compete for homes. As shown below, cash purchases comprised an average of 25% of sales from 2015 through 2020, rising to 42% for sales through October 2021.

Note: inclusive of sales with a known price greater than zero

Local Workforce Affordability

The scarcity of homes for sale poses a challenge to all buyers, regardless of income. It is a more significant challenge, however, for local residents and employees. The majority of residents who own their home earn between 80% and 200% AMI (60%); only 13% earn above this level. Homes priced from about $600,000 to $780,000 may be of interest to some commuters from Teton County, Wyoming, where wages are higher, but most Teton Valley residents need lower priced homes.

> *There is nothing affordable. We were lucky and we're able to purchase our home from our landlord before the market skyrocketed. Would be impossible to move within the valley now.*
>
> *-2021 Employee/Household Survey Comment*

- Only four homes were listed for sale under $400,000 at the start of November 2021; homes in this price range are now essentially non-existent.
- With only 18 homes for sale in the $400,000's and 85% of listings over $500,000, the option to buy a home is increasingly out of reach for the local workforce.

Affordability of Current Listings Compared to Average Household Income

AMI	Max Affordable Price (3-person household) [1]	Owner Household Distribution	Nov. 1, 2021 Listings: Single Family	Nov. 1, 2021 Listings: Attached
0-50%	$142,900	14%	0%	0%
50.1-80%	$228,500	13%	0%	0%
80.1-100%	$285,900	9%	1%	0%
100.1-120%	$343,000	13%	0%	6%
120.1-150%	$428,800	14%	3%	9%
150.1-200%	$571,700	24%	8%	53%
200.1-300%	$1,029,100	6%	39%	31%
>300%	>$1,029,100	7%	49%	0%
Total	-	100%	115	32

Note: percentages may add to more/less than 100% due to rounding

[1] Max purchase price assumes 30-year mortgage at 4.5% with 5% down and 20% of the payment covering taxes, HOA, PMI and insurance.

Changes over past 20 months (Realtors)

Since March 2020 when COVID-19 was declared a pandemic, the for sale housing market in Teton County has changed dramatically. Interviews with local real estate agents and property managers provided additional insight about recent changes.

- The number of people moving to the area outpaced the historical rate and more buyers are from out of the area. The estimated split of local to out of area buyers is now 50/50.

- Households from outside of the region bought second homes to use as a safe haven to ride out the pandemic. Most intend to rent them short- or long-term when not occupying them.
- To stay in the region, some in the Jackson/Teton County, Wyoming market sold their homes and used the proceeds to buy a home on the Idaho side of the pass, many paying cash.
- Land prices have surged. For example, the price of a lot in the Town of Driggs has roughly tripled.
- Interviewees repeatedly used the term "panic buying" to describe the mindset of current buyers.

Rental Market

Rent Trends and Local Workforce Affordability

In the 2014 housing needs assessment,[52] survey respondents from Teton County reported paying an average of $763 per month for rent. In 2021, this increased 83%, or an average of 9% per year, to $1,402. The average rent that residents report paying is still substantially lower than that reported for advertised rentals in November 2021, which was nearly $2,500. These figures indicate how quickly rents have been increasing in Teton Valley.

> *Rent just keeps skyrocketing. So we have to stay here in a cold dark basement.*
>
> *-2021 Employee/Household Survey Comment*

Local property managers stated that some units have increased up to 60% since the pandemic began, indicating that much of this rent increase has occurred in the past few years. The rate of increase depends upon home type, condition, location, and if the lease is being renewed by an existing tenant or a new tenant is moving in. Rents for existing tenants have tended to increase less than new leases over the past 20 months. This is also illustrated by the lower rent rates reported by respondents to the survey compared to advertised rentals and market rents reported by property manager in the below table. In addition:

- Current renters in the county need an income of about $56,000 on average to afford the overall average rent (about 82% AMI). Advertised rentals, which is what new households coming to the Valley are likely to find, require a household to earn 144% AMI on average, or an income of $99,000 for a 3-person household.
- As rents rise, locals increasingly need to find roommates to afford rent, regardless of household type. This means families bringing in more family members, friends, or unknown roommates to cover rent.

> *We have our adult children with good paying jobs living with us because they cannot find affordable housing in the area.*
>
> *-2021 Employee/Household Survey Comment*

[52] See Western Greater Yellowstone Area Housing Needs Assessment, 2014, by Rees Consulting, et al., Teton ID section, p. 18.

- Property managers interviewed indicated that the rental market has generally been capped at about $2,500 per month for locals. As rents rise above this, more roommates are needed, which many landlords seek to avoid.

Rent Prices by Bedroom Size: 2021

	0/1-bedroom	2-bedroom	3+-bedroom	Overall Avg.
Property manager interviews	$800-$2,200	$1,000-$2,800	$2,500-$3,300	$1,000-3,000
October-November 2021 average listed rent	$1,141[2]	$2,550	$3,311	$2,474
2021 Employee/household survey responses	$1,184	$1,322	$1,626	$1,402
AMI affordability of advertised rent[1]	75%	148%	193%	144%
Income needed to afford advertised rent	$45,640	$102,000	$132,440	$98,960
Number of average wages needed to afford rent	1.1	2.5	3.3	2.4

[1]Note: calculation assumes 2 people in a 0/1 bedroom unit and 3 people in 2- and 3-bedroom units
2 Several 0/1 bedroom unit advertised are actually rooms, some with a shared bath. When rooms are removed, the average cost rises to $1,324, affordable for a household earning 87% AMI
Source: Property manager interviews, online rental listings (Teton Valley News, JH News, Craigslist, Facebook, Zillow, Hotpads, Apartments.com), consultant team

The high and rising rents are driven by the extreme shortage of rentals and strong demand. The pandemic brought a wave of remote workers, which property managers noted are able to pay much higher rates than local wages can support. This is paired with the continuing demand from workers in Teton County, Wyoming, where average wages paid are higher than in Idaho.

Our housing prices and rents are dictated by Jackson, however, our wages are being dictated by Idaho, which does not pay good wages. These two influences contradict each other.

-Property manager interview

As shown below, rents paid by households that commute out for work pay about 10% more on average for rent than residents in the Valley in total. Particularly in a tight rental market, the ability to pay more is a competitive advantage. The competition has forced some locals to leave the area. Workers are increasingly relocating to Ashton, St. Anthony, and Idaho Falls because units are more available and affordable.

Rents Paid by Bedroom Size: Residents that Commute Out for Work, 2021

	0/1-bd	2-bd	3+-bd	Overall Average
Commute out for work	$1,256	$1,536	$1,689	$1,537

Source: 2021 Employee/Household Survey

Availability

As a general rule, vacancy rates at or below 3% are very low, double-digit vacancy rates are very high, and a vacancy rate of around 6% that is trending downward typically indicates to developers that construction of additional units should begin.

A search for advertised rentals over a two month period from October to November 2021, only produced 21 rental listings. This is equivalent to a 1.1% vacancy rate per month. This low vacancy rate was confirmed by property managers who noted that:

- Near or zero vacancy is not new to Teton County, having been commonplace for the past eight years.
- During the pandemic, one big change is that adjacent counties like Fremont and Madison also experienced extremely low to zero vacancy, meaning the option of moving further away to find lower cost rentals proved challenging.
- Units in the county are filled in a matter of hours or days, mostly by word of mouth. Property managers do not need to advertise. Competition is fierce.
- Turnover used to be more tied to seasonal changes when Grand Targhee opened or closed. Now units typically only turnover when rents are raised significantly (e.g., $1,750 to $2,800), displacing existing tenants for new ones.

When vacancy rates are this low, the rental market is near capacity and cannot absorb new residents or employees moving to the area. This results in several issues:

- Renters have difficulty moving from one unit to another as their circumstances change;
- Renters are vulnerable to increasing levels of cost burden, because there is nowhere to move to if the landlord seeks to increase their rent;
- Renters fear reporting needed repairs to landlords due to concerns of retaliation through rent increases or nonrenewal of lease;
- New employees struggle to find housing when hired by local businesses;
- Rents increase at rates much faster than incomes; and
- Landlords have little incentive to make repairs and capital investments.

Chapter 6 – Housing Program Accomplishments and Challenges

The purpose of this chapter is to capture what has been accomplished in Teton County with regard to community housing production and programs. Particular focus is on changes seen since the 2014 housing needs assessment was completed. This section reviews subsidized housing inventory, projects in the works, and structures and organizations in place to help facilitate more housing options for local residents and employees in the Teton Valley.

Deed Restricted/Subsidized Inventory

The deed restricted and subsidized housing inventory has not grown since the *2014 Housing Needs Assessment*, but several building blocks are in place that will enable future growth and creative solutions.

Teton County, ID has three income-restricted, subsidized apartment complexes, providing a combined total of 88 restricted units.[53] Most of the units (63) are restricted for very low income households (≤ 50% AMI) with 25 serving households with incomes up to 60% AMI. The 88 restricted units house 9% of the county's households. Affordability restrictions on 74 of the units will expire in 2040 and 2042.

Two of the properties, Fox Creek and Teton View, are family oriented. These properties offer two- and three-bedroom units and are in good condition. They were constructed in 2000 and 2002 utilizing Low Income Housing Tax Credits (LIHTC).

Teton Court is 42 years old. It has one-bedroom units located in a single building and was constructed with Rural Development financing. Residents pay 30% of their income for rent.

Teton County, ID Subsidized Housing Inventory

Project Name	Location	Total	Bedrooms			AMI			Subsidy
		Units	1	2	3	≤50%	51 – 80%	Mkt	Type
Fox Creek	Driggs	32		10	22	16	8	8	LIHTC
Fox Creek II	Driggs	24		20	4	12	7	5	LIHTC
Teton View Village	Victor	32		12	20	21	10	1	LIHTC
Teton Court Apts	Driggs	14	14			14			RD
Total		**102**	**14**	**42**	**46**	**63**	**25**	**14**	

Source: 2014 Housing Needs Assessment

There are no owner-occupied housing units in Teton County, ID with restrictions that make them affordable for the workforce over time. But, the 2021 T*eton County Joint Housing Authority Supply Plan* outlines a robust pipeline of potential additional income restricted housing, both for sale and for rent.

[53] The complexes have 102 units total, including 88 that are income and rent restricted and 14 that are market rate or on-site manager units.

Waitlists

Fox Creek has a waitlist of at least three years, with only about two units opening each year. The program manager reported the longest wait is for two-bedrooms.

Teton Court only has a waiting list of one person, however, there is very little turnover in residents.

Loss of Units

No deed restrictions have been lost since 2014, however, extensive loss of naturally occurring affordable housing is occurring in the community, as documented elsewhere in this report. Much of that loss occurs through incremental changes, such as price appreciation of single-family homes and long term rentals converting to short term rentals. Two recent events illustrate larger market impacts:

- Grand Targhee lost a master lease for employee units in Driggs in 2020.
- The expansion of the Teton Valley Resort in 2021 displaced nine households in the Rockin' H Mobile Home Park in Victor. These households had been paying lot rent of $500/month.

Housing Programs in Operation

The **Eastern Idaho Community Action Partnership** provides a weatherization program which covers energy efficiency measures, health and safety improvements and repairs in 10 counties, including Teton.

- The program is available to homeowners and renters with incomes no greater than 200% of the poverty level. Priority is given to individuals over 60 years of age, families with children under 6 years of age, and persons with disabilities.
- The wait list has 17 applicants (excluding multi-family), and applicants will need to wait about three years to receive assistance.
- In the past five years, 11 Teton County households received weatherization assistance. The last weatherization contract averaged $11,715; almost double the average in 2014.

Community Resource Center of Teton Valley provides numerous services, including assistance with applications for rentals and housing assistance programs, help searching for available rentals (online inventory updated weekly), assistance resolving minor issues with landlords, and referrals to temporary housing shelters in Jackson and Idaho Falls. In addition, emergency rental assistance, energy assistance, and financial assistance with rent, utilities and/or security deposits are also available.

More resources for renovation and weatherization in the valley could help community members live more affordably and in healthier conditions. Investing local resources in these programs could create greater flexibility in who is served and enhance the housing inventory to be sustainable for the long term.

Proposed Additional Inventory

The city of Driggs has contributed land and infrastructure for a LIHTC funded rental project in downtown Driggs called Depot Square. The project has received a LIHTC allocation and is in the final stages of predevelopment with construction start anticipated in spring 2022.

- Depot Square will provide 30 units, serving households from 30-60% AMI, with one market rate unit for a property manager and three market rate live-work units. The project will also include four business incubator spaces on the ground floor.
- Total project cost is projected to be $9 million. The project developer is Northwest Capital Partners, an experienced LIHTC development group based in Boise, Idaho.

Chapter 7 – Housing Resources, Opportunities and Constraints

This chapter summarize the resources available in the community, including land, funding, and development opportunities and challenges to set the stage for the next phase of policy discussions and action planning in the Teton Valley.

Government Owned Land

Identifying land and providing it at low or no cost can be a highly effective strategy for catalyzing community housing, as demonstrated by Depot Square. The *Teton County Joint Housing Authority Supply Plan* was completed in 2021 and focused on vacant government-owned lands within the cities of Driggs, Victor, and Tetonia that might be suitable for housing. Suitability was ranked based on access to transportation, retail and services, employment, walkability, zoning, and presence of infrastructure. The three highest priority sites that emerged from this process are:

1. Sherman Park site, owned by the city of Victor: the city has entered into a Memorandum of Understanding with the Joint Housing Authority to lease this 3.39-acre site for an affordable housing project.
2. Road & Bridge remnant site, owned by Teton County: the county has leased this site to the Joint Housing Authority, creating the opportunity for additional affordable housing.
3. Courthouse Parking Lot remnant site, owned by Teton County.

These sites, in combination with five lower priority sites under both public and private ownership, could yield as many as 391 homes.

The primary strategy in the Supply Plan is prioritizing publicly owned sites to catalyze the types of housing needed in the community. The Plan provides a helpful roadmap, setting the priority sites based on their suitability for housing and exploring what types of housing could serve the community.

Taking the land cost out of the development proforma is a helpful start to creating affordability; however, in the current construction environment, this alone will not be sufficient. Public/private partnerships, staff capacity at the Housing Authority, and local funding sources to fill additional cost gaps will be essential for success. Part of this includes continuing to secure land for future public/private partnerships to place the community in a good position to respond to housing needs over the long term.

Guiding Policy Documents

Affordable Housing Strategic Plan

In 2017, Teton County and city of Driggs, City of Tetonia and Victor created a technical advisory group (TAG) to recommend housing strategies to address needs not being met by the market. This group created the *Affordable Housing Strategic Plan* (AHSP), which was adopted by Teton County, city of Victor, and city of Driggs and city of Tetonia in late 2019 and early 2020. The AHSP goal is:

"To facilitate the development of diverse, permanently affordable housing options within city limits that will support public service agencies, enhance the local economy, add vibrancy to downtowns and help preserve the rural character of the area."

The Plan has prioritized tiers of strategies and assigned implementation steps. The plan also includes discussion of organizational needs and funding opportunities. This plan is an excellent accomplishment and encompasses almost all of the recommendations set forth in the *2014 Housing Needs Assessment*.

Figure 4: Affordable Housing Strategy Evaluation Matrix

CATEGORY	STRATEGY	OWNERSHIP / RENTAL	AMI CATEGORY	LEVEL OF IMPACT	COST / EFFORT	TIME FRAME
Public-Private Partnership	**LIHTC or USDA Direct Loan Project**	Rental	<60%	High	High	3 Years
Public -Non-Profit Partnership	**Habitat for Humanity / Self-Help Housing**	Ownership	<50%	High	High	5 Years
Public	**New Development Incentives**	Both	<120%	High	Medium	1 -2 Years

TIER I STRATEGIES
TIER 2 STRATEGIES
TIER 3 STRATEGIES

Source: page 12 - https://www.tetoncountyidaho.gov/use_images/pdf/additionalInfo/tetoncountyidahoaffordablehousingplan-2-12-2019.pdf

This is a strong plan that follows best practices for housing action planning.

- It was created by a cross-disciplinary group with local expertise and is grounded in market research, demographic data, and prior studies.
- It directs development activity towards incorporated areas with existing services, infrastructure and jobs, to reduce spawl and conserve the rural character of the unincorporated county.
- It takes a multi-faceted approach to housing solutions, looking at regulations, incentives, development, and preservation of inventory.
- It seeks to address the broad spectrum of housing needed for a functional housing market and the diverse demographics that serve a vibrant local economy.
- It recruits participation in solutions across public, private, and non-profit sectors.
- It has recent, buy-in from local elected officials, with adoption by all four jurisdictions.

Implementation of the AHSP is underway. The first priority in Tier 1 has been the highest priority and is coming to fruition with the Deport Square development.

We recommend continuing to implement the strategic actions. The creation of the Teton County Joint Housing Authority and hiring of an Executive Director will add capacity for implementation. Pairing with this is the need to pursue dedicated local funding sources and the public/private partnerships anticipated in the Supply Plan.

Teton County Joint Housing Authority Supply Plan

The Teton County Joint Housing Authority Supply Plan charts a path to help produce 390 homeownership units based on needs identified in the 2014 Housing Needs Assessment. This plan prioritizes a mix of public- and private-owned parcels within the three municipalities that are suitable for housing.

Local Funding Sources

With the increasing gap between the cost to buy, build, and rent and what locals can afford, local funding sources for housing are increasingly important. Local stakeholders are aware of the need to establish a local funding source. The AHSP outlines several prospective sources and the Housing Authority is exploring which options will be most viable. Tools that are currently in place include:

- Private Philanthropy – the Housing Authority has been successful in raising funds to support the new Executive Director position.
- Lodging and Short Term Rental Sales Tax – Both Driggs and Victor collect a lodging tax on hotel/motel and STR stays, and have the ability to use some of the revenue for affordable housing.
- Local government match – Driggs, Victor, and Tetonia are providing funding for Housing Authority operations, and the city of Driggs has provided interim staffing.
- Government owned land and infrastructure, described above.
- Low Income Housing Tax Credit – has been secured through Idaho Housing and Finance Authority to build 30 units in 2022.

- State and Federal Funds – the Housing Authority is also keeping a close eye on funding that might be available through ARPA or other State and Federal actions. There is a draft bill in legislation that proposes to create a state level Housing Fund of about $50 million that would fund workforce housing and help to unlock other state and federal resources.

Development Environment

City and County development requirements, zoning, incentives, and fees all contribute to making housing development more or less affordable to local residents and workers. The summary of tools provided in Appendix B outlines what is currently in use, and where potential improvements could be made to reduce development costs and support development of housing for residents and workers. In general, Driggs and Victor have adopted many best practices for encouraging community housing. Tetonia has policy statements in their Comprehensive Plan supporting housing, but has yet to implement those actions in their code.

Cost of Residential Development

The cost to build residential units has increased dramatically since the Affordable Housing Strategic Plan was prepared in 2019, posing a significant constraint to building housing that the local workforce can afford. The cost to develop housing varies by multiple factors, including location, target demographic, density, and product type. In addition, many costs are in flux and still rising, meaning that prices estimated today will be outdated in the near future. The information below, however, provides a general cost of residential development in Teton County, and illustrates the rising trend.

Cost estimates were obtained through a combination of information in the 2019 Affordable Housing Strategic Plan and through recent interviews with local developers and contractors. Based on discussions, the challenge to build affordably in the area has never been greater. These challenges include high land, labor, and construction materials costs, increasing the gap between cost to build and what local wage earners can afford. As shown in the table below:

The estimated cost to develop has increased significantly since 2019.

- Hard costs (materials and labor) have increased from about $150 per square foot in 2019 for a 1,400 square foot single family home to an estimated range of $225 to $275 per square foot for a multi-family or single-family product that would be starting today. This represents at least a 50% rise in hard costs in just a few years.
- Because costs are continuing to rise, local developers recommend adding a 15% escalator going forward.
- In comparison, developers and contractors who are primarily working in Teton County, Wyoming report that a townhome or multifamily product with medium end finishes ranges from $375-$450 per square foot, which includes materials and labor only (i.e., land, soft costs, site

> *"We have seen lots of turmoil in the material costs over the past 2 years. We have been told to anticipate the following in 2022: 30% rise for drywall, 10% for electrical, and 15% for HVAC. Lumber is going to be the biggest problem."*
>
> *-Developer interview*

work, and development management are excluded). In their experience, working in Teton County, Idaho, is only nominally more affordable to build than in Teton County, Wyoming, as all contractors are competing in the same regional labor and materials pool.

Estimated Cost of Construction, 2014 to 2021

	2014 Plan	2019 Affordable Housing Strategic Plan	Depot Square Estimates	2021 Estimate
Price per square foot	$145-$199	$150	$200	$225-275
Type	Single Family	Single Family	Multifamily	Both
Price includes	Home price - "all in" including land, construction, soft costs, profit	Hard costs only, labor and materials	Hard costs only, labor and materials	Hard costs only, labor and materials

Sources: 2014 Housing Needs Assessment, developer/builder/stakeholder interviews, consultant team

Assuming the cost to construct is $250 per square foot, a 1,400 square foot home now costs $350,000 to build. When land, City fees, design, financing, and developer profit are added, this home will cost in excess of $550,000 as shown below.

Cost to Build – 1,400 square foot single family home: 2021

	Assumptions	Cost
Labor and Materials (hard costs)	$250/sq ft	$350,000
Land and infrastructure [1]	$100,000 per lot	$100,000
Design, fees, financing (soft costs)	20% of hard costs	$70,000
Developer fee	10% of hard costs	$35,000
Total Development Costs		**$555,000**
Price affordable for 3-person household at the median income [2]	100% AMI,	$285,900
Gap (subsidy needed)		**$269,100**

[1] Conservative estimate. Lot prices are rising fast and vary significantly based on location, size, etc.
[2] Max purchase price assumes 30-year mortgage at 4.5% with 5% down and 20% of the payment covering taxes, HOA, PMI and insurance.
Source: consultant team

A household would need an income of about $135,000 per year (about 195% AMI) to afford it, making it unaffordable to about 85% of households in Teton County, Idaho. As a result, the market will increasingly be unable to build new housing that the local workforce can afford without involvement of the public sector, including actions like providing land.

Land Acquisition

The price of raw land is a component of residential development costs. Land costs can vary considerably, depending on the location of the parcel, zoning, and access to infrastructure. The *2021 Housing Supply Plan* provides an inventory of sites potentially suitable for housing.

> *The cost of a typical lot in Driggs has doubled or even tripled since March 2020.*
>
> *-Realtor, Builder and Property Manager Interviews*

Land costs have historically been more attainable in Teton Idaho compared with Teton Wyoming; however, costs have escalated rapidly in the past three years. Developers and real estate agents that observe development ready lots have seen prices double or triple in value. Where the 2019 Plan assumed $40,000 per lot, this is now likely at least $100,000.

Infrastructure Alignment

The *Affordable Housing Strategic Plan 2019* and the *Supply Plan* prioritize locating new housing in existing municipalities, close to existing infrastructure. Local jurisdictions can take this one step further by aligning general infrastructure improvements with desired affordable housing outcomes, for example, prioritizing expanding water and sewer capacity or upgrading streets in areas that have been identified as suitable for medium and higher density housing and mixed-use development. This can be an important step to reduce costs for projects when they become development ready.

Housing Organizations

Some of the local and regional resources available in the Teton Valley are shown below. Some are already helping to produce units, manage housing and otherwise assist residents with housing. Future collaboration with and expansion of Teton Valley resources, as well as exploring opportunities with partners throughout the Teton Region, could help expand these efforts.

Teton County Joint Housing Authority

The Teton County Joint Housing Authority was formed in 2019 by Teton County and the cities of Driggs, Tetonia, and Victor. The Housing Authority will facilitate implementation of many of the Affordable Housing Strategic Plan and Supply Plan activities.

The four jurisdictions have provided the seed money to start the agency, as well as appointing Board members and providing staff time. The Housing Authority recently secured a local philanthropic commitment for the funding for an Executive Director position. The hiring process is anticipated to begin in early 2022.

Community Resource Center of Teton Valley

The Community Resource Center of Teton Valley was formed in 2016 to help individuals and families assess their needs and connect them to housing and supportive services. Services provided include emergency rental assistance, energy assistance, and rental security deposits, among others.

Eastern Idaho Community Action Partnership

The Eastern Idaho Community Action Partnership provides a weatherization program available to both homeowners and renters with incomes no greater than 200% of the poverty level. See Chapter 6 for program details.

Habitat for Humanity

There is a need for a mission driven organization that can provide homeownership opportunities at price points affordable to the local workforce and other residents. Currently, there is no active Habitat for Humanity affiliate working in the valley, or other similar non-profit. Habitat for Humanity of the Greater Teton Area considers Teton County, Idaho, to be in its service area, but is not currently working in the valley. If that affiliate or the Idaho Falls Area Habitat for Humanity were willing to extend their geographic reach and/or services to the valley, it could be a tremendous benefit. If this is not an option, we recommend having the Housing Authority lead affordable for sale development or establishing another entity with that mission.

Chapter 8 – Housing Units Needed

This section addresses the question:

> *How many additional housing units are needed to address housing deficiencies for residents and support the labor force needed to sustain businesses and the economy.*

Needs are projected through 2027 and quantified in two categories:

- Catch-Up Needs – the number of housing units needed now to address current deficiencies in housing based on employees needed to fill unfilled jobs and the number of units needed for a functional rental supply.
- Keep-Up Needs – the number of units needed to keep-up with future housing demand through 2027 based on job growth and jobs vacated by retiring employees. Housing shortages worsen when local job growth and the need for more workers exceeds the growth in available housing units.

This section estimates housing units needed to support employers, keep up with future job growth and improve housing options for area residents based on information presented in other sections of this report. Estimates are a subset of the total demand for housing in the county. Estimates do not include current waitlists for housing, overcrowding, or households that will be forced to leave due to housing conditions.[54] Nor do figures represent the entire housing market – remote workers or retirees moving in from elsewhere, second homeowner purchases, and other market segments, which are outside the scope of this analysis.

Catch-up Needs (Current Conditions)

Unfilled jobs

Labor is in short supply, both locally and nationally. In such a competitive environment, the near-zero rental vacancy rates, and high and rising home prices and rents, make it even more difficult to attract the already scarce labor pool to the area. Eighty-percent (80%) of employers stated that the lack of housing affected their ability to find and keep employees. More housing that local employees can afford is needed for businesses to hire and retain the workers they need to thrive.

Employer survey respondents reported that 19% of jobs were unfilled this summer, which is high and has been affecting business operations and employee satisfaction. Because 100% of jobs are rarely filled, the following estimate seeks to lower the unfilled job rate to 5%, which was more typical prior to the pandemic.

About 80% of employees reside in the Teton Region. If this pattern is maintained, then the number of homes needed locally is about 335 to bring the current 19% unfilled job rate down to a 5% rate.

[54] See Regional Overview – Housing Problems

Units needed to help fill jobs	
A. Current unfilled jobs (19%)	1,400
B. Reduced unfilled jobs (5%)	360
Jobs to fill (A – B)	1,040
Jobs per employee	1.3
Employees per household	1.9
Housing units needed	420
% of employees living in the Teton Region	80%
Housing needed for Teton County, ID, employees to live in the Teton Region	335

While this catch up need is important to understand for relieving current business employee shortages, much of this figure is also incorporated in the estimate of future job growth. This potential for double-counting is addressed in the summary of housing needs later in this section.

Functional Rental Supply

The current rental supply in the county is not functional because vacancies are below 1%, placing substantial upward pressure on rents. When vacancy rates are this low, the rental market is near capacity and cannot absorb new residents or employees moving to the area, much less provide opportunities for current residents to find more suitable rentals as their housing needs change. Renters are "stuck" in their homes, and subject to burdening rent increases.

- A 5% vacancy level, while still low, provides some choice and availability of units for residents and employees. To increase the vacancy rate to 5%, approximately 50 additional rental units are needed.
- To also provide housing for persons who are now camping or living in motel rooms would require about 120 additional units.

Rentals Needed for a Functional Market	
Total rentals (2021)	990
Number of rentals if 5% vacancy rate	1,040
New rental units needed	50
Units needed for unhoused persons	120
Total rentals needed	170

Future (Keep-Up) Needs

Retiring employees

Employers will need to fill the jobs vacated by retirees in addition to any newly created jobs. Some retirees will leave the area upon retirement; however, when they sell their homes, the majority will be purchased by second-home owners or remote workers rather than local employees.

About 15% of employee/household survey respondents that work in Teton County, Idaho, stated they expect to retire over the next five years. Assuming that 80% of retiree homes will not be available to new employees filling vacated jobs, 335 homes will be needed to house employees filling jobs vacated by retirees.

About 80% of employees reside in the Teton Region. If this pattern is maintained, then 265 homes are needed within the Region.

Retiring employees	
% to retire by 2027	13%
# to retire	3,200
Employees per household	1.9
Total housing units	420
Needed housing units (80%)	335
% of employees living in the Teton Region	80%
Housing needed for Teton County, ID, employees to live in the Teton Region	265

New Jobs

To keep up with estimated job growth over the next five years (2,284 new jobs), approximately 920 additional housing units will be needed. Because the regional nature of this study focuses on the Teton Region as a whole, the below estimate shows how many housing units are needed to keep new workers in the Region based on current commuting patterns. The next section shows how many of these units may be needed in Teton County based on various assumptions.

About 80% of employees reside in the Teton Region. If this pattern is maintained, then 730 homes are needed locally.

Estimated Housing Needed by the Workforce Filling New Jobs, 2021 – 2022

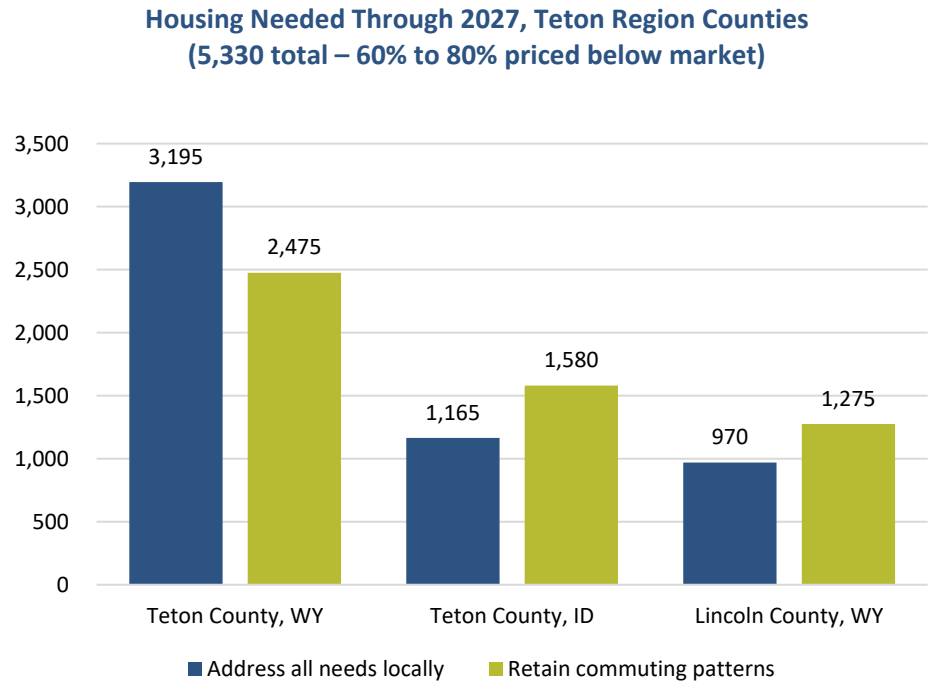
	Low
Increase in Jobs between 2021 to 2027	2,284
Jobs per Employee	1.31
Employees per household	1.9
Housing needed	920
% of employees living in the Teton Region	80%
Housing needed for Teton County, ID, employees to live in the Teton Region	730

Regional Distribution of Catch-Up and Keep-Up Needs

Based on estimated catch-up and keep-up needs in Teton County through 2027, an additional 1,165 housing units will be needed. The number of housing units needed in Teton County will vary depending upon whether the total housing need is provided locally, or if current commuting patterns within the

Teton Region are retained and units are constructed based on where employees presently live. As a bedroom community for Teton County, Wyoming, if current commute patterns are retained, then the number of units needed within Teton County increases because Teton County, Wyoming, employees will need homes.

- If each county in the Region addresses their full housing need locally, 1,165 homes are needed in Teton County.
- If current commuting patterns are retained, the number of units rises to 1,580.



In Teton County, Idaho, about 60% of the housing needed should be priced below-market. As discussed further below, this means ownership housing priced below $500,000 (150% AMI) and rentals priced below $1,500 per month (90% AMI).

Summary of Housing Needs Through 2027

	Address All Needs Locally	Retain Commuting Patterns
Catch-Up	**170**	**170**
Unfilled Jobs (reduce from 19% down to 5% unfilled)*	*335*	*475*
Functional rental supply	170	170
Keep-Up	**995**	**1,410**
New jobs (4.8% growth)	730	1,035
Retiring employees (15% retiring)	265	375
TOTAL through 2027	**1,165**	**1,580**
Below market (60% of units)	700	950
Market rate (40% of units)	465	630

*Housing needed to fill currently unfilled jobs is shown in the table to illustrate the existing shortage of housing related to filling current positions. This number, however, is largely a subset of the new job growth estimate so is not included in the overall total to conservatively prevent double-counting.

The figure below shows the total housing needs through 2027 in the study area based on whether all needs are addressed locally or if current commuting patterns are retained.

Needs by Own/Rent and Income

Ownership and rental housing for local employees and residents is needed. On the rental side, the majority of workers filling new jobs will rent homes (about 70%). Conversion of rentals to short term is also impacting renters in the region (an estimated 180 renter households had to move in the past three years due to this problem). On the ownership side, a significant percentage of current renters (44%) want to buy homes.[55] If ownership opportunities are provided, this can then free up rentals for occupancy. These dynamics support providing a higher ratio of rentals than currently exist, at about a 50:50 split.

The precise ratio, however, is dependent upon the community's desired direction and housing policy. Rentals are needed to help recruit new workers and residents to the region; ownership is needed to retain year-round residents and support community stability.

[55] See Regional Overview – Housing Problems for additional information

Summary of Housing Needs by Own/Rent Through 2027

	Low (housing aligned with job location)	High (housing aligned with current commute patterns)
Units needed through 2027	**1,165**	**1,580**
Ownership	580	790
Rental	585	790

The following table shows the income targeting for the additional units needed based on the income distribution of renter households that work in Teton County. As shown below:

- Market rate rentals in the county currently serve households earning about 90% AMI. The majority of rentals need to be priced below this, and about 50% should be priced below 80% AMI.
- There are 99 rentals in the pipeline for development, ranging from 30% AMI through market unrestricted prices. Rental development is hitting the core rental price points needed and will address 22% of identified need below 100% AMI. This supply will add an important boost to supply at this range.

Rental Units Needed by AMI through 2027, Teton County, ID

	AMI				
	≤50%	50.1% - 80%	80.1% - 100%	100.1% - 120%	>120%
Max. Income	$34,400	$55,000	$68,800	$82,560	>$82,560
Max. Affordable Rent	$850	$1,400	$1,700	$2,050	>$2,050
Renter Income Distribution	22%	30%	14%	8%	26%
Rental Units Needed by AMI*	**150**	**205**	**95**	**55**	**180**
Pipeline development	72		27	0	

Incomes at each AMI are reported for a 3-person household

* Units Needed total is based on the mid-point of the low and high housing need estimates

The following table shows the income targeting for the additional units needed based on the income distribution of owner households that work in Teton County.

- The majority of owners earn under 200% AMI. The current housing market provides some attached product that households earning 150% AMI could afford, but single family homes are generally priced for households earning 200% or more. The shift to this higher price point occurred largely within the past two years.[56]
- When considering ownership product for local residents and employees, most should be priced between $200,000 up to $550,000 (80% to 200% AMI). For housing policies that focus on providing homes for renters that want to buy, entry level product primarily between 50% AMI up to 120% should be the focus ($150,000 to $300,000).

[56] See Chapter 5 - Housing Market

- Fifty-five (55) units of ownership are in the development pipeline, about 75% of which will be priced for owners earning over 200% AMI, meeting about 33% of the estimated need in this income range. Another 15 homes are anticipated to be priced between $300,000 to $500,000, providing homes for upper-middle income buyers in the Valley. Homes from $300,000 up to $780,000, is also a prime purchase range for commuters from Teton County, Wyoming.

Ownership Units Needed by AMI through 2027, Teton County, ID

	AMI					
	≤50%	50.1% - 80%	80.1% - 120%	120.1 - 200%	200.1 - 300%	>300%

Northern Lincoln County, Wyoming

Chapter 1 – Report Snapshot and Recommendations

Overview of the Northern Lincoln County, Wyoming, Housing Needs Assessment

This Assessment centers on the understanding of what households can afford for housing in Northern Lincoln County (N. Lincoln County), and explores where their needs are being met, and where there are gaps. It uses the definition that housing is affordable when monthly housing costs (rent or mortgage, plus utilities, insurance, and property taxes) is equal to no more than 30% of a household's gross income (i.e., income before taxes).

Source: Dept. of Housing and Urban Development for a 3-person household
**Source: Blue Ribbon Demographics, LLC

The housing bridge, illustrated above, presents a picture of what affordability in N. Lincoln County, for its residents and workforce should look like. The bridge portrays a spectrum of housing that is affordable and most likely to be sought out by households in different income groups. It indicates the percentage of households earning incomes in each area median income range and the type of housing likely to be needed at the different income levels. The bridge depicts what may be ideal for most communities – the availability of housing that is affordable to households at all income levels and provides options for changing life circumstances.

It is from this perspective that the housing needs assessment was conducted. The housing bridge summarizes what you are about to read. It illustrates the mix of housing needed by residents making their living in the county and at which income level. It shows where the market is providing housing and

where it is not; and how much housing is needed to address current shortfalls and keep up with future job growth. More specifically:

- The rental housing market for residents and local employees searching for homes has gotten expensive for local wage earners. A three-person household earning about $70,000 per year coming to N. Lincoln County may find something that meets the definition of affordable on the market.
- Households making their living locally can find attached homes to buy (condominiums, townhomes, etc.) for around $440,000 (150% AMI). Market rate single family homes are now mostly over $600,000 (200% AMI). This is a big shift from just two years ago when three-fourths of homes were priced under $500,000.
- To address the amount of housing needed to catch up to current shortfalls and keep up with future job growth, ***about 60% of the approximately 970 to 1,275 homes needed by 2027 in N. Lincoln County will need to be priced below market***. This will require local policies, subsidies, and creative partnerships with local organizations, employers, and the private sector to produce.

Recommendations

The Path Forward

There is good momentum and foundation for addressing housing needs in the Teton Region. And continued momentum is needed to help address the gap of up to 1,275 homes. ***The magnitude of the issue requires a robust and regional response from all sectors of the community (public, private, non-profit) working collaboratively to engage community support and accelerate housing solutions.***

Recommendations

The below recommendations can be revised, expanded, and made more actionable through community conversations and policy direction by elected and appointed officials.

Regional Nature of Housing

The demand for homes in N. Lincoln County from local residents and employees, as well as workers in Teton County, Wyoming, is extensive and will continue. This means that, the extent to which each county in the Teton Region addresses their housing needs will affect housing needs in other communities in the Region. It is important to maintain a regional dialogue about the problem, recognize the local and regional implications of housing polices, and work together on solutions and policies that carry benefits and impacts across jurisdictions.

Develop a Housing Plan and Build Capacity

Develop a plan for expanding local resident and employee housing opportunities. Establish shared housing goals and objectives, inventory existing organizations and resources, build support and leadership through community outreach and education, and establish a prioritized plan of tasks to undertake. Several considerations are listed below.

- Establish an effective housing deed restriction to ensure homes that are produced, particularly with public land or subsidies, are occupied by local residents and employees. This includes local occupancy, employment, income and/or price appreciation limits. Several examples exist from the other counties in the Teton Region; learn from their experience.
- Build capacity to implement and manage the housing plan. Establish a housing authority or organization to take the lead on housing projects and programs by providing the time and expertise needed to plan, design, and implement identified strategies, as well as manage the housing that is produced. Housing created for local resident occupancy and long term affordability need to be actively monitored or they will be lost.

Increase the Diversity of Housing

The vast majority of housing in N. Lincoln County are single family homes. Increasing the diversity of housing types will support greater affordability and mobility in the market.

- Build rental housing. More rentals are needed. Provide stable rental housing in the community, meaning apartments that cannot be short-term rented. Low Income Housing Tax Credits (LIHTC) are a good source of financing for private developers, public agencies or public/private partnerships and will provide rentals affordable for households earning under 80% AMI; the core need in the county.
- Zone for multi-family. Ensure multi-family development is permitted in or near town centers and where services are available. This includes townhomes, multi-plexes, and higher densities for condominiums and apartments.
- Incentivize development of housing for residents. Provide development concessions for developers that restrict all or a portion of their development for occupancy by local residents and employees. This includes effective density bonus provisions (e.g., Teton County, Wyoming, 2-for-1 program); fee waivers or deferrals; lot setback, height, and design variances; parking reductions.
- Work with Habitat for Humanity of the Greater Teton Area to expand homeownership opportunities for lower income residents. Habitat's work in Teton County could potentially be expedited by efforts to engage the community and organize contributions of volunteer labor.
- Allow Accessory Residential Units in all or most zones. Provide incentives for units that owners agree to restrict for rental to local residents and employees, such as tap fee waivers and pre-approved designs.
- Protect and improve mobile home opportunities.
- Align infrastructure investments to support and facilitate affordable housing. Access federal funds and state passthroughs as infrastructure recovery funds become available. This includes American Rescue Plan Funds (ARPA) and Infrastructure and Jobs Act funding.
- Improve senior housing opportunities. Smaller, lower maintenance homes near town services, patio homes and attached product. Pair with targeted research to determine number, locations, unit types and service needs.

Identify Land and Partnership Opportunities

Inventory public, institutional, and private lands suitable for housing development. Explore partnership opportunities to develop needed resident and employee housing – rentals and ownership. Using a

RFP/RFQ process for locating experienced developers of LIHTC or affordable deed restricted ownership product is recommended.

Funding

The most successful housing programs have a layer of funding strategies, including revenue from housing rents and sales, transaction fees, local government sources, grants, loans, philanthropy, among others. Specific considerations include:

- Traditional state and federal resources - CDBG, HOME, USDA/Rural Development, Section 8.
- Low income housing tax credits (LIHTC) for rental development.
- American Rescue Plan Funds (ARPA) and Infrastructure and Jobs Act funding can be leveraged to help produce needed housing.
- Local funding options. Utilize funding structures already in place and explore expanded options, such as transient occupancy tax, excise and sales taxes, local general fund, development mitigation fees, private donations/philanthropy.
- Take advantage of Wyoming housing resources, such as Wyoming Community Development Authority and Wyoming Housing Network. These organizations offer guidance on establishing and funding housing programs.

Housing Programs

Establish programs that help local residents get into existing homes, keep their homes, and conduct needed renovations and repairs. Federal and state grants and loans – CDBG, HOME, USDA/Rural Development, Section 8 – are options to help finance programs. Funds are limited to households earning under 80% AMI. Examples include:

- Down payment assistance to help renters purchase and compete for homes;
- Rent, deposit, and utility assistance to help renters get into and retain rentals as costs rise; and
- Low interest home rehabilitation loans and grants to help current owners repair older homes or modify homes to meet growing family needs.

Transportation Investment

- Commuting and location preference data indicate that a significant share of the population will continue to commute to Teton County, WY for work. Locating development near transit stops and increasing transit frequency/duration will provide commute options for residents and help reduce the impact that commute costs have on housing affordability.
- Engage leaders and stakeholders locally and regionally to help mitigate impacts associated with a commuting workforce. Improve funding for a more robust regional public transit system.

Chapter 2 – Community Demographics

This chapter describes a few key characteristics of the people and households in N. Lincoln County, including growth over time, age, ethnicity, the mix of owner and renter households, and household income. These metrics provide a picture of community change over time and informs the size, type, and tenure mix of housing needed.

Population and Households

The population of N. Lincoln County, WY, increased by about 2,200 residents from 2010 to 2020 and almost 1,000 households. This amounts to a population increase of 1.7% per year on average, which is much higher than that of Wyoming (0.2%) over the same time period.

	2010	2020	% growth (2010 to 2020)
Population	12,578	14,817	18%

Sources: 2010 Census, 2020 Census

Age

The median age of N. Lincoln County residents increased from 38 to 40 years of age since 2011. This is mostly due to a modest increase in persons over 65, rather than any significant change in younger age groups.

The core workforce age 18 to 64 has changed very little since 2011. And persons under 18 shows little change, indicating that families are relatively stable.

Sources: 2011 and 2019 5-year ACS

Ethnicity

The racial and ethnic composition of N. Lincoln County has changed little in the last decade based on census information. The number of people who identify as Hispanic or Latino showed the largest increase in the county, growing by 71% to about 750 persons. This still represents a comparatively low 5% of the population. This demographic comprises a much higher percentage of the population in Teton County, Idaho (14%), and Teton County, Wyoming (17%).

As discussed in other sections of this report, Hispanic/Latino households have generally had a more difficult time locating suitable housing in the county than other households. On average, these households tend to be lower income and have larger households, contributing to their housing challenges.[57]

Hispanic or Latino Population: 2010 to 2020

	2010	2020	% change in population (2010 to 2020)
Hispanic or Latino	3.5%	5.0%	71%

Sources: 2010 Census, 2020 Census

Tenure (own or rent)

Owner-occupancy of homes in N. Lincoln County has been about 82% since 2000. This is a higher ownership rate than the other Teton Region counties. Homeownership helps build stability, security, and satisfaction among residents making their living in the region.[58]

The majority of households that commute into Teton County, Wyoming, for work from Lincoln County also own their homes (72%), supporting the long observed trend that when employees desire to purchase, they look to nearby lower-cost markets to do so.

Percent of Resident-Occupied Households by Tenure: 2011 - 2019

	Ownership		Rental	
	2010	2019	2010	2019
N. Lincoln County, WY	80%	82%	20%	18%

Source: 2010 Census, 2019 5-Year ACS

Unit Type

The 2021 employee/household survey asked respondents what type of home they occupy. About 85% of respondents from N. Lincoln County have least one person in their home that commutes into Teton County, Wyoming, for work. This information, therefore, provides insight into the extent to which commuters may compete with other residents for different types of homes.

[57] See Regional Overview – Housing Problems for more information
[58] See Regional Overview – Housing Problems for more information

- Overall, 78% of all households and 51% of renters live in single-family homes or cabins. About one-third of renters also reside in attached homes (e.g., apartments, townhomes/multi-plexes or condominiums).
- About 2% of respondents indicated they are currently not permanently housed, but rather couch surfing, camping, or living in a vehicle.
- Basement, shop, and cabin (no foundation) were among "other" types of units occupied by respondents.

Type of Housing Occupied by Tenure: N. Lincoln County, 2021

	Own	Rent	Total
Apartment or condominium	2%	18%	6%
Townhome/multi-plex	6%	15%	8%
Single-family house/Cabin	89%	51%	78%
Mobile home	3%	5%	3%
Accessory dwelling/in-law/caretaker unit	0%	1%	0%
Motel/Hotel or Dormitory housing	0%	1%	0%
Not permanently housed (couch surfing, car, tent, etc.)	1%	4%	2%
Other*	1%	4%	2%
TOTAL	100%	100%	100%

Source: 2021 employee/household survey

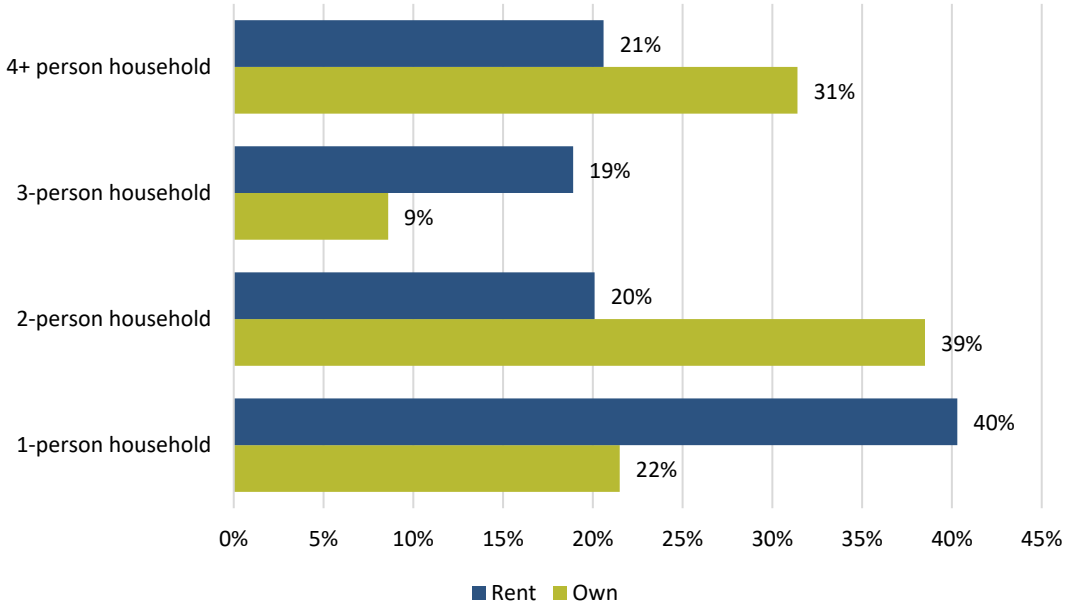
Household Size

The distribution of households by number of people per household by tenure helps to illustrate the size of homes needed by residents. The 2019 ACS estimates that there are about 2.9 persons per home on average in N. Lincoln County, which has remained fairly stable since 2011.

Average Household Size: 2011 to 2019

	2011 ACS	2019 ACS
Total households	2.9	2.9
Own	2.9	2.9
Rent	2.7	2.8

Sources: 2011 and 2019 5-year ACS



The recent fast rise in the cost of home both for rent and for sale and extremely short supply has forced many households to double-up or move in with family, if they have been able to stay in the area.[59] While these emergency housing measures have likely impacted the size of homes in the near term, when considering housing for local residents moving forward, household sizes prior to COVID are a better reflection of needs.

[59] See Regional Overview and Chapter 5 – Housing Market

The below chart reports the pre-COVID household size distribution, showing that:

- Renters are primarily 1-person (40%) households.
- Owners are also predominately 2-person (39%) and 4-or-more-person (31%) households. About one-third of households in the county are families with children, which is reflective of the high proportion of larger owners households.[60]

Household Distribution by Size and Tenure: 2019

Sources: 2019 5-year ACS

Household Income

The median family income reported by the U.S. Department of Housing and Urban Development (HUD) for a family of four increased from $76,100 in 2015 to $83,000 in 2021, an increase of 1.5% per year on average.

Median Family Income for N. Lincoln County, WY, 2021

Persons per Household	50% AMI	80% AMI	100% AMI	120% AMI
1	$29,050	$46,500	$58,100	$69,720

[60] See Regional Overview

An understanding of how much households earn across the income spectrum is important in informing the availability and need for housing that N. Lincoln County residents and employees can afford.

The table below equates the median income of households in N. Lincoln County to the equivalent AMI level for a 3-person household, which is the average size of households in the county. There are clear distinctions between owners and renters in terms of income.

- Well over half of renters (61%) earn below 80% AMI.
- Owners are relatively evenly distributed among the below categories. About 23% earn between 80% and 120% AMI, which are typical income ranges for first time homebuyers.

Lincoln County, Wyoming, Household Distribution by AMI: 2021

	3-person AMI	Own	Rent	Total
<50%	$37,350	16%	38%	20%
50 - 80%	$59,800	16%	23%	17%

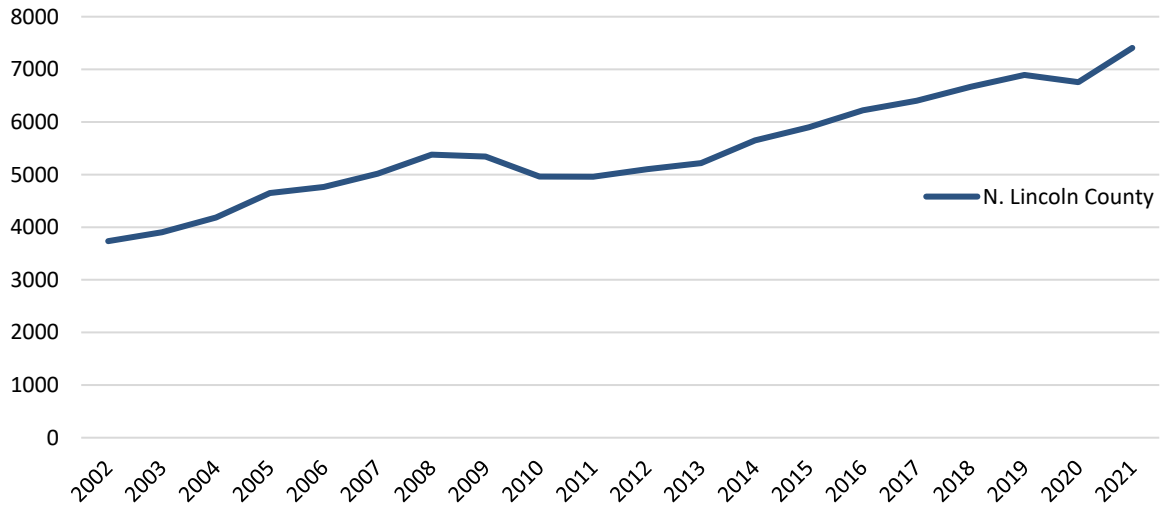
Chapter 3 – Jobs, Seasonality and Commuting

Jobs Estimates and Projections

There are about 7,400 jobs in N. Lincoln County, comprising about 66% of jobs in the county overall. Growth of jobs in N. Lincoln County has been stronger than the southern part of the county, rising 3.7% per year on average since 2001, whereas jobs in the south declined slightly. The growth rate in the county as a whole was only 1.9%.



Job Estimates and Projections, N. Lincoln County, WY: 2010 to 2027[61]

					Annual Growth Rate	
	2010	2015	2021 (est.)	2027	2011-2019	2021-2027
N. Lincoln County, WY	4,963	5,899	7,407	9,196	4.2%	3.7%

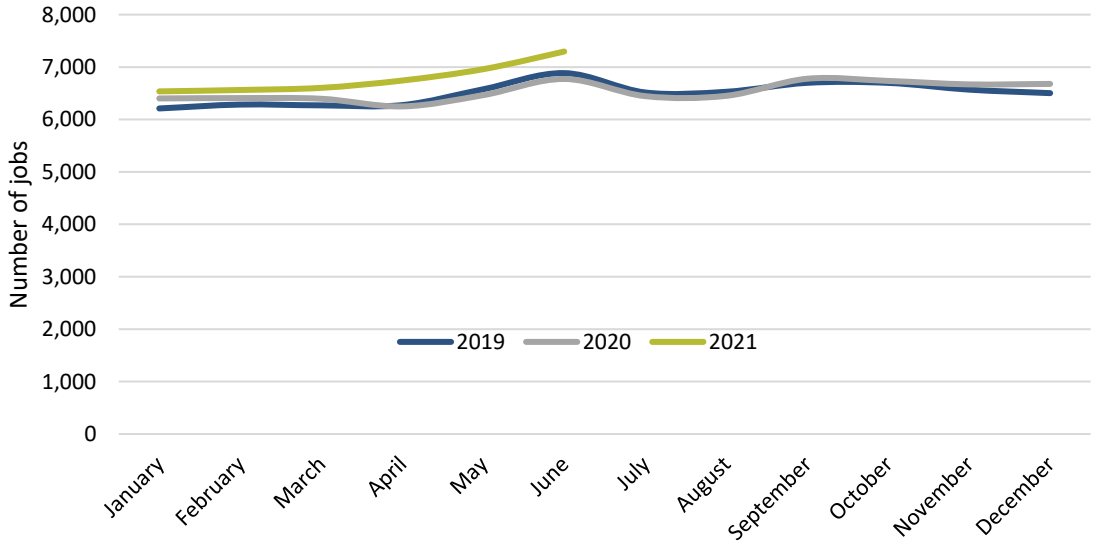
Source: QCEW, BEA, LEHD, Consultant Team

Jobs in N. Lincoln County were growing rapidly since 2011 (the low point of the prior recession) through 2019, at just over 4% per year. The Covid pandemic introduced a short-term drop in the number of jobs in 2020, but jobs more than recovered by the end of that year. Jobs through the first six months of 2021 increased 6% compared to the same period in 2019. Looking forward, job growth is expected to continue to be strong.[62]

Job Estimates: 2002 to 2021

Source: QCEW, BEA, LEHD, Consultant Team

[61] Estimates are calculated by adjusting the QCEW count of wage jobs by the BEA percentage of jobs held by proprietors to ensure all jobs (wage and proprietor) are included in the estimate.



[62] The long term growth rate from 2001 through 2019 was used to estimate future growth (3.7%).

Seasonality of Jobs

June is the peak employment month, but it is not a dramatic peak compared to Teton County, Wyoming, and Teton County, Idaho, rising about 11%, or 675 jobs in 2019. The seasonality characteristics of Lincoln County have been quite consistent for the past 20 years.

The summer rise is mostly driven by construction jobs, with modest contribution from accommodation and food services and retail.

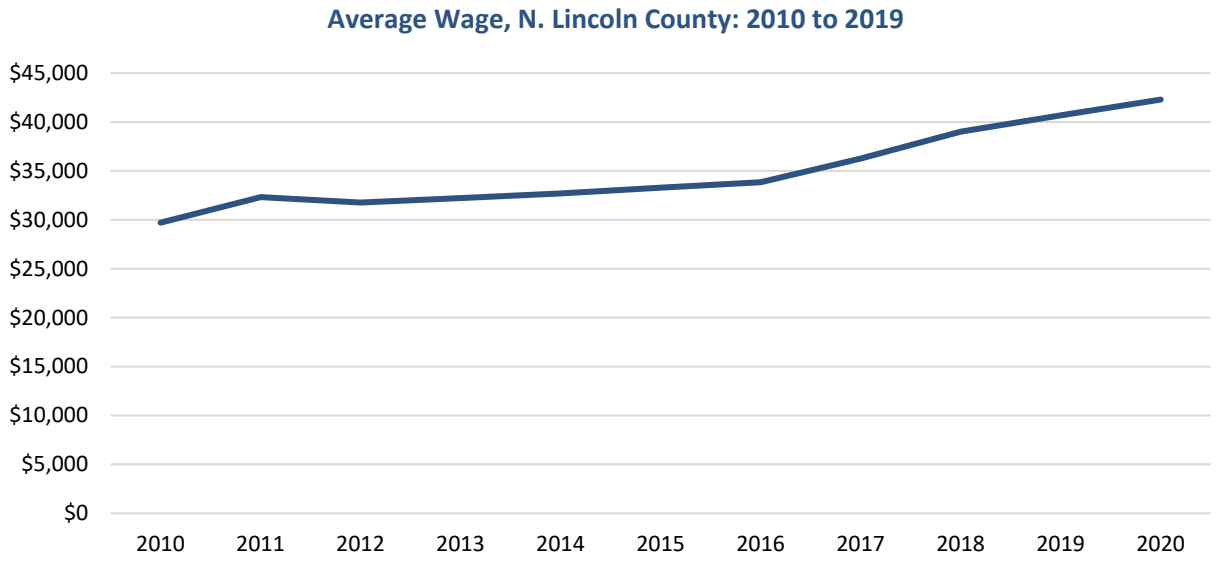
Source: QCEW



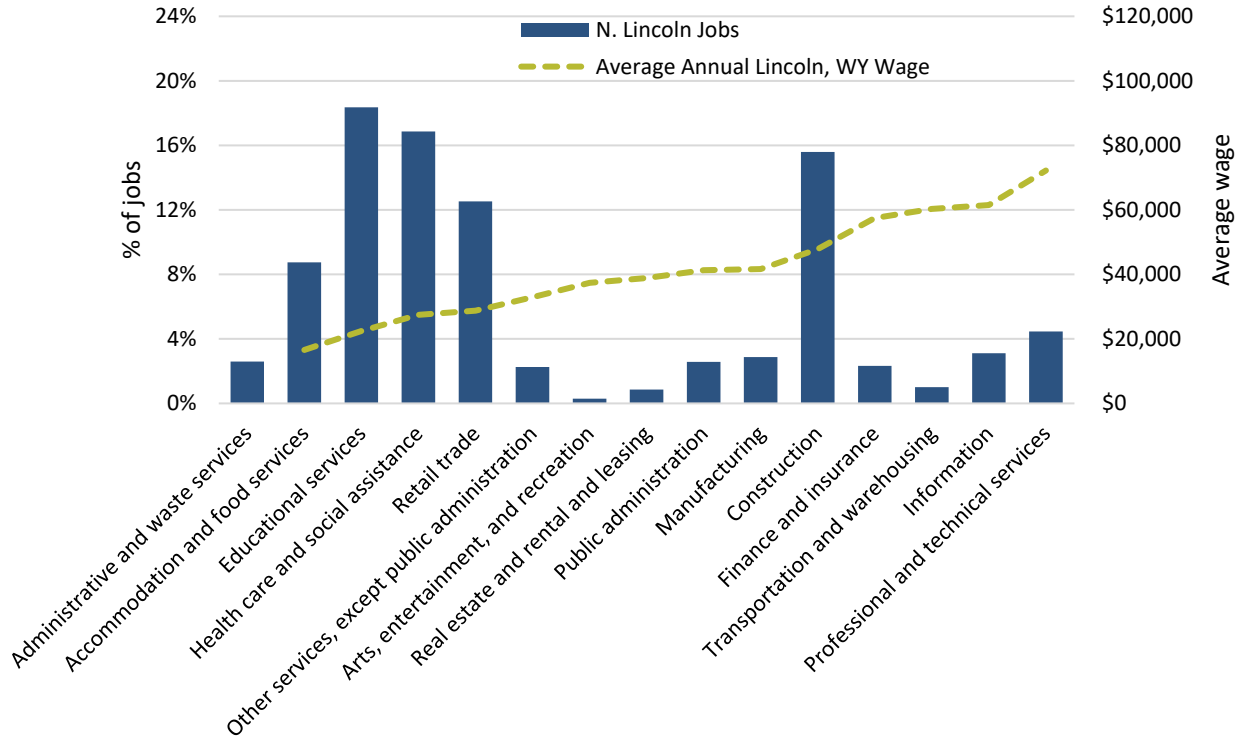
Baseline and Peak Employment, 2019

	Year-round Baseline Jobs	Peak Jobs (June)	Peak % over base
Lincoln County, WY	6,210	6,885	11%

Source: QCEW

Wages and Jobs by Sector

The average wage paid in N. Lincoln County, Wyoming, in 2020 was about $42,300, which is about 30% lower than in Teton County, Wyoming, but similar to that paid in Teton County, Idaho. Overall wage growth has picked up in the past 5 years, following recovery from the Great Recession, increasing an average of 4.9% per year since 2015. Preliminary 2021 wage data indicates growth will continue.



Source: QCEW

Three N. Lincoln County industries account for 51% of the jobs.

- Educational services account for over 18% of jobs, but it is one of the lowest paying industries. It is also a sector that has declined over the past 5 years.
- Health care and social services, also a low paying industry, accounts for another 17% of jobs.
- Construction, which pays more than the average wage, is the third largest sector, accounting for 16% of jobs in 2019. Construction jobs have increased the past couple of years.

Jobs per Employee and Employees per Household

The number of jobs per employee and the number of employees per employed household are used to translate job growth into the number of housing units needed by workers to fill new jobs.

- Workers in the Teton Region, hold about 1.3 jobs on average during the year. Households in N. Lincoln County have about 1.7 employees per household.
- The number of jobs held fluctuates with the seasons. Employees hold an average of 1.4 jobs over the summer and 1.3 jobs over the winter. Many employees, particularly in lower paid service positions, hold more than one job. This was noted both by employers, as well as respondents to the survey.

Average Jobs per Employee by Season: Teton Region

Year-round Jobs per Employee	Additional Summer Season Jobs	Additional Winter Season Jobs	Average jobs held during the year
1.1	0.3	0.2	1.3

Commuting

About 17% of employees who work in N. Lincoln County commute into the area for work from homes outside of the county. This reflects average year-round commuting, meaning it includes employees filling year-round and seasonal jobs. This equates to about 935 workers traveling into the county for work.

# of commuters:	N. Lincoln County, WY
Total jobs (2021)	7,400
Jobs/employee	1.3
Employees filling jobs	5,650
% commuting in for work	17%
# commuting in for work	935

Source: QCEW, BEA, 2019 5-Year ACS, LEHD, consultant team

To the extent employees are commuting into Lincoln County, they are coming from areas outside the Teton Region. Very few commute from Teton County, Wyoming, where housing costs are much higher.

Conversely, about 65% of workers living in N. Lincoln County commute to Teton County, Wyoming for work. Lincoln County represents an informal bedroom community to the large employment center in Teton County, Wyoming, providing less expensive ownership and rental options for Teton County, Wyoming, workers than available nearer their job. With escalating

When workers find homes in N. Lincoln County, often household members end up also taking jobs locally, which benefits local businesses when unemployment rates are low and labor is scarce. This is shown below, where about one-third of households that have an adult that commutes to Teton County, Wyoming, for work, also has at least one adult who also works in N. Lincoln County. When workers get weary of the commute, all household members may take jobs locally.

> *"When our landlord sold their house in Jackson we decided to buy in Alpine... It was the best decision ever... If I can find a good paying good in Alpine, I'll never go to Jackson again."*

Employment Mix of Households with Out-Commuters to Teton Wyoming: 2021

Source: 2021 Employee/household survey
*In a "split household" at least one adult works in N. Lincoln County and one commutes out for work

The primary commute mode used by N. Lincoln County residents that commute to Teton County, Wyoming, for work is to drive alone. About 12% of respondents utilized bus service. A few noted they would use the bus more if better options (e.g., times, frequency) existed. Primary complaints include the long distance, hours, difficulty in bad weather, and expense.

[63] See Chapter 5 - Housing Market for more information

"Living in Alpine wouldn't be so bad, if there were more bus schedule options available. Only able to take the bus if you work an 8-5 job."

"[H]ave second job to pay for gas to commute to Jackson."

-2021 Employee/household survey comments

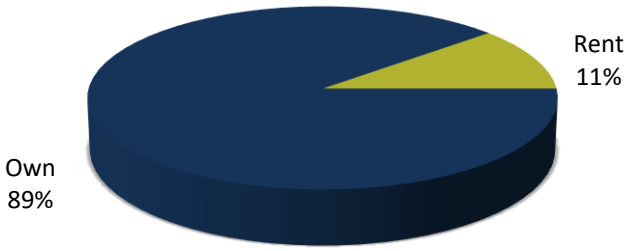
Unfilled Jobs

With unfilled positions, businesses struggle to provide quality services and operate profitably. Because employees need housing, which is scarcely available in the Teton Region, increasing housing options for local workers provides an important competitive advantage for attracting employees to fill vacant positions.[64]

Although a handful of Lincoln County employers responded to the survey (10 businesses), respondents reported that 16% of jobs were unfilled, which is similar to that reported by Teton County, Idaho, and Teton County, Wyoming, employers. This aligns with other information above, indicating that changes in jobs and the N. Lincoln County economy are more in line with the Teton Region rather than counties to the south or east.

	Unfilled Jobs
# jobs unfilled	1,185
% jobs unfilled	16%

Source: 2021 Employer survey



[64] See Regional Overview; see also Teton County reports Chapter 3 – Jobs, Seasonality, and Commuting for a summary of 2021 Employer survey results on how the scarcity and high cost of housing impacts their ability to fill jobs and recruit and retain employees.

Retiring Employees

Ten (10) percent of survey respondents working N. Lincoln County, and 16% of employees living in N. Lincoln County in total, expect to retire within five (5) years.

- Pending retirees tend to hold more senior positions and be skilled staff.
- Housing is a primary concern. Nearly all of employees that expect to retire have stable housing because they own their homes. Many purchased 10 or 20 years ago or during the 2007/08 recession. New employees struggle to find homes to rent and the vast majority will not earn enough to purchase.
- Some retiring employees will stay in the community. For those that decide to move, the homes they vacate likely not be affordable for the employees who follow.

Tenure of Employees in the Teton Region that Plan to Retire Within 5 Years:

Source: 2021 Employee/Household Survey

Pending retirees and the aging population present potential other challenges. For retired residents that prefer to age in place, lower maintenance, smaller patio homes or attached product are often desired as residents age. The need for senior care services and life care or assisted care options will also increase. Finally, rising property taxes are a burden on income-earning households in fast rising home price markets, and can be a particular challenge for senior households on fixed incomes.

"Have to sell in order to retire. Cost of living is too high for a fixed income."

-2021 Employee/household survey comment

Chapter 4 – Housing Inventory

Housing Units – Number and Occupancy

N. Lincoln County, WY has 6,998 housing units. Housing units have been added at a rate of about 1.9% per year since 2015, which is over four times the rate during the previous five years (about 0.4% on average).

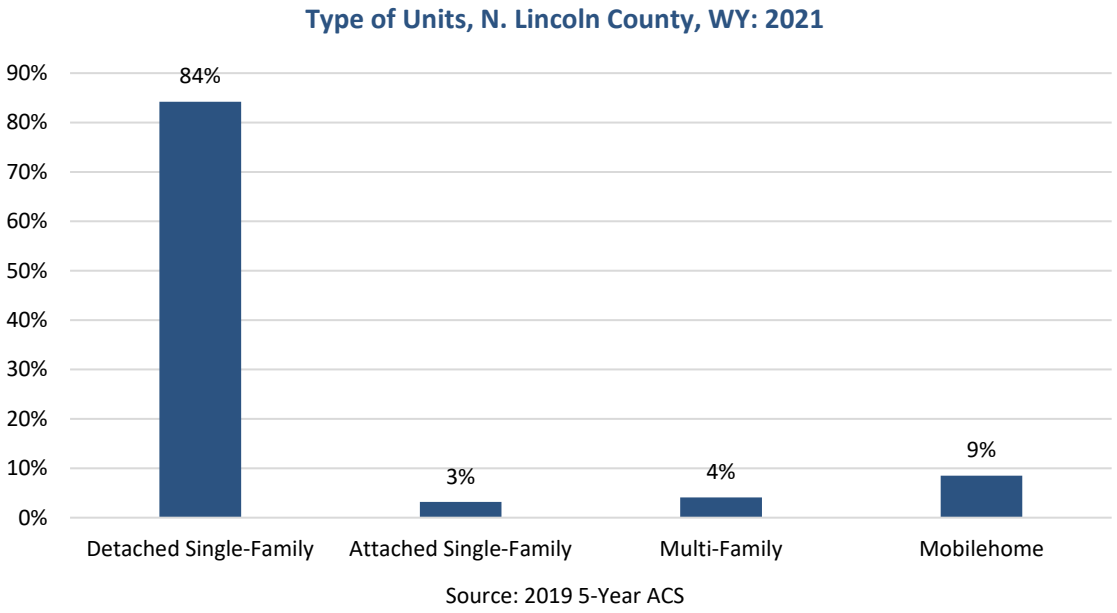
Housing Unit Estimates, N. Lincoln County, WY: 2010 to 2021

	2010	2015	2021 (est)	2015-2021 Annual Growth Rate
Housing Units	6,113	6,246	7,000	1.9%

Source: 2010 Census, 2020 Census, Consultant Team

Occupancy

About 82% of N. Lincoln housing units are occupied by resident households. The other 18% are second homes, short-term rentals, or vacant in the transition of being sold or rented. Occupancy of homes in N. Lincoln County increased from 76% in 2010.



Housing Occupancy, N. Lincoln County, WY: 2000-2020

	2000	2010	2020
Occupancy Rate	75%	76%	82%

Source: 2000, 2010, 2020 Census

Types of Units

There is little diversity in the housing stock in N. Lincoln County. Housing units are predominately single-family homes (84%). About 4% of units are multi-family and 9% are mobile homes, which are more affordable options for local employees. Increasing the diversity of housing types would support greater affordability and mobility in the market.

Housing unit occupancy by income level indicates the extent to which different housing types may provide "naturally occurring" affordable housing. When considering policies that can improve affordability for residents, ensuring that zoning codes allow more affordable product types to be built is important.

The below table shows the type of housing units occupied by income level (AMI) in the Teton Region based on 2021 employee/household survey responses. The sample includes respondents that are residing in market rate housing, meaning that the table excludes respondents that are living in employer-assisted or income-, employment-, rent- or price-limited homes. As shown:

- Households with incomes greater than 120% AMI are more likely than other households to live in single family homes and less likely to live in multi-family units.
- Just over one-third of households earning between 80% and 120% AMI are occupying multi-family units (apartments, condominiums, or townhomes/multi-plexes). Almost one-half (45%) of households earning under 50% AMI occupy attached product.
- Accessory dwelling units predominately provide housing for households earning between 50% to 120% AMI.
- Households earning under 80% AMI are the most likely to reside in mobile homes. They are also most likely to not be permanently housed currently, but rather couch surfing, camping, or living in a vehicle.

Type of Unit Occupied by AMI: Teton Region, 2021
(Respondents Residing in Market Rate Homes)

	Less than 50%	50 to 80%	80 to 120%	120 to 200%	Over 200%

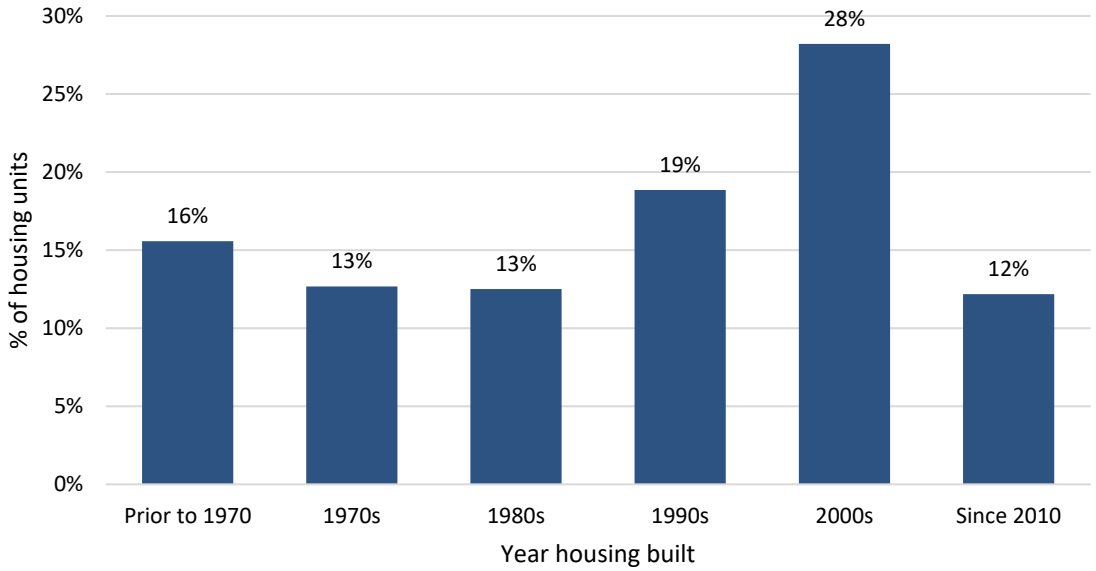
TOTAL	100%	100%	100%	100%	100%



Source: 2021 employee/household survey

Age of Units

Development in N. Lincoln County accelerated in the 2000's, when about 28% of the area's housing stock was constructed. Development slowed significantly during the 2007/08 recession, but beginning in 2015, construction has again picked up.

This is different from development patterns in Teton County, Wyoming, in which the largest percentage of housing stock was constructed in the 1990's (25%), and construction slowed down in the 2000's (20% of units built).

Age of Units, N. Lincoln County, WY: 2021

Source: 2019 5-Year ACS, 2020 Census, Consultant Team

Income Restricted/Subsidized Housing

There is one apartment complex in N. Lincoln County that is income- and rent-restricted to remain affordable for residents. Alpine Park Apartments is a low-income housing tax credit project (LIHTC) that was put into service in 2019. The 24 units are priced affordable for households earning below 80% AMI (or about $60,000 for a 3-person household). Units are 100% occupied.

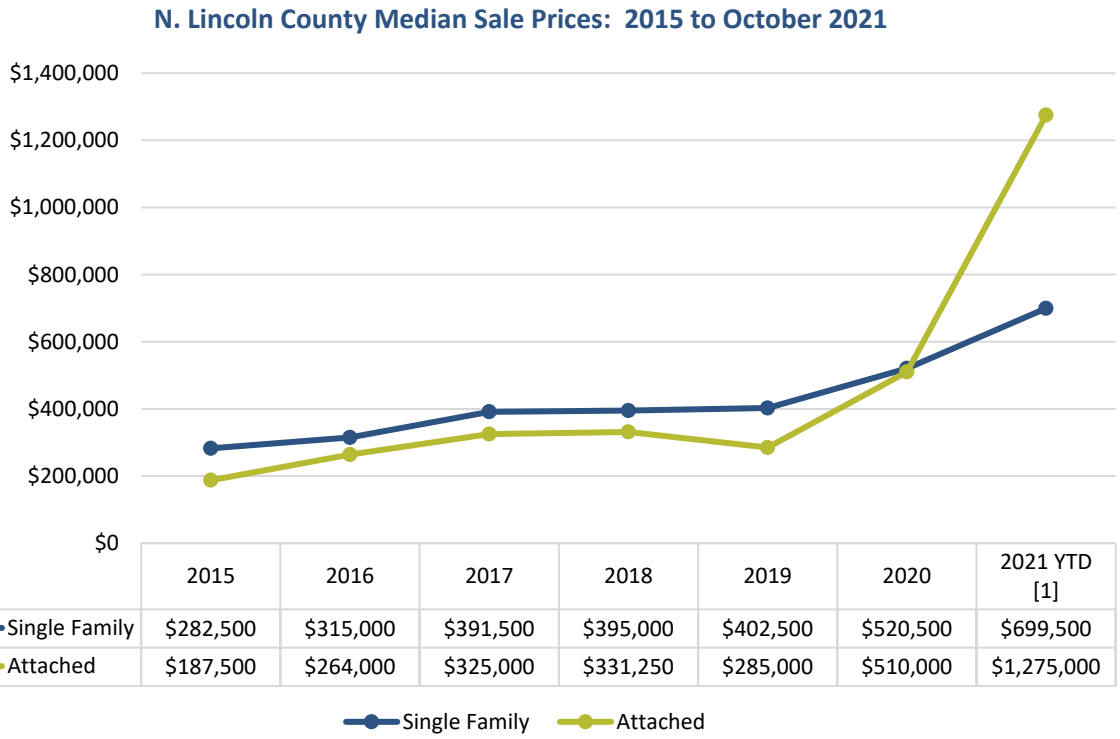
Chapter 5 – Housing Market

This chapter evaluates how key aspects of the housing market in Teton County, Idaho, have changed in recent years. It provides an overview of:

- Home sale and rental prices,
- Recent and current availability of homes,
- The affordability of homes to local residents and employees, and
- Real estate agent and property manager observations about housing market changes in the past 20 months during the COVID-19 pandemic.



Home Ownership Market

The housing market in N. Lincoln County is relatively small, consisting of only about 75 home sales per year on average from 2015 to 2020, or roughly 6 per month. Therefore, readers should note that percentages included herein are based on relatively small numbers of transactions.

Price Trends (2015 to October 2021)

Home sale prices have escalated over the past few years to levels that are unaffordable to most local residents and employees.

- From 2015 to 2020 the median price of a single family home increased by 13% per year on average; condos and townhomes (attached product) increased by 22% per year on average.
- The median sale price of attached product during the first ten months of 2021 was $699,500 for a single family home.
- Only 9 attached homes (i.e., condominiums or townhomes) sold through October 2021. The median sale price was over $1 million. Most were luxury properties complete with an airplane hanger. Only two units sold for under $500,000.

	2015	2016	2017	2018	2019	2020	2021 YTD [1]
Single Family	$282,500	$315,000	$391,500	$395,000	$402,500	$520,500	$699,500
Attached	$187,500	$264,000	$325,000	$331,250	$285,000	$510,000	$1,275,000

Note: inclusive of sales with a known price greater than zero
[1] last sale on Oct 29, 2021
Source: MLS, consultant team

Price Per Square Foot

To better understand price trends and to normalize differences in home size, the table below evaluates changes in the average annual sale price per square foot from 2015 through sales in the first ten months of 2021. As shown:

- From 2015 to 2020, the price per square foot of single family homes and attached product increased by 10% per year on average, respectively.
- The average price per square foot of single family homes sold in the first ten months of 2021 increased by 54% over the 2020 average, and 185% for attached product.

Price increases far exceed the change in local average wages (4.9% per year) since 2015, meaning that affordability for locals is eroding.

Average Sale Price Per Square Foot: 2015 to October 2021

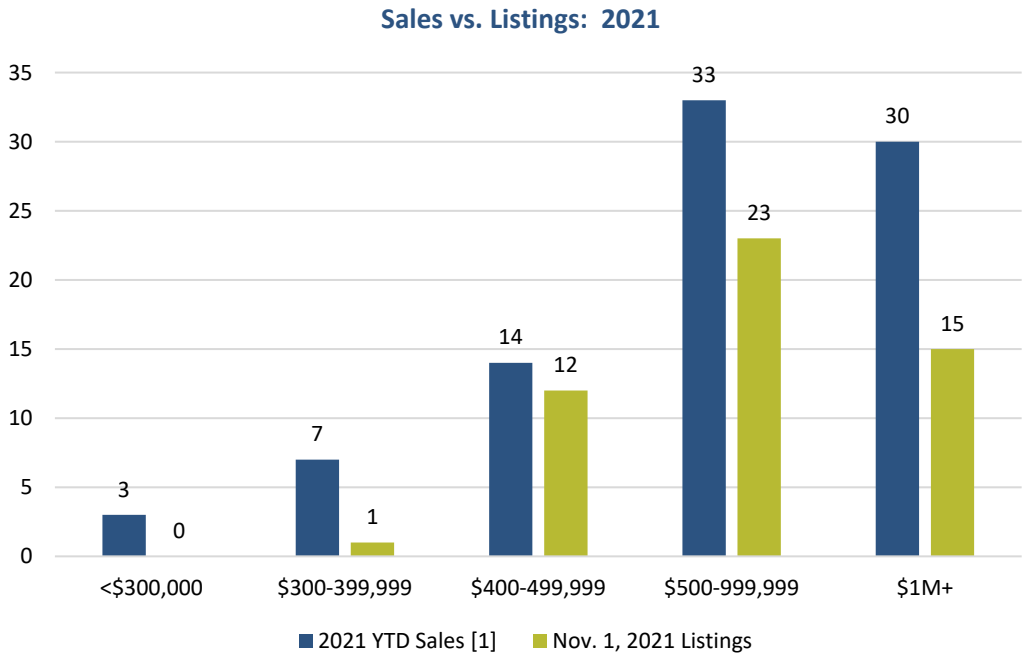
	Single Family	Attached
2015	$187	$125
2016	$229	$188
2017	$269	$135
2018	$232	$178
2019	$225	$216
2020	$296	$201
2021 YTD [1]	$456	$572
CAGR 2015-2020	10%	10%
% change 2020 to 2021 YTD [1]	54%	185%

Note: inclusive of sales with a known price greater than zero
[1] last sale on Oct 29, 2021
Source: MLS, consultant team

Homes for sale under $300,000 have all but disappeared from the market in recent years, and, over the last two years, homes priced between $300,000 to $500,000 have significantly declined.

- The share of sales under $300,000 fell from 58% in 2015 to 3% in 2021 – a drop of 55 percentage points. Forty-six (46) sales under $300,000 occurred in 2015, down to only 3 sales in 2020.
- The share of sales between $300,000 and $500,000 fell from 51% in 2019 to 24% in 2021. The option of finding homes for $500,000 or less in N. Lincoln County is quickly disappearing.

Home Sale Price Distribution by Year: 2015 to October 2021



Note: inclusive of sales with a known price greater than zero
[1] last sale on Oct 29, 2021
Source: MLS, consultant team

Availability

From 2015 through 2019, about 75 homes were sold each year on average in N. Lincoln County. This rose by about 30% (97 homes sold) in 2020. The pace of buying continued to be high in the first 10 months of 2021 with 87 home sales.

There were 51 homes listed for sale as of November 1, 2021, only 13 of which (25%) were priced below $500,000. Ten of these were condos and townhomes listed for about $440,000 each.

Source: MLS, consultant team

A general industry standard is that when the number of homes available for sale is below a 6-month supply, it is a seller's market – meaning that there are more buyers than homes available to purchase, resulting in rising prices.

The 51 homes listed in November 2021 equates to 6.3-months of supply, generally indicating a good supply of homes for sale. The inventory drops, however, to 3.3-months for homes priced under $500,000. In other words, homes at prices that residents and area employees can afford are in short supply. Conversely, homes priced over $500,000 represent 9.3-months of inventory. The local housing market is not meeting local resident and employee needs.

Local Workforce Affordability

The scarcity of homes for sale poses a challenge to all buyers, regardless of income. It is a more significant challenge, however, for local residents and employees. The majority of residents who own earn between 50% up to 200% AMI (65%); only 18% earn above this level. Homes priced above $600,000 may be of interest to commuters from Teton County, Wyoming, where wages are higher, but most N. Lincoln County residents need lower priced homes.

> *"I cannot afford to buy or rent a home. when our child graduates in the next couple of years we will be moving."*
>
> *-2021 Employee/household survey comment*

- Only four homes were listed for sale under $400,000 at the start of November 2021. Homes in this price range are now essentially non-existent.
- With only 18 homes for sale in the $400,000's and 85% of listings over $500,000, the option to buy a home is increasingly out of reach for the local workforce.

Affordability of Current Listings Compared to Average Household Income

AMI	Max Affordable Price (3-person household) [1]	Owner Household Distribution	Nov. 1, 2021, Listings

Rental Market

Rent Trends and Local Workforce Affordability

Compared to local wages, the rents in N. Lincoln County are more affordable than in Teton County, Idaho, or Teton County, Wyoming. That does not, however, mean that rents are generally affordable for residents.

- Recent rent rises have occurred in the Teton Region at rates of 9% or more per year over the past several years.
- Renters on the 2021 survey report that their recent yearly rent increase was anywhere from $200 to $1,200 per month, averaging $470.
- Rent increases far exceed increases in wages (4.9% per year on average since 2015), meaning that rentals are becoming less affordable for residents.

> *"We have always worked full time jobs sometimes more than one. It's heart breaking the more we save it still never enough to afford a home because of the pricing increases."*
>
> *-2021 Employee/household survey comment*

Based on survey responses, current renters in the county need an income of about $63,000 on average to afford the overall average rent (about 84% AMI). Advertised rentals, which is what new households coming to the county are likely to find, require a household to earn 91% AMI on average, or an income of $68,000 for a 3-person household.

Rent Prices by Bedroom Size: 2021

	0/1-bedroom	2-bedroom	3+-bedroom	Overall Avg.
October-November 2021 average listed rent	$995*	$1,467	$2,229	$1,702

Availability

As a general rule, vacancy rates at or below 3% are very low, double-digit vacancy rates are very high, and a vacancy rate of around 6% that is trending downward typically indicates to developers that construction of additional units should begin.

Perhaps more significant to the struggles of renters in N. Lincoln County is the lack of supply and the resulting continued upper pressure on rents. The high and rising rents are driven by the extreme shortage of rentals and strong demand. The pandemic brought a wave of remote workers to the Teton Region, which property managers noted are able to pay much higher rates than local wages can support. This is paired with the continued demand from workers in Teton County, Wyoming, particularly as more are forced to move out of the county due to loss of rental supply.[65]

A search for advertised rentals over a two month period from October to November 2021, only produced 14 rental listings. This is equivalent to less than a 1% vacancy rate per month, which is extremely low. When vacancy rates are this low, the rental market is near capacity and cannot absorb new residents or employees moving to the area. This results in several issues, all of which are being experienced throughout the Teton Region:

- Renters have difficulty moving from one unit to another as their circumstances change;
- Renters are vulnerable to increasing levels of cost burden, because there is nowhere to move to if the landlord seeks to increase their rent;
- Renters fear reporting needed repairs to landlords due to concerns of retaliation through rent increases or nonrenewal of lease;
- New employees struggle to find housing when hired by local businesses;
- Rents increase at rates much faster than incomes; and
- Landlords have little incentive to make repairs and capital investments.

"My daughter pays $800 for a studio in Afton and it is all she can find to rent. Small, old, and expensive but there is nothing else to rent."

"Due to housing be so high in demand, the landlord feels justified in raising the rent an additional $700 per year."

-2021 Employee/household survey comment

[65] See Regional Overview – Forced to Move

Chapter 6 – Housing Units Needed

This section addresses the question:

> *How many additional housing units are needed to address housing deficiencies for residents and support the labor force needed to sustain businesses and the economy.*

Needs are projected through 2027 and quantified in two categories:

- Catch-Up Needs – the number of housing units needed now to address current deficiencies in housing based on employees needed to fill unfilled jobs and the number of units needed for a functional rental supply.
- Keep-Up Needs – the number of units needed to keep-up with future housing demand through 2027 based on job growth and jobs vacated by retiring employees. Housing shortages worsen when local job growth and the need for more workers exceeds the growth in available housing units.

This section estimates housing units needed to support employers, keep up with future job growth and improve housing options for area residents based on information presented in other sections of this report. Estimates are a subset of the total demand for housing in the county. Estimates do not include current waitlists for housing, overcrowding, or households that will be forced to leave due to housing conditions.[66] Nor do figures represent the entire housing market – remote workers or retirees moving in from elsewhere, second homeowner purchases, and other market segments, which are outside the scope of this analysis.

Catch-up Needs (Current Conditions)

Unfilled jobs

Labor is in short supply, both locally and nationally. In such a competitive environment, the near-zero rental vacancy rates, and high and rising home prices and rents, make it even more difficult to attract the already scarce labor pool to the area. Eighty-percent (81%) of Teton Region employers responding to the 2021 employer survey stated that the lack of housing affected their ability to find and keep employees. More housing that local employees can afford is needed for businesses to hire and retain the workers they need to thrive.

Employer survey respondents reported that 16% of jobs were unfilled this summer, which is high and has been affecting business operations and employee satisfaction. Because 100% of jobs are rarely filled, the following estimate seeks to lower the unfilled job rate to 5%, which was more typical prior to the pandemic.

About 85% of employees reside in the Teton Region. If this pattern is maintained, then 310 homes are needed locally to bring the current 16% unfilled job rate down to a 5% rate.

[66] See Regional Overview – Housing Problems

Units needed to help fill jobs	
A. Current unfilled jobs (16%)	1,185
B. Reduced unfilled jobs (5%)	370
Jobs to fill (A – B)	815
Jobs per employee	1.3
Employees per household	1.7
Housing units needed	365
% of employees living in the Teton Region	85%
Housing needed for N. Lincoln County employees to live in the Teton Region	310

While this catch up need is important to understand for relieving current business employee shortages, much of this figure is also incorporated in the estimate of future job growth. This potential for double-counting is addressed in the summary of housing needs later in this section.

Functional Rental Supply

The current rental supply in the county is not functional because vacancies are about 1%, placing substantial upward pressure on rents. When vacancy rates are this low, the rental market is near capacity and cannot absorb new residents or employees moving to the area, much less provide opportunities for current residents to find more suitable rentals as their housing needs change. Renters are "stuck" in their homes, and subject to burdening rent increases.

A 5% vacancy level, while still low, provides some choice and availability of units for residents and employees. To increase the vacancy rate to 5%, approximately 55 additional rental units are needed.

Rentals Needed for a Functional Market	
Total rentals (2021)	1,030
Number of rentals if 5% vacancy rate	1,085
New rental units needed	55

Future (Keep-Up) Needs

Retiring employees

Employers will need to fill the jobs vacated by retirees in addition to any newly created jobs. Some retirees will leave the area upon retirement; however, when they sell their homes, the majority will be purchased by second-home owners or remote workers rather than local employees.

About 10% of employee/household survey respondents that are employed in Lincoln County stated that they expect to retire over the next five years. Assuming that 80% of retiree homes will not be available to new employees filling vacated jobs, 335 homes will be needed.

About 85% of employees reside in the Teton Region. If this pattern is maintained, then 230 homes are needed locally.

Retiring employees	
% to retire by 2027	10%
# to retire	570
Employees per household	1.7
Total housing units	335
Needed housing units (80%)	270
% of employees living in the Teton Region	85%
Housing needed for N. Lincoln County employees to live in the Teton Region	230

New Jobs

To keep up with estimated job growth over the next five years (1,789 new jobs), approximately 805 additional housing units will be needed. Because the regional nature of this study focuses on the Teton Region as a whole, the below estimate shows how many housing units are needed to keep new workers in the Region based on current commuting patterns. The next section shows how many of these units may be needed in N. Lincoln County based on various assumptions.

About 85% of employees reside in the Teton Region. If this pattern is maintained, then 685 homes are needed locally.

Estimated Housing Needed by the Workforce Filling New Jobs, 2021 – 2022

	Low
Increase in Jobs between 2021 to 2027	1,789
Jobs per Employee	1.31
Employees per household	1.7
Housing needed	805
% of employees living in the Teton Region	85%
Housing needed for N. Lincoln County employees to live in the Teton Region	685

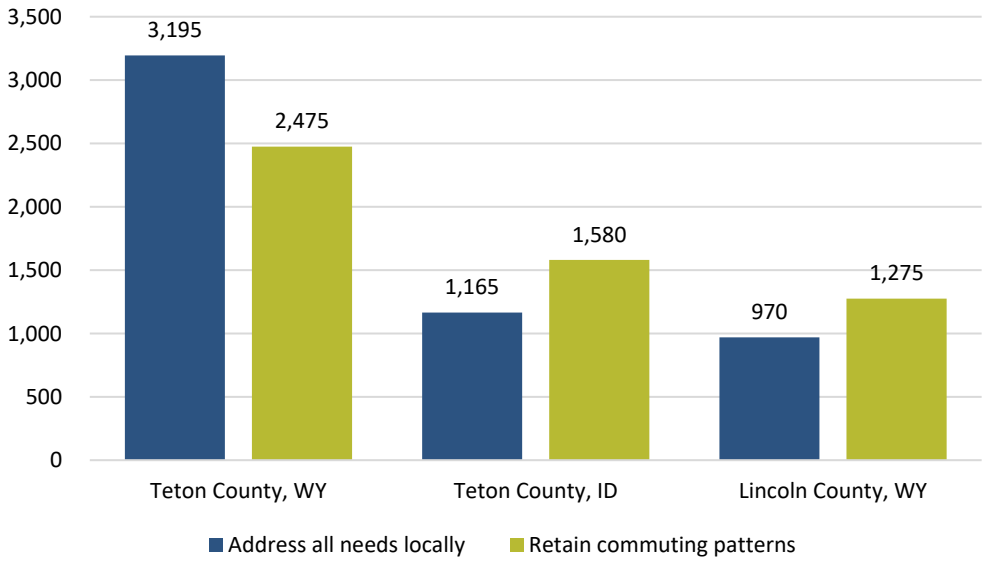
Regional Distribution of Catch-Up and Keep-Up Needs

Based on estimated catch-up and keep-up needs in N. Lincoln County through 2027, an additional 970 housing units will be needed to support employees, residents, and businesses in N. Lincoln County. The number of housing units needed in N. Lincoln County will vary depending upon whether the total housing need is provided locally, or if current commuting patterns within the Teton Region are retained and units are constructed based on where employees presently live. As a bedroom community for Teton County, Wyoming, if current commute patterns are retained, then the number of units needed within N. Lincoln County increases because Teton County, Wyoming, employees will need homes.

- If each county in the Region addresses their full housing need locally, 970 homes are needed in N. Lincoln County.

- If current commuting patterns are retained, the number of units rises to 1,275.

In N. Lincoln County, Wyoming, about 60% of the housing needed should be priced below-market. As discussed further below, this means ownership housing priced below $600,000 (200% AMI) and rentals priced below $1,600 per month (90% AMI).



Summary of Housing Needs Through 2027

	Address All Needs Locally	Retain Commuting Patterns
Catch-Up	**55**	**55**
Unfilled Jobs (reduce from 16% down to 5% unfilled)	*310*	*415*
Functional rental supply	55	55
Keep-Up	**915**	**1,220**
New jobs (3.7% growth)	685	915
Retiring employees (10% retiring)	230	305
TOTAL through 2027	**970**	**1,275**
Below market (60% of units)	580	765
Market rate (40% of units)	390	510

*Housing needed to fill currently unfilled jobs is shown in the table to illustrate the existing shortage of housing related to filling current positions. This number, however, is largely a subset of the new job growth estimate so is not included in the overall total to conservatively prevent double-counting.

The figure below shows the total housing needs through 2027 in the study area based on whether all needs are addressed locally or if current commuting patterns are retained.

Housing Needed Through 2027, Teton Region Counties
(5,330 total – 60% to 80% priced below market)

Needs by Own/Rent and Income

Ownership and rental housing for local employees and residents is needed. On the rental side, the majority of workers filling new jobs will rent homes (about 70%). On the ownership side, a significant percentage of current renters residing in the Teton Region want to buy homes (43%).[67] If ownership opportunities are provided, this can then free up rentals for occupancy. These dynamics support providing a higher ratio of rentals than currently exist, at about a 50:50 split.

The precise ratio, however, is dependent upon the community's desired direction and housing policy. Rentals are needed to help recruit new workers and residents to the region; ownership is needed to retain year-round residents and support community stability.

Summary of Housing Needs by Own/Rent Through 2027

	Low (housing aligned with job location)	High (housing aligned with current commute patterns)
Units needed through 2027	**970**	**1,275**
Ownership	485	635
Rental	485	640

The following table shows the income targeting for the additional units needed based on the income distribution of renter households residing in N. Lincoln County. As shown below:

- Market rate rentals in the county currently serve households earning about 90% AMI.[68] Resident renters primarily earn under 80% AMI (62%), which is where most rentals should be targeted.
- New development in the pipeline should be considered in light of the below to assess where the current market is providing rentals compared to the price points that residents and employees can afford. For example, new rentals in Teton County, Wyoming, can be built at about the 120% AMI level for that county without subsidy; new unsubsidized rentals in Teton County, Idaho, are averaging about 90% AMI.

Rental Units Needed by AMI Through 2027, N. Lincoln County, WY

	AMI				
	≤50%	50.1% - 80%	80.1% - 100%	100.1% - 120%	>120%
Max. Income	$37,350	$59,800	$74,700	$89,640	>$89,640
Max. Affordable Rent	$935	$1,495	$1,870	$2,240	>$2,240
Renter Income Distribution	39%	23%	9%	3%	26%
Rental Units Needed by AMI*	**220**	**130**	**50**	**15**	**145**

Incomes at each AMI are reported for a 3-person household

* Units Needed total is based on the mid-point of the low and high housing need estimates

[67] See Regional Overview – Housing Problems

[68] See Chapter 5 – Housing Market

The following table shows the income targeting for additional units needed based on the income distribution of owner households that reside in N. Lincoln County.

- The majority of owners earn under 120% AMI; however producing homes for ownership for households earning under 60% AMI is often not feasible except through self-help build programs, such as Habitat for Humanity.
- The core first-time homebuyer market earns between 50% up to 120% AMI, comprising close to 50% of owners in N. Lincoln County. Only one home is currently listed for sale at a price affordable at this income range (e.g., below $400,000).
- The current housing market provides some attached product that households earning up to 150% AMI could afford (e.g., priced between $400,000 and $600,000), but single family homes are generally priced for households earning 200% or more. The shift to this higher price point occurred largely within the past two years.[69]
- When considering ownership product for local residents and employees, most should be priced between $200,000 up to $600,000 (80% to 200% AMI); very few resident owners have incomes above this amount. For renters looking to buy, product priced for households earning primarily between 50% AMI up to 120% should be the focus ($160,000 to $400,000). Homes priced from $300,000 up to $750,000 is also a prime purchase range for Teton County, Wyoming, employees that are wanting to buy homes.

Ownership Units Needed by AMI Through 2027, N. Lincoln County, WY

	AMI					
	≤50%	50.1% - 80%	80.1% - 120%	120.1 - 200%	200.1 - 300%	>300%
Max. Income	$37,350	$59,800	$89,640	$149,400	$224,100	>$224,100
Max. Affordable Purchase Price*	$155,200	$248,500	$372,500	$620,800	$931,100	>$931,100
Owner Income Distribution	16%	16%	23%	26%	11%	7%
Ownership Units Needed by AMI**	**90**	**90**	**135**	**145**	**60**	**40**
For sale listings	0	0	1	17	15	18

Incomes at each AMI are reported for a 3-person household

*Assumes 4.5% interest rate 30-year loan, 5% down, and 20% of costs to taxes, insurance, HOA

** Units Needed total is based on the mid-point of the low and high housing need estimates

[69] See Chapter 5 – Housing Market

Appendices

Appendix A – Study Methodology, Data Sources, Definitions, and Acknowledgements

Primary Research

Primary research was conducted to generate information beyond that available from existing public sources and included:

- 2021 Employee/Household Survey
- 2021 Employer Survey
- Interviews/focus group

The survey instruments, data output, and open ended comments from these surveys are attached as an appendix to this report

2021 Employee/Household Survey

To obtain responses needed for the depth of analysis conducted, several distribution methods were utilized and included outreach to both the English- and Spanish-speaking community. Outreach occurred throughout Teton County, Wyoming, and Teton County, Idaho, with significant assistance from these communities, as follows:

- An on-line survey in English and Spanish. The link for the survey was distributed by:
  - Chambers of commerce to their membership;
  - Major employers to their employees;
  - Media (newspapers and radio stations);
  - Sharing via social networks; and
  - Social service and housing organizations to persons they serve.
- Outreach to the Spanish-speaking community. The consultant team worked closely with members of the housing stakeholder group and local organizations to do targeted outreach to the Spanish-speaking community. Our goal was to receive a representative response from this population. We procured the services of Voices JH for this purpose. Voices JH worked with 6 community leaders from the Latinx community to assist in this outreach. These individuals gathered responses to the survey through a variety of means, including texting the survey, calling personal contacts and helping them fill it out over the phone, meeting them at their homes to assist them in taking the survey, working with community organizations to reach their clients, and canvassing outside public spaces. Outreach was conducted in Jackson, Victor, Driggs, Tetonia, Alta, and Alpine.
- Survey instruments. Two employee/household survey instruments were used. At the recommendation of local organizations conducting outreach to the Spanish-speaking community, a shortened version of the Spanish version of the survey was created to make it easier to conduct via personal interviews in a timely manner. Care was taken to ensure that core questions needed for this analysis were retained to maintain data integrity and representation.

- A total of 3,478 valid responses were received from residents, representing 23% of households and 19% of employees in Teton County, Wyoming, and Teton County, Idaho. Most responses were from employees in the local workforce. Responses received from Lincoln County respondents primarily work in Teton County, Wyoming, or Teton County, Idaho given that outreach for the survey was conducted within these two counties.

The table below shows the number of surveys received based on where respondents live and by survey type:

	Regional Total	Teton County, WY	Teton County, ID	N. Lincoln County, WY	Outside of Region
Online English	3,478	2,143	659	254	39
Online Spanish	81	273	97	13	0
Interviews – Spanish	302				
Total	3,478	2,416	756	267	39

Source: Consultant team

Survey results were compared to the 2010 US Census for key variables and weighted, where needed, to ensure that responses represent the population as a whole in each county and the region. Weighting occurred by whether respondents own or rent their homes, type of household (E.g., live alone, couples with children, etc.), age, and income/AMI level.

Importantly, weighting for the Hispanic/Latino community was not needed, which is rare. The representative sample received through local outreach assistance means that there are sufficient responses to conduct crosstabs with multiple questions to learn more about their specific housing needs. While this study reports on big picture observations where responses from this and other populations differ from the Region overall, it is beyond the scope of this study to conduct a specific analysis on this population. Importantly, however, this data is available for a deeper dive if a specialized study is conducted.

The margin of error for survey tabulations is within 1.5% at the 95% confidence level. This means that, for tabulations involving the entire Region, there would be 95% confidence that any given percent reported is no more than plus or minus 1.5 percentage points from what is actually the case. When results are provided independently for Teton County, Idaho, and Teton County, Wyoming, tabulations are within 2% to 3%.

2021 Employer Survey

The employer survey was distributed to businesses in Teton County, Wyoming, and Teton County, Idaho. Distribution occurred through direct outreach from the Housing Stakeholder Group and their connections, local Chambers, economic development groups, newspapers, and social media. The survey probed the number of employees, where workers live (commute patterns), employee retention and

recruitment issues, unfilled jobs, retiring employees, and specifics on the provision of housing units and/or assistance to employees.

A total of 262 businesses responded, representing 8% of businesses in both Teton County, Wyoming, and Teton County, Idaho, and 33% of jobs. A total of 206 have locations in Teton County, Wyoming (excluding Alta); 64 have locations in Teton County, Idaho and Alta; and 10 have locations in Lincoln County, Wyoming.

Interviews and focus group

Interviews were conducted with numerous employers, real estate agents, property managers, non-profits, government organizations, community residents, builders/developers, elected officials, and other stakeholders to supplement data needs and gather local perspectives on community housing concerns, issues, impacts, and observations. A focus group was also conducted with the Young Professionals of the Tetons to understand their particular challenges with building careers and families in the Teton Region.

Secondary Data

A variety of sources of published information were used in the preparation of this report, including but not limited to:

- 2000, 2010, 2020 (limited) US Census data and population projections. This information is used to identify changes in the Teton Region residents and households over time and identify the demographics of the Area.
- American Community Survey data (ACS) to understand general trends since the 2010 Census.
- Employment information from the Quarterly Census of Employment and Wages (QCEW) and US Bureau of Economic Analysis (BEA).
- 2021 Area Median Income from the Federal Department of Housing and Urban Development (HUD).
- Current MLS listings, recent home sales and historic sale trends acquired through local real estate agent assistance.
- Property ownership and residential records acquired through the respective Assessor offices.
- Various records from Teton Region planning and building departments, including Teton County, Wyoming, the town of Jackson, Teton County, Idaho, and the city of Driggs and city of Victor.
- Existing reports, including the 2014 Western Greater Yellowstone Region Housing Needs Assessment (Rees Consulting, et al), 2021 Jackson & Teton County Annual Housing Supply Plan, Teton County Joint Housing Authority Supply Plan.

Consultant Team Responsibilities

Wendy Sullivan of WSW Consulting served as the project manager for the Regional Housing Needs Assessment.

Numerous firms assisted WSW Consulting in preparation of this report:

- Williford LLC (Willa Williford)
- Navigate, LLC (Christine Walker)
- Urban Rural Continuum (Andrew Coburn)
- OPS Strategies (Alex Norton)

Andrew Coburn, Research Analyst
Alex Norton, Research Analyst

Definitions/Terminology

Affordable Housing	As used in this report, housing is affordable if the monthly rent or mortgage payment is equal to or less than 30% of gross household income (before taxes). This definition may vary from federal or state programs, which may include utilities, homeowners association fees, or other housing costs.
Area Median Income (AMI)	A term that generally refers to the median incomes published annually for counties by the US Department of Housing and Urban Development (HUD). AMI is used to set income and rent limits for affordable housing programs statutorily linked to HUD income limits (e.g. low-income housing tax credit rentals). Common affordability categories used are as follows: • Extremely Low Income – At or below 30% AMI • Very Low Income –Between 31% and 50% AMI • Low Income – From 51% to 80% AMI • Moderate Income – From 81% to 120% AMI *Note: Jackson/Teton County Affordable Housing Department uses slightly different figures derived from those published annually by HUD. Reference to AMI or equivalent household incomes in the Teton County, Wyoming section use these figures rather than HUD unless stated otherwise.*
American Community Survey (ACS)	The ACS is part of the Decennial Census Program of the U.S. Census. The survey was fully implemented in 2005, replacing the decennial census long form. Because it is based on a sample of responses, its use in smaller areas (under 65,000 persons) is best suited for monitoring general changes over time rather than for precise estimates due to margins of error.

Average household size	This refers to the number of persons living in a housing unit and includes all adults and children.
Catch-up Needs	The number of housing units needed to catch up to meet the current shortfall in housing available for residents.
Cost Burdened	When housing costs exceed 30% of a household's gross (pretax) income. Housing costs include rent or mortgage and may or may not include utilities, homeowner association fees, transportation or other necessary costs depending upon its application.
COVID-19 / COVID	Coronavirus disease 2019, causing global pandemic starting March 2020 and extensive local public health precautions.
Employee Housing	Housing intended for and affordable to employees and households earning local wages.
FHA	Federal Housing Administration, provides secondary market for residential mortgages.
HOA	Home Owners Association, typically part of condominium developments.
HUD	Housing and Urban Development; federal agency providing funding and regulations for low income housing.
Keep-up Needs	Keep-up refers to the number of housing units needed to keep up with job growth and retiring employees to ensure housing is available for employees filling new or vacated jobs through 2027.
LAUS	Local area unemployment statistics
LEHD	Longitudinal Employer-Household Dynamics
LIHTC	Low Income Housing Tax Credit – a federal program to stimulate capital investment in affordable rental housing, administered in Colorado by the Colorado Housing and Finance Authority.
Local Resident Housing	For the purpose of this report, housing that is intended to be affordable or suitable for Teton Region employees and full-time

	residents. The term encompasses the full range of affordability levels for local residents – from very local income to 120% AMI or more.
MLS	Multiple Listing Service used for purchase and sale of residential real estate
Occupied housing unit	Occupied housing unit means housing units that are occupied by persons that consider the South Shore Region as their usual place of residence or that have no usual place of residence elsewhere. (US Census definition). Occupied units are also referred to as resident households in this report.

Acknowledgements

We would like to thank everyone who gave their time, assistance, knowledge, and expertise to this process. Information in this report relied on participation from many individuals and organizations through interviews, data sharing, focus groups, outreach, etc. We are grateful for the time given by everyone we reached out to. We would like to give particular thanks to the Housing Stakeholder Committee, who were instrumental in this entire process.

Information presented in this report is as much based on data and numbers as it is on the experiences and observations of those living in the community, which would not have been possible without local participation. We appreciate the opportunity to work with dedicated communities seeking to better understand and address the housing needs of local residents and employees for the benefit of the communities, economy, and health of the Teton Region.

Appendix B - Teton County WY/Jackson Housing Tools Matrix

Tools / Programs	Definition or Overview	Notes	In Use In		Units Since 2014
LAND USE PLANNING			**Jackson**	**Teton County**	
Accessory Residential Units	Allow Accessory Residential in all or most zones. Provide incentives to build/convert space to ARUs, can be in form of additional density, tap fee waiver or reduction, subsidy to owner, etc. Note that ARUs here do not include units accessory to commercial uses, just accessory to single-family homes (traditional ADUs).	ARU Pilot Program – will launch Q2 2022 Housing may begin compliance on ARU and Town considering adding deed restriction requirement. County ARUs not typically used for long term rentals.	Yes. Town has allowed ARUs in all zones since 2015; allowed in most zones except single family since 1994	Yes. County allows ARUs in all zones except S-TC; primarily considered guesthouses. Employee residency would be more beneficial.	Teton County: 168 town of Jackson: 45
Aligning Planning Documents	Strategic Priority on Affordable housing in all local planning documents, budget setting, and work plans. Consistent recognition of housing as policy priority and alignment between all Planning and Housing Documents.	Priority Driven Budget Process for town of Jackson. Greater alignment of funding for infrastructure, transit, complete neighborhoods, etc could also support housing efforts.	Yes. Some.	Yes. Limited	
Aligning Community Infrastructure Investments	Strategic alignment of infrastructure investments to support affordable housing. Recommend being aggressive in accessing federal funds and state passthroughs as infrastructure recovery funds become available.	Town has moved up and provided infrastructure funding to support housing i.e. Westview townhomes, Hidden Hollow, etc. Town will complete an Impact Investment category (CP Policy 4.3.b) in our 5-year Capital Improvement Plan	Yes, some with more in Process.	Yes, with additional opportunities to support connect to water and sewer, support “complete neighborhoods” and transit.	
Annexation Policies	Negotiating affordable housing as part of annexation agreements.	Prohibited by the State in 2021 at request of Teton County large landowner	No.	No.	
Density Bonus 2:1	2:1 – Ability to maximize building envelope – two market rate square feet for every affordable square foot.	Implemented in 2018. Applies in Jackson Transitional Zones NH-1, NM-2, OR, CR-1, CR-2, CR-3 & DC-2, DC (LDR Div. 7.8)	Yes	No.	Jackson: 140
Density Bonus PUD process			Eliminated in 2018.		

Tools / Programs	Definition or Overview	Notes	In Use In		Units Since 2014
LAND USE PLANNING			**Jackson**	**Teton County**	
Fast Track Processing	Gives priority to development applications with affordable and/or workforce housing.	Implemented in 2018 in Jackson (LDR Sec. 7.8.3.C) No public hearings required. Design review still required in Town.	Yes.	No.	Jackson: 84
Height Variance	Fourth Floor allowed	Allowed in CR-3 zone (LDR Sec. 2.2.13.E.4) This code was a migration from PUD rules in 2018. Hasn't been used in new form yet, minimum lot size is two acres. Consider allowing on smaller lots.	Yes – limited.	n/a	Mi
Fee Waivers or Deferrals	Water/sewer tap fees, building permit or other fees waived in part or whole to reduce cost to build affordable or locals housing. General funds or other sources need to cover cost of fees waived. Deferred fees/taxes (use, property) can take risk away from development by requiring payment upon sale or occupancy of a unit.	Town of Jackson fees waived for 100% deed restricted housing as of July 2021 County allows fee waivers if an application "demonstrates bona-fide community benefit for the whole of Teton County." Is not guaranteed nor automatically waived	Yes – codified in 2020, and has been used on all 100% DR projects in recent years.	No. Nothing codified – can be requested through community benefit category.	Jackson: greater than 300 County: no recent examples.
Inclusionary Zoning (IZ)	Requiring a percentage of residential units in new subdivisions to be affordable housing. Market homes support development of affordable units.	Eliminated in 2018 for both Town and County. Had been in place since 1995.	No	No	

Tools / Programs	Definition or Overview	Notes	In Use In		Units Since 2014
Parking Reductions	Reduced parking requirements for workforce and affordable housing	Town allows parking reductions through Administrative Relief. Implemented in 2018; most DR projects seek it. County also allows parking requirements to be adjusted through administrative relief, with demonstration that a lesser standard is workable due to anticipated parking demand and alternative transportation is available.	Yes -	Yes - limited	
Widespread Zoning for multifamily housing (over eight units/building)	Community or Deed Restricted Housing is allowed by right in most.	Town Zoning allows residential buildings with 8 or more units in zones NH-1, NM-2, CR-1, CR-2, CR-3, DC and DC-2 County allows multifmaily in WC, BC-TC, but few properties have this zoning.	Yes – potential to further expand?	No	
REQUIREMENTS			**Jackson**	**Teton County**	
Residential Mitigation	Requiring new homes to contribute to housing for employees relative to demand generated by residential units. Mitigation rate may increase with house size. Fees in lieu provide revenue stream that fluctuates with building activity. Nexus required.	LDR Division 6.3	Yes	Yes	Generally fee-in-lieu, which is reinvested by Housing Department

Tools / Programs	Definition or Overview	Notes	In Use In		Units Since 2014
Commercial Mitigation	Requiring new commercial development to provide housing for a portion of employees generated. Nexus required. Alternatives in application and compliance methods (on site, off site, land, fees in lieu) create flexibility yet complexity.	LDR Division 6.3	Yes	Yes	108 deed-restricted since 2016 across Town and County
FUNDING			**Jackson**	**Teton County**	
Real Estate Transfer Fee		Currently not allowed by State; working to allow at State level			
Lodging Tax		Does not directly fund housing	Yes – but not for housing	Yes – but not for housing	
LIHTC		WY QAP requirements are hard for Jackson projects to be competitive. Applied multiple times without success, currently have application in to WCDA.	Maybe – Flat Creek Apts currently under consideration	No.	
Federal and State Funds		Apply for LIHTC, HOME, NHTF and CDBG regularly, rarely receive awards	Habitat received $500k HOME for 445 E Kelly, Flat Creek Apts applied for CDBG, HOME, NHTF, LIHTC pending ARPA –$3million pending	$4 million ARPA pending	
Community Foundation		One-off grants thus far. The Jackson/Teton County Affordable Housing Department has been working with them to create some kind of PRI or other loan fund for housing.	Yes – limited	Yes - limited	

Tools / Programs	Definition or Overview	Notes	In Use In		Units Since 2014
Economic Development / Chambers		Tourism Improvement District is being considered at state level, Chamber is actively supporting.	No	No	
General Fund Allocations		ACTIVE – details from April	Yes. $1m - $2m/year	Yes. $1m/year

Below market debt		Jackson St. Apartments	Yes	Yes	
Program-related investment		Jackson St. Apartments	Yes	Yes	
Realtors/Voluntary Transfer		Community Housing Fund Created in 2021	Yes	??	
Special Purpose Excise Tax		$5.5 million passed in 2019, long history of support, and several SPET that did not pass.	Yes	??	
PARTNERSHIP TOOLS			**Jackson**	**Teton County**	
RFQ/RFP process	RFQ/RFP process effective for selecting development partners on government or institutionally owned land. Can also be used with subsidy funds, in addition to or in place of land.	Jackson/Teton County Affordable Housing Department Supply Plan	Yes. 3 projects with Town property	Yes. 1 project with County property	114 units since 2017

Tools / Programs	Definition or Overview	Notes	In Use In		Units Since 2014
Employer Assisted Housing / Partnerships	Master leasing new development, mortgage assistance, units for temporary relocation. Public/non-profit sector can provide technical assistance to help develop projects. Housing for emergency services personnel and seasonal workers often provided by employers. • Lots of employers are providing housing assistance • Jackson/Teton County Affordable Housing Department & Housing Trust conduct housing needs assessments for businesses (HD is free, HT charges a nominal rate)	Lots of activity in the space… not specifically codified or incentivized. For those building units, may bank units for future mitigation requirements (think: Hotel Jackson, JHMR, etc.) Other partnerships are underway.	Yes, for example Westview TH – Town allowed 8 units to be employer owned Workforce Rental restricted.	Yes, for example Mercill Condos – County allowed 12 units to be employer owned Workforce Rentals.	
PRESERVATION TOOLS			**Jackson**	**Teton County**	
Acquisition of Market Units	Usually involves buying down units with public funds. Deed restrictions imposed for permanent affordability.		No	No	
Compliance Management	Monitoring deed restrictions eligibility and ongoing compliance, collecting data, ensuring program integrity.	Performed by Housing Dept.	Yes	Yes	
Expiring Deed Restriction Preservation		Performed by Housing Dept.	Yes	Yes	1 recently, several being monitored
Deed Restriction Purchase	Preservation Program lead by JTCHA is to deed restrict existing units for rental or homeownership to local employees. Must make 75% of income in Teton County. Program also implements an appreciation cap.	Preservation Program implemented by the Jackson/Teton County Affordable Housing Department in February 2021. $1 million set aside.	Yes	Yes?	3 units secured and with 1 pending
Housing Rehabilitation and Weatherization	Repairing, updating, enlarging, improving energy efficiency, and providing handicapped accessibility, typically with Federal or State grants. Staff/time intensive.	Discussed during Landlord-Tenant stakeholder group meetings, but ultimately not pursued due to staff capacity	No	No	

Tools / Programs	Definition or Overview	Notes	In Use In		Units Since 2014
No-Net Loss/Redevelopment Policy	Requiring replacement of housing occupied by the workforce and residents when redevelopment occurs. Similarly priced units should be replaced on site or another site, or a fee-in-lieu of replacement could be allowed.	Debated by electeds in 2017 and not included	No	No	
Property Management	Contracting to provide property management of rental units for local employees. Could work both ways – public/non-profit sector hires private firm or private sector hires public/non-profit. Could be used with Employer Assisted Housing and conversion of STR's to LTR's.	Yes – Redmond Street Rentals, partnered with Housing Trust to provide. Flat Creek Apts, partner with BlueLine Development to provide.	No	No	
Right of First Refusal	Non-profit, HA or government entity securing right of first refusal on key multi-family properties or mobile home parks to ensure the chance for affordability of the property ever sells.		No	No	
STR Conversion	Providing rent guarantees and property management in exchange for renting units long term that were vacant or rented short term.		No	No	
STR Restrictions	Requiring licensing, limiting number of permits, limiting the number in defined areas, occupancy requirements based on local housing or income, prohibiting STR of deed restricted housing etc.	More enforcement may be needed.	Permit and License; limited locations	No.	

Appendix C - Teton County Idaho Housing Tools Matrix

Tools / Programs	Definition or Overview	In Use In		
LAND USE PLANNING		**Driggs**	**Victor**	**Teton County / HA**
Accessory Residential Units	Allow Accessory Residential in all or most zones. Providing incentives such as additional density, tap fee waiver or reduction, subsidy to owner, etc can enhance the tool.	Yes. Allowed in all zones. Tap fees waived.	Yes. Allowed in all zones. Tap fees waived.	HA is preparing an ADU guide and permit-ready ADU plans, and is considering a shared-equity model like Dweller.com
Aligning Planning Documents	Strategic Priority on Affordable housing in all local planning documents, budget setting, and work plans.	Yes – partially. Teton County Affordable Housing Strategic Plan adopted and referenced in new Comprehensive Plan. Housing is an eligible use of local sales tax. Still formulating budget & work plan to meet strategic priorities.	Yes – partially. Teton County Affordable Housing Strategic Plan adopted and referenced in new Comprehensive Plan. Housing is an eligible use of local sales tax. Still formulating budget & work plan to meet strategic priorities.	Yes – partially. Adopted AHSP, but 2012 Comp Plan not updated. Prioritizing affordable housing in work plans & budgeting.
Aligning Community Infrastructure Investments	Strategic alignment of infrastructure investments to support affordable housing. Access federal funds and state passthroughs.	Using CDBG funds to support LIHTC housing project. Urban Renewal Agency supporting with TIF revenue.	No.	No.
Annexation Policies	Negotiating affordable housing as part of annexation agreements.	Policy included in adopted TCAHSP, and is being implemented, but lacks clear standards or guidance on what to negotiate.	Policy included in adopted TCAHSP. No implementation to date.	N/A.
Density Bonus	Increased density in exchange for building affordable/workforce housing.	Only in PUDs currently. As part of adopted TCAHSP policy, negotiate affordable component with any zone change to increased density.	No.	No.

Tools / Programs	Definition or Overview	In Use In		
Fast Track Processing	Gives priority to development applications with affordable and/or workforce housing.	No.	No.	No.
Height Variance?	Workforce/affordable housing able to better utilize land through set back, height, other variances.	In mixed-use zones, allow 10ft height bonus if any residential use on upper floors, but no income or occupancy restriction.	No.	No.
Fee Waivers or Deferrals	Water/sewer tap fees, building permit or other fees waived in part or whole to reduce cost to build affordable or locals housing. General funds or other sources need to cover cost of fees waived. Deferred fees/taxes (use, property) can take risk away from development by requiring payment upon sale or occupancy of a unit.	Impact fees waived for affordable housing as defined in state statute (<80% AMI). Possible use of sales tax to cover fees. No deferred tax program.	No.	No.
Inclusionary Zoning (IZ)	Requiring a percentage of residential units in new subdivisions to be affordable housing. Market homes support development of affordable units.	No adopted policy, but City has started requesting at least 50% workforce housing restriction in large-scale (>20 units) developments. Voluntary.	No.	No.
Parking Reductions	Reduced parking requirements for workforce/affordable housing.	No. 1/1BR, 1.5/2BR+ multi-family.	No, but only 1 per unit across all residential.	No.
Widespread Zoning for multifamily housing	Within Cities and Towns, most zone districts allow for attached product that makes efficient use of land and is cost effective to build, including duplexes, townhouses, apartments and condos.	Yes. Multi-family is allowed in all mixed-use zones. Comp Plan enables widespread multi-family via rezoning.	Yes. Multi-family is allowed in all mixed-use zones. Comp Plan enables widespread multi-family via rezoning.	No; dense development is directed to cities.

Tools / Programs	Definition or Overview	In Use In		
Voluntary Agreements	Seek developer participation in providing workforce housing as part of the entitlement process.	Current practice (developing policy) at any rezone application is to negotiate workforce housing mitigation and adopt conditional zone change agreement.	TBD	TBD
REQUIREMENTS		**Driggs**	**Victor**	**Teton County / HA**
Residential Mitigation	Requiring new homes to contribute to housing for employees relative to demand generated by residential units. Mitigation rate may increase with house size. Fees in lieu provide revenue stream that fluctuates with building activity. Nexus required.	No. Not legal in Idaho, except through negotiation at annexation, conditional zone change or possibly large scale subdivision.	No.	No.
Commercial Mitigation	Requiring new commercial development to provide housing for a portion of employees generated. Nexus required. Alternatives in application and compliance methods (on site, off site, land, fees in lieu) create flexibility yet complexity.	No. Not legal in Idaho, except through negotiation at annexation, conditional zone change or possibly large scale subdivision.	No.	No.
FUNDING FOR HOUSING		**Driggs**	**Victor**	**Teton County / HA**
Local Lodging Tax	Some or all local lodging tax dedicated to workforce housing	Yes. 3% Housing is an eligible use; may designate a portion for housing to enable bond repayment.	Yes. Increased lodging tax to 6% and included housing as an eligible use of funds.	No.
Community Foundation		No. Driggs does not receive funding through CFTV.	No.	Housing Authority is eligible to receive funding through CFTV
Economic Development/Chambers		TREC helps with research and lobbying as a Chamber.		

Tools / Programs	Definition or Overview	In Use In		
General Fund Allocations		Not cash, but pays salary for staff to support Housing Authority.	Yes, $5000 operating funds to Housing Authority.	Yes, $40,000 operating funds to Housing Authority
Private Donations		No.	No.	Yes. Foundation funding expected for new Executive Director position.
Realtors/Voluntary Transfer		No.	No.	Yes – Housing Authority funded from CommunityHousingFund.com
Special Purpose Excise Tax		No.	No.	No.
Urban Renewal		Yes. Can help fund public improvements for projects in district. Helping w/ Depot Square LIHTC project currently.	Yes, has a URA.	No.
Real Estate Transfer Fee		Real Estate Transfer Tax not legal in Idaho, but Grand Targhee in WY has a transfer tax of .5% that is for affordable housing that can be built in Driggs.	No.	No.
LIHTC		Yes. 1 Active. 2 Previous.	1 previous project.	No.
Federal and State Funds		Idaho Governor announced Gap Financing program will be launched in 2022. Idaho Housing Trust Fund remains unfunded despite state surplus.		Considering allocation of ARPA funding for affordable housing development.

Tools / Programs	Definition or Overview	In Use In		
PARTNERSHIP TOOLS		**Driggs**	**Victor**	**Teton County / HA**
Land Banking	Use publicly owned land for workforce/affordable development. Make strategic purchases of land for future housing development.	Yes. Driggs donated 1ac for LIHTC project.	Yes. Victor donating 3ac to Housing Authority.	Yes, County donating .6 acre to Housing Authority.
RFQ/RFP process	RFQ/RFP process effective for selecting development partners on public land that is currently land banked. Can also be used with subsidy funds, in place of land.	Yes; in partnership with Joint Housing Authority.	Yes; in partnership with Joint Housing Authority.	Yes; in partnership with Joint Housing Authority.
Employer Assisted Housing/Partnerships	Master leasing new development, mortgage assistance, units for temporary relocation. Public/non-profit sector can provide technical assistance to help develop projects. Housing for emergency services personnel and seasonal workers often provided by employers.	No partnerships; large employers (Grand Targhee, Teton Valley Health, City) providing/building employee housing.	No partnerships; large employers (Grand Targhee, Teton Valley Health) providing/building employee housing.	No partnerships; large employers (Grand Targhee, Teton Valley Health) providing/building employee housing.
Downpayment Assistance	Support first time homebuyers with downpayment loans or grants.	Not yet; identified as a strategy to consider. CRCTV operates a rental deposit loan program.	Not yet; identified as a strategy to consider. CRCTV operates a rental deposit loan program.	Not yet; identified as a strategy to consider. CRCTV operates a rental deposit loan program.
PRESERVATION TOOLS		**Driggs**	**Victor**	**Teton County / HA**
Acquisition of Market Units	Usually involves buying down units with public funds. Deed restrictions imposed for permanent affordability.	No.	No.	No.
Compliance Management	Monitoring deed restrictions eligibility and ongoing compliance, collecting data, ensuring program integrity.	Not yet; HA will serve this function.	Not yet; HA will serve this function.	Not yet; HA will serve this function.
Deed Restriction Purchase	Purchase a deed restriction from an existing owner; property may continue as homeownership or long-term rental.	No.	No.	No.

Tools / Programs	Definition or Overview	In Use In		
Housing Rehabilitation and Weatherization	Repairing, updating, enlarging, improving energy efficiency, and providing handicapped accessibility, typically with Federal or State grants. Staff/time intensive.	Regional via EICAP: https://www.eicap.org/	Regional via EICAP: https://www.eicap.org/	Regional via EICAP: https://www.eicap.org/
No-Net Loss/Redevelopment Policy	Requiring replacement of housing occupied by the workforce and residents when redevelopment occurs. Similarly priced units should be replaced on site or another site, or a fee-in-lieu of replacement could be allowed.	No.	No.	No.
Property Management	Contracting to manage affordable rental units. Could work both ways – public/non-profit sector hires private firm or private sector hires public/non-profit. Could be used with Employer Assisted Housing and conversion of STR's to LTR's.	No.	No.	No.
Right of First Refusal	Securing a right of first refusal on "naturally occurring affordable housing" properties, so public sector or non-profit can purchase and preserve, forestalling condo and STR conversions.	No.	No.	No.
STR Conversion	Providing rent guarantees and property management in exchange for renting units long term that were vacant or rented short term.	No.	No.	No.

Tools / Programs	Definition or Overview	In Use In		
STR Restrictions	Requiring licensing, limiting number of permits, limiting the number in defined areas, occupancy requirements based on local housing or income, prohibiting STR of deed restricted housing etc.	Require permit and have standards for safety, parking, trash, etc., and collect lodging tax. Idaho statute prohibits a ban (and potentially a cap, which can be found equivalent to a ban). Negotiating prohibitions in some new developments and in all deed-restricted housing.	Requires business license; collects lodging tax.	No.

Note: Tetonia is a participating jurisdiction in the Teton County Joint Housing Authority. Tetonia has set intentions in their Comprehensive Plan to make land use regulations more favorable for a variety of housing types and price points.

Appendix D – Survey Instruments

Employee Survey – Housing Needs, Challenges, and Preferences

1. In which community do you live in or nearest to?

	Where do you live?
Lincoln County, WY	
Alpine	☐
Etna	☐
Star Valley Ranch	☐
Thayne	☐
Afton, Fairview, Smoot	☐
Other Lincoln County, WY _____	☐
Teton County, ID	
Driggs	☐
Victor	☐
Tetonia	☐
Other Teton County, ID _____	☐
Teton County, WY	
Jackson	☐
Alta	☐
Hoback	☐
Kelly, Moran, Colter Bay	☐
Rafter J Ranch, South Park	☐
Teton Village	☐
Wilson, Moose Wilson Road	☐
Teton or Yellowstone National Parks	☐
Other Teton County, WY _____	☐
Other Location _____	☐

2. Do you live in the region:
   - ☐ Year round or most of the year (i.e., 8-months or more)
   - ☐ Part time - How many months in each season? #____ Spring/Summer #____ Fall/Winter
     If part time – are you: ☐ part time resident ☐ seasonal employee ☐ Other_____

3. How long have you resided in the region and your current home?

	Lived In Region	Lived in Current Home
Less than 1 year	☐	☐
1 to 2 years	☐	☐
3 to 5 years	☐	☐
6 to 10 years	☐	☐
More than 10 years	☐	☐

4. When you last moved, how hard was it to find housing that met your needs and that you could afford?
   - ☐ Not difficult
   - ☐ Moderately difficult
   - ☐ Very difficult
   - ☐ I have yet to find such housing

5. How do you feel about the issue of people who work in the region being able to find suitable housing they can afford?
   - ☐ It is the most critical problem
   - ☐ One of the more serious problems
   - ☐ A problem among others needing attention
   - ☐ One of our lesser problems
   - ☐ I don't believe it is a problem

6. In what type of home do you live?
   - ☐ Single-family house/Cabin
   - ☐ Apartment or condominium
   - ☐ Townhome/duplex/triplex/fourplex
   - ☐ Mobile home
     - ☐ on rented space ☐ on owned land
   - ☐ Accessory dwelling/in-law/caretaker unit
   - ☐ Dormitory housing
   - ☐ Motel/Hotel
   - ☐ Tent/Camper/RV/Car/Van
   - ☐ Couch surfing/staying with friends
   - ☐ Other _____

7. How many bedrooms are in your home? #____

8. Which of the following best describes your current household (include yourself and others living in your home or dorm room)?
   - ☐ I live alone
   - ☐ Single parent with child(ren) at home
   - ☐ Couple, no child(ren) at home
   - ☐ Couple with child(ren) at home
   - ☐ Unrelated roommates
   - ☐ Immediate and extended family members
   - ☐ Family members and unrelated roommates
   - ☐ Other: _____

9. How many people live in your household? _____ # people in total ____ # under 18

10. Where within the region would you most like to live if housing you could afford is available?

	Where Do You Most Want to Live?
Lincoln County, WY	
Alpine	☐
Etna	☐
Star Valley Ranch	☐
Thayne	☐
Afton, Fairview, Smoot	☐
Other Lincoln County, WY _____	☐
Teton County, ID	
Driggs	☐
Victor	☐
Tetonia	☐
Other Teton County, ID _____	☐
Teton County, WY	
Jackson	☐
Alta	☐
Hoback	☐
Kelly, Moran, Colter Bay	☐
Rafter J Ranch, South Park	☐
Teton Village	☐
Wilson, Moose Wilson Road	☐
Teton or Yellowstone National Parks	☐
Other Teton County, WY _____	☐
Other Location _____	☐

11. Do you:
    - ☐ Own
    - ☐ Rent
    - ☐ Lease to own
    - ☐ Caretake
    - ☐ Other _____

12. Do you live in:
    - ☐ Free market housing
    - ☐ Restricted housing or employer-provided housing (such as deed restricted ownership; rentals with price, income or employment limits; etc.)

13. Within which age categories do household members fall (check all that apply)?
    - ☐ Under 5
    - ☐ 5 to 17
    - ☐ 18 to 29
    - ☐ 30 to 44
    - ☐ 45 to 64
    - ☐ 65 and over

14. Which choice best describes your satisfaction with your current residence?

Very Dissatisfied	Somewhat Dissatisfied	Somewhat Satisfied	Very Satisfied
1	2	3	4

15. Why are you not fully satisfied with your residence? (Respond if 1, 2, or 3 above)
    (Check all that apply)
    - ☐ Currently rent, prefer to buy
    - ☐ Too small/overcrowded
    - ☐ Too expensive
    - ☐ Needs repairs/poor condition (GOTO Q16)
    - ☐ Pets not allowed
    - ☐ Too far from work
    - ☐ Disturbance from nearby short term rentals
    - ☐ I need to have roommates and would prefer not to
    - ☐ Other reason _____

16. (IF "Needs repairs" checked in Q15) If your home needs repairs, why have repairs not been made? (CHECK ALL THAT APPLY)
    - ☐ Cost of repair - too expensive
    - ☐ Do not want to spend more money on the home
    - ☐ Unable to get qualified contractor
    - ☐ Landlord not taking responsibility
    - ☐ Have not notified the landlord – concerned I might lose my rental or have rent increased
    - ☐ Other_____

17. If you rent your home, have you been forced to move for any of the following reasons within the past 3 years? (MARK ALL THAT APPLY)
    - ☐ I do not rent my home
    - ☐ Had to move when rental was sold
    - ☐ Had to move when rental was converted into a short term/vacation rental
    - ☐ Had to move when the owner of my rental moved in
    - ☐ Had to move due to significant rent increase → how much was your last rent increase $_____
    - ☐ Other reason _____
    - ☐ NONE OF THE ABOVE – I have not been forced to move

18. (if any of b thru f selected above) How many times have you been forced to move over the past 3 years?
    #_____

19. Within the next 5 years do you plan to:
    - ☐ Stay in your current residence
    - ☐ Move into a different home within the region ---- Because you: ☐ want to ☐ have to (ANSWER Q20 to 23)
    - ☐ Leave the region ---------- Because you: ☐ want to ☐ have to (GOTO Q24)

      (if leaving) -> Why are you leaving the region? _____

IF YOU PLAN TO MOVE INTO A DIFFERENT HOME IN THE REGION:

20. If you will be moving within the region, do you prefer to:
    - ☐ Own
    - ☐ Rent
    - ☐ Either own or rent

21. How many bedrooms does your household need? #_____

22. Since land is expensive, sites suitable for housing are limited and construction costs are high, it may not be possible to build or provide the home you desire at your preferred price in the community where you most want to live. Trade-offs may be necessary, such as paying a higher price for a smaller home in your preferred community. Please rank the following home considerations, with 1 being the consideration that is most important to you (and that you are least willing to compromise on) and 4 being least important.

    Rank from 1 "most important" to 4 "least important"

    - ____ Location - a home in the community where you most want to live
    - ____ Price - a home that is the most affordable option for the minimum size you need; the best value.
    - ____ Size – number of bedrooms and space is important.
    - ____ Type – you want to live in your preferred home type (e.g., single family home, townhome, condominium, etc.).

23. Would you have interest in purchasing a deed restricted home in your preferred community/county of residence? This is home priced below market value so that it is affordable to purchase (affordable means that you pay no more than 30% of your income for mortgage). The deed restriction would limit resale price appreciation (typically to no more than 3% per year on average) and require that homes be sold to households with at least one person who works in your preferred county of residence.
    - ☐ I would purchase a deed restricted home to live in my preferred community
    - ☐ I would not purchase a deed restricted home
    - ☐ Unsure/need more information

24. How much do you have available for a down payment? *Include the portion of home equity you could spend on a down payment if you were to sell a home you now own.*

    $_____

25. How many adults (18 and over) in your household, including yourself, are:

_____# Employed
_____# Unemployed and looking for work
_____# Retired

If no one is employed in your household, please skip to Q. 40

26. How many full-time plus part-time jobs do employed adults in your household (persons 18 or over only) work year round and in each season? Enter the number of jobs you work and the number of combined jobs all other adults in your household work.

	Adult #1 (You)	Adult #2	Adult #3	Adult #4
# Year Round job(s)				
# Summer seasonal job(s)				
# Winter seasonal job(s)				

27. Where do you and other adults (persons 18 or over only) in your household work? (MARK ALL THAT APPLY) Please note the primary location of your job(s) for each season. If you work at the same job year round, please mark BOTH boxes.

Introductory Section

Administration and Finance

December 27, 2023

To the Honorable Mayor, Members of the Town Council, and the Citizens of the Town of Jackson:

The Wyoming statutes require all cities, towns, and counties to issue an annual report on its financial position and activity prepared in accordance with accounting principles generally accepted in the United States of America (GAAP), and audited in accordance with auditing standards generally accepted in the United States of America by a firm of licensed certified public accountants or the Wyoming Office of State Audit. Pursuant to that requirement, we hereby issue the Annual Comprehensive Financial Report (ACFR) of the Town of Jackson for the fiscal year ended June 30, 2023.

The Town of Jackson' financial statements have been audited by Jones Simkins LLC, a firm of licensed certified public accountants. The goal of the independent audit was to provide reasonable assurance that the financial statements of the Town of Jackson for the fiscal year ended June 30, 2023, are free of misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unmodified opinion that the Town of Jackson's financial statements for the fiscal year ended June 30, 2023, are fairly presented in conformity with GAAP.

Management's discussion and analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview, and analysis of the basic financial statements. The MD&A compliments this letter of transmittal and should be read in conjunction with it. The MD&A can be found on 11s 13-21.

PROFILE OF THE GOVERNMENT

The Town of Jackson, incorporated in 1914, is located in Teton County near the Wyoming and Idaho border south of the Grand Teton and Yellowstone National Parks. The town currently has a land area of nearly 4 square miles and an estimated population of 10,760. The Town of Jackson is empowered to levy 8 mills of property tax on both real and personal properties located within its boundaries. The Town implemented a property tax of 0.5 mills during 2022. This is the first property tax assessment by the Town since 1977. It is also empowered by state statute to extend its corporate limits by annexation, which is done periodically when deemed appropriate by the Town Council.

The Town of Jackson is governed by city code under Wyoming Statutes with a council-mayor form of government. Policy-making and legislative authority are vested in a Town Council consisting of the mayor and four council members. The Town Council is responsible, among other things, for passing ordinances, resolutions, adopting the budget, appointing commissions, authorities, and committees, and hiring the town manager, town attorney and municipal judge. The town manager is responsible for carrying out the policies and ordinances of the Town Council, for overseeing the day-to-day operations of the town government, and for appointing the heads of the various departments. The council is elected on a non-partisan basis. All four council members and the mayor are elected at large. Council members serve staggered four-year terms, with elections occurring every even year. Effective 2017, the mayor serves a four-year term.

The Town of Jackson provides a full range of services, including police and fire protection; construction and maintenance of streets and infrastructure; recreational facilities and pathways, water, sewage, and transit services. Additionally, the town owns rental properties for employees.

FACTORS AFFECTING FINANCIAL CONDITION

The information presented in the financial statements is perhaps best understood when it is considered from the broader perspective of the specific environment within which the Town of Jackson operates.

Local economy. The Town of Jackson is located at the southern entrance to Grand Teton and Yellowstone National Parks in the northwest corner of Wyoming. Dramatic mountain peaks, including the Tetons, the Gros Ventres, and Snow King form a breathtaking backdrop to our valley (called Jackson Hole). The Town of Jackson is home to a little over 10,700 people and another 12,900 live in the unincorporated county (Teton).

Jackson's economy is centered on tourism and lifestyle. Approximately four million guests visit each year and more than 700,000 skier days are tallied at the Jackson Hole Mountain Resort. The abundance of outdoor recreation opportunities, the unsurpassed scenic beauty, the prevalence of many species of wildlife, the lack of individual state income tax, and the high quality of life give Jackson unsurpassed appeal as a place to live, visit and recreate.

At fiscal year-end, the Town of Jackson's employment picture, at a 1.7% unemployment rate (Teton County), is healthier than the 3.8% national average. The state of Wyoming has an unemployment rate of 3.1%.

FINANCIAL INFORMATION

Management of the town is responsible for establishing and maintaining internal control designed to ensure that the assets of the government are protected from loss, theft, or misuse, and to ensure that adequate accounting data are compiled to allow for the preparation of financial statements in conformity with accounting principles generally accepted in the United States of America. Internal control is designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that: (1) the cost of a control should not exceed the benefits likely to be derived, and (2) the valuation of costs and benefits requires estimates and judgments by management.

This report consists of management's representations concerning the finance of the town. As a result, management assumes full responsibility for the completeness and reliability of all the information and content presented in this ACFR. Additionally, management asserts that, to the best of their knowledge and belief, this financial report is complete and reliable in all material respects.

Budgetary Controls. The annual budget serves as the foundation for the Town of Jackson's financial planning and control. All departments, authorities, and commissions of the town submit requests for appropriation to the town manager in February of each year. The town manager uses these requests as the starting point for developing a proposed budget. The town manager then presents this recommended budget to the council for review prior to May 15. The council is required to hold public hearings on the proposed budget and to adopt a final budget no later than June 30, the close of the town's fiscal year. The appropriated budget is prepared by fund, function (e.g., public safety), department (e.g., police), and division (e.g., patrol). Department heads may make transfers of appropriation within a departmental division. Transfers of appropriations between funds and departments, however, require the approval of the Town Council. Budget-to-actual comparisons are provided in this report for each individual governmental fund which an appropriated annual budget has been adopted. For the general fund and major special revenue funds, this comparison is presented starting on page 28 of the basic financial statements. For non-major special revenue funds, with appropriated annual budgets, this comparison is presented in the governmental fund subsection of this report, which starts on page 65.

Long-term Financial Planning. The Town's strategic vision is laid out in a Council bi-annual Work Plan, supported by a five-year financial model and Capital Improvement Program. The Plan identifies the Town's strategic intent and identifies areas for emphasis and funding. The Town's near-term and long-term fiscal planning are focused on accomplishing Work Plan objectives. A five-year financial model and Capital Improvement Program are maintained to assess the attainability and sustainability of these objectives.

The Town Council supports and understands that the main area of focus for the Town of Jackson is the provision of core services, maintaining the current level of service already supported and approved through the annual budget, and most importantly those services that directly contribute to and maintain the health, safety, and welfare of the citizens and guests to our community. A brief summary includes:

Safety and security provided through law enforcement, fire protection, building safety and inspection, animal control, contractor licensing, and municipal court and prosecution services.

Infrastructure, facility and public asset management provided through street, sidewalk and right of way maintenance and snow removal services, engineering, preventive and proactive facility management, and parking enforcement.

Health and well-being provided through water treatment and distribution, sewer collection and treatment, emergency medical services, and victim services.

Development and economic oversight provided through code compliance, planning and development review, permit processing, and business, liquor, taxi, special event, and rental licensing.

Accessibility and livability provided through public transit, community and affordable housing, parks and recreation, and pathway creation and maintenance.

Internal services for the Town of Jackson organization that support the efficiency and effectiveness of our local government provided through information technology support, records management and access, fleet maintenance, public information, legal services, personnel services, financial accounting, and overall coordination, administration, leadership and management of government services and day to day operations.

Major Budget Initiatives.

To continue to be a resilient community, we will need to preserve and maintain General Fund Reserves to have the resources to adapt to uncertain times ahead. Looking ahead, recurring expenses are expected to exceed recurring revenues. We must continue evaluating our revenue streams and expenditures, to determine how to ensure a balanced budget into the future.

Due in part to COVID-19 pandemic we reinforced the importance of our fiduciary responsibility to maintain and continue building a strong, resilient community in the short, mid, and long-term. Due to years of prudent budgeting and planning, the Town was able to respond to reduced revenues projected and maintain a well-resourced and responsive Town government to close fiscal year 2023.

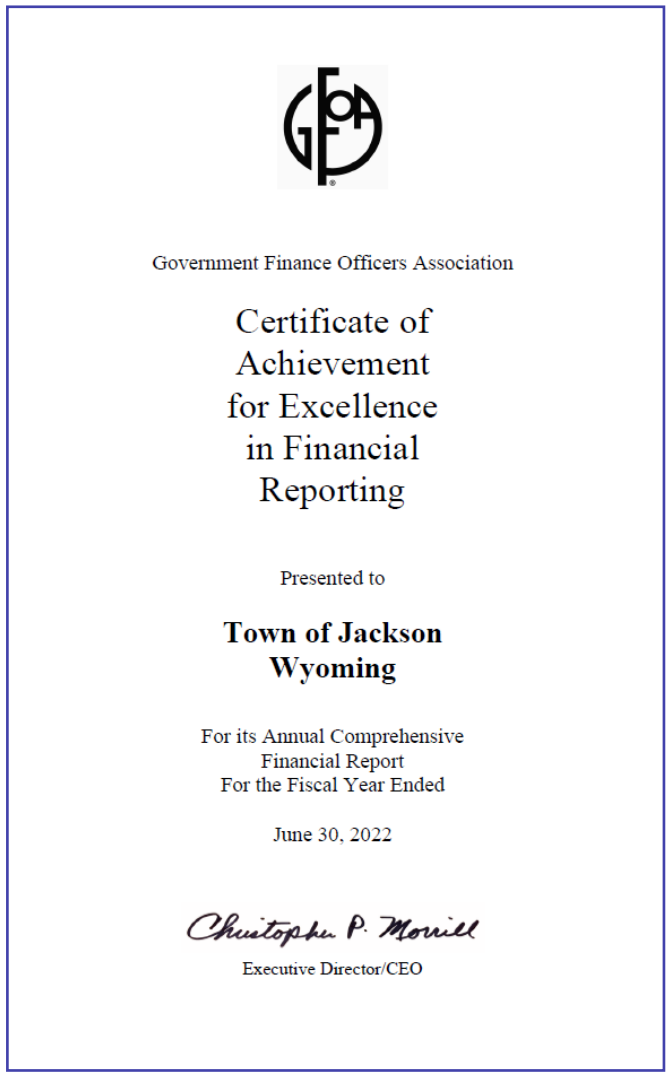
The Town will need to prioritize our core services, capital projects and consider reducing funding to the areas of lower priority and/or work to consider a new funding source(s) to maintain current Town program services and capital improvement projects. As our community changes, various core services continue to see increased need year-over-year. The Town simply does not have the capacity to absorb such continuous growth without increasing revenue or reducing existing program services and capital projects.

Single Audit. As a recipient of federal awards, the town is also responsible for ensuring that adequate internal controls are in place to ensure compliance with applicable laws and regulations related to those programs. The internal controls are subject to periodic evaluations by town management and external auditors.

AWARDS AND ACKNOWLEDGEMENTS

The Government Finance Officers Association (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Town of Jackson, Wyoming for its comprehensive financial report for the fiscal year ending June 30, 2022. This is the 37th year the town has received this prestigious award. In order to be awarded the Certificate of Achievement, the government must publish an easily readable and efficiently organized annual comprehensive financial report. This report satisfies both accounting principles generally accepted in the United States of America and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe our current report continues to conform to the Certificate of Achievement Program's requirements, and we are submitting it to GFOA to determine its eligibility for another certificate.



The preparation of this report could not be accomplished without the professional, efficient services of the Finance Department staff. We would like to express our appreciation to all members of the staff, with special recognition for the assistance contributed by Finance Manager Melanie Adams and Senior Deputy Treasurer Pauline Scholes. Due credit also should be given to the mayor and the council for their support in planning and conducting the operations of the town in a responsible and progressive manner.

Government Finance Officers Association

Certificate of Achievement for Excellence in Financial Reporting

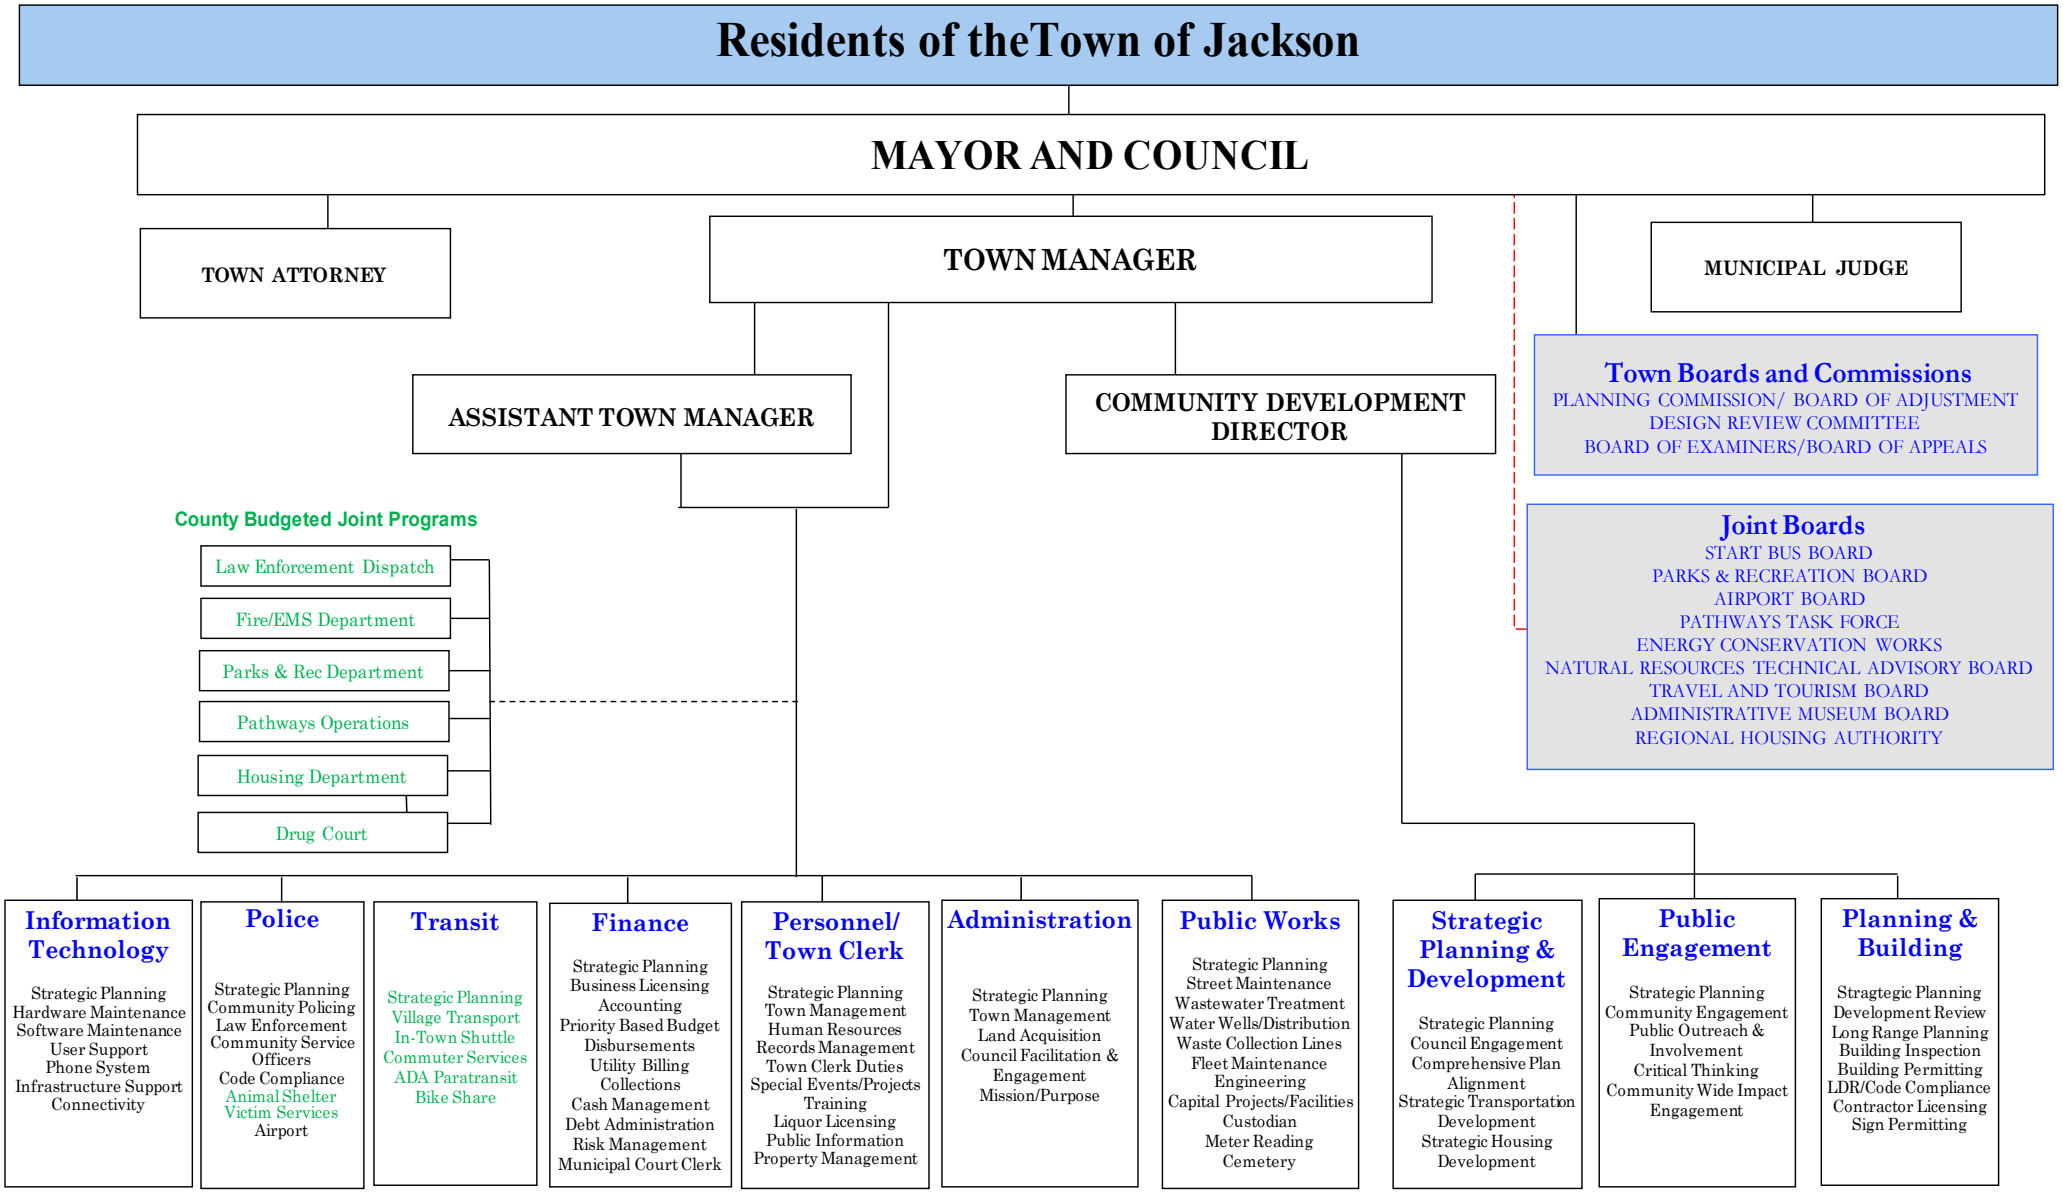
Presented to

Town of Jackson Wyoming

For its Annual Comprehensive Financial Report For the Fiscal Year Ended

June 30, 2022

Christopher P. Morrill



Executive Director/CEO

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate for Excellence in Financial Reporting to the Town of Jackson, Wyoming for its annual comprehensive financial report for the fiscal year ended June 30, 2022.

In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized annual comprehensive financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe our current annual comprehensive financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

INDEPENDENT AUDITOR'S REPORT

To the Mayor and Town Council
Town of Jackson, Wyoming

Report on the Audit of the Financial Statements

Opinions

We have audited the financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Jackson, Wyoming (the Town), as of and for the year ended June 30, 2023, and the related notes to the financial statements, which collectively comprise the Town's basic financial statements as listed in the table of contents.

In our opinion, the accompanying financial statements present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town, as of June 30, 2023, and the respective changes in financial position and, where applicable, cash flows thereof and the respective budgetary comparison for the general fund and START Bus System Fund for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Town and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Independent Member of PrimeGlobal | The Association of Advisory and Accounting Firms

Responsibilities of Management for the Financial Statements

The Town's management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Town's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and *Government Auditing Standards* will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and *Government Auditing Standards*, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Town's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Town's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, the schedule of proportionate share of the net pension liability, and the schedule of contributions, as listed in the table of contents, be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Town's basic financial statements. The supplementary information listed in the table of contents is presented for purposes of additional analysis and is not a required part of the basic financial statements. The accompanying schedule of expenditures of federal awards is presented for purposes of additional analysis as required by *Title 2 U.S. Code of Federal Regulations (CFR) Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards*, and is also not a required part of the basic financial statements.

The supplementary information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Information

Management is responsible for the other information included in the annual report. The other information comprises the introductory and statistical sections but does not include the financial statements and our auditor's report thereon. Our opinions on the financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Change in Accounting Principle

As described in the notes to the financial statements, the Town adopted new accounting guidance, GASB Statement No. 96, Subscription-Based Information Technology Arrangements. Our opinion is not modified with respect to this matter.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated December 27, 2023 on our consideration of the Town's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Town's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Town's internal control over financial reporting and compliance.

Management's Discussion and Analysis

As management of the Town of Jackson (Town), we offer readers of the Town's basic financial statements this narrative overview and analysis of the financial activities of the Town for the fiscal year ended June 30, 2023. We encourage readers to consider the information presented here in conjunction with additional information that we have furnished in our letter of transmittal, which can be found on pages 1-4 of this report.

OVERVIEW OF THE BASIC FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the Town's basic financial statements. The Town's basic financial statements comprise three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

COMPONENTS OF THE ANNUAL FINANICAL REPORT

Government-wide financial statements. The government-wide financial statements are designed to provide readers with a broad overview of the Town of Jackson's finances, in a manner similar to a private-sector business.

The statement of net position presents information on all of the Town's assets and liabilities, with the difference between the two reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the Town is improving or deteriorating.

The statement of activities presents information showing how the Town's net position changed during the most recent fiscal year. All changes in net positions are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods.

Both of the government-wide financial statements distinguish functions of the Town of Jackson that are principally supported by taxes and intergovernmental revenues (governmental activities) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (business-type activities). The governmental activities of the Town include general government, public safety, public works, health and welfare, community development, transit, and recreation and culture. The business-type activities of the Town include water and sewage utilities.

The government-wide financial statements can be found on pages 22-23 of this report.

Fund financial statements. The fund financial statements focus on current available resources and are organized and operated on the basis of funds, each of which is defined as fiscal and accounting entity with a self-balancing set of accounts established for the purpose of carrying on specific or attaining certain objectives in accordance with special regulations, restriction or limitations. The Town, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the Town can be divided into two categories: governmental funds, and proprietary funds. The Town does not maintain any fiduciary funds.

Governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financial requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the Town's near term

financial decisions. Both the governmental fund balance sheet and governmental fund statement of revenues, expenditures, and change in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

The Town maintains four major governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the general fund, one special revenue fund, and two capital project funds, all of which are considered major funds. Data from eleven other governmental funds are combined into a single, aggregated presentation. Individual fund data for each of these non-major governmental funds is provided in the form of combining statements elsewhere in this report.

The Town adopts an annual appropriated budget for its general and special revenue funds. A budgetary comparison statement has been provided for those funds to demonstrate compliance with this budget.

The basic governmental fund financial statements can be found on pages 24-30 of this report.

Proprietary funds. The Town of Jackson maintains two different types of proprietary funds. Enterprise funds are used to report the same functions presented as business-type activities in the governmental-wide financial statements. The Town uses enterprise funds to account for its water and sewage operations. Internal service funds are accounting devices used to accumulate and allocate costs internally among the Town's various functions. The Town uses internal service funds to account for its fleet management, employee insurance (self insurance), information technology (IT), and central equipment operations. Because all of these services predominately benefit governmental rather than business-type functions, they have been included within governmental activities in the government-wide financial statements.

Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. The proprietary fund financial statements provide separate information for the water and sewage utilities. Both are considered major funds of the Town. Conversely, all internal service funds are combined into a single, aggregated presentation in the proprietary fund financial statements. Individual fund data for the internal service funds is provided in the form of combining statements elsewhere in this report.

The basic proprietary fund financial statements can be found on pages 31-35 of this report.

Fiduciary funds. Fiduciary funds are used to account for resources held for the benefit of parties outside of the government. Fiduciary funds are not reported in the governmental-wide financial statements because the resources of those funds are not available to support the Town of Jackson's own programs. The accounting used for fiduciary funds is much like that used for proprietary funds.

The Town of Jackson currently maintains no fiduciary funds.

Notes to the financial statements. The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

The notes to the financial statements can be found on pages 36-56 of this report.

Other information. In addition to the basic financial statements and accompanying notes, this report also presents required supplementary information concerning the Town's funding obligation related to participation in a defined benefit plan. Required supplementary information can be found on pages 57-60 of this report.

The combining statements referred to earlier in connection with non-major governmental funds and internal service funds can be found immediately following the required supplementary information.

Combining and individual fund statements can be found on pages 61-75.

FINANCIAL HIGHLIGHTS

- The Town's net position (assets and deferred outflows of resources minus liabilities and deferred inflows of resources) increased by 8.8% as a result of this year's operations. The net position of the Town's governmental activities increased $19,915,715 (10.8%) and net position of the Town's business-type activities increased $454,813 (1.0%).
- Overall, capital assets (net of accumulated depreciation and amortization) increased $25,374,043. Capital assets of governmental activities increased $25,283,216 (20%) and capital assets of business-type activities increased $90,827 (0.3%). Significant governmental capital assets acquisitions included: $15,065,925 for Core Services Maintenance Facility construction, $5,271,683 for 12 transit buses, $2,282,561 in street and sidewalk improvements, and $609,581 in fleet equipment and vehicles. Significant business-type capital assets acquisitions included: $654,089 in water line infrastructure, $156,669 for well #9 development, and $416,131 in sewer line installation. The capital increases in the business activities are offset by $1,712,635 in current year depreciation and amortization.

- The Town's long-term liabilities increased $6,887,382 (63%). The increase was a result of a $6,168,664 increase in net pension liability, $520,005 increase in lease liabilities and $278,519 increase in subscription liability to implement GASB 96. See note I-J "Implementation of new accounting principles" on page 43 for detailed disclosure.
- At the close of the current fiscal year, the Town's governmental funds reported total ending fund balances of $61,048,419, a decrease of $3,583,517 (6%). The decrease is mainly due to a $6,556,465 decrease in the 2019 SPET Fund for construction of the Core Services Maintenance Facility.
- The General Fund's total fund balance decreased $6,153,012 (25%) to $18,726,713. The ending fund balance is 48% of General Fund expenditures. $4,035,491 of the fund balance is assigned to the FY2024 budget to fund several one-time projects.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

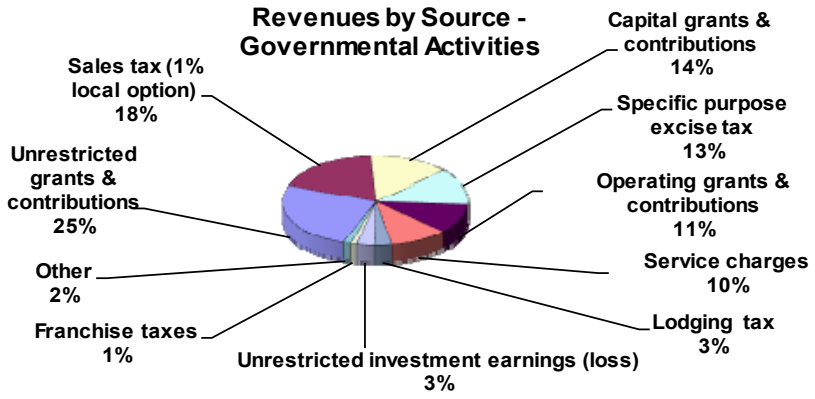
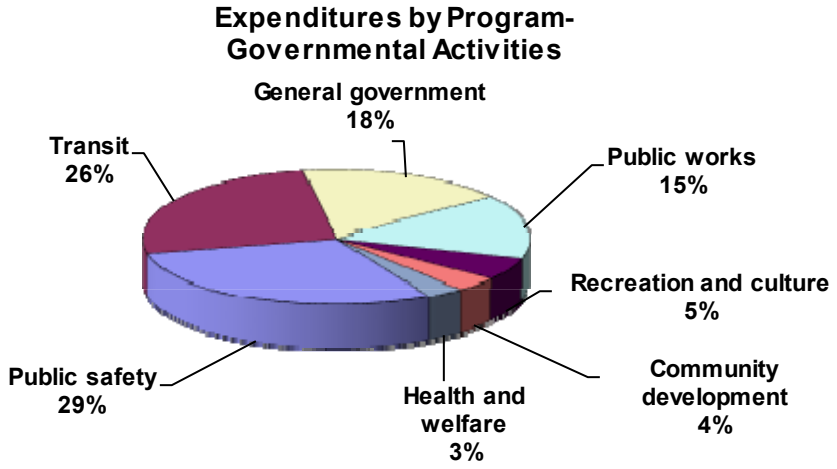
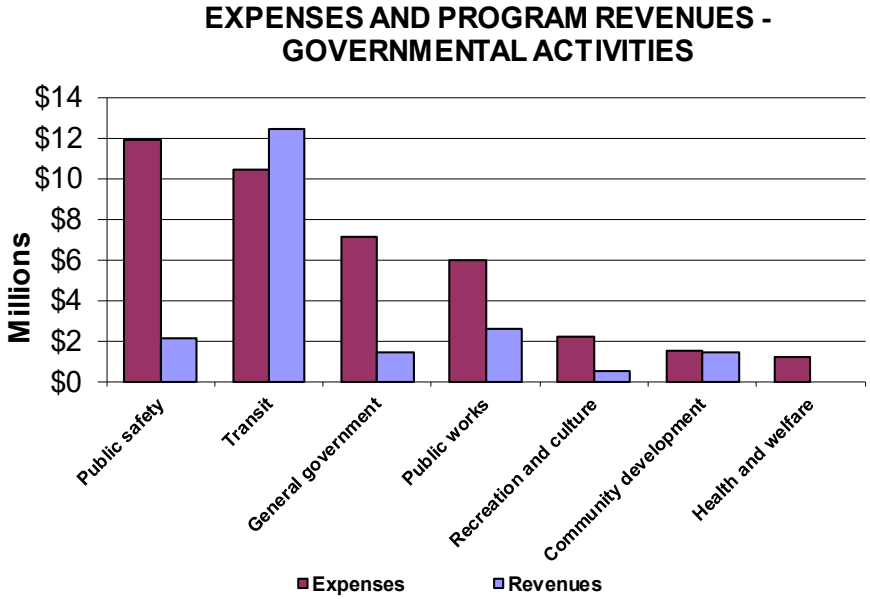
Deferred outflow of resources	5,596,771	5,151,419	367,478	227,738	5,964,249	5,379,157
Other liabilities	8,531,540	6,424,782	879,938	268,632	9,411,478	6,693,414
Long-term liabilities	15,642,971	9,349,677	2,239,996	1,645,908	17,882,967	10,995,585
Total Liabilities	24,174,511	15,774,459	3,119,934	1,914,540	27,294,445	17,688,999
Deferred inflow of resources	4,051,994	8,036,612	8,332	445,221	4,060,326	8,481,833
Net position:						
Net investment in capital assets	147,278,595	123,866,253	33,465,147	33,500,073	180,743,742	157,366,326
Restricted	18,054,440	26,238,326	-	-	18,054,440	26,238,326
Unrestricted	38,726,212	34,038,953	13,542,349	13,052,610	52,268,561	47,091,563
Total net position	$ 204,059,247	$ 184,143,532	$ 47,007,496	$ 46,552,683	$ 251,066,743	$ 230,696,215



By far the largest portion of the Town's net position (74%) reflects investments in capital assets (e.g. land, buildings, structures, systems, machinery, equipment, infrastructure, and intangible assets), net of any related debt used to acquire those assets that is still outstanding. The Town uses assets to provide services to citizens; consequently, these assets are not available for future spending. Although the Town's investment in capital assets is reported net of related debt, it should be noted that resources needed to repay this debt must be provided from other sources, since capital assets themselves cannot be used to liquidate these liabilities.



A small portion of the Town's net position (7%) represents resources that are subject to external restrictions on how they can be used. The $8,183,886 decrease in governmental activities restricted net position is primarily due to 2019 Special Purpose Excise Tax (SPET) project expenditures for Core Services Maintenance Facility.



The remaining unrestricted net position of $52,268,561 may be used to meet one-time obligations to citizens and creditors. Of the unrestricted net positions, $13,542,349 (26%) is attributable to business-type activities. The unrestricted governmental activities net position increased $4,687,259 (14%), while business-type activities unrestricted net position increased $489,739 (3.8%). The government-wide total unrestricted net position increase of $5,176,998 (9.9%) is primarily due to specific purpose excise tax increases and interest earnings. Business-type capital assets increased by $90,827 (0.3%) due to FY2023 additions previously discussed.

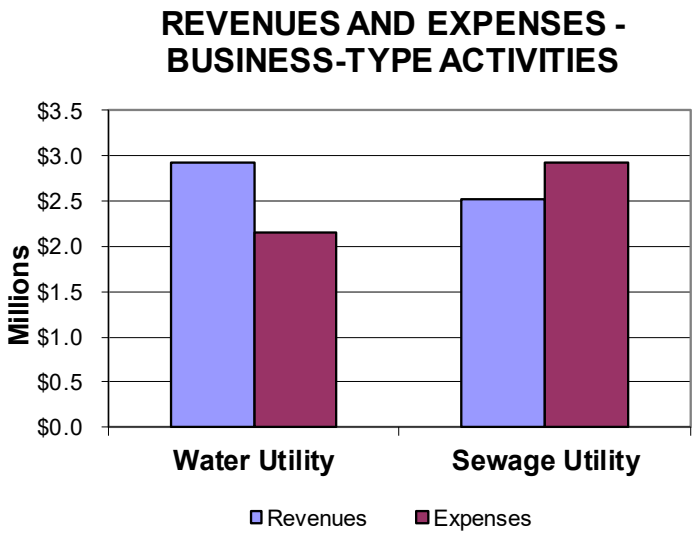
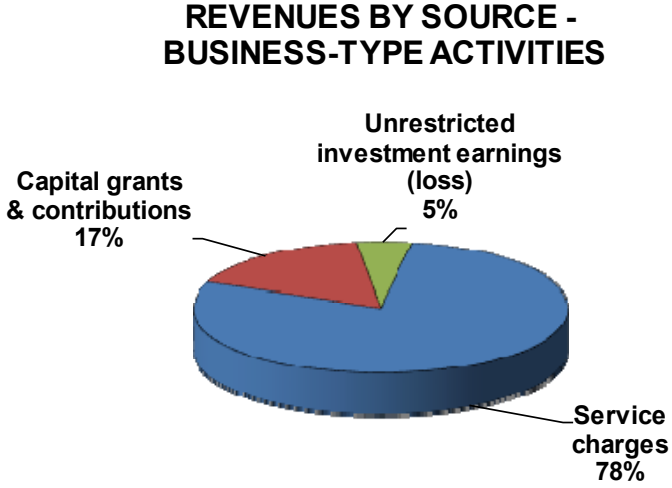
Governmental Activities. The most significant revenue (25%) of the governmental activities are $14.8M in unrestricted grants and state shared revenue. The majority of the revenue in the state-shared category consists of the 4% state-shared sales and use tax ($12.9M) followed by federal mineral royalties ($.5M), gasoline tax ($.5M), severance tax ($.4M) and in various Teton County reimbursements ($.4M). The 1% local option (5th cent) sales tax makes up the second highest source of revenue ($10.5M or 18%) in the governmental funds. The revenue generated from the 5th cent sales tax is split evenly between the general fund and capital projects fund. Capital grants and contributions make up the third highest source of revenue ($8.2M or 14%) in the governmental funds.

Public Safety (police, fire/EMS, building inspector, victim services, animal shelter and dispatch) expenses (29%) was the most significant followed by Transit (26%), General Government (18%), Public Works (15%), Recreation and Culture (5%), Community Development (4%), and Health and Welfare (3%). Included in these amounts is $5,781,952 of depreciation and amortization expense, which is 14% of the total expenses for governmental activities.



Governmental revenues increased $15,143,935 (35%), in the current year, with the most significant portion of the increase attributable to higher capital grants and contributions ($7,042,264) and operating grants and contributions ($2,616,043). Capital grants were significantly higher due to federal grants for



twelve transit bus purchases. Operating grants were higher due to Teton County and federal matches for START Bus System service increases.

Governmental activities expenses increased $6,587,391 (20%) in the current year. The most significant changes in program expenses were as follows:

- General government expenses increased $425,051 (6%). The majority of the increase is due to total compensation increases.
- Public safety expenses increased $2,375,381 (25%). The increase is related to pension expense, total compensation increases, and contributions to Dispatch (Teton County).
- Public works expenses increased $817,803 (16%). The increase is related to increases in total compensation and street maintenance.
- Health & Welfare expenses increased $205,878 (20%) to meet request increases from local non-profits.
- Transit operating expenses increased $2,583,999 (33%). The increase is related to total compensation increases, increased service levels and BUILD grant administration.
- Recreation and culture expenses decreased $500,086 (19%), primarily due to a decrease in operating match for Parks and Recreation (Teton County) department.
- Interest expense increased $24,725 (82%) due to GASB 87 lease and GASB 96 subscription arrangement accounting.

There were no other programs with significant or unusual changes.

Business-type activities. Business-type activities increased the Town's net position by $454,813 (1%). In the prior year, the business-type activities increased the Town's net position by 397,212 (0.9%).

Key elements of the change are as follows:

Water Fund operating revenues increased $312,480 (12%), which is reflective rate increases effective July 1, 2022. Sewage Fund operating revenues increased $151,300 (6%), rate increases effective July 1, 2022.

Capital grants and contributions totaled $1,174,196, 31% higher than the prior year total of $897,205. Capital grants and contributions include capacity and tap fees charged to new customers and intergovernmental grants for capital improvements. Capacity and tap fees increased due to a few large developments in the current year coupled with fee increases. Depreciation and amortization expenses in the water and sewage utilities for fiscal year 2023 were $699,865 and $1,012,750, respectively.

FINANCIAL ANALYSIS OF THE TOWN'S FUNDS

Governmental funds. The focus of the Town's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the Town's financing requirements. In particular, spendable fund balances may serve as a useful measure of a government's net resources available for expenditure at the end of the fiscal year.

At June 30, 2023, the Town's governmental funds reported total ending fund balances of $61,048,419, a decrease of $3,583,517 (6%) when compared with the prior year. Nearly 30% or $18,054,440 of the total ending fund balances constituted restricted fund balances, which are considered unavailable for appropriation for general operations. The prior year restricted fund balances totaled $26,238,326. The decrease is mostly attributable to 2019 SPET project expenditures for the Core Services Maintenance Facility exceeding tax revenues.

At the end of the fiscal year, the General Fund reported a fund balance of $18,726,713 decreasing $6,153,012 (25%) from the prior year. General fund operating revenues were $1,673,209 (6%) more than the prior fiscal year and operating expenditures increased by $2,348,567 (12%). Transfers in increased by $557,215 (42%), primarily due to indirect cost allocations for staff. Transfers out increased by $8,967,912 (115%). This is due to one-time transfers to the Capital Projects Fund to fund multiple, large capital projects.

General Fund expenditures increased $2,348,567 (12%). Salaries and salary related expenditures (Wyoming Retirement, Workers' Compensation, health insurance, etc.) increased $1,303,468 (13%) for all functions. Increase is primarily due to wage increases and 3.5 additional full-time equivalents.

The START Bus System Fund net change in fund balance was negative by $214,997 (11%). Operating expenditures were $14,812,016. Much of the fund balance decrease is due to labor increases and contracted services to meet approximately 7,000 additional service hours. There were $6,289,989 in capital outlays during the fiscal year related to purchasing twelve transit buses. Intergovernmental revenues increased to $10,477,320 from the prior year total of $3,735,481. This is due to US Department of Transportation grant matches of approximately 80% for eleven bus purchases. Transit fares increased $36,169 from the prior year reflecting increased ridership. The Town contributed $1,797,732 and Teton County contributed $1,928,990 for a total of $3,726,722 to the fund in fiscal year 2023.

The 5th Cent Capital Project Fund saw its fund balance increase $12,127,222 (271%) to $16,599,149. The General Fund transferred $16,106,207 in 5th Cent sales tax to the fund in FY2023, an increase of $9,855,965 from FY2022. This is due to one-time transfers to the Capital Projects Fund to fund multiple, large capital projects.

The 2019 SPET Fund saw its fund balance decrease $6,556,465 to $11,548,282. This is due to construction beginning on the Core Services Maintenance Facility and project expenditures exceeding tax collections. This fund will collect taxes specific to voter approved projects and begin to decrease when those projects begin in future years.

Proprietary funds. The proprietary funds financial statements provide the same type of information found in the government-wide financial statements, but in greater detail.

The water utility's net position increased $536,869 (3%) from the prior fiscal year. In 2023, operating revenues increased $312,480 (12%). Capital contributions increased to $299,683 from $224,754 in the previous year (33%). Operating expenses increased $158,281 (8%) to $2,110,181. The 2023 operating income of $821,586 includes $699,885 in depreciation and amortization.

The sewage utility's net position decreased $92,663 (.3%) in the fiscal year ending June 30, 2023. Sewage utility operating revenues increased $151,300 (6%) to $2,524,540 and the utility's operating expenses increased $514,075 (21%) to $2,946,328. Capital contributions increased $202,062 (30%) from $672,451 to $874,513. The $421,788 operating loss includes $1,012,750 in depreciation and amortization.

Other factors of the changes in income from operations have previously been discussed in the government-wide financial analysis of business-type activities.

GENERAL FUND BUDGETARY HIGHLIGHTS

The differences between the 2023 original budget and the final amended budget are adopted by council resolution throughout the year.

General Fund revenues totaled $30,636,180 and fell short the final budget by $655,548 (2%). General taxes and intergovernmental revenues were $615,452 (5%) and $748,737 (5%) lower than budget, respectively. This is due to sales tax related revenues which were budgeted to increase 8% over FY2023 actuals. However, this major revenue source increased 3.1%. This decrease is directly attributable to tourism and sales tax generating transactions returning to historical norms after the COVID-19 pandemic spikes.

General Fund operating expenditures totaled $21,909,840. This was $2,774,217 (11%) less than the final amended budget and $2,504,887 (10%) less than the adopted budget. Including transfers out, supplemental appropriations from budget amending council actions increased the original budget by $434,987 (1%). The majority of this increase was for a mid-year compensation study implementation resulting in employee wage and benefit increases. In fiscal year 2023, no divisions finished the year over budget.

The General Fund year end fund balances since 2013 are as follows:

Year	Amount	Year	Amount
2014	$ 5,450,770	2019	$ 8,683,289
2015	7,049,752	2020	12,158,856
2016	7,484,300	2021	18,020,470
2017	7,650,890	2022	24,879,725
2018	8,329,716	2023	18,726,713

Capital assets. The Town's investment in capital assets for its governmental and business-type activities at June 30, 2023 totaled $184,312,617 (net of accumulated depreciation and amortization). This investment in capital assets included land, construction in progress, structures, systems, machinery and equipment, intangible assets, right to use assets and infrastructure. Right to use assets – subscription asset is a new asset implemented this fiscal year due to GASB 96 as previously discussed.

Major governmental activities capital assets include: $15,065,925 for Core Services Maintenance Facility construction, $5,271,683 for 12 transit buses, $2,282,561 in street and sidewalk improvements. The total government-wide capital asset increase over the prior fiscal year is approximately $25,374,043; governmental activities increased 20% and business-type activities increased 0.3%.

Additional information on the Town's capital assets can be found in the notes to the financial statements on pages 47-48.

LONG-TERM LIABILITIES

Total	$ 15,643,735	$ 9,350,502	$ 2,260,431	$ 1,667,053	$ 17,904,166	$ 11,017,555

Long-term liabilities. The Town's outstanding long-term liabilities--including notes payable, accrued interest payable, and net pension liability—totaled $17,904,166 at June 30, 2023. Governmental long-term and business-type long-term liabilities increased primarily due to net pension liability increase and GASB 96 subscription liability implementation.

Additional information on the Town's long-term liabilities can be found in the notes to the financial statements on pages 50-56 of this report.

ECONOMIC FACTORS AND NEXT YEAR'S BUDGETS AND RATES

- The unemployment rate for the Teton County, Wyoming area for June 30, 2023 was 1.7%, which is below the state average (3.1%) and below the national average (3.8%).
- Due in part to COVID-19 pandemic we reinforced the importance of our fiduciary responsibility to maintain and continue building a strong, resilient community in the short, mid, and long-term. Due to years of prudent budgeting and planning, the Town was able to respond to reduced revenues projected and maintain a well-resourced and responsive Town government to close fiscal year 2023.
- To continue to be a resilient community, we will need to preserve and maintain General Fund Reserves to have the resources to adapt to uncertain times ahead. Looking ahead, recurring expenses are expected to exceed recurring revenues. We must continue evaluating our revenue streams and expenditures, to determine how to ensure a balanced budget into the future.
- The Town will need to prioritize our core services, capital projects and consider reducing funding to the areas of lower priority and/or work to consider a new funding source(s) to maintain current Town program services and capital improvement projects. As our community changes, various core services continue to see increased need year-over-year. The Town simply does not have the capacity to absorb such continuous growth without increasing revenue or reducing existing program services and capital projects.

REQUESTS FOR INFORMATION

This financial report is designed to provide a general overview of the Town's finances for all those interested in governmental finance. Questions concerning any information in the report or requests for additional information should be addressed to Town of Jackson, Finance Department, P.O. Box 1687, Jackson, WY 83001.

Reconciliation of the Governmental Funds Balance Sheet to the Statement of Net Position June 30, 2023

Total fund balances - governmental funds		$ 61,048,419
Amounts reported for governmental activities in the statement of net position are different because:		
Capital assets used in governmental activities are not financial resources and, therefore, are not reported in the funds.		
Land	$ 33,351,431	
Construction in progress	19,713,986	
Buildings, structures and improvements	73,998,356	
Machinery and equipment	24,619,126	
Intangible	6,119,667	
Right to use asset - buildings	1,062,808	
Infrastructure	59,459,054	
Accumulated depreciation and amortization	(71,778,632)	146,545,796
Deferred outflows of resources related to pensions are not reported in the funds.		5,596,771
Long-term liabilties, including bonds payable, are not due and payable in the current period and therefore are not reported in the funds.		
Accrued interest payable		(764)
Lease liability		(849,256)
Note payable		(612,863)
Net pension liability		(13,902,333)
Deferred inflows of resources related to pensions are not reported in the funds.		(1,082,708)
Certain lease revenues are considered unavailable and therefore not reported in the funds.		224,354
Internal service funds are used by management to charge the costs of employee insurance, fleet management, IT services, and central equipment to individual funds. The assets and liabilities of the internal service funds are included in governmental activities in the statement of net position:		
Cash and cash equivalents	$ 598,792	
Investments	3,741,267	
Accounts receivable	340,705	
Due from other governmental units	52,911	
Inventories	501,308	
Prepaid items	57,290	
Machinery and equipment, net	2,894,854	
Right to Use - subsciption asset, net	370,924	
Interfund Payable - pooled cash	(582,653)	
Accounts payable	(585,558)	
Accrued wages payable	(19,490)	
Subscription liability	(278,519)	7,091,831
NET POSITION OF GOVERNMENTAL ACTIVITIES		$ 204,059,247

Reconciliation of the Statement of Revenues, Expenditures and Changes in Fund Balances of Governmental Funds to the Statement of Activities
Year Ended June 30, 2023

Net change in fund balances--total governmental funds		$ (3,583,517)
Amounts reported for governmental activities in the statement of activities are different because:		
Governmental funds reported capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation and amortization expense. This is the amount by which capital outlays exceeded depreciation and and amortization expense.		
Capital outlays	$ 29,981,614	
Depreciation and amortization	(4,997,243)	24,984,371
Repayment of long-term debt principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the Statement of Net Position.		49,302
The net effect of transactions involving net pension liability, deferred outflows of resources related to pensions, deferred inflows of resources related to pensions, and pension expense is to decrease net position.		(1,251,524)
The net effect of transactions involving leases issued, debt service on lease liabilities, and lease conversion is to decrease net position.		(436,824)
Internal service funds are used by management to charge the costs of certain activities to individual funds. The net revenue of the internal service funds is reported with governmental activities.		153,907
Change in net position of governmental activities		$ 19,915,715

The notes to the financial statements are an integral part of this statement.

The notes to the financial statements are an integral part of this statement.

I. Summary of significant accounting policies

A. Description of government-wide financial statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the primary government. Governmental activities, which normally are supported by taxes, intergovernmental revenues, and other nonexchange transactions, are reported separately from business-type activities, which rely to a significant extent on fees and charges to external customers for support.

B. Reporting entity

The Town of Jackson was incorporated in 1914 and is a municipal corporation governed by an elected mayor and four-member governing council. The five-member mayor-council is elected on staggered, even-numbered years. The mayor and council members are elected at-large to four-year terms. The governing body appoints a manager to implement policies and oversee daily operations.

The accompanying financial statements present the governmental entities for which the government is considered to be financially accountable. The Town does not report any component units.

C. Basis of presentation - government-wide financial statements

While separate government-wide and fund financial statements are presented, they are interrelated. The governmental activities column incorporates data from governmental funds and internal service funds, while business-type activities incorporate data from the Town's enterprise funds. Separate financial statements are provided for governmental funds and proprietary funds.

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the non-fiduciary activities of the primary government. For the most part, the effect of inter-fund activity has been removed from these statements.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function. Program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operation or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

D. Basis of presentation - fund financial statements

The fund financial statements provide information about the Town's funds. Separate statements for each fund category; governmental and proprietary, are presented. The emphasis of fund financial statements is on major governmental and enterprise funds, each displayed in a separate column. All remaining governmental funds are aggregated and reported as nonmajor funds. Major individual governmental and enterprise funds are reported as separate columns in the fund financial statements.

The Town reports the following major governmental funds:

- The general fund is the government's primary operating fund. It accounts for all financial resources of the general government, except those accounted for in another fund.
- The 5th cent capital projects fund accounts for the acquisition and construction of the government's major capital facilities, other than those financed by the propriety funds and Specific Purpose Excise Tax (SPET) funds.
- The Southern Teton Area Rapid Transit (START) fund is a special revenue fund. It accounts for operational and capital transit system expenditures primarily financed by state and federal transit grants.
- The 2019 SPET fund accounts for expenditures related to the revenue generated by the 2019 specific purpose excise tax.

The Town reports the following enterprise funds:

- Water Fund. This enterprise fund accounts for the operations of the Town-owned water treatment and distribution system.
- Sewage Fund. This enterprise fund accounts for the operations of the Town-owned sewage collection and treatment system.

Additionally, the Town reports the following fund type:

Internal Service Funds. The operating activities for Employee Insurance, Fleet Management, Central Equipment, and Information Technology (IT) Services are reported in internal service funds because they provide services to other Town departments on a cost reimbursement basis.

During the course of operations, the government has activity between funds for various purposes. Any residual balances outstanding at year end are reported as due from/to other funds and advances to/from other funds. While these balances are reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements. Balances between the funds included in governmental activities (i.e., the governmental and internal service funds) are eliminated so that only the net amount is included as internal balances in the governmental activities column. Similarly, balances between the funds included in business-type activities (i.e., the enterprise funds) are eliminated so that only the net amount is included as internal service fund balances in the business-type activities column. Internal service fund services provided and used by other funds are not eliminated in consolidation. No overhead costs are charged to internal service funds requiring elimination.

Further, certain activity occurs during the year involving transfers of resources between funds. In fund financial statements these amounts are reported at gross amounts as transfers in/out. While reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements. Transfers between the funds included in governmental activities are eliminated so that only the net amount is included as transfers in the governmental activities column. Similarly, balances between the funds included in business-type activities are eliminated so that only the net amount is included as transfers in the business-type activities column.

E. Measurement focus and basis of accounting

The accounting and financial reporting treatment is determined by the applicable measurement focus and basis of accounting. Measurement focus indicates the type of resources being measured such as current financial resources or economic resources. The basis of accounting indicates the timing of transactions or events for recognition in the financial statements.

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

The governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences, and claims and judgments, are recorded only when payment is due. General capital asset acquisitions are reported as expenditures in governmental funds. Issuance of long-term debt and acquisitions under capital outlay related to leases are reported as other financing sources.

Property taxes, sales taxes, franchise fees, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Entitlements are recorded as revenues when all eligibility requirements are met, including any time requirements, and the amount is received during the period or within the availability period for this revenue source (within 60 days of year-end). Expenditure-driven grants are recognized as revenue when the qualifying expenditures have been incurred and all other eligibility requirements have been met, and the amount is received during the period or within the availability period for this revenue source (within 60 days of year-end). All other revenue items are considered to be measurable and available only when cash is received by the government.

The proprietary funds are reported using the economic resources measurement focus and the accrual basis of accounting.

F. Budgetary information

1. Budgetary basis of accounting

The Town uses the following procedures in establishing the budgetary data reflected in the accompanying financial statements:

- According to the laws of the State of Wyoming, all town budgets must be approved by their governing board not later than the third Tuesday in June.
- In May, the recommended budget for the following fiscal year is presented by the Town Manager to the Town Council. The budget includes recommended expenditures and the means of

financing them. Public meetings are held to obtain citizen comment.

- Prior to June 30, the Town Council legally adopts the budget through the passage of a resolution. The resolution sets the limit for expenditures for the year.
- The maximum legal expenditure permitted for the year is the total budget as adopted. The expenditure appropriations in the adopted budget are maintained in the Town's financial system by department within individual funds. Departmental appropriations may be amended during the year if approved by Council in the form of a budget amendment resolution.
- Department directors are generally authorized to transfer budgeted amounts within any specific department's expenditure appropriation. Any budget revisions requiring a transfer between departments must be approved by the Town Council. Additionally, budget revisions involving personnel or capital asset expenditures/expenses must be approved by the Town Council.
- Appropriations in all budgeted funds lapse at the end of the fiscal year even if they have related committed contracts. While all appropriations lapse at year end, valid outstanding committed contracts (those for which performance under the executory contract is expected in the next year) are re-appropriated and become part of the subsequent year's budget.

2. Excess of expenditures over appropriations

For the year ended June 30, 2023, expenditures exceeded appropriation in the Employee Housing Fund. This was due to GASB 87 implementation, non-cash basis budgetary transaction. Through four formal supplementary appropriations, the General Fund original budget increased 1%. Actual expenditures and other uses are 7.9% under the final amended budget.

G. Assets, liabilities, deferred outflows/inflows of resources, and net position/fund balance

1. Cash and cash equivalents

The government's cash and cash equivalents are cash on hand, demand deposits, and short-term investments with original maturities of three months or less from the date of acquisition.

2. Investments

Cash and investment balances from all funds are combined and invested to the extent authorized by state statutes and Town investment policy. Earnings from such investments are allocated to respective funds on the basis of applicable cash balance participation by each fund. The interest receivable balance is reported as one amount in the General Fund while all other funds receive interest revenue distributions in cash.

Investments for the Town are reported at fair value.

3. Receivables

Account (trade) receivables are carried at original billing amount less an estimate made for doubtful receivables based on a review of all outstanding amounts on a regular basis. Management determines the allowance for doubtful accounts by identifying troubled accounts and by using historical experience applied to an aging of accounts. With council approval, trade receivables are written off when deemed uncollectible. Recoveries of trade receivables previously written off are recorded when received.

A receivable is considered past due if any portion of the receivable balance is outstanding for more than 30 days. Interest is charged on receivables that are outstanding for more than 30 days. Accrual of interest is not suspended until a receivable is determined to be uncollectible. Provisions for bad debts would be insignificant and immaterial and none has been made for 2023.

4. Short-term interfund receivables/payables

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. These receivables and payables are classified as "due from other funds" or "due to other funds" on the balance sheet. Short-term inter-fund loans are classified as "interfund receivables/payables." Due to and due from other funds are closed to cash and cash equivalents at year end.

5. Inventories, prepaid items, and deposits

Materials and supplies are valued at cost, which approximates market value, using the first-in/first-out (FIFO) method. The consumption method is used to account for inventories. Inventory costs are recorded as expenditures when individual inventory items are consumed. In governmental funds, reported inventories are equally offset by nonspendable fund balance amounts, indicating that they do not constitute "available spendable resources" even though they are a component of net current assets. The net change in nonspendable fund balances is not presented because the combined statements of revenues, expenditures, and changes in fund balances reflects

the changes in total fund balances rather than just the spendable and nonspendable fund balances.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both the government-wide and fund financial statements. The cost of prepaid items is recorded as expenditures/expenses when consumed rather than when purchased.

Certain payments made to lessors are considered security deposits. These funds are considered assets that will be returned. In the event any deposit is kept by lessor, an expenditure/expense will be recorded.

6. Leases and Service-Based IT Arrangements (Subscription)

A. Town as Lessee

The Town is a lessee for various buildings and an easement. The Town recognizes a lease liability and an right-to-use lease asset (lease asset) in the government-wide financial statements. The Town recognizes lease liabilities with an initial, individual value of $50,000 or more and the lease must be longer than one year including expected extensions.

At the commencement of a lease, the Town initially measures the lease liability at the present value of payments expected to be made during the lease term. Subsequently, the lease liability is reduced by the principal portion of lease payments made. The lease asset is initially measured as the initial amount of the lease liability, adjusted for lease payments made at or before the lease commencement date, plus certain initial direct costs. Subsequently, the lease asset is amortized on a straight-line basis over its useful life. Key estimates and judgments related to leases include how the Town determines (1) the discount rate it uses to discount the expected lease payments to present value, (2) lease term, and (3) lease payments.

- The Town uses the interest rate charged by the vendor as the discount rate. When the interest rate charged by the lessor is not provided, the Town generally uses its estimated incremental borrowing rate as the discount rate for subscription agreements.
- The lease term includes the noncancellable period of the lease.
- Lease payments included in the measurement of the lease liability are composed of fixed payments and purchase option price that the Town is reasonably certain to exercise.

The Town monitors changes in circumstances that would require a remeasurement of its lease and will remeasure the lease asset and liability if certain changes occur that are expected to significantly affect the amount of the lease liability.

Lease assets are reported with other capital assets and lease liabilities are reported with long-term debt on the statement of net position.

B. Town as Lessor

The Town is a lessor for multiple facilities and easements. The Town recognizes a lease receivable and a deferred inflow of resources in the government-wide and governmental fund financial statements.

At the commencement of a lease, the Town initially measures the lease receivable at the present value of payments expected to be received during the lease term. Subsequently, the lease receivable is reduced by the principal portion of lease payments received. The deferred inflow of resources is initially measured as the initial amount of the lease receivable, adjusted for lease payments received at or before the lease commencement date. Subsequently, the deferred inflow of resources is recognized as revenue over the life of the lease term.

Key estimates and judgments include how the Town determines (1) the discount rate it uses to discount the expected lease receipts to present value, (2) lease term, and (3) lease receipts.

- The Town uses its estimated incremental borrowing rate as the discount rate for leases.
- The lease term includes the noncancellable period of the lease.
- Lease receipts included in the measurement of the lease receivable is composed of fixed payments from the lessee.

The Town monitors changes in circumstances that would require a remeasurement of its lease, and will remeasure the lease receivable and deferred inflows of resources if certain changes occur that are expected to significantly affect the amount of the lease receivable.

C. Subscription based IT Arrangements

The Town is committed under various subscription agreements. The Town recognizes a subscription liability and an right-to-use subscription asset in the government-wide financial statements. The Town recognizes subscription liabilities with an initial, individual value of $50,000 or more and the agreement must be longer than one year including expected extensions.

At the commencement of a contract, the Town initially measures the subscription liability at the present value of payments expected to be made during the contract term. Subsequently, the subscription liability is reduced by the principal portion of contract payments made. The subscription asset is initially measured as the initial amount of the subscription liability, adjusted for contract payments made at or before the contract commencement date, plus certain initial direct costs. Subsequently, the subscription asset is amortized on a straight-line basis over its useful life. Key estimates and judgments related to contracts include how the Town determines (1) the discount rate it uses to discount the expected contract payments to present value, (2) contract term, and (3) contract payments.

- The Town uses the interest rate charged by the lessor as the discount rate. When the interest rate charged by the lessor is not provided, the Town generally uses its estimated incremental borrowing rate as the discount rate for leases.
- The contract term includes the noncancellable period of the contract.
- Contract payments included in the measurement of the subscription liability are composed of fixed payments and purchase option price that the Town is reasonably certain to exercise.

The Town monitors changes in circumstances that would require a remeasurement of its contract and will remeasure the subscription asset and liability if certain changes occur that are expected to significantly affect the amount of the lease liability.

Subscription assets are reported with other capital assets and subscription liabilities are reported with long-term debt on the statement of net position.

7. Capital assets

Capital assets, including property, plant, and equipment, and infrastructure assets (e.g., roads, sidewalks, and similar items) are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the government as assets with an initial, individual cost of more than $10,000 ($20,000 for buildings and improvements and $50,000 for infrastructure) and an estimated useful life in excess of two years. Right to use assets are discussed in note below. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated acquisition value on date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized. Major outlays for capital assets and improvements are capitalized as projects are constructed.

Property, plant, equipment, and intangible assets with exhaustible useful lives are capitalized when acquired, and depreciation is provided using the straight-line method applied over the following estimated useful lives of the assets:

Buildings	10-50
Distribution systems	20-50
Infrastructure	20-50
Machinery and equipment	5-15
Right-to-use asset - buildings	2-99
Right-to-use asset – easements	2-99
Right-to-use asset – subscription asset	2-10
Other improvements	5-99
Intangible assets	5-99

Intangible assets lack physical substance, are nonfinancial in nature, and have an estimated useful life extending beyond a single reporting period. The term depreciation, as used in this footnote, includes amortization of intangible assets.
Capital assets transferred between funds are transferred at their net book value (cost less accumulated depreciation), as of the date of the transfer.

8. Deferred outflows and inflows of resources

In addition to assets, the statement of net position reports a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net assets that applies to future periods and so will not be recognized as an outflow of resources (expense/ expenditure) until then. The Town has reported deferred outflows of resources related to pensions on the government-wide statement of net position, each proprietary fund statement of position, and the Fleet Management Fund within the Internal Service Fund statement of net position.

In addition to liabilities, the statement of net position reports a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net assets that applies to future periods and so will not be recognized as an inflow of resources (revenue) until then. The Town has reported three deferred inflows of resources: pension related items, leases and property taxes. Pension items are reported on the government-wide statement of net position, each proprietary fund statement of position, and the Fleet Management Fund within the Internal Service Fund statement of net position. Leases are reported in both the governmental funds balance sheet and the entity-wide statement of net position. These amounts represent future revenues that will be collected per lease agreements and are not currently available to finance operations.

Property taxes for future periods are reported in both the governmental funds balance sheet and the entity-wide statement of net position. Property tax revenues are not recognized prior to the period which they are intended to finance, even if an enforceable lien is in place prior to the beginning of the intended period. Thus, property taxes received or receivable as of year-end, which are intended to finance the following fiscal year, are recorded as deferred inflows.

9. Pension related assets, liabilities, deferred outflows and inflows of resources

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Wyoming Retirement System (the System) and additions to/deductions from the System's fiduciary net position have been determined on the same basis as they are reported by the System. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

10. Net position flow assumption

Sometimes the Town will fund outlays for a particular purpose from both restricted (e.g., restricted bond or grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted – net position and unrestricted – net position in the government-wide and proprietary fund financial statements, a flow assumption must be made about the order in which the resources are considered to be applied.

It is the Town's policy to consider restricted – net position to have been depleted before unrestricted – net position is applied.

11. Fund balance flow assumption

Sometimes the Town will fund outlays for a particular purpose from both restricted and unrestricted resources (the total of committed, assigned, and unassigned fund balance). In order to calculate the amounts to report as restricted, committed, assigned, and unassigned fund balance in the governmental fund financial statements a flow assumption must be made about the order in which the resources are considered to be applied. It is the Town's policy to consider restricted fund balance to have been depleted before using any of the components of unrestricted fund balance. Further, when the components of unrestricted fund balance can be used for the same purpose, committed fund balance is depleted first, followed by assigned fund balance. Unassigned fund balance is applied last.

12. Fund balance policies

Fund balance of governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. The Town itself can establish limitations on the use of resources through either a commitment (committed fund balance) or an assignment (assigned fund balance). The committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the Town's highest level of decision-making authority. The Town council is the highest level of decision-making authority for the Town that can, by adoption of an ordinance prior to the end of the fiscal year, commit fund balance. Once adopted, the limitation imposed by the ordinance remains in place until a similar action is taken (the adoption of another ordinance) to remove or revise the limitation.

Amounts in the assigned fund balance classification are intended to be used by the Town for specific purposes but do not meet the criteria to be classified as committed. The Town council has, by resolution, authorized the Town Manager to assign fund balance. The council may also assign fund balance as it does when appropriating fund balance to cover a gap between estimated revenue and appropriations in the subsequent year's appropriated budget. Unlike commitments, assignments generally only exist temporarily. In other words, an additional action does not normally have to be taken for the removal of an assignment. Conversely, as discussed above, an additional action is essential to either remove or revise a commitment.

13. Long-term obligations

In the government-wide financial statements and in the proprietary fund types of the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statements of net position. If any, bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of applicable bond premium or discount. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental funds recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of the debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from actual debt

proceeds received, are reported as debt service expenditures. The Town's current debt obligations were issued without discounts or premiums and issuance costs were insignificant and immaterial.

14. Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

15. Reclassifications

Where presented, certain 2022 financial statement amounts have been reclassified to conform to the 2023 presentation.

H. Revenues and expenditures/expenses

1. Property Tax

Teton County assesses all taxable property other than centrally assessed property, which is assessed by the State of Wyoming, by January 1 of each year. The Town notifies its levy to Teton County by July 31. Properties taxes are levied on or about August 1 and are payable in two installments on September 1 and March 1. The Teton County Treasurer is responsible for billing and collecting property taxes for the Town. The Town receives monthly distributions for the prior month's collections by the County. Property tax revenues are recognized when levied to the extent that they result in current receivables which means collected within the current period or expected to be collected within 60 days after the period end to be used to pay liabilities of the current period.

2. Sales Tax

The Town imposes a 1% local optional sales and use tax (5th cent). The 5th cent sales tax is collected by the state and remitted monthly to the Town. Sales tax revenues are recorded at the time of receipt or earlier if the susceptible to accrual criteria are met. Additionally, the Town imposes a 1% specific purpose excise tax (SPET) for various voter-approved projects.

3. Lodging Tax

The lodging tax is a 2% tax that is added to a visitor's stay in any Teton County hotel, motel or rental property. It was approved by voters in November, 2010. The tax was reapproved on the ballot in November 2018. The Jackson Hole Travel and Tourism Joint Powers board is responsible for allocating 60% of the collected funds. Teton County and the Town of Jackson governments are responsible for the remaining 40% of the funds collected.

4. Entitlements, state shared revenues and grants (Intergovernmental revenues)

Entitlements and shared revenues are recorded at the time of receipt or earlier if the susceptible to accrual criteria are met. Expenditure-driven grants are recognized in the fund financial statements as revenue when the qualifying expenditures have been incurred, all eligibility requirements have been met, and reimbursement is received within availability period. Included below are the ongoing state shared revenues and grants received by the Town.

Sales tax. The state levies a 4% general sales and use tax, with 31% of it returned to Wyoming towns and counties based on populations and location of sales.

America Rescue Plan (ARPA) Act. These are program allocation driven, one-time funds related to the COVID-19 pandemic. Funds were received via the United States Department of the Treasury.

Gasoline, cigarette, and severance taxes. These three taxes are all imposed by the state and returned to cities, towns and counties by various percentages determined by the Wyoming legislature.

Mineral Royalties. These are federal royalties paid to the state and passed down to cities, towns, and counties by percentages determined by the Wyoming legislature.

Federal Transit Administration (FTA). The FTA provides funding for 80% of administration, 57.5% of operations, and 80% of capital for qualifying bus system expenditures. In FY2023, the FTA provided additional Coronavirus Aid, Relief, and Economic Security (CARES) Act funds which provided for 100% of operations costs.

5. Program revenues

Amounts reported as program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions (including special assessments) that are restricted to meeting the

operational or capital requirements of a particular function or segment. All taxes, including those dedicated for specific purposes, and other internally dedicated resources are reported as general revenues rather than as program revenues.

6. Compensated absences

Employees can sell-back up to 40 hours of accumulated paid time off (PTO) before the end of each fiscal year provided they meet certain requirements. All other accumulated PTO is forfeited. There are no accumulated balances for PTO. Compensatory time, if any, is accrued as wages payable at year end.

7. Proprietary funds operating and nonoperating revenues and expenses

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the water fund, sewer fund, and internal service funds are charges to customers for sales and services. The water fund also recognizes as operating revenue the portion of tap fees intended to recover the cost of connecting new customers to the system. Operating expenses for enterprise funds and internal service funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

I. Federal Audit Requirements

The U.S. Office of Management and Budget (OMB) issued Uniform Administration Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance), which establishes uniform cost principles and audit requirements for federal awards to non-federal entities and administrative requirements for all federal grants.

For 2023, the Town of Jackson audit was performed in accordance with Uniform Guidance. The auditor's report on consideration of the Town's internal control over financial reporting and tests of other matters are issued with this report.

J. Implementation of new accounting principles

For the year ending June 30, 2023, the Town reviewed the applicability of the following new pronouncement of the Governmental Accounting Standards Board (GASB): GASB Statement No. 96 Subscription Based IT Arrangements "subscription agreement." This Statement requires recognition of certain subscription-based information technology assets and liabilities that previously were classified as operating, subscription based agreements and recognized as inflows of resources or outflows of resources based upon the payment provisions of the agreement. It establishes a single model for information technology agreement accounting based upon the principle that software subscriptions are financing arrangements for the right to use an underlying asset. Subscription agreements with less than one-year terms or under $50,000 capitalization threshold do not qualify as technology agreements under this standard. Perpetual software licenses and subscription agreements that transfer ownership and contain no cancelation provisions are reported as debt by the Town and sale of an asset by the vendor. The requirements of this Statement apply to the Town and are implemented in this report.

II. Stewardship, compliance and accountability

A. Budgetary information

Annual budgets are adopted on a basis consistent with accounting principles generally accepted in the United States of America. Annual appropriated budgets are legally adopted by council resolution for all funds.

Formal budgetary integration is employed as a management control device during the year for the General and Special Revenue Funds. Budgetary control for Capital Project Funds is based on a project completion time cycle rather than on an annual basis, therefore, budgetary comparisons on an annual basis would not present meaningful information.

The Town follows these legal compliance procedures in establishing the budgetary data reflected in the financial statements:

1. The Town administrator submits a proposed operating budget, including proposed expenditures and means of financing them, to the town council prior to the beginning of the fiscal year commencing July 1.

2. Public hearings are conducted to obtain taxpayer comments.

3. Prior to June 30, the budget is legally enacted through the passage of a budget resolution.

4. Management may not legally exceed budgeted expenditures at the division level. Monitoring of budgets is maintained at the division level (i.e., police administration, police investigations, police patrols, etc.) and the category level (i.e., personal services; supplies; other services and charges; capital outlay)

within each division. Management can alter the budget at the category level within their division but cannot exceed the total budgeted expenditures for the division that was approved by the town council. During the year, four formal supplementary appropriations were made. However, the town council approves all payments of vouchers and payroll at its regular meetings held twice a month.

5. All budgeted appropriations lapse at the end of the fiscal year. The legal level of budgetary control (i.e. the level at which expenditures may not legally exceed appropriations) is at the department level.

Deficit fund equity

At June 30, 2023, there was one internal service fund (Fleet Management) with a deficit fund balance. Fleet management deficit is due mostly to net pension liability calculations.

IIII. Detailed notes on all activities and funds

A. Cash, cash equivalents and investments

Cash, cash equivalents, and investments at June 30, 2023 are classified in the accompanying financial statements as follows:

Statement of net position:		
Cash and cash equivalents	$	12,640,541
Investments		59,345,179
Total cash and investments	$	71,985,720

Cash and investments at June 30, 2023 consist of the following:

Cash:		
Cash on hand	$	300
Deposit with financial institutions		86,496
Cash equivalents:		
Short-term certificate of deposit		2,089,954
Money market funds		10,463,791
Investments:		
Federal agencies		13,562,360
WYO-STAR		45,782,819
Total cash, cash equivalents, and investments	$	71,985,720

Investments authorized by Wyoming statutes and Town investment policy

The following table identifies the investment types that are authorized for the Town by Wyoming state statute. The Town's investment policy does not restrict investment types beyond the limits set forth by state statute. The table also identifies any provisions in Town policy and state statutes that address interest rate risk, credit risk, and concentration risk. This table also applies to investments of debt proceeds held by bond trustee that are governed by provisions of debt agreements and similarly restricted by state statute.

Authorized Investment Type	Maximum Maturity	Maximum Percentage of Portfolio	Maximum Investment in One Issuer
U.S. treasury obligations	None	None	None
U.S. agency securities	None	None	None
Banker's acceptances	None	25%	None
Commercial paper	270 days	25%	None
Negotiable certificates of deposit	None	None	$250,000
Non-negotiable certificates of deposit	None	None	None
Repurchase agreements	None	25%	None

The Town has investments in WYO-STAR, a government investment pool operated by the State of Wyoming Treasurer's Office. WYO-STAR is available for investments of funds administered by any local government entity within the State of Wyoming. WYO-STAR is not registered with the SEC as an investment company. WYO-STAR is authorized and regulated by the laws of the State of Wyoming. Deposits in WYO-STAR are not insured or otherwise

guaranteed by the State of Wyoming, and participants share proportionally in any realized gains or losses on investments. WYO-STAR operates and reports to participants on an amortized cost basis. The income, gains, and losses, net of administration fees, of WYO-STAR are allocated monthly based on the participant's average balance in relation to the total balance of the pool. The fair value of the WYO-STAR investment pool is approximately equal to the value of the pool shares, $45,782,819.

B. Disclosures related to investment risk

Credit risk: Generally, credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical rating organization. Town polices restrict investments to the safest security types and require portfolio diversification so that potential losses on individual securities will be minimized. As of June 30, 2023, the Town's investments in U.S. Agencies are rated AA+ by Standard & Poor's and AAA by Moody's Investors Service. The Town's investments in negotiable certificates of deposit are below the F.D.I.C. $250,000 insurance limit per institution. Non-negotiable certificates of deposits exceeding $250,000 per institution must be collateralized by the limits defined in the custodial credit risk section of this footnote. The Town's investment in the brokerage money market mutual fund is unrated. Town investment policy limits investments to the safest types of securities, pre-qualifies financial institutions, brokers/dealers, intermediaries, and advisors, and requires investment portfolio diversification.

Custodial risk: Custodial risk for deposits is the risk that, in the event of the failure of a depository financial institution, a government will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. The custodial risk for investments is the risk that, in the event of failure of the counterparty (e.g. broker-dealer) to a transaction, a government will not be able to cover the value of its investment or collateral securities that are in possession of another party. Wyoming statutes do not contain legal requirements that would limit the exposure to custodial risk for deposits or investments, other than the following provision for deposits: Wyoming statutes require that all Town deposits be protected by insurance, surety bond, or collateral. Authorized collateral includes the legal investment described earlier, as well as certain first mortgage notes, and certain other state or local obligations. Wyoming statutes require that securities pledged as collateral be held in safekeeping by the public funds depositor or by any bank, other than the depository bank, chartered by the state of Wyoming, any national bank, other than the depository bank, authorized to do business in the state, any federal reserve bank or branch thereof, or any federal reserve system member bank. According to Town polices, the market value of the collateral must be a minimum of 105% of deposits not covered by insurance or bonds.

Interest Rate Risk: Interest rate risk is the risk that changes in market interest rate will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value is to changes in market interest rates. According to its investment policy, the Town manages its exposure to interest rate risk by purchasing a combination of shorter term and longer term investments. The Town also manages this risk by timing cash flows from maturities so that a portion of the portfolio is maturing or coming close to maturity evenly over time as necessary to provide cash flow and liquidity for operations. Further, the Town purchases some securities that have interest rates that step-up over time. The Town monitors the interest rate risk inherent in its portfolio by measuring the weighted average maturity of its portfolio. The Town has no specific limitations with respect to this metric.

Investment Type	Fair Value	Maturity (in years)
Federal Agencies:		
Federal National Mortgage Assn.	$ 1,976,480	0.98
Federal Farm Credit Bank	3,806,960	1.01
Federal Home Loan Banks	7,778,920	0.86
WYO-STAR	45,782,819	0.00
	$ 59,345,179	
Portfolio weighted average maturity (yrs)		0.15

Concentration of Credit Risk: State statutes contain no limitations on the amount that can be invested in any one issuer. Investments in any one issuer representing approximately 5% or more of the Town's total investments are as follows:

Investment Type	Fair Value	Percent of Investment Portfolio
Federal Agencies:		
Federal National Mortgage Assn.	$ 1,976,480	3.3%
Federal Farm Credit Bank	3,806,960	6.4%
Federal Home Loan Banks	7,778,920	13.1%
WYO-STAR	45,782,819	77.1%

Fair Value: The Town categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The

hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs.

The Town has the following recurring fair value measurements as of June 30, 2023:

The $13,562,360 in U.S. agency securities are determined by an independent pricing service using recently executed transactions, market price quotations, and pricing models that factor in, when applicable, interest rates, bond spreads, and volatility (Level 2 inputs).

Cash, cash equivalents, and investments are presented in the government-wide financial statements as follows:

	Cash and Cash Equivalents	Investments	Total
Governmental activities:			
General Fund	$ 1,974,049	$ 9,973,068	$ 11,947,117
Start Fund	-	-	-
5th Cent Capital Projects	3,098,837	15,296,919	18,395,756
2019 SPET	1,858,101	9,172,221	11,030,322
Nonmajor govermental	2,535,274	9,233,641	11,768,915
Internal service funds	747,295	3,741,267	4,488,562
Total	10,213,556	47,417,116	57,630,672
Business-type activities:			
Water	1,255,463	6,197,392	7,452,855
Sewage	1,160,915	5,730,671	6,891,586
Internal service funds	10,607	-	10,607
Total	2,426,985	11,928,063	14,355,048
Government-wide total	12,640,541	59,345,179	71,985,720
Total cash and investments	$ 12,640,541	$ 59,345,179	$ 71,985,720

C. Concentration of sales and revenues

Teton County School District and Snow King Resort (and affiliates) are the two largest customers of water and sewage. Teton County School District water purchases account for $95,455 (3%) and sewage charges account for $24,998 (1%) of total sales. Snow King water purchases account for $107,655 (4%) of the Water Fund's operating revenue and sewage charges account for $33,727 (1%) of the Sewage Fund's operating revenue.

D. Capital assets

Capital asset activities for the year end June 30, 2023 are as follows:

	Beginning Balance	Additions	Deletions	Ending Balance	Internal Service Fund Assets	Governmental Activities Total	Internal Service Fund Additons	Governmental Activities Additions
Governmental activities:								
Nondepreciable capital assets:

Additions to construction in progress represent new construction in progress minus projects transferred to infrastructure or buildings for completed projects.

Depreciation and amortization was charged to function/programs as follows:

Governmental acitivities:	
General government	$ 1,429,053
Public safety	286,198
Public works	2,009,981
Recreation and culture	527,535
Transit	1,529,185
Total depreciation/amortization expenses - governmental activities	5,781,952
Internal service fund depreciation on capital assets charged to the various functions based on usage.	(784,709)
Depreciation expense excluding internal service fund.	$ 4,997,243
Business-type activities:	
Water Fund	$ 699,885
Sewer Fund	1,012,750
Total depreciation/amortization expenses - business-type activities	$ 1,712,635

E. Claims and judgements

The Town participates in a number of federal and state programs that are fully or partially funded by grants received from other governmental units. Expenditures financed by grants are subject to audit by the appropriate grantor government. If expenditures are disallowed due to noncompliance with grant program regulations, the Town may be required to reimburse the grantor government.

As of June 30, 2023, significant amounts of grant expenditures have not been audited by the granting agency, but the Town believes that disallowed expenditures discovered in subsequent audits, if any, will not have a material effect on any of the individual funds or the overall financial position of the Town. Additionally, unearned revenues are recognized in those funds that have received grant monies in advance of future reimbursable expenditures.

F. Receivables and unearned revenues

Accounts receivables and due from other governmental units: Due from other governmental units represent earned grant reimbursements or repayments owed for providing non-utility related services. The following are the accounts receivables and due from other governmental units at June 30, 2023:

	Accounts Receivable	Due from other Governments
Governmental activities:		
General Fund	$ -	$ 4,002,326
START Bus System	510,548	7,467,286
5th Cent Capital Projects	-	8,869
2019 SPET	8,145	2,436,428
Nonmajor funds	461,488	-
Internal service funds	340,705	52,911
Total governmental activities	1,320,886	13,967,820
Business-type activities		
Water Fund	256,012	-
Sewage Fund	352,209	-
Total business-type activities	608,221	-
Total	$ 1,929,107	$ 13,967,820

Lease receivable

During the current fiscal year, the Town leased eight facilities and easements. The leases range in term from 3 to 23 years with the longest expiring June 2044. Monthly payments ranged in value between $658 and $10,562. The Town recognized $381,043 in lease revenue and $128,603 in interest revenue during the current fiscal year related to these leases. As of June 30, 2023, the Town's receivable for lease payments was $2,731,179. Also, the Town has a deferred inflow of resources associated with this lease that will be recognized as revenue over the lease term. As of June 30, 2023, the balance of the deferred inflow of resources was $2,521,197.

Interfund receivables, payables and transfers: At June 30, 2023, there are interfund balances that are generally short-term loans used to cover temporary cash deficits in various funds. The interfund transfers generally are made for the purposes of distributing revenue from the general fund to other funds for capital projects and operations. Aside from utility transfers discussed below, no significant transfers during the fiscal year that were either non-routine in nature or inconsistent with the activities of the fund making the transfer.

The composition of interfund balances as of June 30, 2023 is as follows:

Receivable Fund	Payable Fund	Amount
General	Start Fund	$ 5,423,487
General	Fleet Management	582,653

On October 1, 2018, the Town approved an interfund loan each from the Water and Sewage funds to the Capital Projects fund to purchase property for office space and employee housing. The 5th Cent Capital Projects fund will repay the utility funds in monthly installments utilizing current interest rates earned on pooled cash over a five-year term. The interfund interest paid and received is recorded in transfers. These interfund loans were paid off during the year ended June 30, 2023.

Unearned revenues: Governmental funds also defer revenue recognition in connection with resources that have been received, but not yet earned. This deferred revenue type is specifically referred to as unearned revenue. At the end of the current fiscal year, the various components of unearned revenue reported in governmental funds were as follows:

	Court Bonds	Construction Bonds	Grants	Lease Deposits	Total
Governmental Fund Activities:					
Unearned revenue					
General Fund	$ 18,750	$ 1,840,287	$ 70,100	$ 11,500	$ 1,940,637
START Bus System	-	-	1,600	-	1,600
5th Cent Capital Fund	-	-	29,615	-	29,615
Employee Housing	-	-	-	60,202	60,202
Total	$ 18,750	$ 1,840,287	$ 101,315	$ 71,702	$ 2,032,054

Transfers: The following interfund transfers are reflected in the fund financial statements at June 30, 2023:

	Transfers In	Transfers Out
Governmental funds:		
General Fund	$ 1,894,246	$ 16,773,598
START	1,797,732	114,345
5th Cent Capital Projects	16,106,207	321,831
Nonmajor governmental	1,435,227	2,427,749
Total governmental funds	21,233,412	19,637,523
Enterprise funds:		
Water	3,513	725,112
Sewage	3,513	725,112
Total enterprise funds	7,026	1,450,224
Internal service funds	32,164	184,855
Total	$ 21,272,602	$ 21,272,602

The following schedule reflects each fund transfer:

In Fund	Out Fund	Amount	
General	Water	$ 725,112	(1)
General	Sewage	725,112	(1)
General	START	114,345	(1)
General	Employee Housing	86,109	(1)
General	Animal Care	58,713	(1)
General	Employee Insurance	184,855	(1)
Capital Projects	Parking Exactions	800,000	(5)
START	Lodging Tax	1,482,927	(1)
START	Capital Projects	314,805	(5)
Capital Projects	General	15,306,207	(2)
Utility Funds	Capital Projects	7,026	(4)
Fleet Management	General	32,164	(1)
Affordable Housing	General	1,435,227	(3)
		$ 21,272,602	

Annual reimbursement for shared expenditures
(1) Annual transfer to subsidize fund operations
(2) Annual 5th cent transfer to capital projects
(3) Transfer for housing projects and joint affordable housing department
(4) Transfer for interfund receivable interest
(5) One-time transfer for capital project

G. Accounts Payable

Accounts payable consists of vendor and retainage payables. As of June 30, 2023, governmental fund vendor payables totaled $5,350,500 and retainage payables totaled $792,341. As of June 30, 2023, business-type activities vendor payables totaled $705,486 and retainage payables totaled $110,249.

H. Long-term liabilities

Notes payable: The Town currently has issued two notes payable:

The first is a $1,158,046, 4% note also with the WWDC. This note is secured by the revenues of the Water Fund and a mortgage on the assets of the water supply system. This 30 year note is also payable in equal annual installments.

The last is a $1,000,000, .5% loan from Wyoming Business Council to install additional infrastructure at Snow King Mountain. This note is secured by the revenues of the Water Fund. This 20 year note is payable in 19 annual installments of $52,552 with all unpaid principal and interest due in the 20th year.

The notes payable outstanding are as follows:

Governmental activities

Notes Payable	Final Maturity	Interest Rates	Issue Amount	Outstanding 6/30/2023
Snow King Infrastructure				
Snow King Loan	03/31/35	0.50%	$ 1,000,000	$ 612,863

Business-type activities

Notes Payable	Final Maturity	Interest Rates	Issue Amount	Outstanding 6/30/2023
Water supply and storage projects				
2010 WWDC note	11/11/41	4.00%	1,158,046	879,579

Annual debt service requirements to maturity for the notes payable are as follows:

Year ending June 30	Governmental activities Principal	Governmental activities Interest	Business-type activities Principal	Business-type activities Interest
2024	$ 49,488	$ 3,064	$ 31,787	$ 35,183
2025	49,735	2,817	33,058	33,912
2026	49,984	2,568	34,381	32,589
2027	50,234	2,318	35,756	31,214
2028	50,485	2,067	37,186	29,784
2029-2033	256,237	7,799	209,468	125,382
2034-38	106,701	1,602	254,850	80,000
2039-42	-	-	243,094	24,645
Total	$ 612,863	$ 22,235	$ 879,579	$ 392,709

Leases payable

The Town is committed under nine leases for buildings and easements entered into as lessee. The leases range between two and six years. As of June 30, 2023, the value of the lease liability was $895,324. The Town is required to make monthly principal and interest payments ranging between $1,500 and $11,050. The leases have an interest rate between 1% and 12%. The leases have estimated useful lives ranging between two and six years. The value of the right-to-use asset as of the end of the current fiscal year was $1,130,345 and had accumulated amortization of $284,100.

The future principal and interest lease payments as of June 30, 2023 were as follows:

Year ending June 30	Governmental activities Principal	Governmental activities Interest	Business-type activities Principal	Business-type activities Interest
2024	$ 186,472	$ 47,420	11,118	190
2025	169,125	37,760	11,380	154
2026	156,026	27,618	11,648	117
2027	165,179	16,554	11,922	79
2028	147,432	5,468	-	-
2029	25,022	193	-	-
Total	$ 849,256	$ 135,013	$ 46,068	$ 540

Subscription payable

The Town is committed under four subscription agreements for software. The agreements range between two and six years. As of June 30, 2023, the value of the subscription liability was $278,519. The Town is required to make annual principal and interest payments ranging between $12,314 and $46,545. The agreements have an interest rate between 3.34% and 4.02%. The right-to-use subscription assets have estimated useful lives ranging between two and six years. The value of the right-to-use asset as of the end of the current fiscal year was $464,823 and had accumulated amortization of $93,899.

During the year ended June 30, 2023, there were no additional variable payments or other payments associated with these subscriptions.

The following is a summary of changes in long-term liabilities reported in the government-wide financial statements for the year ended June 30, 2023:

	Beginning Balance	Additions/ Proceeds	Reductions/ Payments	Ending Balance	Due Within One Year
Governmental activities:					
Snow King Loan	$ 662,105	$ -	$ (49,242)	$ 612,863	$ 49,488
Leases payable	307,782	700,215	(158,741)	849,256	186,472
Subscription payable	-	377,792	(99,273)	278,519	103,253
Governmental activities total	969,887	1,078,007	(307,256)	1,740,638	339,213
Business-type activities:					
Water - storage	910,144	-	(30,565)	879,579	31,787
Leases payable	67,537	-	(21,469)	46,068	11,118
Business-type activities total	977,681	-	(52,034)	925,647	42,905
Government-wide total	$ 1,947,568	$ 1,078,007	$ (359,290)	$ 2,666,285	$ 382,118

Redemptions: None.

I. Risk management and litigation

The Town is exposed to various risks of losses related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. For the past several years, the Town obtained coverage from various sources and has effectively managed risk through a number of employee education and prevention programs.

All risk management activities are accounted for in the appropriate fund. Expenditures and claims are recognized when it is probable that a loss has occurred, the amount of the loss can be reasonably estimated, and the loss amount exceeds insurance coverage. In determining claims, events that might create claims, but for which none have been reported, are considered.

The Town attorney estimates that the amount of actual or potential claims against the Town as of June 30, 2023 will not materially affect the financial condition of the Town.

Workers compensation coverage is provided through the state of Wyoming's Worker's Safety and Compensation Division. The Town pays an annual premium, reflecting a base rate plus an experience premium, to the division. Currently, the Town receives drug, alcohol, and safety program discounts.

The Town self-insures its health benefit coverage up to an annual $70,000 per claimant, with exception of laser coverage option. Stop-loss coverage is purchased from private insurers for amounts exceeding $70,000. For the year ended June 30, 2023, the Town exercised no laser coverage on any participants. Health benefit self-insurance activities are accounted for in the Employee Insurance Fund, an internal service fund.

Liability insurance is provided through Local Government Liability Pool (LGLP), a pooled self-insurance program. LGLP was created by the legislature specifically for local governments in Wyoming. The coverage amounts are the limits set by the Governmental Claims Act (W.S. 1-39-118). Current statutory limits are $250,000 per claimant with $500,000 per occurrence. Excess insurance coverage provides for out-of-state claims and Federal Civil Rights claims with the current limit of $5 million with a $1 million limit per occurrence. The LGLP policy has a $1,000 deductible.

Property and casualty insurances are provided by Wyoming Association of Risk Management (WARM) through a pooled self-insurance program. The WARM policy has a $5,000 deductible.

An analysis of claims activities for the last three fiscal periods ending on June 30 is presented below:

	2021	2023	2023
Paid losses	$33,696	$35,358	$32,361
Paid expenses	3,270	7,000	9,000
Reserves	25,965	14,895	-
Total incurred	$62,931	$57,253	$41,361

The Town's commercial insurance carrier has no set reserve losses or reserve expenses for claims filed after June 30, 2023 for incidents occurring prior to that date.

There were no significant reductions in insurance from the previous year and there were no settlements in excess of insurance coverage in each of the past three years.

J. Retirement plans

1. Defined benefit plans

The Town participates in the Wyoming Retirement System (the "System"), a statewide cost sharing multiple-employer public employee retirement system. The System is established and governed by the respective sections of Wyoming state statute. The statute provides for the administration of the

System under the direction of the Wyoming State Retirement Board whose members are appointed by the Governor. The System issues a publicly available financial report that includes financial statements and required supplementary information for the System. A copy of the report may be obtained by writing to the Wyoming Retirement System, 6101 Yellowstone Road, Suite 500, Cheyenne, Wyoming 82002, by calling 1-307-777-7691, or https://retirement.wyo.gov/About/Reports?#categories. Substantially all Town employees are eligible to participate in following retirement plans offered by the System based upon eligibility and hiring status: 1) Public Employees' Pension Plan; 2) Law Enforcement Pension Plan; and 3) Wyoming Deferred Compensation Plan.

Public Employees' Pension Plan

The Public Employees' Pension Plan (PEPP) is a cost sharing multiple employer defined benefit, contributory retirement plan covering substantially all full-time employees of the Town. PEPP statutorily requires 18.62% of the participant's salary to be contributed to PEPP. Contributions consist of 9.25% of the participant's salary as employee contributions and 9.37% as employer contributions. The amount of contributions designated as employee contributions represent the portion of total contributions that a participant retains ownership of and can elect to receive as a refund upon termination of employment. Employers can elect to cover all or a portion of the employee's contribution at their discretion. Through legislation passed during the 2012 legislative session, two tiers of benefits were established for participants of this plan.

- Tier 1, PEPP allows for normal retirement after four years of service and attainment of age 60. Early retirement is allowed provided the employee has completed four years of service and attained age 50 or 25 years of service but will result in a reduction of benefits based on the length of time remaining to age 60.

- Tier 2, PEPP allows for normal retirement after four years of service and attainment of age 65. Early retirement is allowed provided the employee has completed four years of service and attained age 55, or 25 or more years of service but will result in a reduction of benefits based on the length of time remaining to age 65. All employees may also retire upon normal retirement on the bases that the sum of the member's age and service is at least 85.

PEPP provides retirement, disability and death benefits according to predetermined formulas and allows retirees to select one of eight optional methods for receiving benefits, including two joint and survivor forms of benefits: a 100% joint and survivor annuity, and a 50% joint and survivor annuity. The benefit amounts under these options are determined on an actuarially equivalent basis. Any cost of living adjustment provided to retirees must be granted by the State Legislature. In addition, a cost of living adjustment will not be approved by the legislature unless the plan is 100% funded after the COLA is awarded.

Employees terminating prior to normal retirement can elect to withdraw all employee contributions plus accumulated interest through date of termination or, if they are vested, they may elect to remain in PEPP and be eligible for retirement benefits at age 50 (Tier 1 employees) and 55 (Tier 2 employees).

Contributions to PEPP for the year ended June 30, 2023 were $1,305,841.

Law Enforcement Pension Plan

The Wyoming Law Enforcement Pension Plan (LEPP) is a cost sharing multiple employer defined benefit, contributory plan covering all law enforcement employees of the Town. LEPP statutorily requires participants to contribute 8.6% of their salary to LEPP and the employer is required to contribute 8.6% of each participant's salary.

LEPP statutorily provides retirement, disability and death benefits according to predetermined formulas and allows employees to select one of seven optional methods for receiving benefits. Any cost of living adjustment provided to retirees must be granted by the State Legislature. In addition a cost of living adjustment will not be approved by the legislature unless LEPP is 100% funded after the COLA is awarded. Participants may withdraw from LEPP at any time and receive refunds of participant contributions plus accumulated interest.

Contributions to LEPP for the year ended June 30, 2023 were $484,598.

Wyoming Deferred Compensation Plan

The Plan administered by the System is an IRS Section 457 Deferred Compensation Plan. This Plan is available as a supplemental plan to the defined benefit retirement plans. Contributions may be made into this Plan (subject to plan and Internal Revenue Code limitations) by employees and employer contributions at rates determined by the Town.

2. **Pension Liabilities, Expense and Deferred Outflows of Resources Related to Pensions**

At June 30, 2023, the Town reported an entity-wide net pension liability of $15,216,682 of which $13,902,333 is related to governmental activities and $550,239 and $764,110 is related to the Town's water and sewer funds, respectively.

Plan	Proportionate Share	Pension Liability
PEPP	0.367419%	$ 10,040,865
LEPP	1.519374%	$ 5,175,817
Total net pension liability		$ 15,216,682

The net pension liability was measured as of December 31, 2022, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of December 31, 2022 and rolled-forward using generally accepted actuarial procedures. The proportion of the net pension liability was based upon actual historical employer contributions to the plan from the census data submitted to the plan for pay periods ending in 2022.

For the year ended June 30, 2023, the Town recognized entity-wide pension expense of $1,794,321. The PEPP recognized an expense of $799,153. The LEPP recognized an expense of $995,168. At June 30, 2023, the Town reported entity-wide deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	PEPP	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	$ 50,354	$ 63,650
Net difference between projected and actual earnings on pension plan investments	864,321	-
Changes in assumptions	269,472	-
Change in proportion	886,266	-
Contributions subsequent to the measurement date	736,901	-
	$ 2,807,314	$ 63,650

	LEPP	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	$ 122,212	$ 163,221
Net difference between projected and actual earnings on pension plan investments	363,257	-
Changes in assumptions	2,143,509	800,450
Change in proportion	287,684	63,719
Contributions subsequent to the measurement date	240,273	-
	$ 3,156,935	$ 1,027,390

Deferred outflows of resources related to pensions resulting from Town contributions of $977,174 made subsequent to the measurement date will be recognized as a reduction of the net pension liability in the upcoming fiscal year. Other amounts reported as deferred outflows of resources related to pensions will be recognized in pension expense as follows:

Fiscal Year Ending June 30,	Net Deferred Outflows (Inflows) of Resources PEPP	LEPP
2024	$ 201,949	$ 542,744
2025	498,321	887,546
2026	372,112	38,710
2027	934,381	420,272
	$ 2,006,763	$ 1,889,272

Asset Class	Allocation	20 Year Arithmetic Expected Real Return
Cash	0.50%	0.32%
Gold	1.50%	
Fixed Income	20.00%	0.72%
Equity	51.50%	9.00%
Marketable Alternatives	16.00%	6.02%
Private Real Assets	10.50%	7.67%
Totals	100.00%	

Actuarial Assumptions

The total pension liability in the December 31, 2022, actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

	PEPP	LEPP
Projected salary increases, includes inflation	2.50% to 6.50%	5.25% TO 9.25%
Assumed inflation rate	2.25%	2.25%
Investment Rate of Return	6.80%	6.80%

Mortality rates were based on the RP-2014 Employee Mortality Table, fully generational, for Males and Females, as appropriate, with adjustments for mortality improvements based on Scale MP-2017.

Discount Rate

The discount rate used to measure the total pension liability for PEPP was 6.8% and LEPP was 5.53%. The projection of cash flows used to determine the discount rate assumed contributions from participating employers will be made based on the actuarially determined rates based on the Board's funding policy, which establishes the contractually required rates under Wyoming State Statutes. Based on those assumptions, the Systems' fiduciary net position was projected to be available to make all the projected future benefit payments of current plan members. Therefore, the long term expected rate of return on pension plan investments was applied to all periods of projected benefit payment to determine the total pension liability.

Sensitivity of the proportionate share of the net pension liability to changes in the discount rate:

The following presents the proportionate share of the net pension liability calculated using the PEPP discount rate of 6.80% and the LEPP discount rate of 5.53%, as well as what the proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower or 1-percentage-point higher than the current rate:

	1% Decrease	Discount Rate	1% Increase
PEPP	5.80%	6.80%	7.80%
Proportionate share of net pension liability	$ 14,826,753	$ 10,040,865	$ 6,074,663
LEPP	4.53%	5.53%	6.53%
Proportionate share of net pension liability	7,789,900	5,175,817	3,074,638

Pension plan fiduciary net position

Detailed information about the pension plan's fiduciary net position is available in the separately issued Wyoming Retirement System financial report.

K. Committed contracts

At June 30, 2023, the Town had the following remaining commitments for uncompleted construction and equipment purchase contracts:

Fund/Project	Remaining Contract
START	
6 Buses	4,294,308
BUILD Grant	451,134
On-Demand	205,395
Capital Projects	
Chip Seal	275,160
2006 SPET	
North King	255,384
2019 SPET	
Core Services Vehicle Maintenance Facility	17,467,490
Water	
North King	320,180
Well House	131,320
Sewer	
North King	180,515
Gill Avenue	286,934
Flat Creek	354,100
Central Equipment Fund	
Dumptruck	238,664

In 2008, the Town created a shared-appreciation mortgage program as a recruitment tool for key personnel. At June 30, 2023, the Town's commitments totaled $266,500.

L. Fund changes and fund balances

Amounts for specific purposes by fund and fund balance classifications for the year ended June 30, 2023, are as follows:

Classification/Fund	Purpose	Amount
Nonspendable		
General Fund	Prepaid items	$ 4,537
START Bus System	Prepaid items	4,714
5th Cent Capital Projects	Prepaid items	5,000
Restricted		
General Fund	Victim services	13,732
2010 SPET	Energy	121,656
2006 SPET	Pathways/Sidewalks	258,247
2014 SPET	Pedestrian/Complete Streets	3,242,287
2016 SPET	Landslide mitigation	334,001
2019 SPET	Facility/Stormwater	11,548,282
Parking Exactions	Parking improvements	216,181
Parks Exactions	Park improvements	547,244
Affordable Housing	Housing options	420,316
Lodging Tax	Visitor impacts	816,420
Animal Care	Animal shelter	536,074
Assigned		
Employee Housing	Employee housing	2,649,056
Affordable Housing	Housing options	2,106,630
Parking Exactions	Parking management	1,152,616
5th Cent Capital Projects	Various improvements	16,594,149
START Bus System	Transit	1,768,833
General Fund	Subsequent year's budget	4,035,491
Unassigned		
General Fund		14,672,953
Total fund balances		$ 61,048,419

For the year ended June 30, 2023, the Town closed the following fund(s):
2017 SPET

For the same period, the Town opened the following fund(s):
None

Statistical Section

TOWN OF JACKSON
WYOMING

Statistical Information

(unaudited)

The Statistical Section is included to provide financial statement users with additional historical perspective, context, and detail for them to use in evaluating the information contained within the financial statements, notes to the financial statements, and required supplementary information with the goal of providing the user a better understanding of the Town's economic condition.

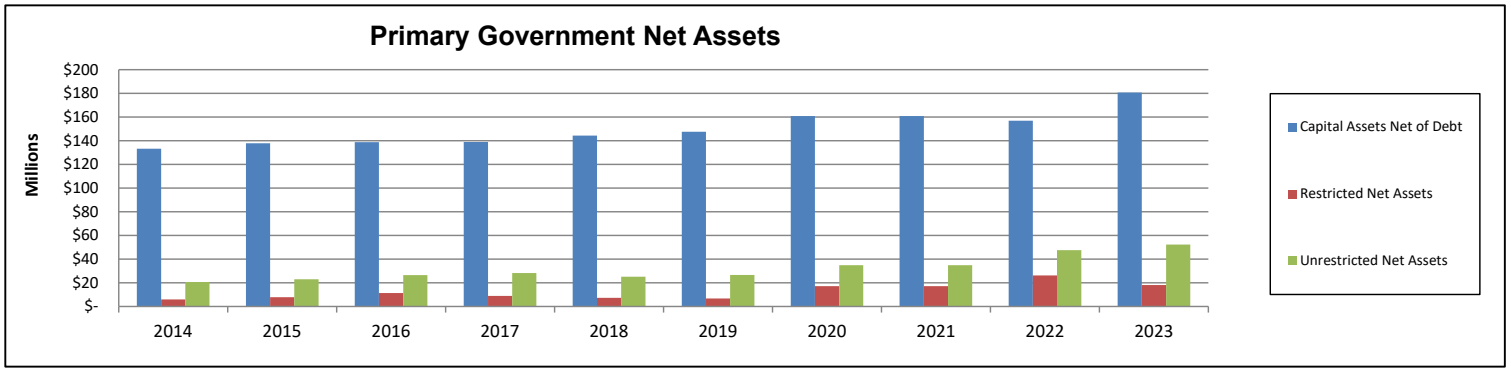
Contents

Financial Trends
These schedules contain information to help the reader understand how the Town's financial performance and well-being have changed over time.

Revenue capacity
These schedules contain information to help the reader assess the Town's most significant local revenue sources.

Debt capacity
These schedules contain information to help the reader assess the affordability of the Town's current levels of outstanding debt and the Town's ability to issue additional debt in the future.

Demographic and economic information
These schedules offer demographic and economic indicators to help the reader understand the environment within which the Town's financial activities take place.



Operating information
These schedules contain service and infrastructure data to help the reader understand how the information in the Town's financial report relates to the services the Town provides and activities it performs.

Sources: Unless otherwise noted, the information in these schedules is derived from the annual comprehensive financial reports for the relevant year.

Notes: (1) The local option sales and use tax is divided between the General and Capital Projects funds.
(2) Franchise fees are approxiamtely 5% of gross revenues for gas, electric, cable, telephone, cell phone towers and trash collection.
(3) Specific Purpose Excise Taxes are restricted to specific voter approved projects.
(4) The lodging tax consists of 10% general use revenue and 30% visitor impact revenue.
(5) The Town began assessing 0.5 mills in FY2021. Based on timing of collections, intital revenues were recoginized in FY2022.
(6) The property tax revenue that could be raised by levying remaining 7.5 mills on the town's assessed valuation.

Change 2014-2023	114.5%	10.9%	-55.9%	9.2%	11.4%	-100.0%	81.9%

Notes: (1) As of June 30, 2004, the 4% state sales and use tax is distributed 69% to the state and 31% to cities, towns and counties. Of the 31%, 1% is distributed proportionately based on population and 30% is distributed proportionately based on the sales tax collected in each county.

(2) The gasoline tax is distributed 57.5% to the state, 13.5% and 14% to counties, and 15% to cities and towns. City and town distributions are based 75% on proportionate sales in cities and towns and 25% on proportionate populations for the same.

(3) The cigarette tax is distributed 33 1/3% to incorporated cities, towns, and counties proportionately to sales derived in each. The remaining 66 2/3% is distributed 38 1/4% to the state's general fund and the remaining 61 3/4% is distributed in the preceding manner.

(4) The severance tax distribution to cities and towns is 9.25% of the total in the state severance tax distribution tax account (up to $155,000,000) in proportion to population.

Direct and Overlapping Governmental Activities Debt
As of June 30, 2023

(Unaudited)

Teton County assessed valuation	3,972,145,024
Town of Jackson assessed valuation	896,178,816
Town of Jackson percent of total	22.6%

Direct and overlapping debt governmental activity debt	Total Debt 6/30/2023 (1)	Percent Applicable	Town's Share of Debt 6/30/2023 (2)
Teton County	$ 2,117,703	22.6%	$ 477,787
Town of Jackson	612,863	100.0%	612,863
Total direct and overlapping governmental activities debt	$ 2,730,566		$ 1,090,650

Ratio to assessed valuations	
Direct debt	0.07%
Total direct and overlapping debt	0.12%

Notes: (1) Excludes enterprise revenue debt, specific purpose excise tax supported debt and lease obligations.

(2) Overlapping governments are those that coincide, at least in part, with geographic boundaries of the town. This schedule estimates the portion of the outstanding debt of those overlapping governments that is borne by the residents and businesses of the town. This process recognizes that, when considering the government's ability to issue and repay long-term debt, the entire burden borne by residents and businesses should be taken into account. However, this does not imply that every taxpayer is a resident, therefore responsible for repaying the debt, of each overlapping government.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the Mayor and Town Council
Town of Jackson, Wyoming

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States (*Government Auditing Standards*), the financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Jackson, Wyoming (the Town) as of and for the year ended June 30, 2023, and the related notes to the financial statements, which collectively comprise the Town's basic financial statements, and have issued our report thereon dated December 27, 2023.

Report on Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Town's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Town's internal control. Accordingly, we do not express an opinion on the effectiveness of the Town's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the Town's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Independent Member of PrimeGlobal | The Association of Advisory and Accounting Firms

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist that were not identified.

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Town's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Town's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Town's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE FOR EACH MAJOR FEDERAL PROGRAM AND REPORT ON INTERNAL CONTROL OVER COMPLIANCE IN ACCORDANCE WITH THE UNIFORM GUIDANCE

Report on Compliance for Each Major Federal Program

Opinion on Each Major Federal Program

We have audited the Town of Jackson, Wyoming's (the Town) compliance with the types of compliance requirements identified as subject to audit in the OMB *Compliance Supplement* that could have a direct and material effect on each of the Town's major federal programs for the year ended June 30, 2023. The Town's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

In our opinion, the Town complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2023.

Basis for Opinion on Each Major Federal Program

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America (GAAS); the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States (*Government Auditing Standards*); and the audit requirements of Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Our responsibilities under those standards and the Uniform Guidance are further described in the Auditor's Responsibilities for the Audit of Compliance section of our report.

We are required to be independent of the Town and to meet our other ethical responsibilities, in accordance with relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on compliance for each major federal program. Our audit does not provide a legal determination of the Town's compliance with the compliance requirements referred to above.

Independent Member of PrimeGlobal | The Association of Advisory and Accounting Firms

Responsibilities of Management for Compliance

Management is responsible for compliance with the requirements referred to above and for the design, implementation, and maintenance of effective internal control over compliance with the requirements of laws, statutes, regulations, rules and provisions of contracts or grant agreements applicable to the Town's federal programs.

Auditor's Responsibilities for the Audit of Compliance

Our objectives are to obtain reasonable assurance about whether material noncompliance with the compliance requirements referred to above occurred, whether due to fraud or error, and express an opinion on the Town's compliance based on our audit. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS, *Government Auditing Standards*, and the Uniform Guidance will always detect material noncompliance when it exists. The risk of not detecting material noncompliance resulting from fraud is higher than for that resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Noncompliance with the compliance requirements referred to above is considered material, if there is a substantial likelihood that, individually or in the aggregate, it would influence the judgment made by a reasonable user of the report on compliance about the Town's compliance with the requirements of each major federal program as a whole.

In performing an audit in accordance with GAAS, *Government Auditing Standards*, and the Uniform Guidance, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material noncompliance, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the Town's compliance with the compliance requirements referred to above and performing such other procedures as we considered necessary in the circumstances.
- Obtain an understanding of the Town's internal control over compliance relevant to the audit in order to design audit procedures that are appropriate in the circumstances and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of the Town's internal control over compliance. Accordingly, no such opinion is expressed.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and any significant deficiencies and material weaknesses in internal control over compliance that we identified during the audit.

Report on Internal Control Over Compliance

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing

their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the Auditor's Responsibilities for the Audit of Compliance section above and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies in internal control over compliance. Given these limitations, during our audit we did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above. However, material weaknesses or significant deficiencies in internal control over compliance may exist that were not identified.

Our audit was not designed for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, no such opinion is expressed.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

NOTE 1 – BASIS OF PRESENTATION

The accompanying schedule of expenditures of federal awards (the Schedule) includes the federal award activity of the Town of Jackson under programs of the federal government for the year ended June 30, 2023. The information in this schedule is·presented in accordance with the requirements of Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). Because the Schedule presents only a selected portion of the operations of the Town of Jackson, it is not intended to and does not present the financial position, changes in net position, or cash flows of the Town of Jackson.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Expenditures reported on the Schedule are reported on the accrual basis of accounting. Such expenditures are recognized following the cost principles contained in the Uniform Guidance, wherein certain types of expenditures are not allowable or are limited as to reimbursement.

NOTE 3 - INDIRECT COST RATE

The Town of Jackson has not elected to use the 10% de minimis indirect cost rate as allowed under the Uniform Guidance.

Introductory Section

Administration and Finance

December 27, 2024

To the Honorable Mayor, Members of the Town Council, and the Citizens of the Town of Jackson:

The Wyoming statutes require all cities, towns, and counties to issue an annual report on its financial position and activity prepared in accordance with accounting principles generally accepted in the United States of America (GAAP), and audited in accordance with auditing standards generally accepted in the United States of America by a firm of licensed certified public accountants or the Wyoming Office of State Audit. Pursuant to that requirement, we hereby issue the Annual Comprehensive Financial Report (ACFR) of the Town of Jackson for the fiscal year ended June 30, 2024.

The Town of Jackson' financial statements have been audited by Jones Simkins LLC, a firm of licensed certified public accountants. The goal of the independent audit was to provide reasonable assurance that the financial statements of the Town of Jackson for the fiscal year ended June 30, 2024, are free of misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unmodified opinion that the Town of Jackson's financial statements for the fiscal year ended June 30, 2024, are fairly presented in conformity with GAAP.

Management's discussion and analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview, and analysis of the basic financial statements. The MD&A compliments this letter of transmittal and should be read in conjunction with it. The MD&A can be found on pages 13-22.

PROFILE OF THE GOVERNMENT

The Town of Jackson, incorporated in 1914, is located in Teton County near the Wyoming and Idaho border south of the Grand Teton and Yellowstone National Parks. The town currently has a land area of nearly 4 square miles and an estimated population of 10,600. The Town of Jackson is empowered to levy 8 mills of property tax on both real and personal properties located within its boundaries. The Town implemented a property tax of 0.5 mills during 2022. This is the first property tax assessment by the Town since 1977. It is also empowered by state statute to extend its corporate limits by annexation, which is done periodically when deemed appropriate by the Town Council.

The Town of Jackson is governed by city code under Wyoming Statutes with a council-mayor form of government. Policy-making and legislative authority are vested in a Town Council consisting of the mayor and four council members. The Town Council is responsible, among other things, for passing ordinances, resolutions, adopting the budget, appointing commissions, authorities, and committees, and hiring the town manager, town attorney and municipal judge. The town manager is responsible for carrying out the policies and ordinances of the Town Council, for overseeing the day-to-day operations of the town government, and for appointing the heads of the various departments. The council is elected on a non-partisan basis. All four council members and the mayor are elected at large. Council members serve staggered four-year terms, with elections occurring every even year. Effective 2017, the mayor serves a four-year term.

The Town of Jackson provides a full range of services, including police and fire protection; construction and maintenance of streets and infrastructure; recreational facilities and pathways, water, sewage, and transit services. Additionally, the town owns rental properties for employees.

FACTORS AFFECTING FINANCIAL CONDITION

The information presented in the financial statements is perhaps best understood when it is considered from the broader perspective of the specific environment within which the Town of Jackson operates.

Local economy. The Town of Jackson is located at the southern entrance to Grand Teton and Yellowstone National Parks in the northwest corner of Wyoming. Dramatic mountain peaks, including the Tetons, the Gros Ventres, and Snow King form a breathtaking backdrop to our valley (called Jackson Hole). The Town of Jackson is home to a little over 10,600 people and another 12,600 live in the unincorporated county (Teton).

Jackson's economy is centered on tourism and lifestyle. Approximately four million guests visit each year and more than 700,000 skier days are tallied at the Jackson Hole Mountain Resort. The abundance of outdoor recreation opportunities, the unsurpassed scenic beauty, the prevalence of many species of wildlife, the lack of individual state income tax, and the high quality of life give Jackson unsurpassed appeal as a place to live, visit and recreate.

At fiscal year-end, the Town of Jackson's employment picture, at a 1.7% unemployment rate (Teton County), is healthier than the 4.1% national average. The state of Wyoming has an unemployment rate of 2.9%.

FINANCIAL INFORMATION

Management of the town is responsible for establishing and maintaining internal control designed to ensure that the assets of the government are protected from loss, theft, or misuse, and to ensure that adequate accounting data are compiled to allow for the preparation of financial statements in conformity with accounting principles generally accepted in the United States of America. Internal control is designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that: (1) the cost of a control should not exceed the benefits likely to be derived, and (2) the valuation of costs and benefits requires estimates and judgments by management.

This report consists of management's representations concerning the finance of the town. As a result, management assumes full responsibility for the completeness and reliability of all the information and content presented in this ACFR. Additionally, management asserts that, to the best of their knowledge and belief, this financial report is complete and reliable in all material respects.

Budgetary Controls. The annual budget serves as the foundation for the Town of Jackson's financial planning and control. All departments, authorities, and commissions of the town submit requests for appropriation to the town manager in February of each year. The town manager uses these requests as the starting point for developing a proposed budget. The town manager then presents this recommended budget to the council for review prior to May 15. The council is required to hold public hearings on the proposed budget and to adopt a final budget no later than June 30, the close of the town's fiscal year. The budget is prepared by fund (general), function (e.g., public safety), department (e.g., police), and division (e.g., patrol). All expenditures require the approval of the Town Council. Budget-to-actual comparisons are provided in this report for each individual governmental fund which an annual budget has been adopted. For the general fund and major special revenue funds, this comparison is presented starting on page 29 of the basic financial statements. For non-major special revenue funds, with annual budgets, this comparison is presented in the governmental fund subsection of this report, which starts on page 67.

Long-term Financial Planning. The Town's strategic vision is laid out in a Council bi-annual Work Plan, supported by a five-year financial model and

Capital Improvement Program. The Plan identifies the Town's strategic intent and identifies areas for emphasis and funding. The Town's near-term and long-term fiscal planning are focused on accomplishing Work Plan objectives. A five-year financial model and Capital Improvement Program are maintained to assess the attainability and sustainability of these objectives.

The Town Council supports and understands that the main area of focus for the Town of Jackson is the provision of core services, maintaining the current level of service already supported and approved through the annual budget, and most importantly those services that directly contribute to and maintain the health, safety, and welfare of the citizens and guests to our community. A brief summary includes:

Safety and security provided through law enforcement, fire protection, building safety and inspection, animal control, contractor licensing, and municipal court and prosecution services.

Infrastructure, facility and public asset management provided through street, sidewalk and right of way maintenance and snow removal services, engineering, preventive and proactive facility management, and parking enforcement.

Health and well-being provided through water treatment and distribution, sewer collection and treatment, emergency medical services, and victim services.

Development and economic oversight provided through code compliance, planning and development review, permit processing, and business, liquor, taxi, special event, and rental licensing.

Accessibility and livability provided through public transit, community and affordable housing, parks and recreation, and pathway creation and maintenance.

Internal services for the Town of Jackson organization that support the efficiency and effectiveness of our local government provided through information technology support, records management and access, fleet maintenance, public information, legal services, personnel services, financial accounting, and overall coordination, administration, leadership and management of government services and day to day operations.

Major Budget Initiatives.

To continue to be a resilient community, we will need to preserve and maintain General Fund Reserves to have the resources to adapt to uncertain times ahead. Looking ahead, recurring expenses are expected to exceed recurring revenues. We must continue evaluating our revenue streams and expenditures, to determine how to ensure a balanced budget into the future.

Due in part to COVID-19 pandemic we reinforced the importance of our fiduciary responsibility to maintain and continue building a strong, resilient community in the short, mid, and long-term. Due to years of prudent budgeting and planning, the Town was able to respond to reduced revenues projected and maintain a well-resourced and responsive Town government to close fiscal year 2024.

The Town will need to prioritize our core services, capital projects and consider reducing funding to the areas of lower priority and/or work to consider a new funding source(s) to maintain current Town program services and capital improvement projects. As our community changes, various core services continue to see increased need year-over-year. The Town simply does not have the capacity to absorb such continuous growth without increasing revenue or reducing existing program services and capital projects.

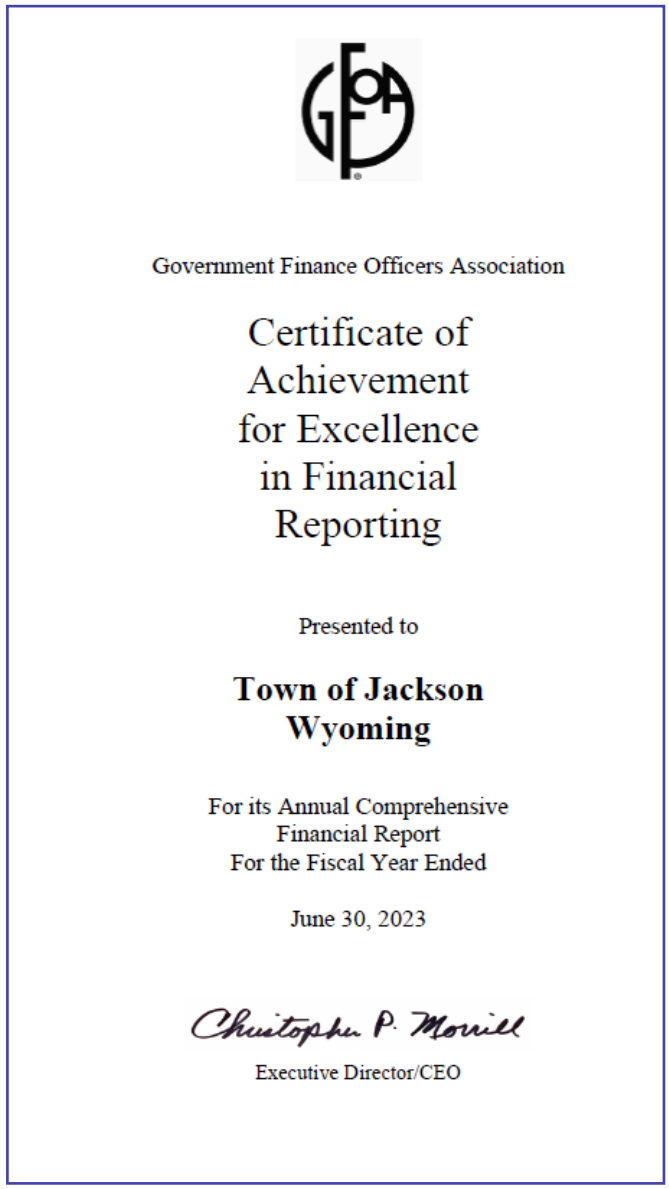
Single Audit. As a recipient of federal awards, the town is also responsible for ensuring that adequate internal controls are in place to ensure compliance with applicable laws and regulations related to those programs. The internal controls are subject to periodic evaluations by town management and external auditors.

AWARDS AND ACKNOWLEDGEMENTS

The Government Finance Officers Association (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Town of Jackson, Wyoming for its comprehensive financial report for the fiscal year ending June 30, 2023. This is the 38th year the town has received this prestigious award. In order to be awarded the Certificate of Achievement, the government must publish an easily readable and efficiently organized annual comprehensive financial report. This report satisfies both accounting principles generally accepted in the United States of America and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe our current report continues to conform to the Certificate of Achievement Program's requirements, and we are submitting it to GFOA to determine its eligibility for another certificate.

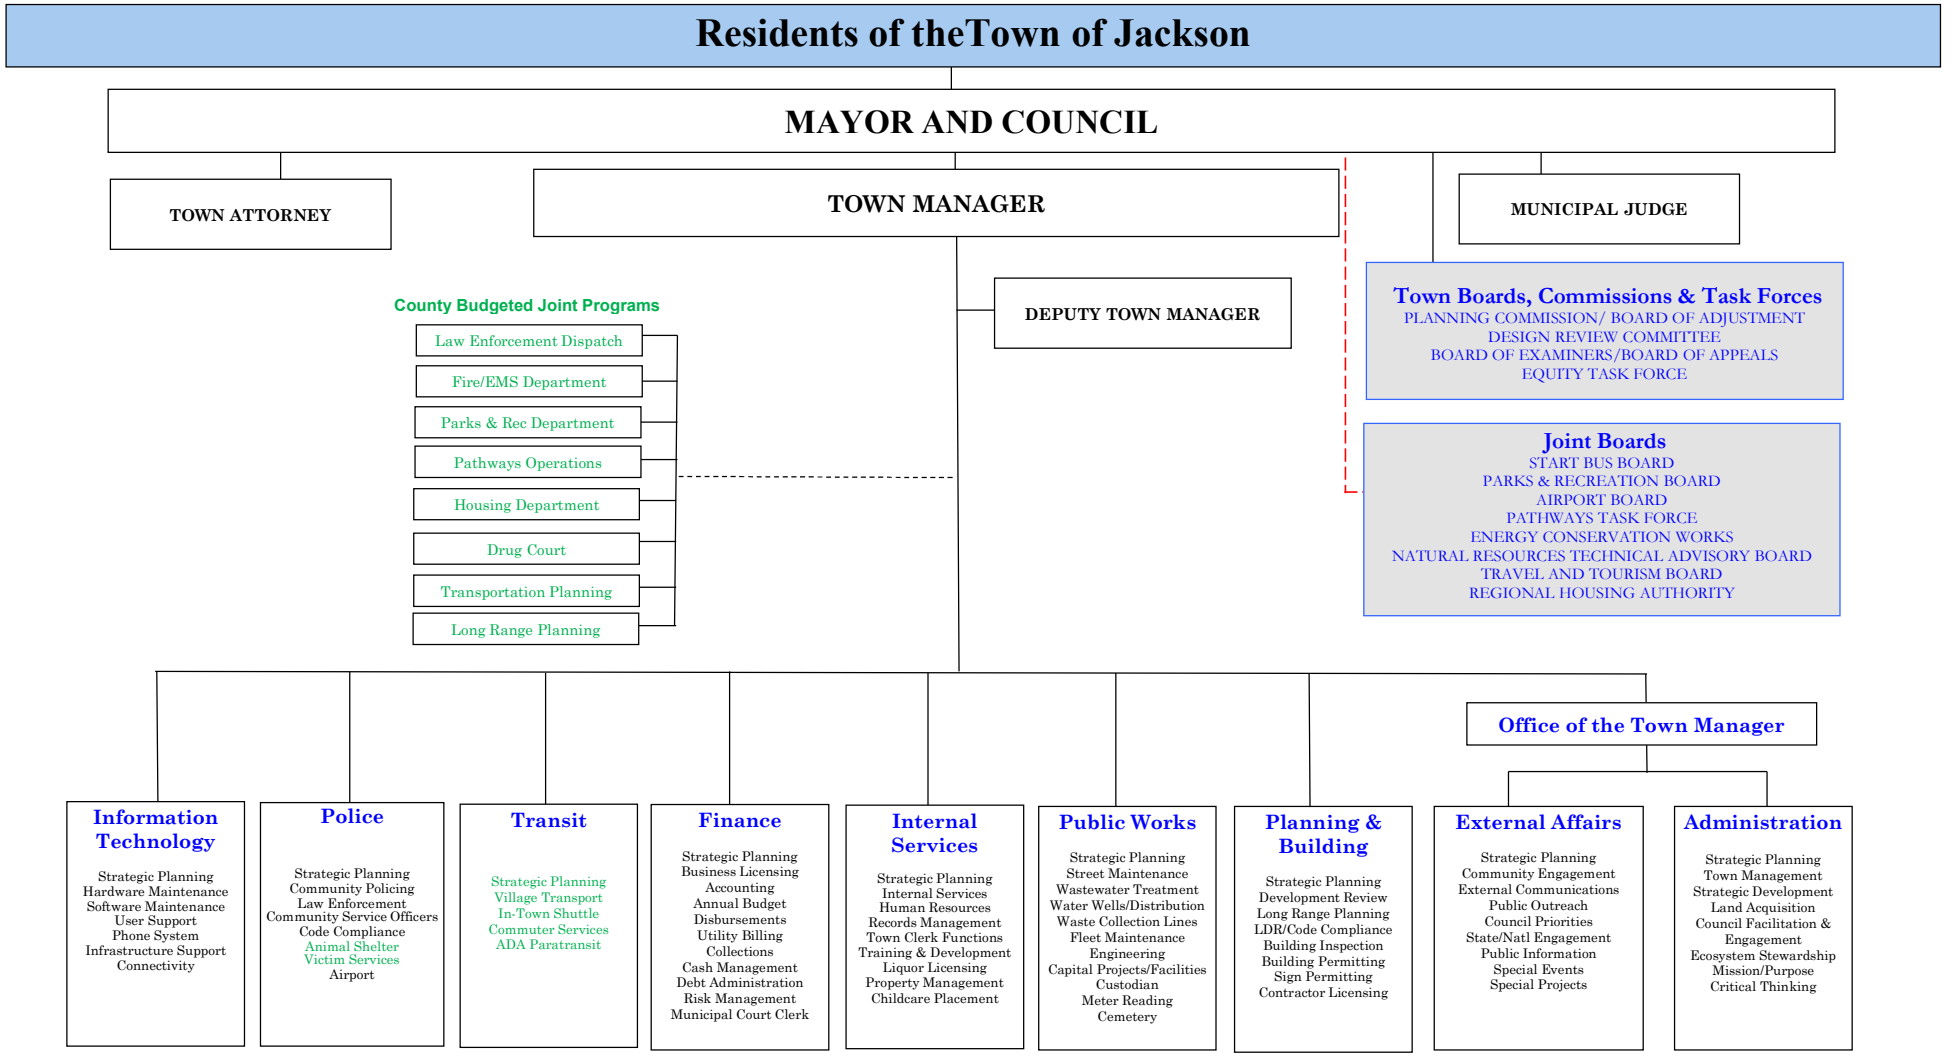
The preparation of this report could not be accomplished without the professional, efficient services of the Town Finance Department staff. We would like to express our appreciation to all members of the staff, with special recognition for the assistance contributed by Finance Manager Melanie



Adams and Senior Deputy Treasurer Pauline Scholes. Due credit also should be given to the mayor and the council for their support in planning and conducting the operations of the town in a responsible and progressive manner.

Tyler Sinclair
Town Manager

Kelly Thompson
Finance Director



The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate for Excellence in Financial Reporting to the Town of Jackson, Wyoming for its annual comprehensive financial report for the fiscal year ended June 30, 2023.

In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized annual comprehensive financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe our current annual comprehensive financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

INDEPENDENT AUDITOR'S REPORT

To the Mayor and Town Council
Town of Jackson, Wyoming

Report on the Audit of the Financial Statements

Opinions

We have audited the financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Jackson, Wyoming (the Town), as of and for the year ended June 30, 2024, and the related notes to the financial statements, which collectively comprise the Town's basic financial statements as listed in the table of contents.

In our opinion, the accompanying financial statements present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town, as of June 30, 2024, and the respective changes in financial position and, where applicable, cash flows thereof and the respective budgetary comparison for the general fund and START Bus System Fund for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards* (GAS), issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Town and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Independent Member of PrimeGlobal | The Association of Advisory and Accounting Firms

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Town's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and GAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and GAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Town's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Town's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, the schedule of proportionate share of the net pension liability, and the schedule of contributions, as listed in the table of contents, be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Town's basic financial statements. The supplementary information listed in the table of contents, including the accompanying schedule of expenditures of federal awards as required by *Title 2 U.S. Code of Federal Regulations (CFR) Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards*, is presented for additional analysis and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Information

Management is responsible for the other information included in the annual report. The other information comprises the introductory and statistical sections but does not include the financial statements and our auditor's report thereon. Our opinions on the financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated December 27, 2024 on our consideration of the Town's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Town's internal control over financial reporting and compliance.

JONES SIMKINS LLC

Management's Discussion and Analysis

As management of the Town of Jackson (Town), we offer readers of the Town's basic financial statements this narrative overview and analysis of the financial activities of the Town for the fiscal year ended June 30, 2024. We encourage readers to consider the information presented here in conjunction with additional information that we have furnished in our letter of transmittal, which can be found on pages 1-4 of this report.

OVERVIEW OF THE BASIC FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the Town's basic financial statements. The Town's basic financial statements comprise three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

COMPONENTS OF THE ANNUAL FINANICAL REPORT

Government-wide financial statements. The government-wide financial statements are designed to provide readers with a broad overview of the Town of Jackson's finances, in a manner similar to a private-sector business.

The statement of net position presents information on all of the Town's assets and liabilities, with the difference between the two reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the Town is improving or deteriorating.

The statement of activities presents information showing how the Town's net position changed during the most recent fiscal year. All changes in net positions are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods.

Both of the government-wide financial statements distinguish functions of the Town of Jackson that are principally supported by taxes and intergovernmental revenues (governmental activities) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (business-type activities). The governmental activities of the Town include general government, public safety, public works, health and welfare, community development, transit, and recreation and culture. The business-type activities of the Town include water and sewage utilities.

The government-wide financial statements can be found on pages 23-24 of this report.

Fund financial statements. The fund financial statements focus on current available resources and are organized and operated on the basis of funds, each of which is defined as fiscal and accounting entity with a self-balancing set of accounts established for the purpose of carrying on specific or attaining certain objectives in accordance with special regulations, restriction or limitations. The Town, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the Town can be divided into two categories: governmental funds, and proprietary funds. The Town does not maintain any fiduciary funds.

Governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financial requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the Town's near term

financial decisions. Both the governmental fund balance sheet and governmental fund statement of revenues, expenditures, and change in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

The Town maintains four major governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the general fund, one special revenue fund, and two capital project funds, all of which are considered major funds. Data from eleven other governmental funds are combined into a single, aggregated presentation. Individual fund data for each of these non-major governmental funds is provided in the form of combining statements elsewhere in this report.

The Town adopts an annual appropriated budget for its general and special revenue funds. A budgetary comparison statement has been provided for those funds to demonstrate compliance with this budget.

The basic governmental fund financial statements can be found on pages 25-31 of this report.

Proprietary funds. The Town of Jackson maintains two different types of proprietary funds. Enterprise funds are used to report the same functions presented as business-type activities in the governmental-wide financial statements. The Town uses enterprise funds to account for its water and sewage operations. Internal service funds are accounting devices used to accumulate and allocate costs internally among the Town's various functions. The Town uses internal service funds to account for its fleet management, employee insurance (self insurance), information technology (IT), and central equipment operations. Because all of these services predominately benefit governmental rather than business-type functions, they have been included within governmental activities in the government-wide financial statements.

Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. The proprietary fund financial statements provide separate information for the water and sewage utilities. Both are considered major funds of the Town. Conversely, all internal service funds are combined into a single, aggregated presentation in the proprietary fund financial statements. Individual fund data for the internal service funds is provided in the form of combining statements elsewhere in this report.

The basic proprietary fund financial statements can be found on pages 32-36 of this report.

Fiduciary funds. Fiduciary funds are used to account for resources held for the benefit of parties outside of the government. Fiduciary funds are not reported in the governmental-wide financial statements because the resources of those funds are not available to support the Town of Jackson's own programs. The accounting used for fiduciary funds is much like that used for proprietary funds.

The Town of Jackson currently maintains no fiduciary funds.

Notes to the financial statements. The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

The notes to the financial statements can be found on pages 37-58 of this report.

Other information. In addition to the basic financial statements and accompanying notes, this report also presents required supplementary information concerning the Town's funding obligation related to participation in a defined benefit plan. Required supplementary information can be found on pages 59-62 of this report.

The combining statements referred to earlier in connection with non-major governmental funds and internal service funds can be found immediately following the required supplementary information.

Combining and individual fund statements can be found on pages 63-78.

FINANCIAL HIGHLIGHTS

- The Town's net position (assets and deferred outflows of resources minus liabilities and deferred inflows of resources) increased by 4.3% as a result of this year's operations. The net position of the Town's governmental activities increased $8,751,417 (4.3%) and net position of the Town's business-type activities increased $2,064,040 (4.4%).
- Overall, capital assets (net of accumulated depreciation and amortization) increased $16,864,288. Capital assets of governmental activities increased $17,505,735 (12%) and capital assets of business-type activities decreased $941,447 (1.9%). Significant governmental capital assets acquisitions included: $16,136,599 for Core Services Maintenance Facility construction, $4,310,340 for six transit buses, $798,164 for START intelligent transit system software and hardware, $539,381 in infrastructure improvements, and $865,390 in fleet equipment and vehicles which includes ten police vehicles. Significant business-type capital assets acquisitions included: $993,090 for water line infrastructure, $79,969 for west Jackson water transmission project design, and $1,389,087 in sewer line installation. The

capital increases in the business-type activities are offset by $1,688,646 in current year depreciation and amortization.

- The Town's long-term liabilities decreased $3,640,425 (23%). The decrease was a result of a $3,576,301 decrease in net pension liability, $36,932 increase in lease liabilities and $112,053 decrease in subscription liability.
- At the close of the current fiscal year, the Town's governmental funds reported total ending fund balances of $52,584,678, a decrease of $8,463,741 (14%). The decrease is mainly due to a $9,951,832 decrease in the 5th Cent Capital Projects Fund for construction of the Core Services Maintenance Facility.
- The General Fund's total fund balance increased $345,715 (2%) to $19,072,428. The ending fund balance is 54% of General Fund expenditures. $2,539,368 of the fund balance is assigned to the FY2025 budget.

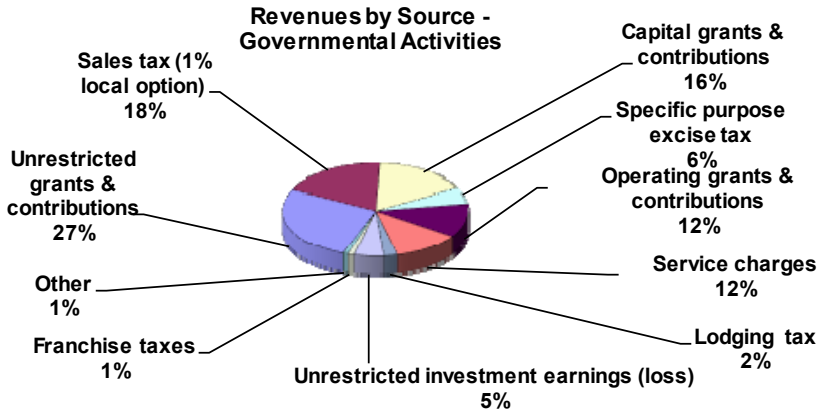
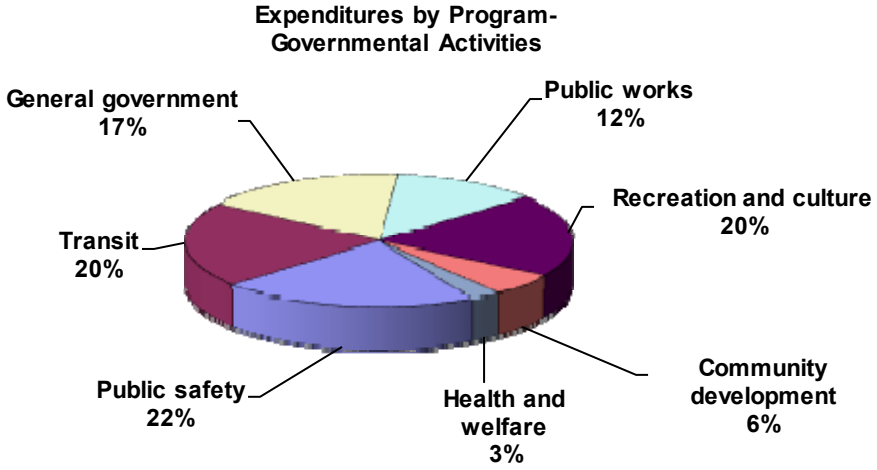
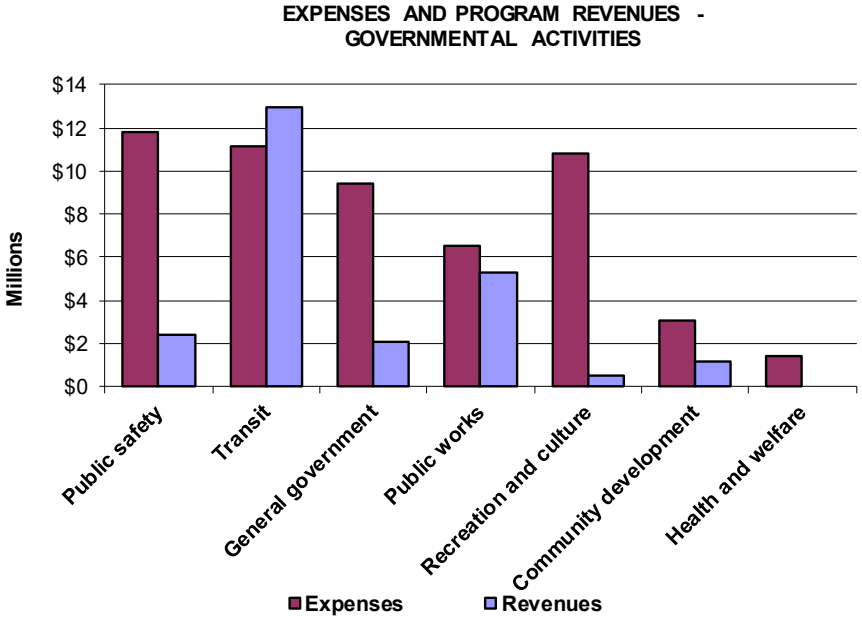
Unrestricted	29,764,709	38,726,212	16,094,682	13,542,349	45,859,391	52,268,561
Total net position	$ 212,810,664	$ 204,059,247	$ 49,071,536	$ 47,007,496	$ 261,882,200	$ 251,066,743



By far the largest portion of the Town's net position (76%) reflects investments in capital assets (e.g. land, buildings, structures, systems, machinery, equipment, infrastructure, and intangible assets), net of any related debt used to acquire those assets that is still outstanding. The Town uses assets to provide services to citizens; consequently, these assets are not available for future spending. Although the Town's investment in capital assets is reported net of related debt, it should be noted that resources needed to repay this debt must be provided from other sources, since capital assets themselves cannot be used to liquidate these liabilities.



A small portion of the Town's net position (7%) represents resources that are subject to external restrictions on how they can be used. The $73,022 decrease in governmental activities restricted net position is primarily due to 2019 Special Purpose Excise Tax (SPET) project expenditures for Core Services Maintenance Facility exceeding SPET collections. The remaining unrestricted net position of $45,859,391 may be used to meet one-time obligations to citizens and creditors. Of the unrestricted net position, $16,094,682 (35%) is attributable to business-type activities. The unrestricted governmental activities net position decreased $8,961,503 (23%), while



business-type activities unrestricted net position increased $2,552,333 (18.8%). The government-wide total unrestricted net position decrease of $6,409,170 (14.0%) is primarily due to Core Services Maintenance Facility construction within the 5th Cent Capital Projects Fund. Business-type capital assets decreased by $641,447 (1.9%) due to accumulated depreciation increase exceeding capital asset acquisitions.

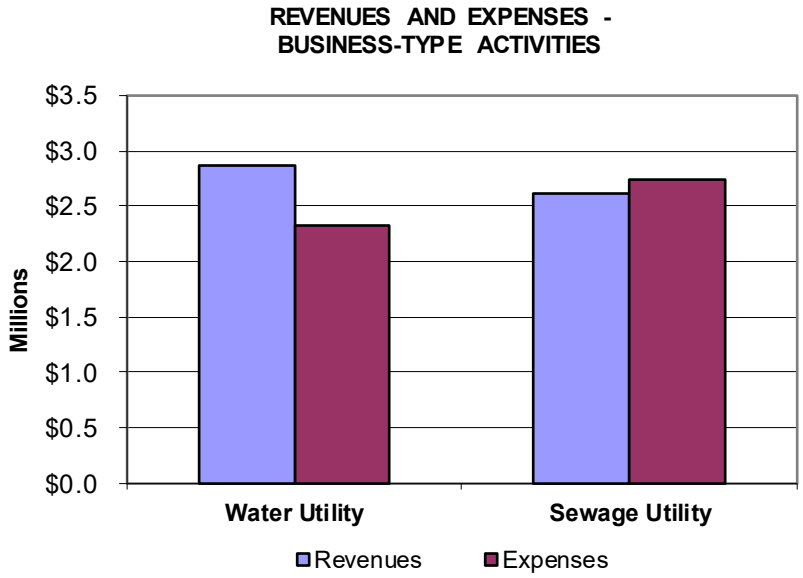
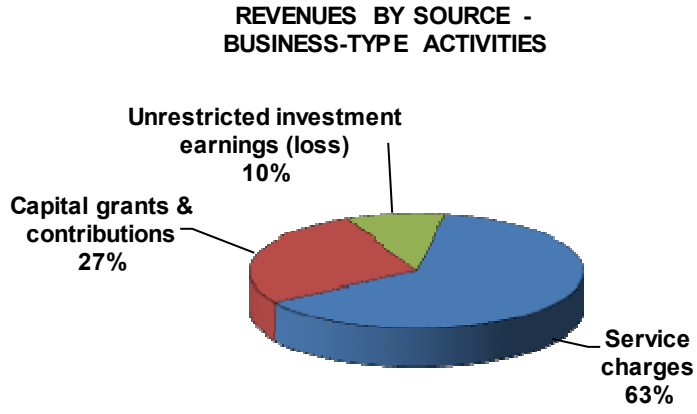
Governmental Activities. The most significant revenue (27%) of the governmental activities are $16.2M in unrestricted grants and state shared revenue. The majority of the revenue in the state-shared category consists of the 4% state-shared sales and use tax ($13.6M) followed by federal mineral royalties ($.5M), gasoline tax ($.5M), various Teton County reimbursements ($.5M), and severance tax ($.4M). The 1% local option (5th cent) sales tax makes up the second highest source of revenue ($11.1M or 18%) in the governmental funds. The revenue generated from the 5_{th} cent sales tax is split evenly between the general fund and capital projects fund. Capital grants and contributions make up the third highest source of revenue ($9.9M or 16%) in the governmental funds.

Public Safety (police, fire/EMS, building inspector, victim services, animal shelter and dispatch) expenses (22%) was the most significant followed by Transit (20%), Recreation and Culture (20%), General Government (17%), Public Works (12%), Community Development (6%), and Health and Welfare (3%). Included in these amounts is $5,734,371 of depreciation and amortization expense, which is 12% of the total expenses for governmental activities.



Governmental revenues increased $2,548,101 (4%), in the current year, with the most significant portion of the increase attributable to higher capital grants and



contributions ($1,695,679) and operating grants and contributions ($1,219,147). Capital grants were higher due to $4,159,078 received from Teton County towards completion of the Core Services Maintenance. Operating grants were higher due to Teton County and federal matches for START Bus System service increases.

Governmental activities expenses increased $13,816,291 (34%) in the current year. The most significant changes in program expenses were as follows:

- General government expenses increased $2,280,000 (32%). The majority of the increase is due to total compensation increases and capital outlay.
- Public safety expenses decreased $149,364 (1%). The decrease is related to pension expense being lower than prior year.
- Public works expenses increased $543,060 (9%). The increase is related to increases in total compensation and street maintenance.
- Health & Welfare expenses increased $198,644 (16%) to meet request increases from local non-profits.
- Transit operating expenses increased $743,009 (7%). The increase is related to total compensation increases and increased service levels.
- Recreation and culture expenses increased $8,598,027 (392%), primarily due to an increase in the operating match for Parks and Recreation (Teton County) department and Town share of the Recreation Center Renovation.
- Interest expense increased $21,083 (38%) due to GASB 87 lease and GASB 96 subscription arrangement accounting.

There were no other programs with significant or unusual changes.

Business-type activities. Business-type activities increased the Town's net position by $2,064,040 (4%). In the prior year, the business-type activities increased the Town's net position by $454,813 (1%).

Key elements of the change are as follows:

Water Fund operating revenues decreased $62,464 (2%), which is reflective of lower irrigation volume. Sewage Fund operating revenues increased $95,943 (4%), mainly due to increased connections and tourism.

Capital grants and contributions totaled $2,356,617, 101% higher than the prior year total of $1,174,196. Capital grants and contributions include capacity and tap fees charged to new customers and intergovernmental grants for capital improvements. Capacity and tap fees increased due to a few large developments in the current year coupled with fee increases. Depreciation and amortization expenses in the water and sewage utilities for fiscal year 2024 were $751,459 and $937,187, respectively.

FINANCIAL ANALYSIS OF THE TOWN'S FUNDS

Governmental funds. The focus of the Town's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the Town's financing requirements. In particular, spendable fund balances may serve as a useful measure of a government's net resources available for expenditure at the end of the fiscal year.

At June 30, 2024, the Town's governmental funds reported total ending fund balances of $52,584,678, a decrease of $8,463,741 (14%) when compared with the prior year. Nearly 34% or $17,981,418 of the total ending fund balances constituted restricted fund balances, which are considered unavailable for appropriation for general operations. The prior year restricted fund balances totaled $18,054,440. The decrease is mostly attributable to 2019 SPET project expenditures for the Core Services Maintenance Facility exceeding tax revenues.

At the end of the fiscal year, the General Fund reported a fund balance of $19,072,428 increasing $345,715 (2%) from the prior year. General Fund operating revenues were $3,104,729 (10%) more than the prior fiscal year and operating expenditures increased by $4,225,831 (19%). Transfers in increased by $50,562 (3%), primarily due to indirect cost allocations for staff. Transfers out decreased by $7,569,267 (45%). This is due to one-time transfers to the Capital Projects Fund to fund multiple, large capital projects in the prior year.

General Fund expenditures decreased $4,225,831 (19%). Salaries and salary related expenditures (Wyoming Retirement, Workers' Compensation, health insurance, etc.) increased $1,047,274 (9%) for all functions. Increase is primarily due to a 7.3% wage increase and $2,648,730 increase in Teton County joint departments.

The START Bus System Fund net change in fund balance was positive by $1,372,532 (77%). Total expenditures were $14,080,975. Operating expenditures increased $212,312, mainly due to labor increases. There were $5,324,935 in capital outlays during the fiscal year related to purchasing six transit buses, Stilson Transit Center design and fare technology. Intergovernmental revenues increased to $408,662 from the prior year total of $10,477,320. This is due to US Department of Transportation grant matches of approximately 80% for the bus purchases. Transit fares increased $181,534 from the prior year. $142,976 of the fare increase is due to the new airport shuttle service. The Town contributed $2,614,309 and Teton County contributed $2,064,278 for a total of $4,678,587 to the fund in fiscal year 2024.

The 5th Cent Capital Project Fund saw its fund balance decrease $9,951,832 (60%) to $6,647,317. The General Fund transferred $6,434,838 in 5th Cent sales tax to the fund in FY2024, a decrease of $8,871,369 from FY2023. This is due to one-time transfers to the Capital Projects Fund to fund multiple, large capital projects.

The 2019 SPET Fund saw its fund balance decrease $752,917 to $10,795,365. This is due to construction on the Core Services Maintenance Facility and project expenditures exceeding tax collections. This fund has received all $29,000,000 in SPET revenues. The fund will continue to decrease due to project expenditures in future years.

Proprietary funds. The proprietary funds financial statements provide the same type of information found in the government-wide financial statements, but in greater detail.

The water utility's net position increased $836,369 (4%) from the prior fiscal year. In 2024, operating revenues decreased $62,464 (2%). Capital contributions increased to $646,373 from $299,683 in the previous year (116%). Operating expenses increased $196,532 (9%) to $2,306,713. The 2024 operating income of $562,590 includes $751,459 in depreciation and amortization.

The sewage utility's net position increased $1,213,897 (4%) in the fiscal year ending June 30, 2024. Sewage utility operating revenues increased $95,943 (4%) to $2,620,483 and the utility's operating expenses decreased $204,579 (7%) to $2,741,749. Capital contributions increased $835,731 (96%) from

$874,513 to $1,710,244. The $121,266 operating loss includes $937,187 in depreciation and amortization.

Other factors of the changes in income from operations have previously been discussed in the government-wide financial analysis of business-type activities.

GENERAL FUND BUDGETARY HIGHLIGHTS

The differences between the 2024 original budget and the final amended budget are adopted by council resolution throughout the year.

General Fund revenues totaled $33,740,909 and exceeded the final budget by $1,934,313 (6%). General taxes and intergovernmental revenues were $249,119 (2%) and $435,235 (3%) higher than budget, respectively. This is due to sales tax related revenues which were budgeted to increase 3% over FY2024 actuals. However, this major revenue source increased 6%. This increase is attributable to tourism and sales tax generating transactions increasing over FY2023.

General Fund operating expenditures totaled 26,135,671. This was $2,422,564 (8%) less than the final amended budget and $1,961,981 (7%) less than the adopted budget. Including transfers out, supplemental appropriations from budget amending Council actions increased the original budget by $553,425 (1.5%). The majority of this increase was for the Town share of Teton County joint departments who increased due to a compensation study implementation. In fiscal year 2024, no divisions finished the year over budget.

The General Fund year end fund balances since 2014 are as follows:

Year	Amount	Year	Amount
2015	$ 7,049,752	2020	$ 12,158,856
2016	7,484,300	2021	18,020,470
2017	7,650,890	2022	24,879,725
2018	8,329,716	2023	18,726,713
2019	8,683,289	2024	19,072,428

Capital assets. The Town's investment in capital assets for its governmental and business-type activities at June 30, 2024 totaled $201,176,905 (net of accumulated depreciation and amortization). This investment in capital assets included land, construction in progress, structures, systems, machinery and equipment, intangible assets, right to use assets and infrastructure.

Major governmental activities capital assets include: $16,136,599 for Core Services Maintenance Facility construction, $4,310,340 for six transit buses, $798,164 for START intelligent transit system software and hardware, $539,381 in infrastructure improvements, and $865,390 in fleet equipment and vehicles which includes ten police vehicles. The total government-wide capital asset increase over the prior fiscal year is approximately $16,864,288; governmental activities increased 12% and business-type activities decreased 9%.

Additional information on the Town's capital assets can be found in the notes to the financial statements on pages 48-49.

LONG-TERM LIABILITIES

Long-term liabilities. The Town's outstanding long-term liabilities - including notes payable, accrued interest payable, and net pension liability - totaled $14,159,551 at June 30, 2024. Governmental long-term and business-type long-term liabilities decreased primarily due to net pension liability decrease.

Additional information on the Town's long-term liabilities can be found in the notes to the financial statements on pages 51-57 of this report.

ECONOMIC FACTORS AND NEXT YEAR'S BUDGETS AND RATES

- The unemployment rate for the Teton County, Wyoming area for June 30, 2024 was 1.7%, which is below the state average (2.9%) and below the national average (4.1%).
- In this budget, the Town continues to focus on staff retention and maintaining standard departmental budgets to provide expected levels of service while considering prudent requests for modest increases focused on staff retention and matching service levels with capacity.
- To continue to be a resilient community, we will need to preserve and maintain General Fund Reserves to have the resources to adapt to uncertain times ahead. Looking ahead, recurring expenses are expected to exceed recurring revenues. We must continue evaluating our revenue streams and expenditures, to determine how to ensure a balanced budget into the future.
- The Town will need to prioritize our core services, capital projects and consider reducing funding to the areas of lower priority and/or work to consider a new funding source(s) to maintain current Town program services and capital improvement projects. As our community changes, various core services continue to see increased need year-over-year. The Town simply does not have the capacity to absorb such continuous growth without increasing revenue or reducing existing program services and capital projects.

REQUESTS FOR INFORMATION

This financial report is designed to provide a general overview of the Town's finances for all those interested in governmental finance. Questions concerning any information in the report or requests for additional information should be addressed to Town of Jackson, Finance Department, P.O. Box 1687, Jackson, WY 83001.

Reconciliation of the Statement of Revenues, Expenditures and Changes in Fund Balances of Governmental Funds to the Statement of Activities
Year Ended June 30, 2024

Net change in fund balances--total governmental funds		$ (8,463,741)
Amounts reported for governmental activities in the statement of activities are different because:		
Governmental funds reported capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation and amortization expense. This is the amount by which capital outlays exceeded depreciation and and amortization expense.		
Capital outlays	$ 22,621,812	
Depreciation and amortization	(5,734,371)	16,887,441
Repayment of long-term debt principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the Statement of Net Position.		49,550
The net effect of transactions involving net pension liability, deferred outflows of resources related to pensions, deferred inflows of resources related to pensions, and pension expense is to decrease net position.		(135,769)
The net effect of transactions involving leases issued, debt service on lease liabilities, and lease conversion is to decrease net position.		(107,537)
Internal service funds are used by management to charge the costs of certain activities to individual funds. The net revenue of the internal service funds is reported with governmental activities.		521,473
Change in net position of governmental activities		$ 8,751,417

The notes to the financial statements are an integral part of this statement.

I. Summary of significant accounting policies

A. Description of government-wide financial statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the primary government. Governmental activities, which normally are supported by taxes, intergovernmental revenues, and other nonexchange transactions, are reported separately from business-type activities, which rely to a significant extent on fees and charges to external customers for support.

B. Reporting entity

The Town of Jackson was incorporated in 1914 and is a municipal corporation governed by an elected mayor and four-member governing council. The five-member mayor-council is elected on staggered, even-numbered years. The mayor and council members are elected at-large to four-year terms. The governing body appoints a manager to implement policies and oversee daily operations.

The accompanying financial statements present the governmental entities for which the government is considered to be financially accountable. The Town does not report any component units.

C. Basis of presentation - government-wide financial statements

While separate government-wide and fund financial statements are presented, they are interrelated. The governmental activities column incorporates data from governmental funds and internal service funds, while business-type activities incorporate data from the Town's enterprise funds. Separate financial statements are provided for governmental funds and proprietary funds.

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the non-fiduciary activities of the primary government. For the most part, the effect of inter-fund activity has been removed from these statements.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function. Program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operation or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

D. Basis of presentation - fund financial statements

The fund financial statements provide information about the Town's funds. Separate statements for each fund category; governmental and proprietary, are presented. The emphasis of fund financial statements is on major governmental and enterprise funds, each displayed in a separate column. All remaining governmental funds are aggregated and reported as nonmajor funds. Major individual governmental and enterprise funds are reported as separate columns in the fund financial statements.

The Town reports the following major governmental funds:

- The general fund is the government's primary operating fund. It accounts for all financial resources of the general government, except those accounted for in another fund.
- The 5th cent capital projects fund accounts for the acquisition and construction of the government's major capital facilities, other than those financed by the propriety funds and Specific Purpose Excise Tax (SPET) funds.
- The Southern Teton Area Rapid Transit (START) fund is a special revenue fund. It accounts for operational and capital transit system expenditures primarily financed by state and federal transit grants.
- The 2019 SPET fund accounts for expenditures related to the revenue generated by the 2019 specific purpose excise tax.

The Town reports the following enterprise funds:

- Water Fund. This enterprise fund accounts for the operations of the Town-owned water treatment and distribution system.
- Sewage Fund. This enterprise fund accounts for the operations of the Town-owned sewage collection and treatment system.

Additionally, the Town reports the following fund type:

Internal Service Funds. The operating activities for Employee Insurance, Fleet Management, Central Equipment, and Information Technology (IT) Services are reported in internal service funds because they provide services to other Town departments on a cost reimbursement basis.

During the course of operations, the government has activity between funds for various purposes. Any residual balances outstanding at year end are reported as due from/to other funds and advances to/from other funds. While these balances are reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements. Balances between the funds included in governmental activities (i.e., the governmental and internal service funds) are eliminated so that only the net amount is included as internal balances in the governmental activities column. Similarly, balances between the funds included in business-type activities (i.e., the enterprise funds) are eliminated so that only the net amount is included as internal service fund balances in the business-type activities column. Internal service fund services provided and used by other funds are not eliminated in consolidation. No overhead costs are charged to internal service funds requiring elimination.

Further, certain activity occurs during the year involving transfers of resources between funds. In fund financial statements these amounts are reported at gross amounts as transfers in/out. While reported in fund financial statements, certain eliminations are made in the preparation of the government-wide financial statements. Transfers between the funds included in governmental activities are eliminated so that only the net amount is included as transfers in the governmental activities column. Similarly, balances between the funds included in business-type activities are eliminated so that only the net amount is included as transfers in the business-type activities column.

E. Measurement focus and basis of accounting

The accounting and financial reporting treatment is determined by the applicable measurement focus and basis of accounting. Measurement focus indicates the type of resources being measured such as current financial resources or economic resources. The basis of accounting indicates the timing of transactions or events for recognition in the financial statements.

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

The governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences, and claims and judgments, are recorded only when payment is due. General capital asset acquisitions are reported as expenditures in governmental funds. Issuance of long-term debt and acquisitions under capital outlay related to leases are reported as other financing sources.

Property taxes, sales taxes, franchise fees, licenses, and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. Entitlements are recorded as revenues when all eligibility requirements are met, including any time requirements, and the amount is received during the period or within the availability period for this revenue source (within 60 days of year-end). Expenditure-driven grants are recognized as revenue when the qualifying expenditures have been incurred and all other eligibility requirements have been met, and the amount is received during the period or within the availability period for this revenue source (within 60 days of year-end). All other revenue items are considered to be measurable and available only when cash is received by the government.

The proprietary funds are reported using the economic resources measurement focus and the accrual basis of accounting.

F. Budgetary information

1. Budgetary basis of accounting

The Town uses the following procedures in establishing the budgetary data reflected in the accompanying financial statements:

- According to the laws of the State of Wyoming, all town budgets must be approved by their governing board not later than the third Tuesday in June.
- In May, the recommended budget for the following fiscal year is presented by the Town Manager to the Town Council. The budget includes recommended expenditures and the means of

financing them. Public meetings are held to obtain citizen comment.

- Prior to June 30, the Town Council legally adopts the budget through the passage of a resolution. The resolution sets the limit for expenditures for the year.
- The maximum legal expenditure permitted for the year is the total budget as adopted. The expenditure appropriations in the adopted budget are maintained in the Town's financial system by department within individual funds. Departmental appropriations may be amended during the year if approved by Council in the form of a budget amendment resolution.
- Department directors are generally authorized to transfer budgeted amounts within any specific department's expenditure appropriation. Any budget revisions requiring a transfer between departments must be approved by the Town Council. Additionally, budget revisions involving personnel or capital asset expenditures/expenses must be approved by the Town Council.
- Appropriations in all budgeted funds lapse at the end of the fiscal year even if they have related committed contracts. While all appropriations lapse at year end, valid outstanding committed contracts (those for which performance under the executory contract is expected in the next year) are re-appropriated and become part of the subsequent year's budget.

2. Excess of expenditures over appropriations

For the year ended June 30, 2024, expenditures exceeded appropriation in the Employee Housing Fund. This was due to GASB 87 implementation, non-cash basis budgetary transaction. Through four formal supplementary appropriations, the General Fund original budget increased 2%. Actual expenditures and other uses are 7.3% under the final amended budget.

G. Assets, liabilities, deferred outflows/inflows of resources, and net position/fund balance

1. Cash and cash equivalents

The government's cash and cash equivalents are cash on hand, demand deposits, and short-term investments with original maturities of three months or less from the date of acquisition.

2. Investments

Cash and investment balances from all funds are combined and invested to the extent authorized by state statutes and Town investment policy. Earnings from such investments are allocated to respective funds on the basis of applicable cash balance participation by each fund. The interest receivable balance is reported as one amount in the General Fund while all other funds receive interest revenue distributions in cash.

Investments for the Town are reported at fair value.

3. Receivables

Account (trade) receivables are carried at original billing amount less an estimate made for doubtful receivables based on a review of all outstanding amounts on a regular basis. Management determines the allowance for doubtful accounts by identifying troubled accounts and by using historical experience applied to an aging of accounts. With council approval, trade receivables are written off when deemed uncollectible. Recoveries of trade receivables previously written off are recorded when received.

A receivable is considered past due if any portion of the receivable balance is outstanding for more than 30 days. Interest is charged on receivables that are outstanding for more than 30 days. Accrual of interest is not suspended until a receivable is determined to be uncollectible. Provisions for bad debts would be insignificant and immaterial and none has been made for 2024.

4. Short-term interfund receivables/payables

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. These receivables and payables are classified as "due from other funds" or "due to other funds" on the balance sheet. Short-term inter-fund loans are classified as "interfund receivables/payables." Due to and due from other funds are closed to cash and cash equivalents at year end.

5. Inventories, prepaid items, and deposits

Materials and supplies are valued at cost, which approximates market value, using the first-in/first-out (FIFO) method. The consumption method is used to account for inventories. Inventory costs are recorded as expenditures when individual inventory items are consumed. In governmental funds, reported inventories are equally offset by nonspendable fund balance amounts, indicating that they do not constitute "available spendable resources" even though they are a component of net current assets. The net change in nonspendable fund balances is not presented because the combined statements of revenues, expenditures, and changes in fund balances reflects

the changes in total fund balances rather than just the spendable and nonspendable fund balances.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both the government-wide and fund financial statements. The cost of prepaid items is recorded as expenditures/expenses when consumed rather than when purchased.

Certain payments made to lessors are considered security deposits. These funds are considered assets that will be returned. In the event any deposit is kept by lessor, an expenditure/expense will be recorded.

6. Leases and Service-Based IT Arrangements (Subscription)

A. Town as Lessee

The Town is a lessee for various buildings and an easement. The Town recognizes a lease liability and an right-to-use lease asset (lease asset) in the government-wide financial statements. The Town recognizes lease liabilities with an initial, individual value of $50,000 or more and the lease must be longer than one year including expected extensions.

At the commencement of a lease, the Town initially measures the lease liability at the present value of payments expected to be made during the lease term. Subsequently, the lease liability is reduced by the principal portion of lease payments made. The lease asset is initially measured as the initial amount of the lease liability, adjusted for lease payments made at or before the lease commencement date, plus certain initial direct costs. Subsequently, the lease asset is amortized on a straight-line basis over its useful life. Key estimates and judgments related to leases include how the Town determines (1) the discount rate it uses to discount the expected lease payments to present value, (2) lease term, and (3) lease payments.

- The Town uses the interest rate charged by the vendor as the discount rate. When the interest rate charged by the lessor is not provided, the Town generally uses its estimated incremental borrowing rate as the discount rate for subscription agreements.
- The lease term includes the noncancellable period of the lease.
- Lease payments included in the measurement of the lease liability are composed of fixed payments and purchase option price that the Town is reasonably certain to exercise.

The Town monitors changes in circumstances that would require a remeasurement of its lease and will remeasure the lease asset and liability if certain changes occur that are expected to significantly affect the amount of the lease liability.

Lease assets are reported with other capital assets and lease liabilities are reported with long-term debt on the statement of net position.

B. Town as Lessor

The Town is a lessor for multiple facilities and easements. The Town recognizes a lease receivable and a deferred inflow of resources in the government-wide and governmental fund financial statements.

At the commencement of a lease, the Town initially measures the lease receivable at the present value of payments expected to be received during the lease term. Subsequently, the lease receivable is reduced by the principal portion of lease payments received. The deferred inflow of resources is initially measured as the initial amount of the lease receivable, adjusted for lease payments received at or before the lease commencement date. Subsequently, the deferred inflow of resources is recognized as revenue over the life of the lease term.

Key estimates and judgments include how the Town determines (1) the discount rate it uses to discount the expected lease receipts to present value, (2) lease term, and (3) lease receipts.

- The Town uses its estimated incremental borrowing rate as the discount rate for leases.
- The lease term includes the noncancellable period of the lease.
- Lease receipts included in the measurement of the lease receivable is composed of fixed payments from the lessee.

The Town monitors changes in circumstances that would require a remeasurement of its lease, and will remeasure the lease receivable and deferred inflows of resources if certain changes occur that are expected to significantly affect the amount of the lease receivable.

C. Subscription based IT Arrangements

The Town is committed under various subscription agreements. The Town recognizes a subscription liability and a right-to-use subscription asset in the government-wide financial statements. The Town recognizes subscription liabilities with an initial, individual value of $50,000 or more and the agreement must be longer than one year including expected extensions.

At the commencement of a contract, the Town initially measures the subscription liability at the present value of payments expected to be made during the contract term. Subsequently, the subscription liability is reduced by the principal portion of contract payments made. The subscription asset is initially measured as the initial amount of the subscription liability, adjusted for contract payments made at or before the contract commencement date, plus certain initial direct costs. Subsequently, the subscription asset is amortized on a straight-line basis over its useful life. Key estimates and judgments related to contracts include how the Town determines (1) the discount rate it uses to discount the expected contract payments to present value, (2) contract term, and (3) contract payments.

- The Town uses the interest rate charged by the lessor as the discount rate. When the interest rate charged by the lessor is not provided, the Town generally uses its estimated incremental borrowing rate as the discount rate for leases.
- The contract term includes the noncancellable period of the contract.
- Contract payments included in the measurement of the subscription liability are composed of fixed payments and purchase option price that the Town is reasonably certain to exercise.

The Town monitors changes in circumstances that would require a remeasurement of its contract and will remeasure the subscription asset and liability if certain changes occur that are expected to significantly affect the amount of the lease liability.

Subscription assets are reported with other capital assets and subscription liabilities are reported with long-term debt on the statement of net position.

7. Capital assets

Capital assets, including property, plant, and equipment, and infrastructure assets (e.g., roads, sidewalks, and similar items) are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are defined by the government as assets with an initial, individual cost of more than $10,000 ($20,000 for buildings and improvements and $50,000 for infrastructure) and an estimated useful life in excess of two years. Right to use assets are discussed in note below. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated acquisition value on date of donation.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized. Major outlays for capital assets and improvements are capitalized as projects are constructed.

Property, plant, equipment, and intangible assets with exhaustible useful lives are capitalized when acquired, and depreciation is provided using the straight-line method applied over the following estimated useful lives of the assets:

Buildings	10-50
Distribution systems	20-50
Infrastructure	20-50
Machinery and equipment	5-15
Right-to-use asset - buildings	2-99
Right-to-use asset – easements	2-99
Right-to-use asset – subscription asset	2-10
Other improvements	5-99
Intangible assets	5-99

Intangible assets lack physical substance, are nonfinancial in nature, and have an estimated useful life extending beyond a single reporting period. The term depreciation, as used in this footnote, includes amortization of intangible assets.
Capital assets transferred between funds are transferred at their net book value (cost less accumulated depreciation), as of the date of the transfer.

8. Deferred outflows and inflows of resources

In addition to assets, the statement of net position reports a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to future periods and so will not be recognized as an outflow of resources (expense/ expenditure) until then. The Town has reported deferred outflows of resources related to pensions on the government-wide statement of net position, each proprietary fund statement of position, and the Fleet Management Fund within the Internal Service Fund statement of net position.

In addition to liabilities, the statement of net position reports a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to future periods and so will not be recognized as an inflow of resources (revenue) until then. The Town has reported three deferred inflows of resources: pension related items, leases and property taxes. Pension items are reported on the government-wide statement of net position, each proprietary fund statement of position, and the Fleet Management Fund within the Internal Service Fund statement of net position. Leases are reported in both the governmental funds balance sheet and the entity-wide statement of net position. These amounts represent future revenues that will be collected per lease agreements and are not currently available to finance operations.

Property taxes for future periods are reported in both the governmental funds balance sheet and the entity-wide statement of net position. Property tax revenues are not recognized prior to the period which they are intended to finance, even if an enforceable lien is in place prior to the beginning of the intended period. Thus, property taxes received or receivable as of year-end, which are intended to finance the following fiscal year, are recorded as deferred inflows.

9. Pension related assets, liabilities, deferred outflows and inflows of resources

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Wyoming Retirement System (the System) and additions to/deductions from the System's fiduciary net position have been determined on the same basis as they are reported by the System. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

10. Net position flow assumption

Sometimes the Town will fund outlays for a particular purpose from both restricted (e.g., restricted bond or grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted – net position and unrestricted – net position in the government-wide and proprietary fund financial statements, a flow assumption must be made about the order in which the resources are considered to be applied.

It is the Town's policy to consider restricted – net position to have been depleted before unrestricted – net position is applied.

11. Fund balance flow assumption

Sometimes the Town will fund outlays for a particular purpose from both restricted and unrestricted resources (the total of committed, assigned, and unassigned fund balance). In order to calculate the amounts to report as restricted, committed, assigned, and unassigned fund balance in the governmental fund financial statements a flow assumption must be made about the order in which the resources are considered to be applied. It is the Town's policy to consider restricted fund balance to have been depleted before using any of the components of unrestricted fund balance. Further, when the components of unrestricted fund balance can be used for the same purpose, committed fund balance is depleted first, followed by assigned fund balance. Unassigned fund balance is applied last.

12. Fund balance policies

Fund balance of governmental funds is reported in various categories based on the nature of any limitations requiring the use of resources for specific purposes. The Town itself can establish limitations on the use of resources through either a commitment (committed fund balance) or an assignment (assigned fund balance). The committed fund balance classification includes amounts that can be used only for the specific purposes determined by a formal action of the Town's highest level of decision-making authority. The Town council is the highest level of decision-making authority for the Town that can, by adoption of an ordinance prior to the end of the fiscal year, commit fund balance. Once adopted, the limitation imposed by the ordinance remains in place until a similar action is taken (the adoption of another ordinance) to remove or revise the limitation.

Amounts in the assigned fund balance classification are intended to be used by the Town for specific purposes but do not meet the criteria to be classified as committed. The Town council has, by resolution, authorized the Town Manager to assign fund balance. The council may also assign fund balance as it does when appropriating fund balance to cover a gap between estimated revenue and appropriations in the subsequent year's appropriated budget. Unlike commitments, assignments generally only exist temporarily. In other words, an additional action does not normally have to be taken for the removal of an assignment. Conversely, as discussed above, an additional action is essential to either remove or revise a commitment.

13. Long-term obligations

In the government-wide financial statements and in the proprietary fund types of the fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund type statements of net position. If any, bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the effective interest method. Bonds payable are reported net of applicable bond premium or discount. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental funds recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of the debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from actual debt

proceeds received, are reported as debt service expenditures. The Town's current debt obligations were issued without discounts or premiums and issuance costs were insignificant and immaterial.

14. Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

15. Reclassifications

Where presented, certain 2023 financial statement amounts have been reclassified to conform to the 2024 presentation.

H. Revenues and expenditures/expenses

1. Property Tax

Teton County assesses all taxable property other than centrally assessed property, which is assessed by the State of Wyoming, by January 1 of each year. The Town notifies its levy to Teton County by July 31. Properties taxes are levied on or about August 1 and are payable in two installments on September 1 and March 1. The Teton County Treasurer is responsible for billing and collecting property taxes for the Town. The Town receives monthly distributions for the prior month's collections by the County. Property tax revenues are recognized when levied to the extent that they result in current receivables which means collected within the current period or expected to be collected within 60 days after the period end to be used to pay liabilities of the current period.

2. Sales Tax

The Town imposes a 1% local optional sales and use tax (5th cent). The 5th cent sales tax is collected by the state and remitted monthly to the Town. Sales tax revenues are recorded at the time of receipt or earlier if the susceptible to accrual criteria are met. Additionally, Teton County imposes a 1% specific purpose excise tax (SPET) for various voter-approved projects. Teton County distributes SPET tax to the Town for projects that the Town manages.

3. Entitlements, state shared revenues and grants (Intergovernmental revenues)

Entitlements and shared revenues are recorded at the time of receipt or earlier if the susceptible to accrual criteria are met. Expenditure-driven grants are recognized in the fund financial statements as revenue when the qualifying expenditures have been incurred, all eligibility requirements have been met, and reimbursement is received within availability period. Included below are the ongoing state shared revenues and grants received by the Town.

Sales tax. The state levies a 4% general sales and use tax, with 31% of it returned to Wyoming towns and counties based on populations and location of sales.

Lodging tax. The state levies a 5% lodging tax that is added to a visitor's stay in any Teton County hotel, motel or rental property. 3% is distributed to the state and used to fund the Wyoming Office of Tourism and the Wyoming Tourism Board. 2% is distributed to the Town and County and allocated based on point of sale. The Jackson Hole Travel and Tourism Joint Powers board is responsible for allocating 60% of the collected funds. Teton County and the Town are responsible for the remaining 40% of the funds collected.

America Rescue Plan (ARPA) Act. These are program allocation driven, one-time funds related to the COVID-19 pandemic. Funds were received via the United States Department of the Treasury.

Gasoline, cigarette, and severance taxes. These three taxes are all imposed by the state and returned to cities, towns and counties by various percentages determined by the Wyoming legislature.

Mineral Royalties. These are federal royalties paid to the state and passed down to cities, towns, and counties by percentages determined by the Wyoming legislature.

Federal Transit Administration (FTA). The FTA provides funding for 80% of administration, 56.56% of operations, and 80% of capital for qualifying bus system expenditures. In FY2024, the FTA provided additional Coronavirus Aid, Relief, and Economic Security (CARES) Act funds which provided for 100% of operations costs.

4. Program revenues

Amounts reported as program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and

contributions (including special assessments) that are restricted to meeting the operational or capital requirements of a particular function or segment. All taxes, including those dedicated for specific purposes, and other internally dedicated resources are reported as general revenues rather than as program revenues.

5. Compensated absences

Employees can sell-back up to 40 hours of accumulated paid time off (PTO) before the end of each fiscal year provided they meet certain requirements. All other accumulated PTO is forfeited. There are no accumulated balances for PTO. Compensatory time, if any, is accrued as wages payable at year end.

6. Proprietary funds operating and nonoperating revenues and expenses

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the water fund, sewer fund, and internal service funds are charges to customers for sales and services. The water fund also recognizes as operating revenue the portion of tap fees intended to recover the cost of connecting new customers to the system. Operating expenses for enterprise funds and internal service funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

I. Federal Audit Requirements

The U.S. Office of Management and Budget (OMB) issued Uniform Administration Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance), which establishes uniform cost principles and audit requirements for federal awards to non-federal entities and administrative requirements for all federal grants.

For 2024, the Town of Jackson audit was performed in accordance with Uniform Guidance. The auditor's report on consideration of the Town's internal control over financial reporting and tests of other matters are issued with this report.

II. Stewardship, compliance and accountability

A. Budgetary information

Annual budgets are adopted on a basis consistent with accounting principles generally accepted in the United States of America. Annual appropriated budgets are legally adopted by council resolution for all funds.

Formal budgetary integration is employed as a management control device during the year for the General and Special Revenue Funds. Budgetary control for Capital Project Funds is based on a project completion time cycle rather than on an annual basis, therefore, budgetary comparisons on an annual basis would not present meaningful information.

The Town follows these legal compliance procedures in establishing the budgetary data reflected in the financial statements:

1. The Town Manager submits a proposed operating budget, including proposed expenditures and means of financing them, to the town council prior to the beginning of the fiscal year commencing July 1.

2. Public hearings are conducted to obtain taxpayer comments.

3. Prior to June 30, the budget is legally enacted through the passage of a budget resolution.

4. Management may not legally exceed budgeted expenditures at the division level. Monitoring of budgets is maintained at the division level (i.e., police administration, police investigations, police patrols, etc.) and the category level (i.e., personal services; supplies; other services and charges; capital outlay) within each division. Management can alter the budget at the category level within their division but cannot exceed the total budgeted expenditures for the division that was approved by the town council. During the year, four formal supplementary appropriations were made. However, the town council approves all payments of vouchers and payroll at its regular meetings held twice a month.

5. All budgeted appropriations lapse at the end of the fiscal year. The legal level of budgetary control (i.e. the level at which expenditures may not legally exceed appropriations) is at the department level.

Deficit fund net position

At June 30, 2024, there was one internal service fund (Fleet Management) with a deficit fund net position. Fleet management deficit is due mostly to net pension liability calculations.

IIII. Detailed notes on all activities and funds

A. Cash, cash equivalents and investments

Cash, cash equivalents, and investments at June 30, 2024 are classified in the accompanying financial statements as follows:

Statement of net position:		
Cash and cash equivalents	$	42,516,668
Investments		28,919,473
Total cash and investments	$	71,436,141

Cash and investments at June 30, 2024 consist of the following:

Cash:		
Cash on hand	$	300
Deposit with financial institutions		342,144
Cash equivalents:		
Short-term certificate of deposit		24,675,559
Money market funds		17,498,665
Investments:		
Federal agencies		11,970,510
WYO-STAR		16,948,963
Total cash, cash equivalents, and investments	$	71,436,141

Investments authorized by Wyoming statutes and Town investment policy

The following table identifies the investment types that are authorized for the Town by Wyoming state statute. The Town's investment policy does not restrict investment types beyond the limits set forth by state statute. The table also identifies any provisions in Town policy and state statutes that address interest rate risk, credit risk, and concentration risk. This table also applies to investments of debt proceeds held by bond trustee that are governed by provisions of debt agreements and similarly restricted by state statute.

Authorized Investment Type	Maximum Maturity	Maximum Percentage of Portfolio	Maximum Investment in One Issuer
U.S. treasury obligations	None	None	None
U.S. agency securities	None	None	None
Banker's acceptances	None	25%	None
Commercial paper	270 days	25%	None
Negotiable certificates of deposit	None	None	$250,000
Non-negotiable certificates of deposit	None	None	None
Repurchase agreements	None	25%	None

The Town has investments with WYO-STAR, an investment pool authorized by the State of Wyoming and regulated by the Wyoming State Treasurer with oversight by the Wyoming State Loan and Investment Board. WYO-STAR issues separate external financial statements which can be obtained from the Wyoming State Treasurer's Office. WYO-STAR is not registered with the SEC as an investment company. Deposits in WYO-STAR are not insured or otherwise guaranteed by the State of Wyoming, and participants share proportionately in any realized gains or losses on investments. The fair value of the WYO-STAR investment pool is approximately equal to the value of the pool shares, $16,948,963.

B. Disclosures related to investment risk

Credit risk: Generally, credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical rating organization. Town polices restrict investments to the safest security types and require portfolio diversification so that potential losses on individual securities will be minimized. As of June 30, 2024, the Town's investments in U.S. Agencies are rated AA+ by Standard & Poor's and AAA by Moody's Investors Service. The Town's investments in negotiable certificates of deposit are below the F.D.I.C. $250,000 insurance limit per institution. Non-negotiable certificates of deposits exceeding $250,000 per institution must be collateralized by the limits defined in the custodial credit risk section of this footnote. The Town's investment in the brokerage money market mutual fund is unrated. Town investment policy limits investments to the safest types of securities, pre-qualifies financial institutions, brokers/dealers, intermediaries, and advisors, and requires investment portfolio diversification.

Custodial risk: Custodial risk for deposits is the risk that, in the event of the failure of a depository financial institution, a government will not be able to recover its deposits or will not be able to recover collateral securities that are in the possession of an outside party. The custodial risk for investments is the risk that, in the event of failure of the counterparty (e.g. broker-dealer) to a transaction, a government will not be able to cover the value of its investment or collateral securities that are in possession of another party. Wyoming

statutes do not contain legal requirements that would limit the exposure to custodial risk for deposits or investments, other than the following provision for deposits: Wyoming statutes require that all Town deposits be protected by insurance, surety bond, or collateral. Authorized collateral includes the legal investment described earlier, as well as certain first mortgage notes, and certain other state or local obligations. Wyoming statutes require that securities pledged as collateral be held in safekeeping by the public funds depositor or by any bank, other than the depository bank, chartered by the state of Wyoming, any national bank, other than the depository bank, authorized to do business in the state, any federal reserve bank or branch thereof, or any federal reserve system member bank. According to Town polices, the market value of the collateral must be a minimum of 105% of deposits not covered by insurance or bonds.

Interest Rate Risk: Interest rate risk is the risk that changes in market interest rate will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment, the greater the sensitivity of its fair value is to changes in market interest rates. According to its investment policy, the Town manages its exposure to interest rate risk by purchasing a combination of shorter term and longer term investments. The Town also manages this risk by timing cash flows from maturities so that a portion of the portfolio is maturing or coming close to maturity evenly over time as necessary to provide cash flow and liquidity for operations. Further, the Town purchases some securities that have interest rates that step-up over time. The Town monitors the interest rate risk inherent in its portfolio by measuring the weighted average maturity of its portfolio. The Town has no specific limitations with respect to this metric.

Investment Type	Fair Value	Maturity (in years)
Federal Agencies:		
US Tresury Bills	$ 3,991,560	0.14
Federal Farm Credit Bank	3,999,400	0.01
Federal Home Loan Banks	3,979,550	0.17
WYO-STAR	16,948,963	0.00
	$ 28,919,473	
Portfolio weighted average maturity (yrs)		0.05

Concentration of Credit Risk: State statutes contain no limitations on the amount that can be invested in any one issuer. Investments in any one issuer representing approximately 5% or more of the Town's total investments are as follows:

Investment Type	Fair Value	Percent of Investment Portfolio
Federal Agencies:		
US Tresury Bills	$ 3,991,560	13.8%
Federal Farm Credit Bank	3,999,400	13.8%
Federal Home Loan Banks	3,979,550	13.8%
WYO-STAR	16,948,963	58.6%

Fair Value: The Town categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs.

The Town has the following recurring fair value measurements as of June 30, 2024:

The $11,970,510 in U.S. agency securities are determined by an independent pricing service using recently executed transactions, market price quotations, and pricing models that factor in, when applicable, interest rates, bond spreads, and volatility (Level 2 inputs).

The fair value of the Town's position in WYO-STAR of $16,948,963 is the same as the value of the pool shares held by the Town (net asset value). WYO-STAR operates and reports monthly statements to participants on an amortized cost basis. The income, gains, and losses, net of administration fees, of WYO-STAR are allocated to participants monthly on the ratio of the participant's share to the total funds in WYO-STAR based on the participant's average daily balance. At June 30, the investments are valued at fair value, and participants are informed of the fair value valuation factor that enables them to adjust their statement balances to fair value (Level 2 inputs).

Cash, cash equivalents, and investments are presented in the government-wide financial statements as follows:

	Cash and Cash Equivalents	Investments	Total
Governmental activities:			
General Fund	$ 10,277,557	$ 7,159,688	$ 17,437,245
Start Fund	133,090	-	133,090
5th Cent Capital Projects	6,527,302	4,525,595	11,052,897
2019 SPET	6,754,662	4,683,231	11,437,893
Nonmajor govermental	7,367,844	4,607,985	11,975,829
Internal service funds	2,592,736	1,807,181	4,399,917
Total	33,653,191	22,783,680	56,436,871
Business-type activities:			
Water	4,647,706	3,222,409	7,870,115
Sewage	4,201,997	2,913,384	7,115,381
Internal service funds	13,774	-	13,774
Total	8,863,477	6,135,793	14,999,270
Government-wide total	42,516,668	28,919,473	71,436,141
Total cash and investments	$ 42,516,668	$ 28,919,473	$ 71,436,141

C. Concentration of sales and revenues

Snow King Mountain Resort and Blair Place Apartments are the two largest customers of water. Snow King Mountain Resort water purchases account for $118,135 (4%) and Blair Place Apartments water purchases account for $87,158 (3%) of the Water Fund's operating revenue. Wilson Sewer District and Spring Creek Improvement Service District are the two largest customers of sewage. Wilson Sewer District sewage charges account for $88,307 (3%) and Spring Creek Improvement Service District sewage charges account for $81,769 (3%) of the Sewage Fund's operating revenue.

D. Capital assets

Capital asset activities for the year end June 30, 2024 are as follows:

	Beginning Balance	Additions	Deletions	Ending Balance	Internal Service Fund Assets	Governmental Activities Total	Internal Service Fund Additons	Governmental Activities Additions
Governmental activities:								
Nondepreciable capital assets:								
Land	$ 33,351,431	$ -	$ -	$ 33,351,431	$ -	$ 33,351,431	$ -	$ -

Depreciation expense excluding internal service fund.	$ 5,734,371
Business-type activities:	
Water Fund	$ 751,459
Sewer Fund	937,187
Total depreciation/amortization expenses - business-type activities	$ 1,688,646

E. Claims and judgements

The Town participates in a number of federal and state programs that are fully or partially funded by grants received from other governmental units. Expenditures financed by grants are subject to audit by the appropriate grantor government. If expenditures are disallowed due to noncompliance with grant program regulations, the Town may be required to reimburse the grantor government.

As of June 30, 2024, significant amounts of grant expenditures have not been audited by the granting agency, but the Town believes that disallowed expenditures discovered in subsequent audits, if any, will not have a material effect on any of the individual funds or the overall financial position of the Town. Additionally, unearned revenues are recognized in those funds that have received grant monies in advance of future reimbursable expenditures.

F. Receivables and unearned revenues

Accounts receivables and due from other governmental units: Due from other governmental units represent earned grant reimbursements or repayments owed for providing non-utility related services. The following are the accounts receivables and due from other governmental units at June 30, 2024:

	Accounts Receivable	Due from other Governments
Governmental activities:		
General Fund	$ -	$ 4,704,510
START Bus System	4,509	3,674,542
5th Cent Capital Projects	-	184,468
Nonmajor funds	796,928	-
Internal service funds	51,490	80,630
Total governmental activities	852,927	8,644,150
Business-type activities		
Water Fund	286,354	-
Sewage Fund	441,380	-
Total business-type activities	727,734	-
Total	$ 1,580,661	$ 8,644,150

Lease receivable

During the current fiscal year, the Town leased 9 facilities and easements. The leases range in term from 3 to 23 years with the longest expiring June 2044. Monthly payments ranged in value between $681 and $10,985. The Town recognized $416,327 in lease revenue and $117,864 in interest revenue during the current fiscal year related to these leases. As of June 30, 2024, the Town's receivable for lease payments was $3,157,790. Also, the Town has a deferred inflow of resources associated with this lease that will be recognized as revenue over the lease term. As of June 30, 2024, the balance of the deferred inflow of resources was $2,867,995.

Interfund receivables, payables and transfers: At June 30, 2024, there are interfund balances that are generally short-term loans used to cover temporary cash deficits in various funds. The interfund transfers generally are made for the purposes of distributing revenue from the general fund to other funds for capital projects and operations. Aside from utility transfers discussed below, no significant transfers during the fiscal year that were either non-routine in nature or inconsistent with the activities of the fund making the transfer.

The composition of interfund balances as of June 30, 2024 is as follows:

Receivable Fund	Payable Fund	Amount
General	Fleet Management	$ 752,214
Water	5th Cent Capital Projects	600,730
Sewage	5th Cent Capital Projects	600,730

On August 1, 2022, the Town approved an interfund loan each from the Water and Sewage funds to the 5th Cent Capital Projects fund to fund the Core Maintenance Facility project. The 5th Cent Capital Projects fund will repay the utility funds in monthly installments utilizing current interest rates earned on pooled cash over a five-year term. The interfund interest paid and received is recorded in transfers.

Unearned revenues: Governmental funds also defer revenue recognition in connection with resources that have been received, but not yet earned. This deferred revenue type is specifically referred to as unearned revenue. At the end of the current fiscal year, the various components of unearned revenue reported in governmental funds were as follows:

	Court Bonds	Construction Bonds	Grants	Customer Deposits	Total
Governmental Fund Activities:					
Unearned revenue					
General Fund	$ 9,980	$ 1,864,890	$ 90,149	$ 11,500	$ 1,976,519
Employee Housing	-	-	-	70,383	70,383
Total	9,980	1,864,890	90,149	81,883	2,046,902
Business-type activities:					
Unearned revenue					
Water	-	-	-	6,000	6,000
Total	-	-	-	6,000	6,000
Government-wide total	$ 9,980	$ 1,864,890	$ 90,149	$ 87,883	$ 2,052,902

Transfers: The following interfund transfers are reflected in the fund financial statements at June 30, 2024:

	Transfers In	Transfers Out
Governmental funds:		
General Fund	$ 1,944,808	$ 9,204,331
START	2,614,309	134,087
5th Cent Capital Projects	6,457,438	54,456
Nonmajor governmental	1,548,303	1,608,426
Total governmental funds	12,564,858	11,001,300
Enterprise funds:		
Water	11,728	785,273

General	Employee Insurance	90,937	(1)
START	General	1,155,121	(5)
START	Lodging Tax	1,459,188	(1)
Capital Projects	General	6,434,838	(2)
Capital Projects	IT Services	22,600	(5)
Central Equipment	Capital Projects	31,000	(5)
IT Services	General	66,069	(5)
Utility Funds	Capital Projects	23,456	(4)
Affordable Housing	General	1,548,303	(3)
		$ 12,685,383	

Annual reimbursement for shared expenditures
(1) Annual transfer to subsidize fund operations
(2) Annual 5th cent transfer to capital projects
(3) Transfer for housing projects and joint affordable housing department
(4) Transfer for interfund receivable interest
(5) One-time transfer for capital project

G. Accounts Payable

Accounts payable consists of vendor and retainage payables. As of June 30, 2024, governmental activities vendor payables totaled $6,391,744 and retainage payables totaled $636,743. As of June 30, 2024, business-type activities vendor payables totaled $174,091 and there were not retainage payables.

H. Long-term liabilities

Notes payable: The Town currently has issued two notes payable:

The first is a $1,158,046, 4% note also with the WWDC. This note is secured by the revenues of the Water Fund and a mortgage on the assets of the water supply system. This 30-year note is also payable in equal annual installments.

The last is a $1,000,000, .5% loan from Wyoming Business Council to install additional infrastructure at Snow King Mountain. This note is secured by the revenues of the Water Fund. This 20-year note is payable in 19 annual installments of $52,552 with all unpaid principal and interest due in the 20th year.

The notes payable outstanding are as follows:

Governmental activities

Notes Payable	Final Maturity	Interest Rates	Issue Amount	Outstanding 6/30/2024
Snow King Infrastructure				
Snow King Loan	03/31/35	0.50%	$ 1,000,000	$ 563,375

Business-type activities

Notes Payable	Final Maturity	Interest Rates	Issue Amount	Outstanding 6/30/2024
Water supply and storage projects				
2010 WWDC note	11/11/41	4.00%	1,158,046	847,792

Annual debt service requirements to maturity for the notes payable are as follows:

Year ending June 30	Governmental activities Principal	Governmental activities Interest	Business-type activities Principal	Business-type activities Interest
2025	$ 49,735	$ 2,817	$ 33,058	$ 33,912
2026	49,984	2,568	34,381	32,589
2027	50,234	2,318	35,756	31,214
2028	50,485	2,067	37,186	29,784
2029	50,737	1,815	38,673	28,296
2030-2034	257,518	5,243	217,847	117,003
2035-39	54,682	1,602	265,044	69,806
2040-42	-	-	185,847	14,921
Total	$ 563,375	$ 18,430	$ 847,792	$ 357,526

Leases payable

The Town is committed under eleven leases for buildings and easements entered into as lessee. The leases range between two and six years. As of June 30, 2024, the value of the lease liability was $921,138. The Town is required to make monthly principal and interest payments ranging between $1,500 and $11,159. The leases have an interest rate between 1% and 12%. The leases have estimated useful lives ranging between two and six years. The value of the right-to-use asset as of the end of the current fiscal year was $1,256,550 and had accumulated amortization of $405,546.

The future principal and interest lease payments as of June 30, 2024 were as follows:

Year ending June 30	Governmental activities Principal	Governmental activities Interest	Business-type activities Principal	Business-type activities Interest
2025	$ 256,892	$ 52,581	11,380	154
2026	264,789	35,454	11,648	117
2027	233,621	17,484	11,922	79
2028	111,895	4,326	-	-
2029	18,991	159	-	-
Total	$ 886,188	$ 110,004	$ 34,950	$ 350

Subscription payable

The Town is committed under four subscription agreements for software. The agreements range between two and six years. As of June 30, 2024, the value of the subscription liability was $166,466. The Town is required to make annual principal and interest payments ranging between $12,314 and $44,641. The agreements have an interest rate between 3% and 4%. The right-to-use subscription assets have estimated useful lives ranging between two and six years. The value of the right-to-use asset as of the end of the current fiscal year was $568,010 and had accumulated amortization of $240,486.

During the year ended June 30, 2024, there were no additional variable payments or other payments associated with these subscriptions.

The future principal and interest lease payments as of June 30, 2024 were as follows:

Year ending June 30	Governmental activities Principal	Interest
2025	$ 97,736	$ 6,399
2026	56,732	2,763
2027	11,998	482
Total	$ 166,466	$ 9,644

The following is a summary of changes in long-term liabilities reported in the government-wide financial statements for the year ended June 30, 2024:

	Beginning Balance	Additions/ Proceeds	Reductions/ Payments	Ending Balance	Due Within One Year
Governmental activities:					
Snow King Loan	$ 612,863	$ -	$ (49,488)	$ 563,375	$ 49,735
Leases payable	849,256	409,386	(372,454)	886,188	256,892
Subscription payable	278,519	248,731	(82,265)	166,466	97,736
Governmental activities total	1,740,638	658,117	(504,207)	1,616,029	404,363
Business-type activities:					
Water - storage	879,580	-	(31,788)	847,792	33,058
Leases payable	46,068	-	(11,118)	34,950	11,380
Business-type activities total	925,648	-	(42,906)	882,742	44,438
Government-wide total	$ 2,666,286	$ 658,117	$ (547,113)	$ 2,498,771	$ 448,801

Redemptions: None.

I. Risk management and litigation

The Town is exposed to various risks of losses related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. For the past several years, the Town obtained coverage from various sources and has effectively managed risk through a number of employee education and prevention programs.

All risk management activities are accounted for in the appropriate fund. Expenditures and claims are recognized when it is probable that a loss has occurred, the amount of the loss can be reasonably estimated, and the loss amount exceeds insurance coverage. In determining claims, events that might create claims, but for which none have been reported, are considered.

The Town attorney estimates that the amount of actual or potential claims against the Town as of June 30, 2024 will not materially affect the financial condition of the Town.

Workers compensation coverage is provided through the state of Wyoming's Worker's Safety and Compensation Division. The Town pays an annual premium, reflecting a base rate plus an experience premium, to the division. Currently, the Town receives drug, alcohol, and safety program discounts.

The Town self-insures its health benefit coverage up to an annual $70,000 per claimant, with exception of laser coverage option. Stop-loss coverage is purchased from private insurers for amounts exceeding $70,000. For the year ended June 30, 2024, the Town exercised no laser coverage on any participants. Health benefit self-insurance activities are accounted for in the Employee Insurance Fund, an internal service fund.

Liability insurance is provided through Local Government Liability Pool (LGLP), a pooled self-insurance program. LGLP was created by the legislature specifically for local governments in Wyoming. The coverage amounts are the limits set by the Governmental Claims Act (W.S. 1-39-118). Current statutory limits are $250,000 per claimant with $500,000 per occurrence. Excess insurance coverage provides for out-of-state claims and Federal Civil Rights claims with the current limit of $5 million with a $1 million limit per occurrence. The LGLP policy has a $1,000 deductible.

Property and casualty insurances are provided by Wyoming Association of Risk Management (WARM) through a pooled self-insurance program. The WARM policy has a $5,000 deductible.

An analysis of claims activities for the last three fiscal periods ending on June 30 is presented below:

	2022	2023	2024
Paid losses	$35,358	$32,361	$88,076
Paid expenses	7,000	9,000	13,415
Reserves	14,895	-	34,478
Total incurred	$57,253	$41,361	$135,969

The Town's commercial insurance carrier has no set reserve losses or reserve expenses for claims filed after June 30, 2024 for incidents occurring prior to that date.

There were no significant reductions in insurance from the previous year and there were no settlements in excess of insurance coverage in each of the past three years.

J. Retirement plans

1. Defined benefit plans

The Town participates in the Wyoming Retirement System (the "System"), a statewide cost sharing multiple-employer public employee retirement system. The System is established and governed by the respective sections of Wyoming state statute. The statute provides for the administration of the System under the direction of the Wyoming State Retirement Board whose members are appointed by the Governor. The System issues a publicly available financial report that includes financial statements and required supplementary information for the System. A copy of the report may be obtained by writing to the Wyoming Retirement System, 6101 Yellowstone Road, Suite 500, Cheyenne, Wyoming 82002, by calling 1-307-777-7691, or https://retirement.wyo.gov/About/Reports?#categories. Substantially all Town employees are eligible to participate in following retirement plans offered by the System based upon eligibility and hiring status: 1) Public Employees' Pension Plan; 2) Law Enforcement Pension Plan; and 3) Wyoming Deferred Compensation Plan.

Public Employees' Pension Plan

The Public Employees' Pension Plan (PEPP) is a cost sharing multiple employer defined benefit, contributory retirement plan covering substantially all full-time employees of the Town. PEPP statutorily requires 18.62% of the participant's salary to be contributed to PEPP. Contributions consist of 9.25% of the participant's salary as employee contributions and 9.37% as employer contributions. The amount of contributions designated as employee contributions represent the portion of total contributions that a participant retains ownership of and can elect to receive as a refund upon termination of employment. Employers can elect to cover all or a portion of the employee's contribution at their discretion. Through legislation passed during the 2012 legislative session, two tiers of benefits were established for participants of this plan.

- Tier 1, PEPP allows for normal retirement after four years of service and attainment of age 60. Early retirement is allowed provided the employee has completed four years of service and attained age 50 or 25 years of service but will result in a reduction of benefits based on the length of time remaining to age 60.

- Tier 2, PEPP allows for normal retirement after four years of service and attainment of age 65. Early retirement is allowed provided the employee has completed four years of service and attained age 55, or 25 or more years of service but will result in a reduction of benefits based on the length of time remaining to age 65. All employees may also retire upon normal retirement on the bases that the sum of the member's age and service is at least 85.

PEPP provides retirement, disability and death benefits according to predetermined formulas and allows retirees to select one of eight optional methods for receiving benefits, including two joint and survivor forms of benefits: a 100% joint and survivor annuity, and a 50% joint and survivor annuity. The benefit amounts under these options are determined on an actuarially equivalent basis. Any cost of living adjustment provided to retirees must be granted by the State Legislature. In addition, a cost of living adjustment will not be approved by the legislature unless the plan is 100% funded after the COLA is awarded.

Employees terminating prior to normal retirement can elect to withdraw all employee contributions plus accumulated interest through date of termination or, if they are vested, they may elect to remain in PEPP and be eligible for retirement benefits at age 50 (Tier 1 employees) and 55 (Tier 2 employees).

Contributions to PEPP for the year ended June 30, 2024 were $1,593,184.

Law Enforcement Pension Plan

The Wyoming Law Enforcement Pension Plan (LEPP) is a cost sharing multiple employer defined benefit, contributory plan covering all law enforcement employees of the Town. LEPP statutorily requires 17.20% of the participant's salary to be contributed to LEPP. LEPP statutorily requires participants to contribute 8.6% of their salary to LEPP and the employer is required to contribute 8.6% of each participant's salary.

LEPP statutorily provides retirement, disability and death benefits according to predetermined formulas and allows employees to select one of seven optional methods for receiving benefits. Any cost of living adjustment provided to retirees must be granted by the State Legislature. In addition a cost of living adjustment will not be approved by the legislature unless LEPP is 100% funded after the COLA is awarded. Participants may withdraw from LEPP at

any time and receive refunds of participant contributions plus accumulated interest.

Contributions to LEPP for the year ended June 30, 2024 were $508,446.

Wyoming Deferred Compensation Plan

The Plan administered by the System is an IRS Section 457 Deferred Compensation Plan. This Plan is available as a supplemental plan to the defined benefit retirement plans. Contributions may be made into this Plan (subject to plan and Internal Revenue Code limitations) by employees and employer contributions at rates determined by the Town.

For the year ended June 30, 2024, employee contributions were $294,034 and employer contributions were $66,124.

2. **Pension Liabilities, Expense and Deferred Outflows of Resources Related to Pensions**

At June 30, 2024, the Town reported an entity-wide net pension liability of $11,640,381 of which $10,386,517 is related to governmental activities and $552,082 and $701,782 is related to the Town's water and sewer funds, respectively.

Plan	Proportionate Share	Net Pension Liability
PEPP	0.420014%	$ 9,535,088
LEPP	1.558506%	$ 2,105,293
Total net pension liability		$ 11,640,381

The net pension liability was measured as of December 31, 2023, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of January 1, 2024 and rolled-forward using generally accepted actuarial procedures. The proportion of the net pension liability was based upon actual historical employer contributions to the plan from the census data submitted to the plan for pay periods ending in 2023.

For the year ended June 30, 2024, the Town recognized entity-wide pension expense of $366,895. The PEPP recognized an expense of $238,077. The LEPP recognized an expense of $128,818. At June 30, 2024, the Town reported entity-wide deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	PEPP	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	$ 184,219	$ 41,654
Net difference between projected and actual earnings on pension plan investments	-	337,991
Changes in assumptions	97,877	-
Change in proportion	1,340,127	-
Contributions subsequent to the measurement date	826,087	-
	$ 2,448,310	$ 379,645

	LEPP	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Difference between expected and actual experience	$ 183,117	$ 109,912
Net difference between projected and actual earnings on pension plan investments	-	126,951
Changes in assumptions	1,181,122	2,500,702
Change in proportion	238,766	12,226
Contributions subsequent to the measurement date	255,590	-
	$ 1,858,595	$ 2,749,791

Deferred outflows of resources related to pensions resulting from Town contributions of $1,081,677 made subsequent to the measurement date will be recognized as a reduction of the net pension liability in the upcoming fiscal year. Other amounts reported as deferred outflows and inflows of resources related to pensions will be recognized in pension expense as follows:

Fiscal Year Ending June 30,	Net Deferred Outflows (Inflows) of Resources PEPP	LEPP
2025	$ 478,255	$ 74,985
2026	370,711	(738,153)
2027	860,439	(315,951)
2028	(466,827)	(167,667)
	$ 1,242,578	$ (1,146,786)

Actuarial Assumptions

The total pension liability in the 2023, actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

	PEPP	LEPP
Projected salary increases, includes inflation	2.50% to 6.50%	5.25% TO 9.25%
Assumed inflation rate	2.25%	2.25%
Investment Rate of Return	6.80%	6.80%

PEPP mortality rates were based on the Pub-2010 General Employee Mortality Table, amount weighted, fully generational, projected with the MP-2020 Ultimate Scale.

LEPP mortality rates were based on the Pub-2010 Safety Employee Mortality Table, amount weighted, fully generational, projected with the MP-2020 Ultimate Scale.

Discount Rate

The discount rate used to measure the total pension liability was 6.8% for both the PEPP and LEPP. The projection of cash flows used to determine the discount rate assumed contributions from participating employers will be made based on the actuarially determined rates based on the Board's funding policy, which establishes the contractually required rates under Wyoming State Statutes. Based on those assumptions, the Systems' fiduciary net position was projected to be available to make all the projected future benefit payments of current plan members. Therefore, the long term expected rate of return on pension plan investments was applied to all periods of projected benefit payment to determine the total pension liability.

Asset Class	Allocation	20 Year Arithmetic Expected Real Return
Cash	0.50%	-0.30%
Gold	1.50%	0.70%
Fixed Income	20.00%	3.80%
Equity	51.50%	8.20%
Marketable Alternatives	16.00%	5.23%
Private Real Assets	10.50%	7.48%
Totals	100.00%	6.61%

Sensitivity of the proportionate share of the net pension liability to changes in the discount rate:

The following presents the proportionate share of the net pension liability calculated using the PEPP discount rate of 6.80% and the LEPP discount rate of 6.80%, as well as what the proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower or 1-percentage-point higher than the current rate:

	1% Decrease	Discount Rate	1% Increase
PEPP	5.80%	6.80%	7.80%
Proportionate share of net pension liability	$ 15,142,031	$ 9,535,088	$ 4,888,626
LEPP	5.80%	6.80%	7.80%
Proportionate share of net pension liability	4,248,370	2,105,293	352,816

Pension plan fiduciary net position

Detailed information about the pension plan's fiduciary net position is available in the separately issued Wyoming Retirement System financial report.

K. Committed contracts

At June 30, 2024, the Town had the following remaining commitments for uncompleted construction and equipment purchase contracts:

Fund/Project	Remaining Contract
START	
BUILD Grant	270,580
Capital Projects	
Chip Seal	254,500
Core Services Vehicle Maintenance Facility	1,070,025
Water	
West Jackson Water Transmission Project	736,269
S. Millward Waterline	971,360
Central Equipment Fund	
Street Sweeper	299,897
IT Vehicle	60,414

In 2008, the Town created a shared-appreciation mortgage program as a recruitment tool for key personnel. At June 30, 2024, the Town's commitments totaled $266,500.

L. Fund changes and fund balances

Amounts for specific purposes by fund and fund balance classifications for the year ended June 30, 2024, are as follows:

Classification/Fund	Purpose	Amount
Nonspendable		
General Fund	Prepaid items	$ 2,508
START Bus System	Prepaid items	66,130
Restricted		
General Fund	Victim services	12,745
2010 SPET	Energy	128,383
2006 SPET	Sidewalks	17,727
2014 SPET	Pedestrian/Complete Streets	3,266,138
2016 SPET	Landslide mitigation	351,404
2019 SPET	Complete Streets/Stormwater	10,795,365
2022 SPET	Employee housing	522,013
Parking Exactions	Parking improvements	228,723
Parks Exactions	Park improvements	601,793
Affordable Housing	Housing options	1,206,612
Lodging Tax	Visitor impacts	280,079
Animal Care	Animal shelter	570,436
Assigned		
Employee Housing	Employee housing	2,943,351
Affordable Housing	Housing options	1,212,260
Parking Exactions	Parking management	1,594,570
5th Cent Capital Projects	Various improvements	6,647,317
START Bus System	Transit	3,079,949
General Fund	Subsequent year's budget	2,539,368
Unassigned		
General Fund		16,517,807
Total fund balances		$ 52,584,678

For the year ended June 30, 2024, the Town closed the following fund(s):
None

For the same period, the Town opened the following fund(s):
2022 SPET

Statistical Section

TOWN OF JACKSON
WYOMING

Statistical Information

(unaudited)

The Statistical Section is included to provide financial statement users with additional historical perspective, context, and detail for them to use in evaluating the information contained within the financial statements, notes to the financial statements, and required supplementary information with the goal of providing the user a better understanding of the Town's economic condition.

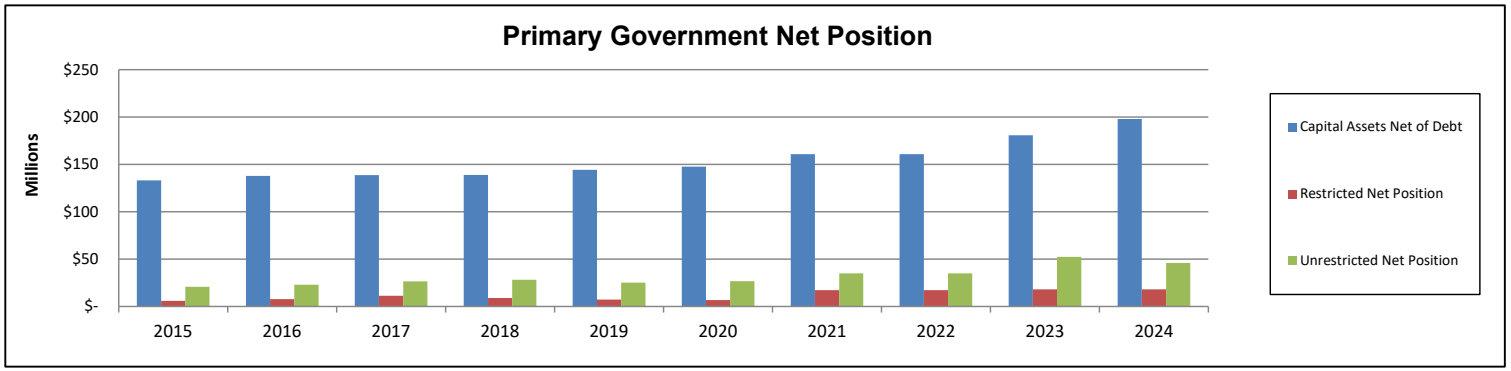
Contents

Financial Trends
These schedules contain information to help the reader understand how the Town's financial performance and well-being have changed over time.

Revenue capacity
These schedules contain information to help the reader assess the Town's most significant local revenue sources.

Debt capacity
These schedules contain information to help the reader assess the affordability of the Town's current levels of outstanding debt and the Town's ability to issue additional debt in the future.

Demographic and economic information
These schedules offer demographic and economic indicators to help the reader understand the environment within which the Town's financial activities take place.



Operating information
These schedules contain service and infrastructure data to help the reader understand how the information in the Town's financial report relates to the services the Town provides and activities it performs.

Sources: Unless otherwise noted, the information in these schedules is derived from the annual comprehensive financial reports for the relevant year.

Change 2013-2024	105.6%	0.6%	-60.5%	7.6%	10.4%	-100.0%	73.0%

Notes: (1) As of June 30, 2004, the 4% state sales and use tax is distributed 69% to the state and 31% to cities, towns and counties. Of the 31%, 1% is distributed proportionately based on population and 30% is distributed proportionately based on the sales tax collected in each county.

(2) The gasoline tax is distributed 57.5% to the state, 13.5% and 14% to counties, and 15% to cities and towns. City and town distributions are based 75% on proportionate sales in cities and towns and 25% on proportionate populations for the same.

(3) The cigarette tax is distributed 33 1/3% to incorporated cities, towns, and counties proportionately to sales derived in each. The remaining 66 2/3% is distributed 38 1/4% to the state's general fund and the remaining 61 3/4% is distributed in the preceding manner.

(4) The severance tax distribution to cities and towns is 9.25% of the total in the state severance tax distribution tax account (up to $155,000,000) in proportion to population.

Direct and Overlapping Governmental Activities Debt
As of June 30, 2024

(Unaudited)

Teton County assessed valuation	4,107,313,200
Town of Jackson assessed valuation	926,028,959
Town of Jackson percent of total	22.5%

Direct and overlapping debt governmental activity debt	Total Debt 6/30/2024 (1)	Percent Applicable	Town's Share of Debt 6/30/2024 (2)
Teton County	$ 2,125,596	22.5%	$ 479,234
Town of Jackson	563,375	100.0%	563,375
Total direct and overlapping governmental activities debt	$ 2,688,971		$ 1,042,609

Ratio to assessed valuations	
Direct debt	0.06%
Total direct and overlapping debt	0.11%

Notes: (1) Excludes enterprise revenue debt, specific purpose excise tax supported debt and lease obligations.

(2) Overlapping governments are those that coincide, at least in part, with geographic boundaries of the town. This schedule estimates the portion of the outstanding debt of those overlapping governments that is borne by the residents and businesses of the town. This process recognizes that, when considering the government's ability to issue and repay long-term debt, the entire burden borne by residents and businesses should be taken into account. However, this does not imply that every taxpayer is a resident, therefore responsible for repaying the debt, of each overlapping government.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS*

To the Mayor and Town Council
Town of Jackson, Wyoming

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States (*Government Auditing Standards*), the financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Jackson, Wyoming (the Town) as of and for the year ended June 30, 2024, and the related notes to the financial statements, which collectively comprise the Town's basic financial statements, and have issued our report thereon dated December 27, 2024.

Report on Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Town's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Town's internal control. Accordingly, we do not express an opinion on the effectiveness of the Town's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the Town's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Independent Member of PrimeGlobal | The Association of Advisory and Accounting Firms

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist that were not identified.

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Town's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Town's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Town's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE FOR EACH MAJOR FEDERAL PROGRAM AND REPORT ON INTERNAL CONTROL OVER COMPLIANCE IN ACCORDANCE WITH THE UNIFORM GUIDANCE

Report on Compliance for Each Major Federal Program

Opinion on Each Major Federal Program

We have audited the Town of Jackson, Wyoming's (the Town) compliance with the types of compliance requirements identified as subject to audit in the OMB *Compliance Supplement* that could have a direct and material effect on each of the Town's major federal programs for the year ended June 30, 2024. The Town's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

In our opinion, the Town complied, in all material respects, with the compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2024.

Basis for Opinion on Each Major Federal Program

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America (GAAS); the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States (*Government Auditing Standards*); and the audit requirements of Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Our responsibilities under those standards and the Uniform Guidance are further described in the Auditor's Responsibilities for the Audit of Compliance section of our report.

We are required to be independent of the Town and to meet our other ethical responsibilities, in accordance with relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on compliance for each major federal program. Our audit does not provide a legal determination of the Town's compliance with the compliance requirements referred to above.

Independent Member of PrimeGlobal | The Association of Advisory and Accounting Firms

Responsibilities of Management for Compliance

Management is responsible for compliance with the requirements referred to above and for the design, implementation, and maintenance of effective internal control over compliance with the requirements of laws, statutes, regulations, rules and provisions of contracts or grant agreements applicable to the Town's federal programs.

Auditor's Responsibilities for the Audit of Compliance

Our objectives are to obtain reasonable assurance about whether material noncompliance with the compliance requirements referred to above occurred, whether due to fraud or error, and express an opinion on the Town's compliance based on our audit. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS, *Government Auditing Standards*, and the Uniform Guidance will always detect material noncompliance when it exists. The risk of not detecting material noncompliance resulting from fraud is higher than for that resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Noncompliance with the compliance requirements referred to above is considered material, if there is a substantial likelihood that, individually or in the aggregate, it would influence the judgment made by a reasonable user of the report on compliance about the Town's compliance with the requirements of each major federal program as a whole.

In performing an audit in accordance with GAAS, *Government Auditing Standards*, and the Uniform Guidance, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material noncompliance, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the Town's compliance with the compliance requirements referred to above and performing such other procedures as we considered necessary in the circumstances.
- Obtain an understanding of the Town's internal control over compliance relevant to the audit in order to design audit procedures that are appropriate in the circumstances and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of the Town's internal control over compliance. Accordingly, no such opinion is expressed.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and any significant deficiencies and material weaknesses in internal control over compliance that we identified during the audit.

Report on Internal Control Over Compliance

A *deficiency in internal control over compliance* exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing

their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A *material weakness in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A *significant deficiency in internal control over compliance* is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the Auditor's Responsibilities for the Audit of Compliance section above and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies in internal control over compliance. Given these limitations, during our audit we did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above. However, material weaknesses or significant deficiencies in internal control over compliance may exist that were not identified.

Our audit was not designed for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, no such opinion is expressed.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

NOTE 1 – BASIS OF PRESENTATION

The accompanying schedule of expenditures of federal awards (the Schedule) includes the federal award activity of the Town of Jackson under programs of the federal government for the year ended June 30, 2024. The information in this schedule is·presented in accordance with the requirements of Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). Because the Schedule presents only a selected portion of the operations of the Town of Jackson, it is not intended to and does not present the financial position, changes in net position, or cash flows of the Town of Jackson.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Expenditures reported on the Schedule are reported on the accrual basis of accounting. Such expenditures are recognized following the cost principles contained in the Uniform Guidance, wherein certain types of expenditures are not allowable or are limited as to reimbursement.

NOTE 3 - INDIRECT COST RATE

The Town of Jackson has not elected to use the 10% de minimis indirect cost rate as allowed under the Uniform Guidance.

Introductory Section

Administration and Finance

December 29, 2025

To the Honorable Mayor, Members of the Town Council, and the Citizens of the Town of Jackson:

The Wyoming statutes require all cities, towns, and counties to issue an annual report on its financial position and activity prepared in accordance with accounting principles generally accepted in the United States of America (GAAP), and audited in accordance with auditing standards generally accepted in the United States of America by a firm of licensed certified public accountants or the Wyoming Office of State Audit. Pursuant to that requirement, we hereby issue the Annual Comprehensive Financial Report (ACFR) of the Town of Jackson for the fiscal year ended June 30, 2025.

The Town of Jackson' financial statements have been audited by Jones Simkins LLC, a firm of licensed certified public accountants. The goal of the independent audit was to provide reasonable assurance that the financial statements of the Town of Jackson for the fiscal year ended June 30, 2025, are free of misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unmodified opinion that the Town of Jackson's financial statements for the fiscal year ended June 30, 2025, are fairly presented in conformity with GAAP.

Management's discussion and analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview, and analysis of the basic financial statements. The MD&A compliments this letter of transmittal and should be read in conjunction with it. The MD&A can be found on pages 13-22.

PROFILE OF THE GOVERNMENT

The Town of Jackson, incorporated in 1914, is located in Teton County near the Wyoming and Idaho border south of the Grand Teton and Yellowstone National Parks. The town currently has a land area of nearly 4 square miles and an estimated population of 10,680. The Town of Jackson is empowered to levy 8 mills of property tax on both real and personal properties located within its boundaries. The Town implemented a property tax of 0.5 mills during 2022. This is the first property tax assessment by the Town since 1977. It is also empowered by state statute to extend its corporate limits by annexation, which is done periodically when deemed appropriate by the Town Council.

The Town of Jackson is governed by city code under Wyoming Statutes with a council-mayor form of government. Policy-making and legislative authority are vested in a Town Council consisting of the mayor and four council members. The Town Council is responsible, among other things, for passing ordinances, resolutions, adopting the budget, appointing commissions, authorities, and committees, and hiring the town manager, town attorney and municipal judge. The town manager is responsible for carrying out the policies and ordinances of the Town Council, for overseeing the day-to-day operations of the town government, and for appointing the heads of the various departments. The council is elected on a non-partisan basis. All four council members and the mayor are elected at large. Council members serve staggered four-year terms, with elections occurring every even year. Effective 2017, the mayor serves a four-year term.

The Town of Jackson provides a full range of services, including police and fire protection; construction and maintenance of streets and infrastructure; recreational facilities and pathways, water, sewage, and transit services. Additionally, the town owns rental properties for employees.

FACTORS AFFECTING FINANCIAL CONDITION

The information presented in the financial statements is perhaps best understood when it is considered from the broader perspective of the specific environment within which the Town of Jackson operates.

Local economy. The Town of Jackson is located at the southern entrance to Grand Teton and Yellowstone National Parks in the northwest corner of Wyoming. Dramatic mountain peaks, including the Tetons, the Gros Ventres, and Snow King form a breathtaking backdrop to our valley (called Jackson Hole). The Town of Jackson is home to a little over 10,700 people and another 12,600 live in the unincorporated county (Teton).

Jackson's economy is centered on tourism and lifestyle. Approximately four million guests visit each year and more than 700,000 skier days are tallied at the Jackson Hole Mountain Resort. The abundance of outdoor recreation opportunities, the unsurpassed scenic beauty, the prevalence of many species of wildlife, the lack of individual state income tax, and the high quality of life give Jackson unsurpassed appeal as a place to live, visit and recreate.

At fiscal year-end, the Town of Jackson's employment picture, at a 2.3% unemployment rate (Teton County), is healthier than the 4.1% national average. The state of Wyoming has an unemployment rate of 3.3%.

FINANCIAL INFORMATION

Management of the town is responsible for establishing and maintaining internal control designed to ensure that the assets of the government are protected from loss, theft, or misuse, and to ensure that adequate accounting data are compiled to allow for the preparation of financial statements in conformity with accounting principles generally accepted in the United States of America. Internal control is designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that: (1) the cost of a control should not exceed the benefits likely to be derived, and (2) the valuation of costs and benefits requires estimates and judgments by management.

This report consists of management's representations concerning the finance of the town. As a result, management assumes full responsibility for the completeness and reliability of all the information and content presented in this ACFR. Additionally, management asserts that, to the best of their knowledge and belief, this financial report is complete and reliable in all material respects.

Budgetary Controls. The annual budget serves as the foundation for the Town of Jackson's financial planning and control. All departments, authorities, and commissions of the town submit requests for appropriation to the town manager in February of each year. The town manager uses these requests as the starting point for developing a proposed budget. The town manager then presents this recommended budget to the council for review prior to May 15. The council is required to hold public hearings on the proposed budget and to adopt a final budget no later than June 30, the close of the town's fiscal year. The budget is prepared by fund (general), function (e.g., public safety), department (e.g., police), and division (e.g., patrol). All expenditures require the approval of the Town Council. Budget-to-actual comparisons are provided in this report for each individual governmental fund which an annual budget has been adopted. For the general fund and major special revenue funds, this comparison is presented starting on page 29 of the basic financial statements. For non-major special revenue funds, with annual budgets, this comparison is presented in the governmental fund subsection of this report, which starts on page 67.

Long-term Financial Planning. The Town's strategic vision is laid out in a Council bi-annual Work Plan, supported by a five-year financial model and

Capital Improvement Program. The Plan identifies the Town's strategic intent and identifies areas for emphasis and funding. The Town's near-term and long-term fiscal planning are focused on accomplishing Work Plan objectives. A five-year financial model and Capital Improvement Program are maintained to assess the attainability and sustainability of these objectives.

The Town Council supports and understands that the main area of focus for the Town of Jackson is the provision of core services, maintaining the current level of service already supported and approved through the annual budget, and most importantly those services that directly contribute to and maintain the health, safety, and welfare of the citizens and guests to our community. A brief summary includes:

Safety and security provided through law enforcement, fire protection, building safety and inspection, animal control, contractor licensing, and municipal court and prosecution services.

Infrastructure, facility and public asset management provided through street, sidewalk and right of way maintenance and snow removal services, engineering, preventive and proactive facility management, and parking enforcement.

Health and well-being provided through water treatment and distribution, sewer collection and treatment, emergency medical services, and victim services.

Development and economic oversight provided through code compliance, planning and development review, permit processing, and business, liquor, taxi, special event, and rental licensing.

Accessibility and livability provided through public transit, community and affordable housing, parks and recreation, and pathway creation and maintenance.

Internal services for the Town of Jackson organization that support the efficiency and effectiveness of our local government provided through information technology support, records management and access, fleet maintenance, public information, legal services, personnel services, financial accounting, and overall coordination, administration, leadership and management of government services and day to day operations.

Major Budget Initiatives.

To continue to be a resilient community, we will need to preserve and maintain General Fund Reserves to have the resources to adapt to uncertain times ahead. Looking ahead, recurring expenses are expected to exceed recurring revenues. We must continue evaluating our revenue streams and expenditures, to determine how to ensure a balanced budget into the future.

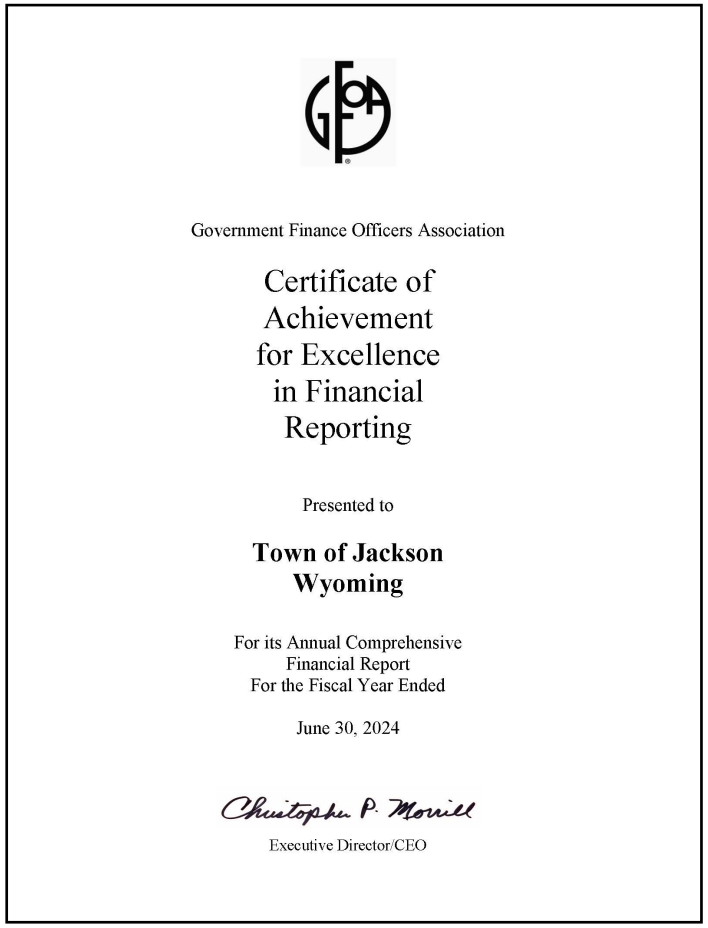
Due in part to COVID-19 pandemic we reinforced the importance of our fiduciary responsibility to maintain and continue building a strong, resilient community in the short, mid, and long-term. Due to years of prudent budgeting and planning, the Town was able to respond to reduced revenues projected and maintain a well-resourced and responsive Town government to close fiscal year 2025.

The Town will need to prioritize our core services, capital projects and consider reducing funding to the areas of lower priority and/or work to consider a new funding source(s) to maintain current Town program services and capital improvement projects. As our community changes, various core services continue to see increased need year-over-year. The Town simply does not have the capacity to absorb such continuous growth without increasing revenue or reducing existing program services and capital projects.

Single Audit. As a recipient of federal awards, the town is also responsible for ensuring that adequate internal controls are in place to ensure compliance with applicable laws and regulations related to those programs. The internal controls are subject to periodic evaluations by town management and external auditors.

AWARDS AND ACKNOWLEDGEMENTS

The Government Finance Officers Association (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Town of Jackson, Wyoming for its comprehensive financial report for the fiscal year ending June 30, 2024. This is the 39th year the town has received this prestigious award. In order to be awarded the Certificate of Achievement, the government must publish an easily readable and efficiently organized annual comprehensive financial report. This report satisfies both accounting principles generally accepted in the United States of America and applicable legal requirements.



A Certificate of Achievement is valid for a period of one year only. We believe our current report continues to conform to the Certificate of Achievement Program's requirements, and we are submitting it to GFOA to determine its eligibility for another certificate.

The preparation of this report could not be accomplished without the professional, efficient services of the Town Finance Department staff. We would like to express our appreciation to all members of the staff, with special recognition for the assistance contributed by Finance Manager Melanie

Adams and Senior Deputy Treasurer Pauline Scholes. Due credit also should be given to the mayor and the council for their support in planning and conducting the operations of the town in a responsible and progressive manner.

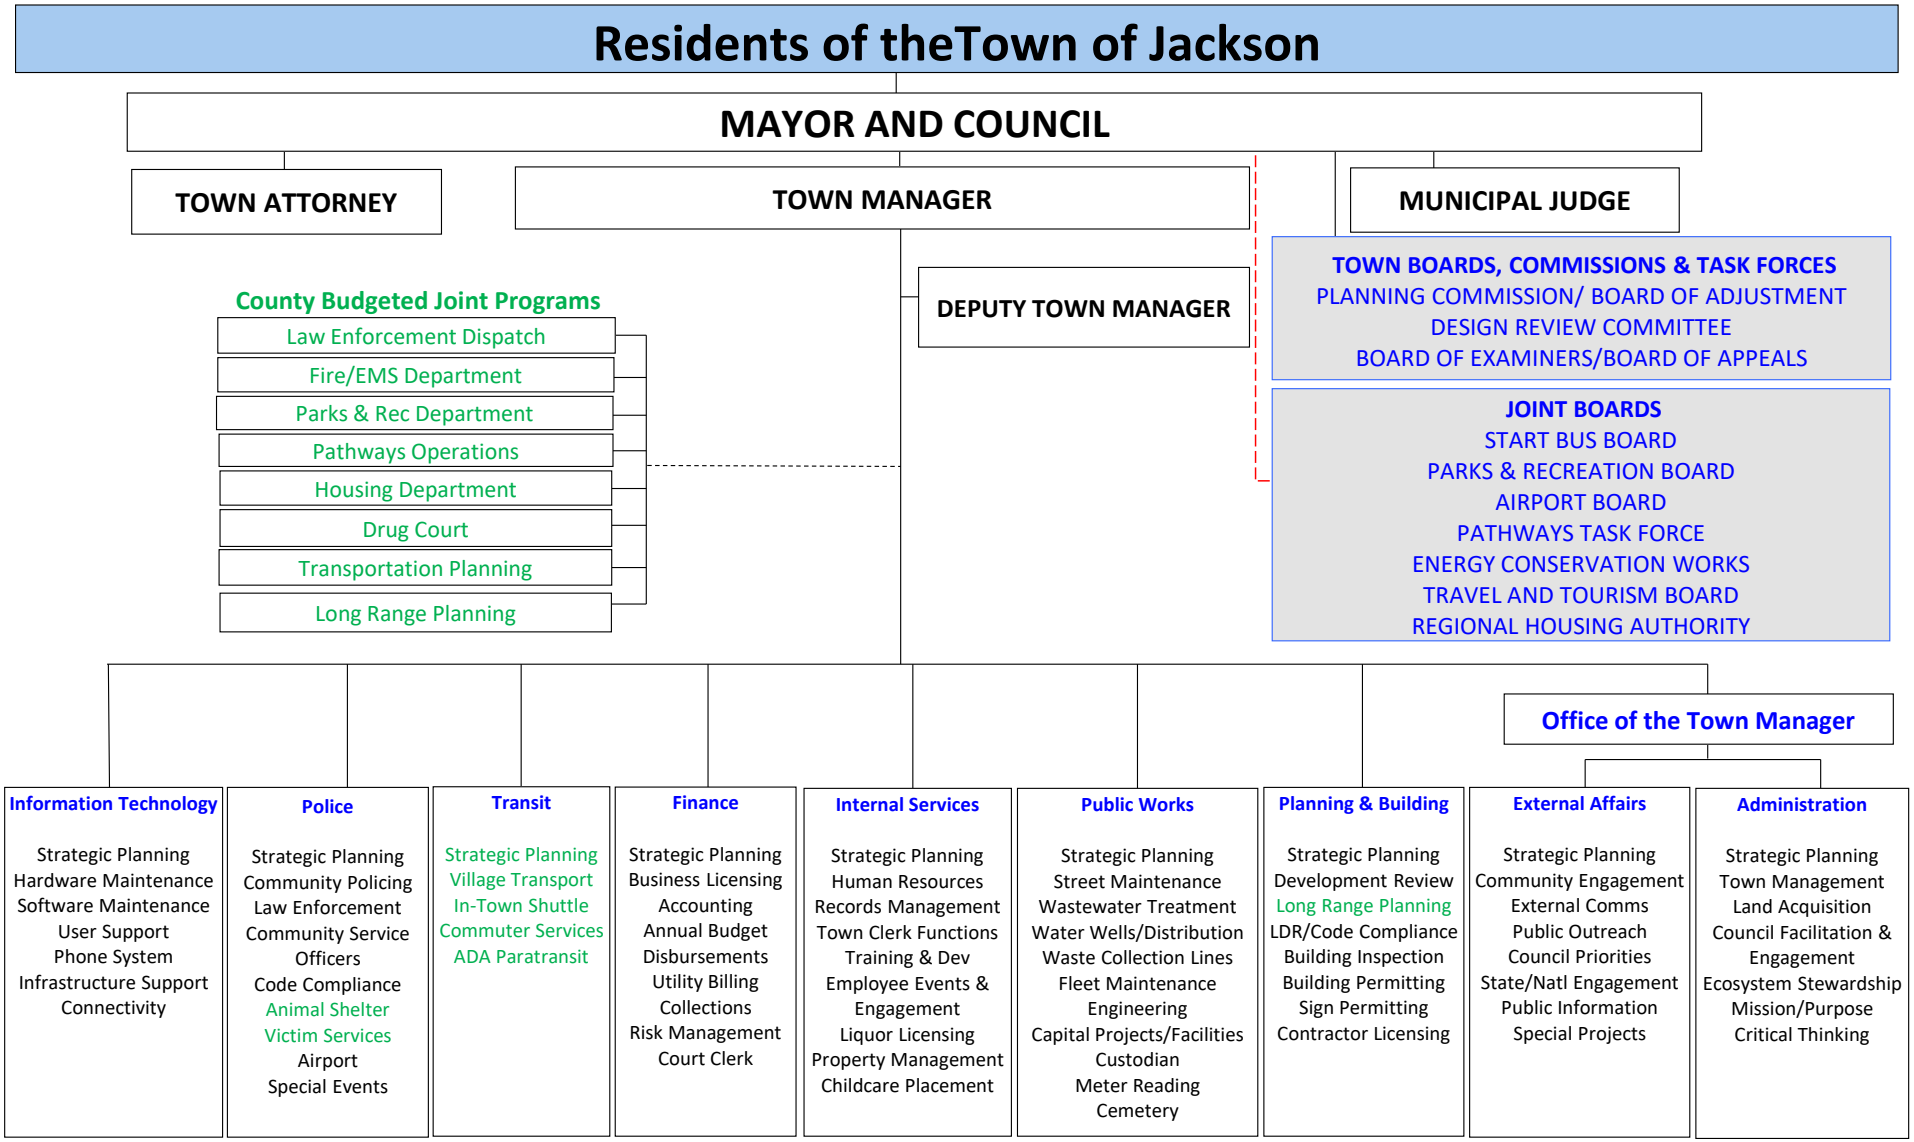
Presented to

Town of Jackson
Wyoming

For its Annual Comprehensive
Financial Report
For the Fiscal Year Ended

June 30, 2024

Christopher P. Morrill



Executive Director/CEO

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate for Excellence in Financial Reporting to the Town of Jackson, Wyoming for its annual comprehensive financial report for the fiscal year ended June 30, 2024.

In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized annual comprehensive financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe our current annual comprehensive financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

INDEPENDENT AUDITOR'S REPORT

To the Mayor and Town Council
Town of Jackson, Wyoming

Report on the Audit of the Financial Statements

Opinions

We have audited the financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town of Jackson, Wyoming (the Town), as of and for the year ended June 30, 2025, and the related notes to the financial statements, which collectively comprise the Town's basic financial statements as listed in the table of contents.

In our opinion, the accompanying financial statements present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Town, as of June 30, 2025, and the respective changes in financial position and, where applicable, cash flows thereof and the respective budgetary comparison for the general fund and START Bus System Fund for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards* (GAS), issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Town and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Independent Member of PrimeGlobal | The Association of Advisory and Accounting Firms

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Town's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS and GAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS and GAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Town's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Town's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control–related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, the schedule of proportionate share of the net pension liability, and the schedule of contributions, as listed in the table of contents, be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Town's basic financial statements. The supplementary information listed in the table of contents, including the accompanying schedule of expenditures of federal awards as required by *Title 2 U.S. Code of Federal Regulations (CFR) Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards*, is presented for additional analysis and is not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Information

Management is responsible for the other information included in the annual report. The other information comprises the introductory and statistical sections but does not include the financial statements and our auditor's report thereon. Our opinions on the financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated December 29, 2025 on our consideration of the Town's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Town's internal control over financial reporting and compliance.

Management's Discussion and Analysis

As management of the Town of Jackson (Town), we offer readers of the Town's basic financial statements this narrative overview and analysis of the financial activities of the Town for the fiscal year ended June 30, 2025. We encourage readers to consider the information presented here in conjunction with additional information that we have furnished in our letter of transmittal, which can be found on pages 1-4 of this report.

OVERVIEW OF THE BASIC FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the Town's basic financial statements. The Town's basic financial statements comprise three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

COMPONENTS OF THE ANNUAL FINANICAL REPORT

Government-wide financial statements. The government-wide financial statements are designed to provide readers with a broad overview of the Town of Jackson's finances, in a manner similar to a private-sector business.

The statement of net position presents information on all of the Town's assets and liabilities, with the difference between the two reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the Town is improving or deteriorating.

The statement of activities presents information showing how the Town's net position changed during the most recent fiscal year. All changes in net positions are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods.

Both of the government-wide financial statements distinguish functions of the Town of Jackson that are principally supported by taxes and intergovernmental revenues (governmental activities) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (business-type activities). The governmental activities of the Town include general government, public safety, public works, health and welfare, community development, transit, and recreation and culture. The business-type activities of the Town include water and sewage utilities.

The government-wide financial statements can be found on pages 23-24 of this report.

Fund financial statements. The fund financial statements focus on current available resources and are organized and operated on the basis of funds, each of which is defined as fiscal and accounting entity with a self-balancing set of accounts established for the purpose of carrying on specific or attaining certain objectives in accordance with special regulations, restriction or limitations. The Town, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the Town can be divided into two categories: governmental funds, and proprietary funds. The Town does not maintain any fiduciary funds.

Governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financial requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the Town's near term

financial decisions. Both the governmental fund balance sheet and governmental fund statement of revenues, expenditures, and change in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

The Town maintains four major governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the general fund, one special revenue fund, and two capital project funds, all of which are considered major funds. Data from eleven other governmental funds are combined into a single, aggregated presentation. Individual fund data for each of these non-major governmental funds is provided in the form of combining statements elsewhere in this report.

The Town adopts an annual appropriated budget for its general and special revenue funds. A budgetary comparison statement has been provided for those funds to demonstrate compliance with this budget.

The basic governmental fund financial statements can be found on pages 25-31 of this report.

Proprietary funds. The Town of Jackson maintains two different types of proprietary funds. Enterprise funds are used to report the same functions presented as business-type activities in the governmental-wide financial statements. The Town uses enterprise funds to account for its water and sewage operations. Internal service funds are accounting devices used to accumulate and allocate costs internally among the Town's various functions. The Town uses internal service funds to account for its fleet management, employee insurance (self insurance), information technology (IT), and central equipment operations. Because all of these services predominately benefit governmental rather than business-type functions, they have been included within governmental activities in the government-wide financial statements.

Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. The proprietary fund financial statements provide separate information for the water and sewage utilities. Both are considered major funds of the Town. Conversely, all internal service funds are combined into a single, aggregated presentation in the proprietary fund financial statements. Individual fund data for the internal service funds is provided in the form of combining statements elsewhere in this report.

The basic proprietary fund financial statements can be found on pages 32-36 of this report.

Fiduciary funds. Fiduciary funds are used to account for resources held for the benefit of parties outside of the government. Fiduciary funds are not reported in the governmental-wide financial statements because the resources of those funds are not available to support the Town of Jackson's own programs. The accounting used for fiduciary funds is much like that used for proprietary funds.

The Town of Jackson currently maintains no fiduciary funds.

Notes to the financial statements. The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

The notes to the financial statements can be found on pages 37-58 of this report.

Other information. In addition to the basic financial statements and accompanying notes, this report also presents required supplementary information concerning the Town's funding obligation related to participation in a defined benefit plan. Required supplementary information can be found on pages 59-62 of this report.

The combining statements referred to earlier in connection with non-major governmental funds and internal service funds can be found immediately following the required supplementary information.

Combining and individual fund statements can be found on pages 63-78.

FINANCIAL HIGHLIGHTS

- The Town's net position (assets and deferred outflows of resources minus liabilities and deferred inflows of resources) increased by 4.3% as a result of this year's operations. The net position of the Town's governmental activities increased $38,697,519 (18.2%) and net position of the Town's business-type activities increased $1,656,483 (3.4%).
- Overall, capital assets (net of accumulated depreciation and amortization) increased $37,662,307. Capital assets of governmental activities increased $35,510,631 (21%) and capital assets of business-type activities decreased $2,151,676 (6.4%). Significant governmental capital assets acquisitions included: $38,920,592 for Recreation Center Expansion, $759,868 for Core Services Maintenance Facility construction, $595,578 for a new fuel island, $440,859 for Gregory Lane improvements, and $1,461,018 in fleet equipment and vehicles. Significant business-type capital assets acquisitions included: $985,367 for South Millward water line, $1,895,173 for west Jackson water transmission construction, and $589,675 for Gregory Lane water and sewer infrastructure. The capital increases in the business-

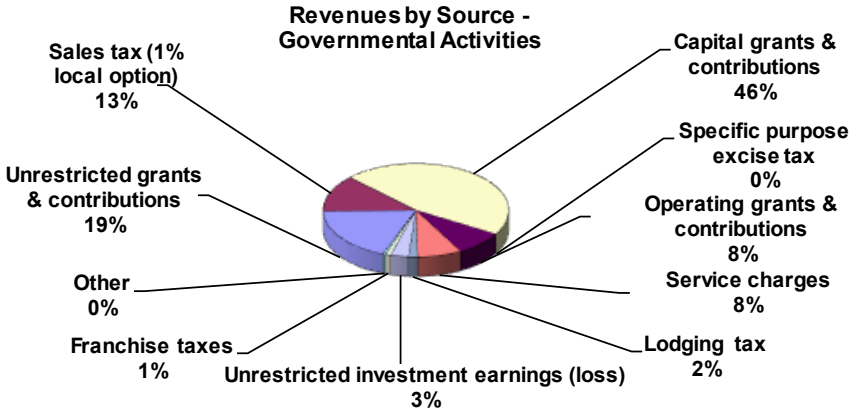
type activities are offset by $1,720,922 in current year depreciation and amortization.

- The Town's long-term liabilities increased $81,077 (1%). The increase was a result of a $82,793 decrease in notes payable, $450,205 decrease in net pension liability, $245,234 decrease in lease liabilities and $859,309 increase in subscription liability.
- At the close of the current fiscal year, the Town's governmental funds reported total ending fund balances of $58,389,615, an increase of $5,804,936 (11%). The increase is mainly due to a $2M increase in the 5th Cent Capital Projects Fund from unspent projects and a $1.25M grant in the Affordable Housing Fund.
- The General Fund's total fund balance decreased $336,764 (2%) to $18,735,664. The ending fund balance is 51% of General Fund expenditures. $2,716,152 of the fund balance is assigned to the FY2026 budget.

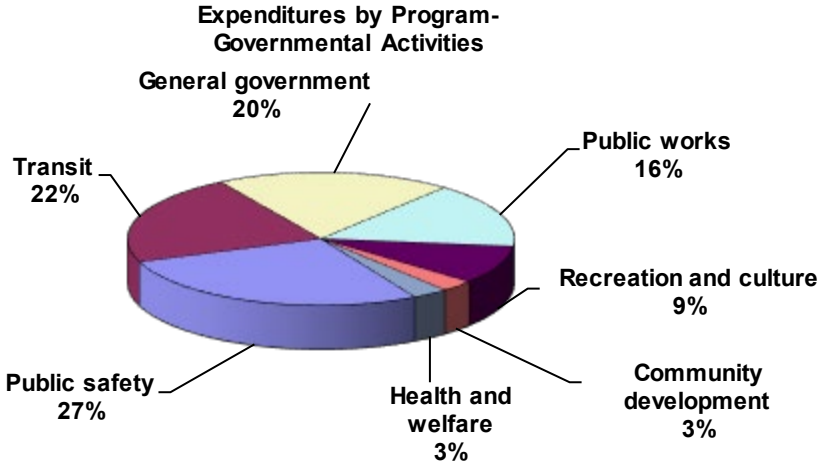
GOVERNMENT-WIDE FINANCIAL ANALYSIS

NET POSITION

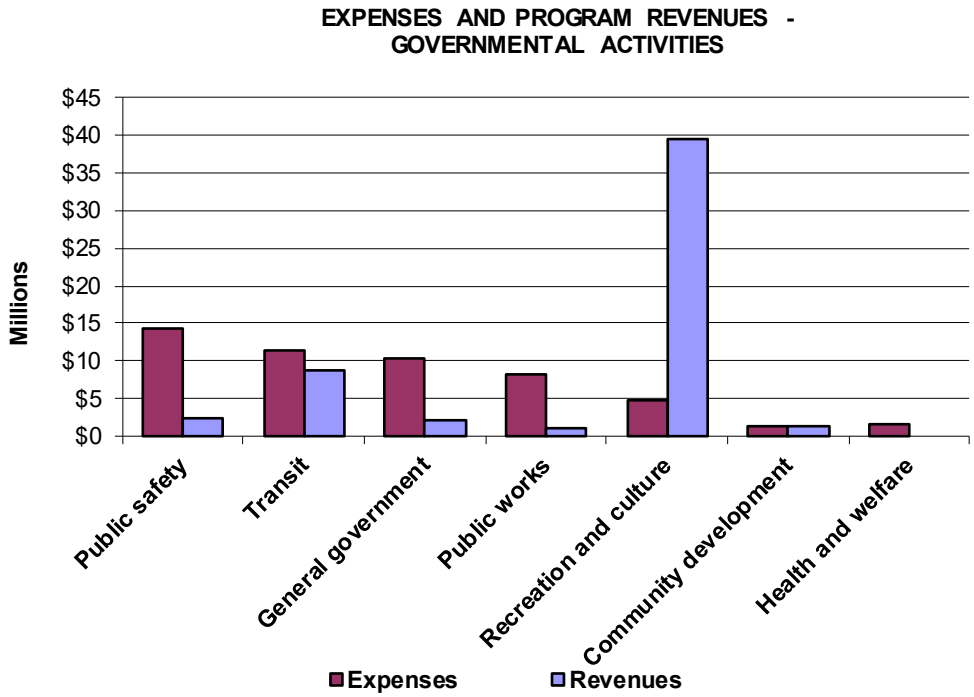
	Governmental Activities		Business-type Activities		Total Government	
	2025	2024	2025	2024	2025	2024
Current and other assets	$ 68,631,449	$ 69,386,271	$ 17,498,674	$ 17,308,131	$ 86,130,123	$ 86,694,402
Capital assets	202,827,940	167,317,309	36,011,272	33,859,596	238,839,212	201,176,905
Total assets	271,459,389	236,703,580	53,509,946	51,167,727	324,969,335	287,871,307
Deferred outflow of resources	3,009,405	3,984,952	311,186	321,953	3,320,591	4,306,905
Other liabilities	4,866,167	9,464,800	770,446	231,615	5,636,613	9,696,415
Long-term liabilities	12,058,389	12,002,546	2,161,840	2,136,606	14,220,229	14,139,152
Total Liabilities	16,924,556	21,467,346	2,932,286	2,368,221	19,856,842	23,835,567
Deferred inflow of resources	6,036,055	6,410,522	160,827	49,923	6,196,882	6,460,445
Net position:						
Net investment in capital assets	200,701,431	165,064,537	35,038,244	32,976,854	235,739,675	198,041,391
Restricted	18,396,536	17,981,418	-	-	18,396,536	17,981,418
Unrestricted	32,410,216	29,764,709	15,689,775	16,094,682	48,099,991	45,859,391
Total net position	$ 251,508,183	$ 212,810,664	$ 50,728,019	$ 49,071,536	$ 302,236,202	$ 261,882,200



By far the largest portion of the Town's net position (78%) reflects investments in capital assets (e.g. land, buildings, structures, systems, machinery, equipment, infrastructure, and intangible assets), net of any related debt used to acquire those assets that is still outstanding. The Town uses assets to provide services to citizens; consequently, these assets are not available for future spending. Although the Town's investment in capital assets is reported net of related debt, it should be noted that resources needed to repay this debt must be provided from other sources, since capital assets themselves cannot be used to liquidate these liabilities.



A small portion of the Town's net position (6%) represents resources that are subject to external restrictions on how they can be used. The $415,118



increase in governmental activities restricted net position is primarily due to restricted revenue increases in the Affordable Housing Fund and Lodging Tax Fund that will be allocated in subsequent years. The remaining unrestricted net position of $48,099,991 may be used to meet one-time obligations to citizens and creditors. Of the unrestricted net position, $15,689,775 (33%) is attributable to business-type activities. The unrestricted governmental activities net position increased $2,645,508 (9%), while business-type activities unrestricted net position decreased $404,907 (2.5%). The government-wide total unrestricted net position increase of $2,240,600 (4.7%) is primarily due to incomplete capital projects in the 5th Cent Capital Projects Fund. Business-type capital assets increased by $2,151,676 (6.4%) due to capital asset acquisitions exceeding accumulated depreciation increase.

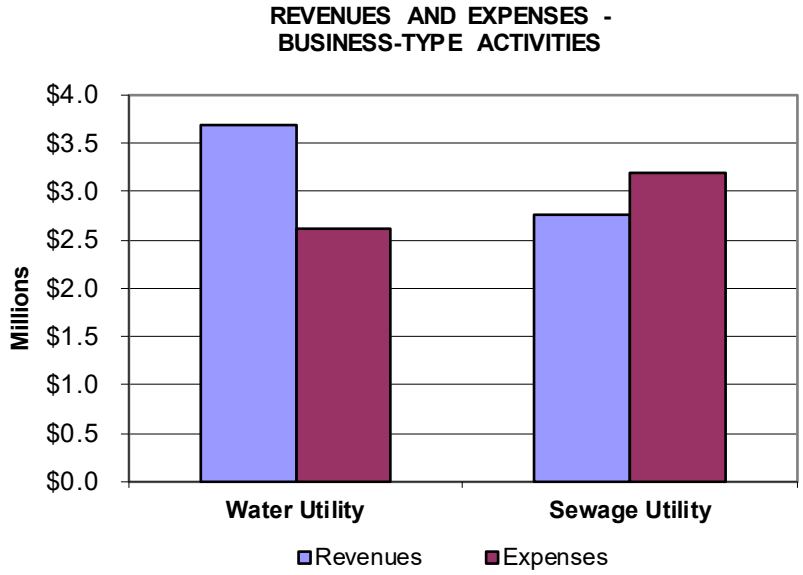
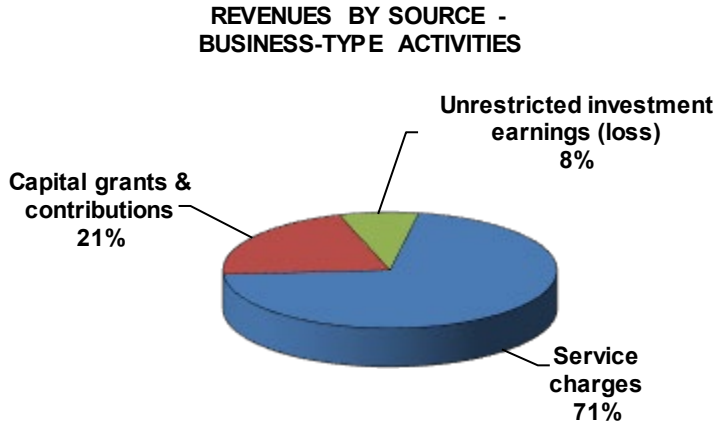
Governmental Activities. The most significant revenue (46%) of the governmental activities is $41.0M in capital grants and contributions. The majority of this is due to a $38M contribution from Teton County for the Recreation Center Expansion. The unrestricted grants and contributions makes up the second highest source of revenue ($16.7M or 19%) in the governmental activities. The majority of the revenue in the state-shared category consists of the 4% state-shared sales and use tax ($13.9M) followed by federal mineral royalties ($.6M), gasoline tax ($.5M), various Teton County reimbursements ($.5M), and severance tax ($.4M). The 1% local option (5th cent) sales tax revenue make up the third highest source of revenue ($11.4M or 13%) in the governmental activities. Revenue generated from the 5th cent sales tax is split evenly between the general fund and capital projects fund.

Public Safety (police, fire/EMS, building inspector, victim services, animal shelter and dispatch) expenses (27%) was the most significant followed by Transit (22%), General Government (20%), Public Works (16%), Recreation and Culture (9%), Community Development (3%), and Health and Welfare (3%). Included in



these amounts is $7,547,509 of depreciation and amortization expense, which is 16% of the total expenses for governmental activities.



Governmental revenues increased $27,891,502 (45%), in the current year, with the most significant portion of the increase attributable to higher capital grants and contributions ($31,082,978) and unrestricted grants and contributions ($467,808). Capital grants were higher due to $38M received from Teton County towards completion of the Recreation Center Expansion. Unrestricted grants were higher due to an increase in sales tax revenues.

Governmental activities expenses decreased $1,972,198 (4%) in the current year. The most significant changes in program expenses were as follows:

- General government expenses increased $878,423 (9%). The majority of the increase is due to personnel wage and benefit increases.
- Public safety expenses increased $2,527,246 (22%). The increase is related to personnel wage and benefit increases, pension expense being higher than prior year and contributions to Teton County Fire/EMS and radio system increase.
- Public works expenses increased $1,693,995 (26%). The increase is related to increases in personnel wage and benefit and street maintenance.
- Health & Welfare expenses increased $127,136 (9%) to meet request increases from local non-profits.
- Community development decreased $1,618,658 (53%) due to decreased contributions to affordable housing projects from the prior year.
- Transit operating expenses increased $310,669 (3%). The increase is related to personnel wage and benefit increases and increased service levels.
- Recreation and culture expenses decreased $5,902,758 (55%), primarily due to a decrease in the Town share of the Recreation Center Expansion.
- Interest expense increased $11,749 (15%) due to GASB 87 lease and GASB 96 subscription arrangement accounting.

There were no other programs with significant or unusual changes.

Business-type activities. Business-type activities increased the Town's net position by $1,656,483 (3%). In the prior year, the business-type activities increased the Town's net position by $2,060,040 (4%).

Key elements of the change are as follows:

Water Fund operating revenues increased $810,926 (28.3%), which is reflective of increased irrigation volume. Sewage Fund operating revenues increased $131,399 (5.0%), mainly due to increased connections and tourism.

Capital grants and contributions totaled $1,923,435, 18% lower than the prior year total of $2,356,617. Capital grants and contributions include capacity and tap fees charged to new customers and intergovernmental grants for capital improvements. Capacity and tap fees decreased due to a few large developments in the prior year. Depreciation and amortization expenses in the water and sewage utilities for fiscal year 2025 were $738,482 and $982,440, respectively.

FINANCIAL ANALYSIS OF THE TOWN'S FUNDS

Governmental funds. The focus of the Town's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the Town's financing requirements. In particular, spendable fund balances may serve as a useful measure of a government's net resources available for expenditure at the end of the fiscal year.

At June 30, 2025, the Town's governmental funds reported total ending fund balances of $58,389,615, an increase of $5,804,936 (11%) when compared with the prior year. Nearly 32% or $18,396,536 of the total ending fund balances constituted restricted fund balances, which are considered unavailable for appropriation for general operations. The prior year restricted fund balances totaled $17,981,418. The increase is primarily due to restricted revenue increases in the Affordable Housing Fund and Lodging Tax Fund that will be allocated in subsequent years

At the end of the fiscal year, the General Fund reported a fund balance of $18,735,664 decreasing $336,764 (2%) from the prior year. General Fund operating revenues were $602,475 (2%) more than the prior fiscal year and operating expenditures increased by $3,274,192 (13%). Transfers in increased by $303,213 (16%), primarily due to indirect cost allocations for staff. Transfers out decreased by $1,686,025 (18%). This is due to a decrease in one-time transfers to the START Fund for bus purchases from the prior year.

General Fund expenditures increased $3,274,192 (13%). Salaries and salary related expenditures (Wyoming Retirement, Workers' Compensation, health insurance, etc.) increased $1,712,650 (14%) for all functions. Increase is primarily due to a 7.1% wage increase, Sworn Officer wage increase and $865,325 increase in Teton County joint departments.

The START Bus System Fund net change in fund balance was positive by $1,082,839 (34%). Total expenditures were $8,878,103. Operating expenditures increased $30,096, mainly due to labor increases. There was $90,713 in capital outlays during the fiscal year related to improving the radio system. Intergovernmental revenues decreased to $6,302,062 from the prior year total of $10,885,982. This is due to US Department of Transportation grant matches of approximately 80% for prior year bus purchases. Transit fares increased $63,862 from the prior year, the majority of which is due to the airport shuttle service. The Town contributed $1,154,767 and Teton County contributed $1,363,822 for a total of $2,518,589 to the fund in fiscal year 2025.

The 5th Cent Capital Project Fund saw its fund balance increase $2,003,192 (30%) to $8,650,510. The General Fund transferred $5,715,283 in 5th Cent sales tax to the fund in FY2025, a decrease of $719,555 from FY2024. This is due to one-time transfers to the Capital Projects Fund to fund multiple, large capital projects in FY2024.

The 2019 SPET Fund saw its fund balance increase $46,971 to $10,842,336. This is due to interest revenue exceeding construction expenditures at the Core Services Maintenance Facility and Gregory Lane projects. This fund has received all $29,000,000 in SPET revenues. The fund should decrease in future years as project expenditures increase.

Proprietary funds. The proprietary funds financial statements provide the same type of information found in the government-wide financial statements, but in greater detail.

The water utility's net position increased $2,108,053 (10%) from the prior fiscal year. In 2025, operating revenues increased $810,926 (28%). Capital contributions decreased to $152,520 from $646,373 in the previous year (76%). Operating expenses increased $200,798 (9%) to $2,507,511. The 2025 operating income of $1,172,718 includes $738,482 in depreciation and amortization.

The sewage utility's net position decreased $317,678 (1%) in the fiscal year ending June 30, 2025. Sewage utility operating revenues increased $131,399 (5%) to $2,751,882 and the utility's operating expenses increased $301,578 (11%) to $3,043,327. Capital contributions decreased $1,224,405 (72%) from

$1,710,244 to $485,839. The $291,445 operating loss includes $982,440 in depreciation and amortization.

Other factors of the changes in income from operations have previously been discussed in the government-wide financial analysis of business-type activities.

GENERAL FUND BUDGETARY HIGHLIGHTS

The differences between the 2025 original budget and the final amended budget are adopted by council resolution throughout the year.

General Fund revenues totaled $34,343,384 and exceeded the final budget by $1,372,025 (4%). General taxes and intergovernmental revenues were $317,628 (3%) and $184,602 (1%) higher than budget, respectively. This is due to sales tax related revenues which were budgeted to increase 3% over FY2024 estimates. However, this major revenue source increased 2%. This increase is attributable to tourism and sales tax generating transactions increasing over FY2024.

General Fund operating expenditures totaled $29,409,863. This was $1,778,964 (6%) less than the final amended budget and $672,200 (2%) less than the adopted budget. Including transfers out, supplemental appropriations from budget amending Council actions increased the original budget by $1,400,789 (4%). The majority of this increase was for Sworn Officer wage increase and a decrease in personnel vacancies. In fiscal year 2025, no divisions finished the year over budget.

The General Fund year end fund balances since 2016 are as follows:

Year	Amount	Year	Amount
2016	$ 7,484,300	2021	$ 18,020,470
2017	7,650,890	2022	24,879,725
2018	8,329,716	2023	18,726,713
2019	8,683,289	2024	19,072,428
2020	12,158,856	2025	18,735,664

Capital assets. The Town's investment in capital assets for its governmental and business-type activities at June 30, 2025 totaled $238,839,212 (net of accumulated depreciation and amortization). This investment in capital assets included land, construction in progress, structures, systems, machinery and equipment, intangible assets, right to use assets and infrastructure.

Major governmental activities capital assets include: $38,920,592 for Recreation Center Expansion, $759,868 for Core Services Maintenance Facility construction, $595,578 for a new fuel island, $440,859 for Gregory Lane improvements, and $1,461,018 in fleet equipment and vehicles. The total government-wide capital asset increase over the prior fiscal year is

approximately $37,662,307; governmental activities increased 21% and business-type activities increased 6%.

Additional information on the Town's capital assets can be found in the notes to the financial statements on pages 48-49.

LONG-TERM LIABILITIES

Long-term liabilities. The Town's outstanding long-term liabilities - including notes payable, accrued interest payable, and net pension liability - totaled $14,239,798 at June 30, 2025. Governmental long-term and business-type long-term liabilities increased primarily due to subscription liability increase.

Additional information on the Town's long-term liabilities can be found in the notes to the financial statements on pages 51-57 of this report.

ECONOMIC FACTORS AND NEXT YEAR'S BUDGETS AND RATES

- The unemployment rate for the Teton County, Wyoming area for June 30, 2025 was 2.3%, which is below the state average (3.3%) and below the national average (4.1%).
- In this budget, the Town continues to focus on staff retention and maintaining standard departmental budgets to provide expected levels of service while considering prudent requests for modest increases focused on staff retention and matching service levels with capacity.
- To continue to be a resilient community, we will need to preserve and maintain General Fund Reserves to have the resources to adapt to uncertain times ahead. Looking ahead, recurring expenses are expected to exceed recurring revenues. We must continue evaluating our revenue streams and expenditures, to determine how to ensure a balanced budget into the future.
- The Town will need to prioritize our core services, capital projects and consider reducing funding to the areas of lower priority and/or work to consider a new funding source(s) to maintain current Town program services and capital improvement projects. As our community changes, various core services continue to see increased need year-over-year. The Town simply does not have the capacity to absorb such continuous growth without increasing revenue or reducing existing program services and capital projects.

REQUESTS FOR INFORMATION

This financial report is designed to provide a general overview of the Town's finances for all those interested in governmental finance. Questions concerning any information in the report or requests for additional information should be addressed to Town of Jackson, Finance Department, P.O. Box 1687, Jackson, WY 83001.
